#### CHRONICLF & COMMENT

# GREETINGS

The CALCUTTA MUNICIPAL GAZETTE offers its NEW YEAR Greetings to its readers and well-wishers in Calcutta and throughout the country on its reappearance after the holidays.

# WHOSE IS THE FAULT?

It is astonishing that a house could exist in Calcutta in such a bad and dilapidated condition that due to the passage of several lorries, a huge chunk of its cornice could fall down, killing one passer-by outright and severely injuring two others. It is described as a "rented" house, and one wonders that the tenants could continue to live in it without complaining about its dilapidated state. Or perhaps they did complain to the landlord, who did not care to spend money on repairs. Whose fault is it, then, that one person was killed and two injured?

We hope that the authorities of the Corporation of Calcutta and Calcutta Police will have an enquiry made into this matter. Incidentally, it shows what a congested state Calcutta has come to, that people can go on living—or rather existing—even in an unsafe building where life is in risk.

# "SOUTH AFRICAN TREASURER"

We have been informed that the "South African Treasurer," the official organ of the Institute of Municipal Treasurers and Accountants, South Africa, will be soon transferred from theseity of Durban to Johannesburg. The change of place of the editorial office is coincident with the change of the Honorary Editor. Mr. D. Heron, M.Com., A. M.T.A. (South Africa), the present Honorary

Editor, is relinquishing his position in favour of Mr. E. M. Penrose, City Treasurers' Department, Johannesburg.

Civic journals are generally concerned with the public utility services that a civic institution or a municipality has usually the charge of. But the one, under review, though a civic journal, maintains a somewhat different feature and is no less important than a journal of the first type.

Municipal treasurers and accountants, and with them, municipal collectors and license officers, are most useful adjuncts of a civic institution. They constitute the financial aspect of social service, and it is desired that such officers of the municipalities must confer, and possess a journal like the South African Treasurer.

# "ARYAN PATH"

We are in receipt of the January (1950) Number of the Aryan Path. It is the first number of the twenty-first volume of the journal, containing as usual, several important and thought-provoking articles, and reviews of many outstanding new books. Every issue of this journal offers 48 pages of the most substantial, authoritative and stimulating reading material including a number of very striking and significant editorials, discussing with unprejudiced frankness the vital problems of the day from the universal and spiritual point of view.

The Aryan Path has been endeavouring for twenty years now to uphold the unchanging values of the spirit in a world of prejudice and of change, to bring together the peoples of the world in mutual sympathy and appreciation, and especially to interpret the East to the West and vice-versa.

Today, when there is a decline in our cultural and social ideals, the utility of the Aryan Pub. will be more than ever appreciated. Although this journal reaches the intellectual stratum in the society, its effect surely percolates through this stratum and reaches even the lowest.

# SPECIAL ARTICLES

# Air Service In India Linking Of The Important Cities

By M. K. SHN, M.A.

THE pioneering efforts of Messrs. Tata & Sons have been mainly responsible for the beginning of civil aviation in India. However, immediately after the first World War it became evident that India possessed ideal meteorological and geographical conditions suitable for the development of civil aviation. India has since then formed the central spot through which the European powers link their colonial empires in the East.

The International Airways, like the late Imperial Airways, came first in the field. During the early part of 1983 Mr. J. R. D. Tata, who had been dreaming to put India on the aviation transport map and who had been, being himself a pilot, indefatigably working towards this end, started, directly sponsored by the house of the Tatas, a Mail Service, which linked the western keyboard of India. The first mail was carried from Bombay to Karachi and Bombay to Madras. From a small beginning the Tatas have gradually built up the present huge organization of "Air India" and the "Air India International."

At Delhi another small company was started, the present Indian National Airways under the management of Messrs. Govan Brothers Ltd. about the same time. This company has also worked its way to the present success.

Prior to the second World War the above two organizations were running the main air services of India from Karachi to Delhi and from Bombay to Karachi and Madras and later on to Colombo.

The very nature of civil air transport is such that it can only link large cities and towns and hence so unlike the surface transport systems.

#### POST-WAR CIVIL AVIATION

Sir Frederick Tymms, the then Director General of Civil Aviation in India, first laid down the post-war plan for the development of civil aviation in India. His plan was to allow four zonal air companies all the available and potential air routes of the country. But permission had to be granted to more companies than what the potential air traffic and route factors warranted. The result is the present crisis in the air. Some air companies have gone into liquidation and probably more will follow suit. Only three or four companies are expected to survive this veritable catastrophe.

The best plan to develop civil aviation in this country would be, first, to limit the number of operators, so that only the competent and financially sound companies may be left in the field: secondly, to get the services of experts from outside.

The British Government of India lead some post-war plans for civil aviation and in these plans they had connected all the important cities of India. partitlearly the biguer towns and commercial centres. But the partition of the country in the wake of Independence practically shelved those plans, and till now the Government of the Indian Union.

facing various urgent problems have not found time and opportunity to make out new plans suitable for the present.

# LESSONS FROM OTHER COUNTRIES

The Government of the Indian Union have now to take lessons from other countries. A proper survey of all potential traffic should be made in connection with almost all the cities and bigger towns in India. Then, it may be useful to construct new aerodromes and put to proper use the old ones. It is possible to surmise that the linking of provincial capitals with all the district headquarters holds fair possibility of success for civil air transport in India and it will also facilitate utilisation of suitable smaller type of aircraft and development of airmindedness uniformly all over the country.

The present mode of urbanisation will surely have its own course. It will, firstly, promote airmindedness among the people more and more: secondly, it will tend to develop civil air transport system on a universal and uniform basis over the length and breadth of the country. The development of civil aviation will also help proper defence of the country in case of national emergencies.

To-day, the commercial classes, only those who are very rich, and the officials of the various companies and of the Government as well and army officers, travel by air. To create a common urge for air travel the rate structure should be within the economic range of the common man. Unless the fares come down the volume of traffic will not improve.

# EX COUNCILLORS MEET AND DISCUSS

A meeting of former Councillors and Aldermen of the Calcutta Corporation was held at 31, Linton Street, Beniapukur, on the 29th December last. A proposal for early termination of the period of supersession and holding of the general election of the Calcutta Corporation is reported to have been discussed at the meeting. After preliminary discussions the meeting adjourned till the 7th January.

#### ADULTERATION OF MUSTARD OIL

#### PROPRIETOR AND SELLER OF FIRM FINED

About 530 maunds of mustard oil was seized by the Health Department of Calcutta Corporation in July, 1949. As on examination this quantity of mustard oil showed presence of Argemone oil, a case was instituted against the proprietor and seller of the firm, Messrs. Hitsaran & Co. The Municipal Magistrate, Shri P. Basu on Tuesday, the 3rd January, delivered judgment in this case and fined the proprietor and the seller of the firm Rs. 250 and Rs. 59 respectively. The aforesaid quantity of oil was ordered to destroyed in the presence of the District Health Officer.

Dr. S. B. Nuth, Food Inspector, District I, detected this case.

MOSCOW, NEW APARTMENT HOUSE ON CHKALOV STREET

Photo: N. Kolli

# Moscow in Construction

FVERY day thousands of bricklayers, plasterers, finishers take up their places on the construction sites on Gorky, Peschanaya and Sadovaya streets, on the Leninskie Gory (Lenin Hills), on the Mozhaisk Chaussee and on many other thoroughfares of Moscow.

NEW-BUILT APARTMENT HOUSE ON SADOVO-KARETNAYA STREET

Photo: Brodsky

Here is Peschanaya Street in the neighbourhood of the "Sokol" Underground station. where a whole block of tall apartment houses is going up. Some of the houses are completely finished and ready for occupancy, others are being roofed, while still others are "gaining height."

On Leningrad Chaussee interior decoration work is drawing to a close in a new nine-storey apartment house. In a few days work will begin on the exterior finish of its main facade which will be handsomely done in stucco.

# House For Working People

A huge eight-storey house has gone up on Smolenskaya Ploshchad (Smolensk Square). Stretching for 200 metres along the sidewalk, the four sections of this house have 190 apartments where all the latest conveniences have been provided for the working people: luxuriously furnished bathrooms, well equipped kitchens with gas stoves, electric refrigerators, incinerator service, water heaters, etc.

Its ground floor is given to a public library, a polyclinic and a post office, while in the basement a spacious garage is being fixed up for the tenants' cars. The house will be ready for occupancy this year.

Many new buildings are being erected on Mozhaisk Chaussee but most prominent among them is a tall apartment house crowned with two lofty towers and extending for nearly 800 metres along the street. Its volume exceeds 140,000 cubic metres; it has some 18,000 square metres of dwelling floor space and took over 18,000,000 bricks to erect it. These figures give an idea of its size and the labour invested in its construction.

# CONSTRUCTION OF TALL BUILDINGS

The capital will be adorned by tall buildings the construction of which has already begun. There are under construction also new schools, a notel, hospitals, an extensive university settlement on the Leninskie Gory, and a multitude of new apartment houses with all modern conveniences.

Moscow has the most beautiful and most convenient Underground in the world. On October 1,

a new Underground line will open for traffic—a large section of the Big Circuit, running from the Kursk railway terminus to the Gorky Park of Culture and Rest. On the new line the rails are now being laid. All its six Underground stations are being richly ornamented. Thus, the Kurskaya Station, for instance, is being faced with Ural marble and its arched ceiling will be supported by 46 massive metal columns.

# MOSCOW BEING BEAUTIFIED

The Soviet capital is becoming more beautiful with every year. Already in 1940 Moscow had five times more schools than before the Revolution and eight times, more polyclinics and dispensaries. In the course of the Stalin Five-Year Plans, Moscow's housing resources have increased one and a half times with the construction of 6,000,000 square metres of housing floor space.

Leningrad Chaussee, Taganskaya, Vostochanava and a number of other streets are being repayed with smoothly polished concrete. Hundreds of kilometres of heat and gas tubing are being laid.

When the war broke out bricklayer Ivan Shirkov went to the front. On the march with rifle in hand, or when resting after a strenuous advance he always dreamt of the busy construction time that would come, a time that would assuredly come after victory. He dreamt practically, realistically. On scraps of newspaper he drew sketches of building machines and tools, visualizing how these machines and implements would accelerate and lighten the work of the bricklayers. When victory came his dream came true. His frontline sketches have been embodied into remarkable machines, making for a substantial advancement of the building workers' labour productivity, greatly accelerating construction work and reducing its cost.

At the end of war he also proved victorious on the construction site.

When many years ago bricklayer Shavlyugin for the first time came to the building trade, he laid 300 to 500 bricks per shift. And now using Shavlyugin's new methods masons lay 8,000 to 10,000 bricks with less effort.

The building sites of Moscow are schools and universities for the building workers. With the rising of the buildings they erect, their know-how and skill advance.—Tass.

# HEALTH & HYGIENE

# Combating Cholera

# Work to Begin Under Control of World Health Organization

MEASURES to combat cholera were discussed at a joint meeting held towards the middle of November last at New Delhi of the Cholera Advisory Committee of the Indian Research Fund Association and a group of foreign cholera experts, on a tour of the country.

The foreign experts were sent by the Office of the Internatoinale d' Hygiene Publique of Paris and the W. H. O. The group, which had arrived in India on October 31, toured Bombay, Madras, Trichinopoly and Calcutta and seen research work on cholera being conducted in institutes there.

The meeting was inaugurated by India's Health Minister, Rajkumari Amrit Kaur. It was presided over by Dr. Raja, Director-General of Health Services of the Government of India, and attended by Dr. C. G. Pandit, Secretary of the Indian Research Fund Association.

#### WELCOME TO EXPERTS

Welcoming the foreign experts. Rajkumari Amrit Kaur said that "India is always willing and anxious to assist in the development of international co-operation in the vital sphere of health on as wide a basis as possible." She said that in regard to cholera, India at the request of the Office Internationale, undertook an extended series of studies covering a period of seven or eight years, from 1984 onwards.

Declaring that all the major laboratories in India participated in the investigations and that the work accomplished during these years had helped to throw light on a number of obscure problems in relation to cholers, the Health Minister said:

"We are indeed happy that the invitation that came to our Indian Research Fund Association last year jointly from the W. H. O. and the Office Internationale, to start further

studies on a number of subjects considered desirable by the Cholera Expert Committee, has resulted in the holding of the present session of that Committee in our capital city. This is additional evidence of international recognition of India's past work in this field and I need hardly assure you of India's desire to contribute, in an increasing measure, her share to the study of health problems of common interest to all nations."

# ERADICATIVE MEASURES

Apart from discussion on measures necessary for complete eradication of cholera from "endemic" areas (where the occurence of the disease is frequent) the conference will be discussing standard procedure for the diagnosis of cholera, and results of laboratory studies on the disease, and will review the work on "cholera toxin" which makes people immune to the disease

The annual figures of incidence of cholera, according to the Bhore Report, varies from about 1.50,000 to 4,50,000 in the Indian subcontinent.

The international cholera experts attending the third session of the Joint Study Group on cholera recommended active field work in cholera control in the Cauvery delta region, Madras, where the population suffers the ravages of the disease throughout the year.

The work will be begun next year by a W. H. O. cholera control team.

# JOINT-STUDY GROUP

The Joint Study Group, which met for a two-day session also recommended the establishment of a second W. H. O. cholera control team in a similar deltaic region in East Bengal. It laid down the lines of further research to be undertaken into the factors

responsible for the persistence of cholers outside the "cholers season" in so-called endemic areas.

The experts were unanimous in praising certain investigations into the endemicity, or persistent presence, of chelera at present being carried out by the Indian Research · Fund Association following suggestions made by the second session of the Joint Cholera Study Group in Paris in 1948.

While visiting Tanjore District in the Cauvery delta, the Study Group was able to see cholera patients in their homes and discuss local difficulties.

The experts also visited laboratories and hospitals in Bombay, Madras. Trichinopoly and Calcutta. Later, they attended meetings of the Cholera Advisory Committee of the IRFA in New Delhi.

After comparison of reports of studies undertaken in different districts where cholera seems to be constantly present, the Group noted that such endemic areas occurred most in river deltas with high population density and high humidity and where there was abundance of uncontrolled water supplies with high organic content and some salinity. Both the Cauvery delta in Madras province and the Ganges delta in East Bengal, according to the Group, conform to this pattern.

#### BEWARE OF SMALL POX

Dr. M. U. Ahmad, Health Officer, Calcutta Corporation, asks for the co-operation of the public in his department's vaccination drive against small-pox, as this is the usual season for outbreak of the disease. The Corporation has already appointed a large number of extra vaccinators, besides its permanent staff. He requests the authorities in charge of schools and various firms to see that people under their care are immediately vaccinated. They are advised to get in touch with their respective district health officers in this connection.

GET YOURSELF VACCINATED

# Immunization

The experts reiterated their opinion that cholera immunization was of value as a quarantine measure provided the vaccine and the mode of vaccination conformed to standards laid down by W. H. O. They also recommended that research be carried out on the immunity of the population in endemic areas.

A standard method for the laboratory diagnosis of cholera based on recent research work carried out by Indian scientists was formally approved by the Group.

The recommendations of the Group will be submitted to the W. H. O. Experts Committee on Epidemiology and Quarantine.

The meeting was presided over by Dr. C. G. Pandit, Secretary, IRFA.

Those who attended were: M. Vaucel, Director, Public Health Department, Ministry for French Overseas Territories: Lt.-Col. Jaffar, Director-Genl. of Health, Government of Pakistan, Dr. M. Gaud, Director of the Office Internationale d'Hygiene Publique; Dr. P. M. Kaul, in charge of cholera studies, W. H. O. Geneva; Sir Aly T. Shousha Pasha, Director, W. H. O. Regional Office for Eastern Mediterranean; Dr. C. Mani, W. H. O. Regional Director for South East Asia; and Dr. Pollitzer, W. H. O. Epidemiologist.

# CALCUTTA NEWS & VIEWS

RECENT DISTURBANCES IN THE CITY was referred to by His Excellency Dr. Kailash Nath Katju. Governor of West Bengal, while delivering his presidential address at the annual function in Dakhineswar on Sunday, the 1st January. 1950, and he regretted that in the land of Sree Ramkrishna, a section of people indulged in violent activities. Throwing bombs and burning buses and tram cars made the life of innocent peace-loving citizens miserable, the Governor pointed out.

Three prisoners were killed and two wounded in a prison van near Dum Dum, Calcutta, in the afternoon of the 27th December last when an armed constable of a party of five, escorting the prisoners, fired after a prisoner had made a rifle attack on the guards, severely wounding one of them. The rifle had been snatched away from one of the nuwary guards.

A heavy bom's attack was made on a police party in Dalhousie Square soon after mid-day on the 29th December last. Many, who were nearest the explosions, stampeded and rushed into the G. P. O. and nearby buildings.

The attack was made on the police after they had stopped a procession. Nine policemen were wounded, one of them seriously. At least eight hombs are reported to have been thrown About ten people including some women were arrested.

The police were again the target of a bomb attack in Beliaghata in the night of the 30th December last after a Communist-sponsored meeting called there earlier in the evening had been abandoned due to police precautions.

Four police personnel and one bystander were wounded in a bomb attack, while a procession was stopped at the junction of Circular Road and Dhurumtolla Street.

There were four cracker explosions in the city on Sunday the 1st January. No one was injured. One of the crackers was thrown at a police picket in Bankim Chatterjee Street, two exploded in Sradhananda Park and another in a ferry steamer ghat on Strand Road.

Two bombs were found in a house in the Entally area and the police made two arrests.

About 406 crackers were reported to have been seized by the police when they searched a house in South Calcutta in the morning of Monday, the 2nd January.

Four armed men, one of whom had a Sten gun, another a revolver and the other two daggers, raided the Amherst Street Post Office in north Calcutta in the morning of Tuesday, the 3rd January and escaped in a taxi with Rs. 55,000.

An Assistant Commissioner of Police was wounded when a bomb attack was made on a police party in Bowbazar in the afternoon of Wednesday, the 4th January. A rickshaw puller was also hit by bomb splinters.

After a meeting held at the University lawn under the auspices of the Bengal Provincial Students' Federation and Mahila Atma Raksha Samity, over 100 people, including about 15 women, marched in procession. Passing College Street, the procession turned into Bowbasar Street when a bomb was thrown at a police truck following them. The vehicle was damaged.

FIRST INTER-UNIVERSITY ORIENTAL MUSIC COMPETITION, organised by Calcutta University Institute in the evening of the 30th December last, was inaugurated by His Excellency the Governor of West Bengal.

Fifteen competitors including five women from three different universities. Agra, Pathas and Calcutta participated in the competition. The competition was divided into vocal and instrumental music sections.

Inaugurating the competition, Dr. Katju said that he

in Director for South East Asia; and Dr. Inaugurating the competition, Dr. Katju said that he er, W. H. O. Epidemiologist. heartily endorsed the move for an Inter-University competition

en music because it would greatly help in bringing together students of different provinces. Now-a-days there was so much talk of provincialism and local prejudices. They had to take some concrete and positive measures to counteract this provincial feeling.

"MERGER OF COOCH BEHAR" was the subject matter of a broadcast talk given by His Excellency Dr. Katju from the Calcutta Station of the All-India Radio in the night of Sunday, the lat January. In the course of his talk His Excellency said:

"The ties which bind the people of Cooch Behar and West Bengal are intimate and ancient, a common religion, a common language and a common tradition and long neighbourly relations; and experience has shown that these silken ties are the strongest which bind people together. It is true that Cooch Behar has been for centuries a separate political unit under the direct personal rule of the Maharajas of Cooch Behar, but whatever may have been the history of Cooch Behar in pre-British times, even administratively ever since 1773 the connection between Bengal and Cooch Behar has been close indeed."

ANNUAL KALPATARU UTSAV at Dakshineswar Kali Temple was observed in the afternoon of Sunday, the 1st January. Large crowds of men and women visited the temple throughout the day.

Dr. Katju. Governor of West Bengal, presiding over a public meeting held in that connection said that he would fervently pray that by the blessings of Shri Ramkrishnathe evil spirit would disappear in the New Year and a consciousness of doing good to the country would be roused in every heart for progress of this fair province of West Bengal.

Kalpataru Utsav in commemoration of Shri Ramkrishna Paramhansadev was held for the first time at Cossipore Garden house (90, Cossipore Road). The celebrations were held under the auspices of Sannyasins of Belur Math led by Swami Jitatmananda.

In this self-same garden house, 64 years ago, on 1st January, 1886, Paramhansadev became Kalpataru at 3 o'clock in the afternoon fulfilling desires of all who approached him

BIRTHDAY OF THE HOLY PROPHET OF ISLAM was the occasion observed by the (Muslim) Association for Unity and Progress on Tuesday, the 3rd January. Addressing the members of the Association Dr. Katju said that all great prophets, like Jesus, Mohammad and Buddha, who preached toleration, were born in Asia. But there were many people who seldom followed their teachings in actual practice. People belonging to one religion should read and assimilate the message embodied in other religious in order to remove the misunderstandings between followers of different religious faiths.

Importance of Sanskrit learning in Free India was stressed by the Governor of West Bengal while speaking at a meeting of the Institute of Oriental Learning held at Government House on Tuesday, the 3rd January.

Dr. Katju said that although Hindi had been declared the State language of India, Sanskrit as the fountain head of almost all the Indian languages would occuy an important place in their national life.

cholers, 19 from small-pox, nil from influenza, 12 from fevers, 29 from bowel-complaints and 47 from respiratory diseases. The death-rate of the suburbs (or added areas) was 30.46 per mills.

There were nil imported deaths. Excluding these, the death-rate was 50.46.

There were 11 deaths from tuberculosis against 8 in the previous week.

# VITAL STATISTICS

For the City of Calcutta for the week ending 17th December, 1949.

City of Calcutta (Town and Suburbs.)

The total number of deaths registered during the week was 997 against 953 and 1018 in the two preceding weeks and lower than the corresponding week of the last year by 30. The general death-rate of the week was 17.90 per mille.

### Town (Wards 1-27).

The number of deaths registered during the week ending 17th December, 1949, was 796 against 765 and 802 in the two preceding weeks. There were 21 deaths from cholers, against 13 and 7 in the two preceding weeks. There were 3 deaths from small-pox during the week against 4 in the previous week. There was nil death from influenza against 3 in the previous week. The mortality from fevers and bowel-complaints amounted to 52 and 106 respectively against 48 and 105 in the preceding week. The general death-rate of the week was 16.32 per mille per annum.

There were 27 imported deaths. Excluding these, . the death-rate of the Town was 15.77.

There were 158 deaths from respiratory diseases against 156 in the previous week.

There were 55 deaths from tuberculosis against 49 in the previous week.

#### Suburbs (Wards 28-32).

The number of deaths registered was 201 against 198 and 216 in the two preceding weeks. Of these, 3 were from cholera, 13 from small-pox, nil from influenza, 10 from fevers, 33 from bowel-complaints and 48 from respiratory diseases. The death-rate of the suburbs (or added areas) was 29.0 per mille.

There was nil imported death. Excluding these, the death-rate was 29.01.

There were 8 deaths from tuberculosis against 8 in the previous week.

11

For the City of Calcutta for the week ending 24th December, 1949

CITY OF CALCUTTA (TOWN & SUBURBS)

The total number of deaths registered during the week was 1010 against 997 and 963 in the two preceding weeks and higher than the corresponding week of the last year by 5 The general death-rate of the week was 18.13 per mille.

#### Town (Wards 1-27).

The number of deaths registered during the week ending 24th December, 1949 was 799 against 796 and 765 in the two preceding weeks. There were 9 deaths from cholera against 21 and 13 in the previous week. There was 1 death from influenza against nil in the previous week. The mortality from fevers and bowel-complaints amounted to 44 and 104 respectively against 52 and 106 in the preceding week. The general death-rate of the week was 16.36 per mille per annum.

There were 31 imported deaths. Excluding these, the death-rate of the Town was 15.75.

There were 189 deaths from respiratory diseases against 158 in the previous week.

There were 40 deaths from tuberculosis against 55 in the previous week.

Suburbs (Wards 28-32)

The number of deaths registered was 211 against 201 and 198 in the two pressing weeks. Of these, 5 were from

(Continued on previous columns)

# ORPORATION NOTICES

#### To Contractors

Tenders are invited in duplicate for the following and will be received by the 2nd Deputy Executive Officer on the date noted for each, up to 12 noon. Each tender in duplicate must be enclosed in a sealed cover and superscribed "Tender for.....". For specifications and tender forms apply to the Keeper of Records, Price Rs. 2 per set.

- 1. Supply and delivery of capillary tubes of Neutral Glass during 1950-51.
- 2. Supply and delivery of calves during 1950-51.
- 3. Supply and delivery of Unani Medicines, Drugs and other ingredients for the year 1950-51.
- 4. Supply and delivery of (1) Medicines, Drugs and Chemicals (2) Injections, (3) Miscellaneous Medical Requisities, (4) Medicinal Oils, etc., (5) Dressings, for the year 1950-51.
- 5. Unloading of Corporation coal wagons at Municipal Sidings, Sealdah (account Palmer's Bridge Pumping Station) etc., and the removal of Steum coal from the stacks within the yard to the boilers at the Palmer's Bridge Pumping Station during the period of one year from 1st April, 1950.

Tenders for 1, 2, 3 will be opened on 19th and for 4 and 5 on 20th January, 195Q. The rates quoted in the tenders are to remain open for 3 months.

S. GHOSHAL,

Secretary

Central Municipal Office, The 3rd January, 1950.

# Notice To Petty Improvement Contractors

District No. III Engineer's Department

Tenders for the following works are invited and will be received by the Chief Engineer in duplicate in sealed covers, superscribed "Tender for....." on 18th January, 1950 up to 2 p.m.

206. Repairs to the Corporation Cabin in Koraborder Lane,—Rs. 591,—dated 3rd January, 1950, (3 weeks).

Gowkhana III,—Rs. 399,—dated 3rd January, 1950, (15 days).

208. Repairs to footpath of Free School Street from the junction of Rani Rashmoni Road,—Rs. 884,—dated 15th July, 1949, (1 month).

209. Construction of lamphole in connection with house drainage connection of premises No. 35B, Hazra Road,—Rs. 491,—dated 3rd January, 1950, (7 days).

210. Repairs to Superintendent's Quarters at Vaccination Institute,—Rs. 940,—dated 3rd January, 1950, (3 weeks).

211. Repairs to flank of Hughes Road near reserve tank,—Rs. 463,—dated 3rd January, 1950, (3 weeks).

212. Repairs to Vaccination with Registration Offics at Vaccination Institute,—Rs. 106,—dated 3rd January, 1950, (7 days).

Please note that the words in italics (7 days' notice) as printed in Clause 6 of the Tender and Agreement Form for piece work, is to be read as "5 days' notice."

S. C. GHOSE, District Engineer III.

Dist. III Eng'g. Office, The 3rd January, 1950.

# Drainage Department

To ALL PETTY IMPROVEMENT CONTRACTORS, DISTRICT III AND DHAPPA

# NEW DRUG FOR T. B.

Tibions, a new drug for use in the treatment of tuberculosis has been developed by four German scientists, it is reported.

Derived from coal tar tibione has been tested in German hospitals and clinics during the last two years and some seven thousand persons have been treated with it.

The announcement of this discovery came as a result of investigations conducted in Germany by Welsh McDermott of Conrnell University and Dr. Corwin Hinshaw of San Franscisco.

It was developed by Professors Devaled Domegic and Hans Schmidt and Doctors Robert Bemisch and Prits Mistacol, all working at the Bayer pharmaceutical laboratories in Eberfield. Professor Domegic had been awarded the Nobal Prize for the development of the dest sulfonamide.

Tibione which is shortly to be released in the United States may be used with streptomycin for the treatment of tuberculosis.

**EDITORIAL** 

# SARDARJI IN CALCUTTA

CALCUTTA has been in the throes of disturbances. Although, as the Commissioner of Police pointed out sometime ago, such disturbances could be localized and brought under control by the Police without great difficulty, there has been the spirit of lawlessness "which appears to have seized some classes of the population." It may hence be presumed that the disturbances, however minor in dimensions or limited to particular spots of occurrence need careful tackling not only by the Police and the Press of the city and the politicians of the country as well but also by the citizens themselves. Minor incidents may be the beginning of an outbreak of far bigger calamities.

Already a number of the leftist organizations has been banned by the West Bengal Government. But will that step and greater policing arrangements be enough to quash and quell such disturbances? We fear, even such measures will not be quite sufficient. Otherwise, how do the unruly elements dare to throw bombs at police or police stations or to stone Dr. Pow's can?

or to stone Dr. Roy's car?

Matters in Calcutta are no longer to be overlooked, but ruthless repression will not be able to permanently suppress the present outbreaks of violence. Calcutta, of all other cities in India, has a thoroughly reasonable, yet a peculiarly inflammable, mind, that needs careful handling. Moreover, there are, at present, many factors, though born out of the times and the circumstances, that have disrupted Calcutta's normal life and thinking.

Sardar Vallabhai Patel. India's Home Minister, is in Calcutta today. He is a man of sterner stuff, none of the temptations of the day dare overpower his mind; he is a man of determination. nobody can influence him easily: he has been the master of the mass mind, once the leader of the peasants putting up a successful non-violent fight against British administration in the country. The right guide at the right moment. We are sure, he will be able to bring back in no time peace and order in the city.

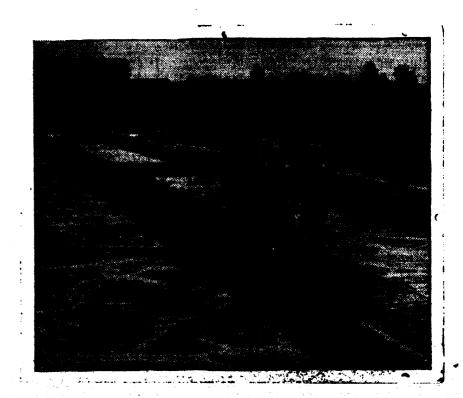

# THE FINEST DRAINAGE PURIFICATION WORKS IN THE WORLD

Impurities present in precipitate form are settled out. Primary sedimentation tanks change their contents every two hours. Electrically-driven tanks push the sludge to the centre, whence it is pumped away. Water flowing over the lip of the tank is visibly cleaner after the first two-hours' process. Similar tanks for secondary sedimentation work on a four-hour period.

Still recognized as the finest drainage purification works in the world, the plant of the West Middlesex Drainage at Mogden is visited by students and engineers from all over the world. The total sewer capacity is 600 million gallons a day, and depreciation and running charges come to less than 2d (2 annas) per head of population per week. Methane gas, collected from the sludge deposited in sedimentation tanks, not only makes the entire scheme self-sufficient in power supply, but also generates enough electricity to meet the domestic requirements of a population of 10,000.

Aeration tanks deal with bacteriological impurities on the 'activated sludge' principle, which was invented by one of the chemists of the Mogden plant. Compressed air jets into long tanks round which the sewage flows for eight hours after the two sedimentation processes. Bacteria are added to accomplish the work of purification and the aeration gives them good working conditions. The activated sludge is sludge from the final sedimentation tanks which is pumped back into the aeration tanks to speed-up the bacteriological process.

# THE SCHEME OF WEST MIDDLESFX (ENGLAND)

. . . . .

One of the initial problems of the West Middlesex scheme was that much of the area served is very little above the level of the main river Thames. Pumping from the low level sewers to the purification plant is powered by diesel engines run on methane gas gathered from the sewage itself.

THOUGHT of as little as possible by those who benefit most, the drainage problem created by the accelerated growth of urban areas between the wars, though capable of technical solution, involved financial considerations large enough to frighten off many local authorities.

In the western suburban areas of London the Middlesex County Council did one of their finest strokes of business when they decided to forget the 28 local undertakings in their western area and build a new drainage scheme covering 162 square miles at a cost of £5,000,000 (Rs. 6.7 crores).

That was in the 1980's, when the population had doubled since 1920 to about the million mark. In 1948 the figure was 1,850,000—but those prewar drainage plans catered for a top limit of 2.000.000. The whole scheme, allowing for depreciation and running charges, costs less than 2d. (2 annas) per head per week.

The average flow treated is over 60 million gallons per day; but the works could take up to

Water in the final sedimentation tanks looks limpid as a first-class swimming pool. Weeping willows add to the illusion.

600 millions in one day. Sewers lie at different leve's according to the contours of the land under which they run. Bags and other large refuse which might choke the plant are first sifted by screens in the "Screen House." The flow then moves on to the "Grit Chambers," where the speed of travel is reduced to give time for sand and grit to settle on the bottom. From there it moves through culverts to "Sedimentation Tanks," where mud-like solid matter is deposited in the form of sludge.

Many years age sewage was purified on extensive farms, turning thousands of acres into unsightly, bad-smelling marsh. Science and research brought improvements, and by about the year 1900 filter-beds had been developed. In these beds conditions are provided where friendly bacteria can thrive and make use of the oxygen from the air to

But the work at Mogden is still only halffinished. The impurities left behind in the form of a dark, liquid sludge must be treated to make them harmless. The sludge is first pumped into covered tanks, where it is fermented. During this process a gas is given off, containing about 70 per cent. of methane, which has more heating value than coal gas. Inside the tanks the sludge is held for about three weeks, and from it is produced one and a haf million cubic feet of gas every day. This provides power and heat for the whole of Mogden's requirements. Used in boilers, it heats buildings. It is used in cylinders to drive all the lorries, vans and cars needed in the running of the organization. In the vast power house, engines turn the gas intopower, producing electricity not only for the whole works, but also enough to meet the domestic

A view of the power house where enough current to supply a town of 10,000 people is generated by diesel-powered generators running on methane gas obtained from sewage sludge. Annual fuel saving is in the region of £50,000 (Rs. 6,66,667).

purify the sewage. This scientific principle is behind the "Activated Sludge Process," developed in more recent years. It was found that if sewage were agitated by air in a tank, the right kind of bacteria could be developed and utilised to do this work without the need of a filter bed. In this way, at Mogden, millions of gallons of sewage are treated in a very small space.

When the bacteria have completed their work, the mixture flows into the final tanks, where the activated sludge itself is separated from the purified sewage. The effluent, now practically pure, is repeatedly tested before it is allowed to flow into the river Thames. Fish, which had been scarce before 1985, now fill the river in the region of the out-falls on the Thames—a proof positive that the effluent is purer than the river itself.

requirements of a population of 10,000. This self-sufficiency in power is a factor of utmost importance, for it keeps running expenses incredibly low. It also makes it economically possible to operate such drainage schemes even in countries where there is no abundant supply of fuel. More than that, the surplus energy from drainage works could make a positive contribution to ease fuel shortage!

What is left of the sludge after this process, is still of value. Pumped away through pipes to drving-beds, it is left there for a few months to gradually dry into a substance which makes an excellent fertiliser. Local farmers buy many thousands of tons of this a year to spread on their fields to improve the crops, and thus what might have been a source of danger and contamination, goes back to nature—harmless and productive.—

B.I.S.

HEALTH & HYGIENE

# Relation Of Mind To Physical Health

# Influence Of Home-life

T the British National Health Education Conference held in London sometime ago Lord Woolton, Chairman of the Conference, said that preventive medicine now offered "more glittering prizes" than ever before in human health and happiness.

Representatives from all parts of the world, including India, Italy, Denmark, Norway, Persia, New Zealand, Australia, Hongkong and the Gold Coast, attended the conference.

#### Lord Woolton said:

"Advertisements of digestive tablets and powders are a constant reminder to your profession that either something is wrong with our selection of food, or else the foods at present available and the digestive apparatus of the modern man are out of harmony."

# MENTAL DISEASES HOSPITAL IN CALCUTTA

Shri S. C. Mitra. Secretary, Indian Psycho-Analytical Society, Calcutta, in course of a statement gives an account of the growth and progress of the hospital run by the Society at Bediadanga Road, Tiljala, near Ballygunj, for treatment of persons suffering from mental diseases.

The hospital, known as Lumbini Park, which was started in 1940 with three indoor beds and a free outdoor department, has at present accommodation for 50 indoor patients besides the outdoor department. Another outdoor clinic known as Lumbini Clinic is being run by this hospital at 14/1, Parsibagan Lane, Calcutta—9, where latest scientific methods of treatment are offered to the patients.

As there is a great public demand for more beds the Society proposes to accommodate 25 more patients in a new ward in the Hospital, which is now under construction and estimated to cost Rs. 50,000.

The Society appeals to the generous public for financial help so that the construction work may be completed.

He said many parallel movements were now converging to give an entirely new orientation to preventive medicine. Not least of these was the relation of mind to bodily health.

"We begin to ask ourselves pertinent questions whether it is the physical quality of a man or his environment that causes him to develop gastric troubles, colitis and nervous disorders.

"I wonder how many cases there are where gastric disorders could, in the end, be traced to an overbearing boss or a bullying foreman or even to domestic disharmony." HEALTH AND HOME-LIFE

The Study Group on Health and Home Life appointed by the UNESCO Seminar has submitted its report embodying the minimum needs for adequate health services.

The Group which was assisted by experts of the World Health Organization has urged that every village, however small and poor, must have a local health service with its own administration and its own budget and with an elected head who should be given adequate training in individual and public health.

The report says that the Group has formulated its recommendations after detailed study of home and health conditions in Asian rural community. The problem of dirt and filth seems to be a dominating one in all the areas surveyed.

The report stresses that the status of a woman in the family must be improved and her work appreciated. She must be made the centre of all efforts in educating the family to healthier ways of living. It recommends to the UNESCO to drive home to the member States the importance of giving adequate representation for women in bodies dealing with development of rural adult education and formulating policies affecting the home life of a nation.

The Group has also suggested to the UNESCO to increase the flow of material between its clearing house for fundamental education and the workers in the field.

Inaugurating recently the Bengal provincial medical conference at Raipur, 24-Parganas, about 10 miles from Calcutta, Dr. B. C. Roy, West Bengal Premier, said that if medical men could not think of the environmental hygiene of the patient, the profession would turn into something like quackery. "If we want to thrive, we must co-ordinate social science with medicine," he said.

The Premier said that doctors should place the interest of the society above their own individual interests.

# CANNING INDUSTRY

India's Canning Industry is today in a state of virtual collapse due to a very meagre supply of sugar. In West Bengal itself such factories numbering about 56 were practically closed for over ten weeks and even now a few of them work only partially. As a matter of fact the largest and best equipped factory in India is situated in West Bengal and even that factory has been permitted only two maunds of sugar a week.

If immediate steps are not taken to allocate sufficient sugar to this industry in West Hengal the industry with an investment of Rupess fifty lacs and employing about 1,500 persons including East Bengal refugees, will come to an end.

#### CIVIC NEWS FROM BOMBAY

#### MILK SCHEME FOR BOMBAY

The quality and price of milk supplied in Bombay city and suburbs have been controlled by the Government.

The Milk Control Order for Greater Bombay under the Essential Commodities Act, requires all dairies and vendors to be licensed. Selling of milk below a certain standard is punishable with imprisonment and fine under this Act.

The Government have taken over milk control from the Municipality.

Loans to the extent of six lakhs of rupees are being given by the Bombay Government to large scale dairy fermers to increase milk production in the province. The Government are also giving financial aid to small-scale dairy farmers.

Under a five-year scheme, a sum of rupees one lakh would be distributed as loans to 100 deserving dairymen in the province for improving their farms. The maximum amount of loan to each dairyman would be Rs. 1,000, carrying an interest of one per cent. This amount is repayable in five years.

Schemes of milk colonies such as the one at Arrey, about 20 miles from Bombay, and a comprehensive long-term plan to assist dairymen to improve their trade are under consideration of the Government.

### BOMBAY GOVT.'S MILK SCHEME

The Bombay Government's milk scheme is one of the biggest ventures launched by them.

The Arrey milk colony, 20 miles north of Bombay, is spread over an area of 8,000 acres. It is proposed to construct 80 modern dairy farms to house the city's 15,000 milch cattle at present kept under most insanitary, uneconomic and unnatural conditions.

Seven of the farms have been completed and ten more are under construction. The remaining 13 will be ready in the near future. In less than 18 months all the cattle from the city are expected to be removed to the new quarters at the colony.

The Bombay milk plan has under it 15,000 commercial diary cattle on one spot and it looks after their feeding, management, disease control, growing of fodder, rearing of calves, handling of milk, processing, distribution etc., under one Central authority.

After about 24 months of the working of the scheme, the Government are handling approximately 1,750 maunds of milk per day which is equal to one-third of the city's milk supply.

# MILE CENTRES IN THE CITY

There are 258 whole milk centres in the city for supplying milk to consumers. Nearly 1,50,000 families in the city—each of which possesses a milk card—are taking advantage of the scheme.

To control the quality of milk handled under the scheme, it is proposed to introduce shortly a system of bacteriological examination of milk which, it is stated, would lead to "defining of bacterial standards" so far unknown in India.

In order to prevent adulteration, the Government have decided to stop handling of milk in raw condition and distributing it loose from large cans as is done now. With this object in view it is proposed to set up a large and modern pasteurizing plant at the colony with a capacity to pasteurise and bottle 40,000 pounds of milk per hour. The plant is already on its way from London and is expected to start functioning in the course of the next six months.

As a preliminary step towards the prevention of adulteration, the Bombay Government will shortly promulgate an order under the Essential Commodities Act authorizing the Government to license those who handle milk.

# Health Notes & News

LEPROSY RESEARCH INSTITUTE

The Government of India's Ministry of Health have applied for grants of about Rs. 10,00,000 from the Gandhi National Memorial Fund for starting a Leprosy Research Institute in India.

# "PLAGUE LIKELY TO REAPPEAR

"Plague is very likely to reappear in the coming season", said Dr. S. C. Seal, In-Charge of Plague Research at the All-India Institute of Hygiene at a meeting of the British Medical Association held sometime ago in this city.

In reply to a question as to whether there was any specific drug for pneumonic plague, Dr. Seal said that he considered that streptomycine given along with anti-plague serum was very effective.

In the absence of plague in Calcutta for nearly 3 decades—the outbreak occurring in April, 1948,—it was but natural, Dr. Seal said, that there would be very few clinicians and more than so, private practitioners who could depend upon their own experience in clinically diagnosing the cases admitted in hospital and hence a large number of cases which were sent to hospital on suspicion could not naturally be later confirmed as plague.

At the beginning of the outbreak it took sometime, he said, for the hospital authorities to organise proper laboratory facilities or the bacteriological diagnosis of the cases sent. This was mainly done through the bacteriological department of the School of Tropical Medicine and subsequently by a clinical party from the Haffkine Institute, Bombay, who stayed in the city.

The total number of cases admitted in hospital in 1949, so far analysed, Dr. Seal said, was 417. Bacteriological examination of gland amears or of gland or blood culture was done in 396 cases. 213 cases were considered as plague on clinical grounds and 127 were non-plague cases. 74 cases proved fatal of which 31 were confirmed bacteriologically. "If the rest of the deaths are considered to be due to plague." Dr. Seal remarked, "then the total number of confirmed plague cases were at least 126 (77 bacteriologically positive and 43 cases amongst those who died and 5 sarologically positive among the clinical plague cases)".

Of the remaining 208 clinical plague cases, Dr. Seal said, the organism was perhaps missed in certain number of cases due to the administration of specific drugs prior to the collection of samples. Yet there was a large number of cases in the clinical group, he said, about which the diagnosis of plague was perhaps done on meagre clinical grounds:

# CALCUTTA NEWS & VIEWS

IN MEMORY OF PROF. BENOY KUMAR SARKER a meeting was held at the Senate Hall on Tuesday, the 10th January, Bis Excellency Dr. K. N. Katju, Governor of West Bengal, presiding.

A proposal to raise Rs. 2,00,000 for the establishment of an institution after the name of Prof. Benoy Kumar Sarkar to carry on research in various branches of economics and sociology was made at the meeting and accepted.

Speeches were made referring to Prof. Sarkar's erudition and patriotism. He was, it was said, a source of great inspiration to a large band of students and research workers. His numerous original contributions in economics and sociology published in various languages had received wide recognition and his wide travels abroad helped to interpret India to the outside world.

Dr. Katju, commending the proposal for the establishment of a research institution, hoped that funds would be forthcoming. There were many monuments and memorials in this city, he said, but without the spirit that lay behind them they served no useful purpose.

The meeting decided to approach Calcutta University and the Jadavpur College of Technology and Engineering, with both of which Prof. Sarkar had been intimately connected, to establish a chair in his name.

Donations of Rs. 2,000 and Rs. 1.000 by Shri K. D. Jalan and Shri Babulal Rajgharia respectively to the proposed fund

SEVENTIETH BIRTHDAY OF BARINDRA KUMAR GHOSE formed the occasion of a public meeting held on the 5th January last. Tributes were paid to the burning patriotism and self-sacrifice of India's pioneer revolutionary leader.

Shri Ghose who is lying in hospital for eye trouble, sent
 a message to his countrymen.

BRAHMANANDA KESHUB CHUNDER SEN'S activities in the field of social reform and other progressive

service were recalled by different speakers addressing a public meeting held on the cceasion of his rixty-sixth ascension anniversary at Bharatvarshiya Brahma Mandir in Keshub Chunder Sen Street on the 7th December last.

NEW PREMISES OF RAMKRISHNA MISSION INSTITUTE OF CULTURE at 111, Russa Road were opened by His Excellency Dr. Kailash Nath Katju, Governor of West Bengal in the evening of the 29th December last.

The four storeyed building, recently renovated, was a gift of Colonel Dwijendra Nath Bhaduri and his wife to the Institute to commemorate the passing away of their spiritually minded 26-year old only son, Debendra Nath Bhaduri under tragic circumstances in London in 1943.

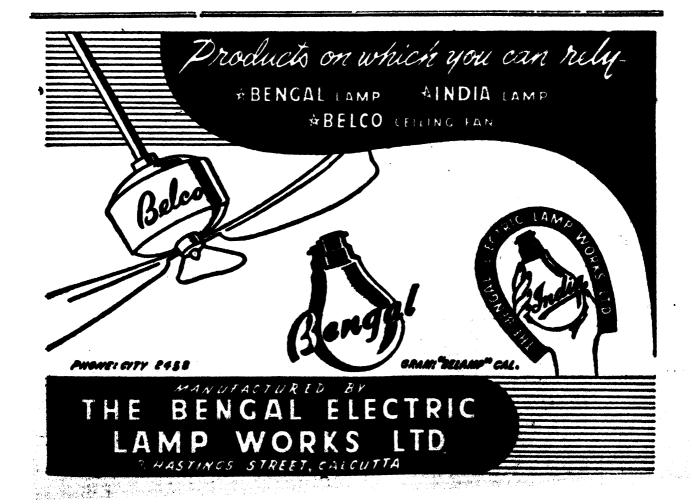

THE 5TH ANNUAL MANIMELA CONFERENCE, one of India's largest annual children's rallies, opened on the 30th December last at the E.I.R. Mansion Institute, Scaldah under the presidentship of Swami Prabhavanandaji of the Vedanta Society of Southern California. The conference continued till Monday, the 2nd January.

At the opening coremony Dr. Kalidas Nag and Moumachhi, Shri Binal Ghosh, addressed the assembly.

An exhibition of handicrafts by the members was opened by Dr. Nag.

SECOND ANNIVERSARY OF BURMA'S INDEPENDENCE was celebrated at the Burmese Consulate in Calcutta, on Wednesday, the 4th January. Dr. U. Thein, a barrister of the Rangoon High Court, presiding over the ceremonies said that the achievement of independence was not the end of sacrifice. It had been so with Burma and with India, Pakistan and Indonesia. But, under the guidance of their leaders, these countries would soon be set on the path of peace, progress and prosperity.

FORTIFOURTH ANNUAL GENERAL MEETING OF THE MINING, GEOLOGICAL AND METALLURGICAL INSTITUTE OF INDIA was held at Royal Asiatic Society, Calcutta, on Tuesday, the 3rd January. Mr. L. J. Barraclough, President of the Institute, at ressed the need for

efficient personnel, management, research and other facilities in mining industry.

In the course of his speech the President said that the accident rate in Indian mines had shown a progressive decline per 1,000 men employed during the past few years and on this basis was now one of the lowest, if not the lowest in the world.

FIFTIFIFTH ANNUAL GENERAL MEETING OF THE BANGIYA SAHITYA PARISHAD was held in its premises in Upper Circular Road in the evening of the 31st December last. Sir Jadunath Sarkar presided. In his speech Sir Sarkar appealed to the Government to recognize the Parishad library as a "copy right" library. He stressed that Government should come forward to take the responsibility of employing qualified men in charge of the library.

Shri Sajani Kanta Das, the outgoing Secretary, in his report said that West Bengal Government had made a donation of Rs. 10,000 for publication of the entire works of

Acharyya Ramendra Sundar Trivedi Another sum of Rs. 5,000 had been donated for the preparation of a catalogue of books in the Parishad Library. Government also granted a sum of Rs. 1,200 for publication of books by the Farishat.

A portrait of the late Rampran Gupta, noted historian of Mymensingh, was unveiled by Sir Jadunath Sarkar on the occasion.

Dr. Niharranjan Roy, who has been awarded Rampran Gupta Prize by the Parishad, delivered a lecture on "Some Indications of Early History of Bengal' based on his new book to be out by the middle of January.

Shri Jogesh Chandra Roy Vidyanidhi was re-elected president of the Parishad. Shri Brojendra Nath Banerjee was elected Secretary, Shri Basanta Ranjan Roy Vidyaballav and Shri Haricharan Banerjee were elected Honorary members. Raja Dhirendra Narayan Rao of Lalgola was made a life member.

# DRPORATION NOTICES

#### To Contractor-

Tenders are invited in duplicate for the following and will be received by the Second Executive Officer on the date noted for each, up to 12 noon. Each tender in duplicate must be enclosed in a sealed cover and superscribed—"Tender for...."
For specifications and tender forms apply to the Keeper of Records. Price Rs. 2 per set.

- \* 1. General repairs to Hogg Building.
- 2. Supply and delivery of gas mantles and glass inner bulbs for the year 1950-51.

Tenders for the above will be opened on 31st January, 1950. The rates quoted in the tenders are to remain open for 3

S. GHOSHAL.

Secretary.

Central Municipal Office,

The 9th January, 1950

### TENDER NOTICE

- (1) Repairs to the River Side Jetty at Kulti.
- (2) Sinking of a new Tube Well 1½ in.
  dia. at Bantolla Sedimentation
  Tanks.

Quotations in scaled covers and superscribed for the above works are invited and
will be received by the undersigned upto
2 p.m. of Friday, the 20th January, 1950.
Intending tenders are requested to inspect the sites of works and to acquaint
themselves with all other particulars, if
required in this connection, from the office
of the undersigned on all working days
during office hours prior to submitting their
quotations. The successful tenderer will
have to deposit as security in cash or in
Municipal Debentures the sum of Rs. 50
(Rupees Fifty only) for each of the above
works into the Corporation Treasury
through this department before taking up
the same in hand. Work mentioned in
No. (1) must be completed in all its details
within 30 days and in No. (2) within 15
days from the date of receiving the Work
Order in this respect.

A. N. BANERJEE.

Outfall Engineer.

Central Municipal Office.

The 11th January, 1950.

#### Plumbing Examination

#### NOTICE

It is hereby notified for information of those concerned that the plumbing examination under Chapter XVI (water) will be held on the 21st January, 1950, the

last date of receiving applications being the 10th January, 1950 and the last date of depositing the examination fee being the 14th January, 1950.

Each intending candidate should submit his application along with three copies of his own photo and certificates of his training under an authorised plumber of the Calcutta Corporation for at least three years. No candidate will be sligible to appear in the examination who has not undergone such training.

A. K. SEN. Executive Engineer, Water Works.

Central Municipal Office. The 3rd January, 1950.

# Special Notice

Re. License for selling Foodstuffs to Gangasagar Mela Pilgrims

Applications for grant of license for the sale of foodstuffs to the Gangasagar Mela pilgrims at the Embarkation ground near Prinsep's Ghat will be received by the District Health Officer, District IV, 11, Belvedere Road, Alipore, up to the 13th of January, 1950. None but those vendors, who undertake to keep the foodstuffs in fly-proof containers and to sell wholesome and pure articles of food, need apply.

A. D KHAN, Chief Executive Officer.

Central Municipal Office: The 27th December, 1949.

# Sir Stuart Hogg Market

The 30th December, 1949

To all whom it may concern, that an application has been received from the heirs and heiresses of Md. Ibrahim Beg decessed recorded occupier of Stalls Nos. 39.40 in the North Range in the Sir Stuart Hogg Market for permission to transfer their rights and interests in the above stalls to Messrs. Mokbul Hossain Nusker, Md. Siddique Nusker and Md. Rafiq Nusker.

Objections, if any, to this application should be submitted to the undersigned within 15 days from date hereof.

Sir Stuart Hogg Market, The 30th December, 1949

To all whom it may concern, that ap application has been received from Messrs. Gehimul Tahilram and Udharam T. Manglani for permission to take in Mr. Khiaidas T. Manglani as partner in their business carried on in Stalls Nos. 71-72 in Block 'D' in the Sir Stuart Hogg Market.

Objections, if any, to this application should be submitted to the undersigned within 15 days from date hereof.

Sir Stuart Hogg Market,
The 10th January, 1950.

# Auction Sale

The following articles will be put up for sale in the public auction to be held on the 21st January, 1950, at the Sir Stuart Hogg Market, New Buildings at 2-30 p.m.

1. One mud flower vase.
2. One small table.
3. One dinner table.
4. Four chairs.

N. K. MONDAL, Asst. Collector.

Central Municipal Office, The 12th January, 1950.

# CALCUTTA BECAME SPORTS MINDED

Calcutta became very much sports-minded early this week. The long unbeaten record of the Commonwealth touring team in India was broken in this city on Tuesday afternoon, the 3rd January, when thousands of excited cricket fans took possession of the field in expression of joy at India's victory by seven wickets over the tourists in the third unofficial Test match which concluded at Eden Gardens on the fifth day.

It was indeed a great event for India and for Calcutta as well as it recorded the first defeat of the tourists, India's sixth unofficial Test victory, and the second at Eden Gardens.

The first Asian Lawn Tennis Championships were successfully completed at the Calcutta South Club on Sunday, the 1st January, when three finals were played, Dilip Bose winning the men's singles final, Mrs. Todd and Miss Moran the women's doubles title, and Mr. P. Washer and Miss Moran the mixed doubles title.

Of the five titles played for during this tournament the distribution was as follows:--

India—two titles. America—two titles. Belgium and America—one title.

### **EDITORIAL**

### THESE WE SHOULD REMEMBER

In spite of his ill-health Sardar Vallabhai Patel came to Calcutta to see and know for himself what were really the reasons for the untoward incidents that had been happening in the city for sometime past. During the four-day stay in the city he met the citizens, industrialists, Congress workers, students, refugees, Ministers and officials of the Government of West Bengal, talked to them, received their views about the disturbances and appealed to all of them to remember that—

Calcutta is the premier city of India in which trade, commerce and industry are located. If Calcutta is in agony the whole country cannot afford to be at peace. The commercial community of Calcutta has, therefore, something to do in order that they can put their wealth into productive activity.

Calcutta citizens should shake off the attitude of indifference towards individual responsibilities as citizens of Free India. They must stop those few young men who disturb the peace of the city.

In Calcutta there is a focus of disorder, and this city is the most delicate spot in the country where maintenance of peace and order must be helped by the editors of the city's newspapers.

In Calcutta, a cosmopolitan city, there are so many communities living together, and here provincialism should not grow. All who have interests here should live like members of one family.

Congress leaders of Calcutta must bring about an end to group

quarrels: they must maintain contact with the people

Students, refugees and citizens of Calcutta should know that the Government of the country have been very much attentive to the matters of getting sufficient food for the people, ending profiteering and black marketing and also easing other very abnoral conditions of living. Here individually the people can help the Government by finding ways out of the tangle.

And all these, we should remember if we love our country, our own Government and even ourselves. We hope Sardarii's visit to this city will bring in immense improvement in the conditions prevailing

at present.

# **SARDAR** VALLABHAU **PATEL** IN CALCUTTA

SARDARJI ON ARRIVAL AT DUM DUM

(On the right) Sardarji, Dr. K. N. Katju, Shrimati Maniben Patel. Dr. S. P. Mookerji and Dr. B. C. Roy.

SARDAR VALLABHAI PATEL, Deputy Prime Minister of India, arrived in Calcutta from Delhi by air in the afternoon of the 12th January last on a four-day visit. He was received at Dum Dum by Dr. Kailas Nath Katju, Governor of West Bengal, Dr. B. C. Roy, the Premier, Ministers and high civil and military officers. Dr. S. P. Mookerjee, Industry and Supply Minister, Government of India, was also present

Among others, who called at the air port were the Sheriff of Calcutta, Dr. S. B. Dutta, Shri Sures Chandra Majumder, Dr. P. N. Banerjee, Shri B. M. Birla, Major-General S. B. S. Roy, Area Commander, Bengal, Bihar and Orissa, Shri S. N. Ray, Administrative Officer, Calcutta Corporation, and Shri V. I. Nanjappa, formerly Administrator, Cooch Behar.

Sardarji was accompanied by his daughter, Shrimati Maniben Patel, his Private Secretary, Shri V. Shankar, i.c.s., and his personal assistants, Shri Vaidvanathan and Shri Gupta.

Soon after his arrival at Dum Dum a guard of honour was provided by a contingent of West Bengal Armed Police, the band playing 'Jana Gana Mana'. After inspection of the guard of honour he was introduced by the West Bengal Premier, Dr. Roy to all those

After the Ministers and others had been introduced by Dr. Roy, Sardar Patel, accompanied by the Governor and Shrimati Patel went to Governmen: House On the way Sardarji was greeted by thousands of people lining the two sides of the route.

On arrival at Government House, a guard of honour was provided by the Calcutta Mounted Police and the 1st Battalion, Jat Regiment.

In the evening, West Bengal Ministers met the Deputy Prime Minister at Government House when the West Bengal problem in all its aspects including law and order, labour and agrarian situation and the refugee problem was discussed. India's Industry and Supply Minister, Dr. Syamaprasad Mookerjee was also present.

Besides West Bengal Premier, Dr. B. C. Roy, other West Bengal Ministers present were the Education Minister, Shri Rai Harendra Nath Chaudhuri, Labour Minister, Shri Kalipada Mookerjee, Minister for Home Defence. Shri Bhupati Majumdar, Supply Minister. Shri Nikunja Behary Maiti and Excise Minister. Shri Syamapada Burman Sardarji left for Delhi after four days' stay in Calcutta in the

morning of Monday, the 16th January.

His Excellency Dr. Kailash Nath Katju, Dr. B. C. Roy and several other Ministers and high-ranking officials of the Government of West. Bengal were present at the Dum Dum aerodrome to see off the Deputy Prime Minister

### SARDARJI MEETS CITIZENS AND OFFICIALS

### SECOND DAY OF HIS STAY

On the 18th January last in the morning Sardarji addressed a joint conference of members of the executive committee of the West Bengal Provincial Congress Committee and Congress M.L.A.'s at Government House. The meeting lasted nearly two hours and Dr. B. C. Roy, Premier and the Ministers of West Bengal, Shri Surendra Mohan Ghosh, President of the West Bengal Provincial Congress Committee and Dr. P. C. Ghosh were present.

The meeting was followed by a conference between Sardar Patel and Mr. J. R. Walker, Chairman of the Jute Mills Association, and other representatives of the jute industry.

In the afternoon, Sardar Patel met the members of the West Bengal Congress Chhatra Dal, an organization of students. He also had a meeting with principals and professors of Calcutta educational institutions.

### CONFERENCE WITH CITIZENS

His engagements for the day ended with a conference in the evening with leading citizens. Dr. B. C. Roy, Premier and Dr. S. P. Mookerjee, Industry and Supply Minister, Government of India, were present at the meeting which was attended by Shri Atul Gupta, Dr. Radha Binode Pal. Dr. P. N. Banerjea, Shri C. C. Biswas, Dr. S. B. Dutt (Sheriff of Calcutta), Shri N. C. Chunder, Shri N. C. Chatterjee, Dr. R. Ahmed, Syed Nausner Ali, the Maharajadhiraj Bahadur of Burdwan, Sri B. P. Singh Roy and Shri D. N. Sen (former Sheriff).

### THIRD DAY OF HIS STAY

The third day of his stay in the city started with his meeting a deputation of refugees from East Bengal, Sardar Patel gave a patient hearing and invited suggestions from the deputationists for the solution of the problem of refugee rehabilitation.

Among the deputationsts present were Shri Girindia Nath Roy Chowdhury, Shri Purna Chandra Fas, Shrimati Phulrenu Guha, Shri Rabi Sen, and Shri Sudhir Guha. Besides the deputationists, Dr. E. C. Roy and Shri Sures Chandra Majumdar, were also present.

#### CONFERENCE WITH OFFICIALS

Later, in the morning, Sardar Patel met highofficials of West Bengal Government. Discussions continued for nearly two hours.

Officials present were Shri Sukumar Sen. Chief Secretary, Shri S. Banerjee, Member, Board of Revenue, Shri J. N. Talukdar, Commissioner, Presidency Division, Shri B. Sarkar, Commissioner, Burdwan Division, Shri R. Gupta, Home Secretary, Shri Sukumar Gupta, Inspector-General of Police, Shri H. N. Sarker, D.I.G., I.B., and S.B., Shri S. N. Chatterjee, Commissioner of Police, Calcutta. Shri K. C. Bysack, Food Commissioner, Shri Hiranmoy Banerjee, Relief Commissioner, Shri S. N. Ray. Administrative Officer, Calcutta Corporation. Shri R. K. Roy, Chief Commissioner, Tripura State and Shri V. I. Nanjappa, Administrator, Cooch Behar, Major-General S. B. S. Roy, Area Commander, Bengal, Bihar and Orissa, was also present.

### "IF CALCUTTA IS GONE, INDIA IS GONE"

A reception was given to Sardar Patel in the afternoon of the 14th January last, the third day of his stay in Calcutta by the Bengal National Chamber of Commerce, Bengal Chamber of Commerce at the Calcutta Club. The West Bengal Governor, Dr. K. N. Katju, Dr. B. C. Roy, Premier, and Dr. S. P. Mookerjee, Industry and Supply Minister, Government of India, were also present.

Addressing the leading business men of the city Sardar Patel said that Calcutta was the premier trading city in the country, and they could not afford to be at peace when Calcutta was in agony. It was essential that a situation should be created in which everybody could feel that he could confidently carry on business.

He referred to provincialism as a great canker which would kill the city, and urged the people to create conditions in which this spirit would no longer exist.

### CALCUITA IN AGONY

Among Calcutta's inhabitants, he said, he discerned a general attitude of apathy towards their responsibilities as citizens of free India. They must make up their minds that the present campaign of terrorization by a few people must stop. This was not the responsibility of the police alone.

He had come to Calcutta in spite of failing health and his many engagements. It was not a pleasure trip. He had been anxious, as many of his colleagues were, about Calcutta. From Calcutta they received reports every morning of untoward incidents in some part of the city or another, reports of bomb explosions, of trams and buses being burnt, and policemen being killed or injured.

### DUTY OF BUSINESS MEN

Calcutta was the premier city of India in which trade, commerce and industry were located. If Calcutta was in agony then they could not afford to be at peace. Therefore, he had come here to see what the actual conditions were, if the reports were exaggerated, and whether he could contribute anything to create conditions in which trade, commerce and industry could flourish.

After the consolidation of the country their first concern was to see that economic stability was also brought about. India had been one, with a joint economy which had been broken all of a sudden. They had agreed to partition because they saw that the alternative was worse, but they agreed to it on condition they did not lose Calcutta. If Calcutta was gone then India was gone.

It was well known what Calcutta was like during what was known as "Direct Action" days; they

remembered Bengal of the time of Noakhali. They saved Calcutta because this was the fount from which wealth would grow and flow all over the country. It was the biggest centre of industry, trade and commerce. But if business men felt nervous and there was a feeling of anxiety, then nothing could be done.

Therefore, they must see that a situation was created in which everybody would be able to feel that he could confidently carry on business in Calcutta. Business men, he felt, were not yet quite confident that they could put their wealth into productive activity in Calcutta any more. He also telt that in a city like Calcutta which was a cosmopolitan city, provincialism should not grow. It was a great canker which would kill the city, and unless they removed it they could not create confidence. . It was no use blaming one community or another. No matter which province or country they came from, they all lived in Calcutta. All who had interests here were members of one family. They should work in that spirit, and if the individual began to realize his own responsibilities he would spread that atmosphere and the collective atmosphere would remove the spirit of provincialism.

In Calcutta there was a general feeling—a general attitude of apathy, an attitude of indifference towards individual responsibilities as citizens of free

India. Otherwise how could a few people terrorize hundreds; a few young men disturb the peace of the city?

#### CREATION OF PUBLIC OPINION

Citizens of Calcutta, to whatever class they might belong, must make up their minds that these things must stop. If they did so, then they would not look to the police alone. Citizens must also do their duty.

How would the people of Calcutta be judged outside when two or three urchins terrorized crowds of people?

Some people said that it was the same old bureaucratic police, the same old bureaucratic regime functioning now. These were false notions. They could change their Government if they wanted. What was most needed was to create public opinion in Calcutta by which priority should be given to bringing about conditions in which no terrorist crimes could be committed.

Dr. N. N. Law, welcoming Sardar Patel on behalf of the commercial community of Calcutta said that by his unique services and as one of the unster-builders of new India, he had endeared himself to the entire nation. He then dwelt on the various difficulties of commercial and industrial activities in the city and the country.

### "CAICUTTA'S AGONY MAY UPSET THE WHOLE COUNTRY"

The same evening Sardar Patel met editors of Calcutta newspapers at a conference at Government House.

He told the Editors that while he appreciated the need for constructive criticism and, in fact, regarded it as the duty of Government to encourage such criticism, he felt that editors should give top priority to unreserved criticism of the unlawful and terroristic methods that were being employed in an attempt to upset and unsettle the whole social structure.

He was conscious of the failings and deficiencies of Government, but he asked the editors at the same time to assess the credit side of Government policy and actions. There could be no doubt that Government had a creditable record of achievements, which had won honour and respect for India in foreign countries. At the same time, he felt that, unless India set its own house in order, this fund of respect and honour accumulated abroad would not last long. There was no need to be impatient. India had framed its Constitution within three years of her freedom. It took America seven years to do so. America took decades to stabilize her position politically and economically. India had had also to face many a trial and ordeal during her infancy.

The agony of Calcutta and Bengal was bound to upset the whole country, he stressed in the course of his speech.

### MOST DELICATE SPOT OF INDIA

It was not, therefore, that the rest of India was unmindful of, or unsympathetic to, the needs of Bengal and its youth. Unemployment, a sense of frustration and discontent were all known and sympathetically understood, but the primary and basic condition was to create a proper atmosphere in

which remedies for these ailments could be prepared as well as administered.

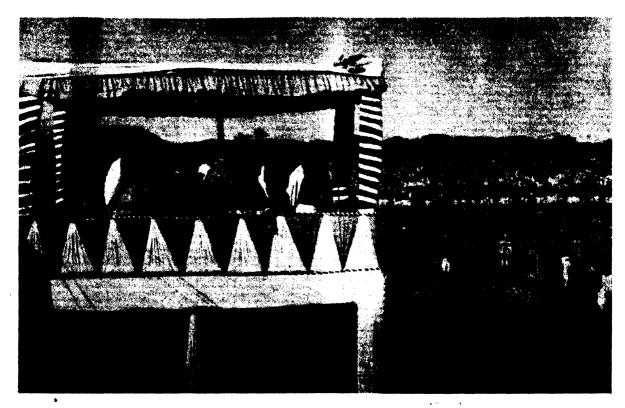

Political and economic stability was, therefore, essential. Obviously that stability could not be achieved when there was a focus of disorder in a city like Calcutta. He knew that there were one or two other parts where a certain state of disorder prevailed, but Calcutta was the most delicate spot of all and peace and stability here had to be maintained in the interests of the people not only of Calcutta or of Bengal, but of the whole of India

### FOURTH DAY OF HIS STAY

In the morning of the fourth day of his stay in the city, that is Sunday, the 15th January, Sardar Patel addressed a meeting of the presidents and secretaries of district Congress Committees and other leading Congressmen of the province. He appealed to them to compose their differences and strengthen the hands of the Government to fight anti-social elements and to solve the problems confronting the country.

He said that he had come to Calcutta with the hope of revitalizing the Provincial Congress. If this could be done, it would benefit the Congress on other provinces also.

Often Congressmen well known for their services in villages lost contact with the people as soon as they arrived in Calcutta and began to take part in group politics. They must maintain contact with the people; otherwise the Congress would be destroyed. If they maintained that contact, they could successfully put pressure on their leaders in Calcutta to bring about an end to group quarrels. This would strengthen the organization and make it very popular.

### SARDARJI SPEAKS TO THE CITIZENS OF CALCUTTA

### LAW AND ORDER MUST BE MAINTAINED

AT an open air meeting—on the Brigade Parade Ground, Calcutta Maidan, held in the afternoon of Sunday, the 15th January, Sardar Vallabhai Patel, speaking in Hindu for about an hour, analysed for the citizens of Calcutta the various problems facing the city and the province.

In the course of his speech he stressed that the maintenance of law and order in Calcutta was the first duty of its citizens.

He said that if people desired to replace the present Covernment they could do so by the method of the ballot bex or by revolution. Throwing of bombs at the police was no revolution. It was a kind of madness. Those who indulged in terrorist activities should be resisted. He appealed to the public to co-operate with the police in their efforts to preserve law and order.

Sardarji reiterated his warning against provincialism, and said that, unless this spirit disappeared. Calcutta's position as a centre of trade and industry would be jeopardized seriously.

He emphasized the need for increasing production and called upon all to co-operate for this purpose. Malpractices such as blackmarketing and profiteering should be given up and labourers should not resort to strikes and go-slow methods to enforce their demands.

### SARDARJI ARRIVES

As Sardar Patel, accompanied by his daughter. Shrimati Maniben Patel, and the Governor of West Pengal. Dr. Kailas Nath Katju. drove up to the meeting ground, the vast gathering shouted in cheer, the band in attendance playing Bande Mataram.

He was received by Dr. B. C. Boy, the Premier, and Dr. S. P. Mcokerjee, Industry and Supply Minister, Government of India, and was borne to the 12-ft, high rostrum, from which he spoke, in a specially constructed lift.

Before the meeting began, the police searched the Maidan area and recovered three high-calibre bembs from Curzon Park, about a mile away from the Brigade Parade Ground.

#### IRONY OF FATE

"What an irony of fate!" said Sardarji, "We resisted the partition of Bengal when it was planned by the British 40 years before the partition of India actually came about. You sacrificed your all to avoid the catastrophe of partition; India was with you; subsequently, we had to accept the partition of another conception."

'All accepted it as an inevitable fact. However, we could not accept partition without the city of Calcutta. You had to suffer grievously. How can Bengal, or even the rest of India, forget those days of 'direct action' and the situation in calcutta which followed in its wake?'

Sardarji then referred to the onrush of refugees from Pakistan and expressed concern about their distress although the Government of India were doing their best to help them.

"Today, the whole of India feels concerned to read every day something or other happening in some part of Calcutta", said Sardarji. "Bombs, crackers, burning of tram cars, attacks on police, arrests, fasts in jail-these are the incidents that are reported under prominent headlines. It is natural that in such circumstances people outside the province should feel that there is general lawlessness in Calcutta, and the machinery of Government has broken down. It is only whenyou come here and see the normal life of the city going on unchecked that you realize that all this is the work of some young men who have gone astray. These handful of youths wish to upset the peace and tranquillity of the whole city. They wish to terrorize or overawe the whole population and the Government. I do not know what they wish to

gain out of it. I can understand Communist ideology, but I cannot understand what they will achieve as a result of murderous assaults and other tactics."

Sardarji then asked the people if they wanted to change the Government. They could do so by holding fresh elections, and he thought those elections should be held if they wanted. He then pointed to the difficulties for holding elections just at present.

Next, Sardarji lamented, "Our Congress organization has been weakened. Our own army of volunteers does not command the same influence, and there is also not that same spirit of service."

### CALCUTTA'S PROBLEMS

Referring to every problem that faced the city Sardarji said:

I know the students are restless. They study in classes where they do not have even sufficient elbow room. They work in shifts. Whether and what they can learn in these circumstances beats me. I do not know what all these thousands of graduates who are coming out of colleges every year learn. I hope it is not merely to agitate and create mischief. Nor do I hope that they read literature which sometimes you see on posters. They cannot digest it. They will very soon get indigestion if they go on reading that rotten stuff.

"Calcutta is the centre of industry. It was at one time the capital of India. Now it is the capital of industry. For our prosperity, we need both agricultural and industrial wealth. In the industrial field, Bengalis do not play their due part. Their young men are to be found in small numbers in industrial installations. Instead of making a grievance of it.

you should really inquire why it is so. Why should they not take to industrial occupations? Why should they not become captains of industry?

I want to appeal to those who own these industries and those who do not to realize each other's duties. They have to share the troubles of Bengal together and to understand each other. Today, each province is autonomous. There can be no question of one overlording the other. There should, there fore, be no barriers.

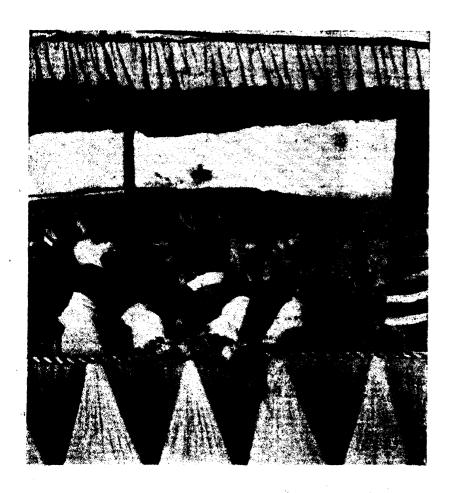

### SHAKE OFF PROVINCIALISM

Provincialism is bad. It narrows one's vision and prevents one from thinking in terms of the larger whole. We lose our sense of perspective as citizens of a great India. We forget our duties as sons of the Motherland. Today, people ask for separation of their province. Bengalis want more room for expansion.

"It is my earnest desire to help Bengal in its hour of need, to the maximum of my capacity. It was for this reason that when the people of Bengal claimed Cooch-Behar, I went into the whole question and came to the conclusion that their claim was just and proper.

We have to change all this atmosphere. We have to devote ourselves to the art of peace. We have to run our Government We have to pursue our normal avocations. We have to create wealth for our existence and also for improvement in our own standards of living. We have to run our industries. We must explain to labour that we regard it as our duty to see that they get their due.

"The industrialists should be prepared to sacrifice their profits in the interests of their

A close view of the pandal wherefrom Sardarji spoke to the peope of Calcutta. Others on the pandal include Shrimati Mani Ben Patel, Dr. K. N. Katju, Dr. S. P. Mookerjee, and Dr. F. C. Roy.

Two Photos of the Public Meeting by B. R. Sen

country. Blackmarketing, profiteering, cornering of business, all this must go. They must also lend a helping hand to Government in dealing with commodities that are scarce and in seeing that the task of distribution is performed smoothly and efficiently.

They make all sorts of charges against Government. Do they realize that when a closely knit administrative machinery was functioning 80 lakhs of people died of starvation in this very city without any nurmur. Nobody has been allowed to die of starvation during the two years that we have been in office. It has cost us crores of rupees, but we have seen to it that people get sufficient food for sustenance.

"We should also make sacrifices for the relief of the poor. Formerly, the middle classes and others who could afford used to sponsor charities for the relief of the poor. Now the middle classes are also in difficulties.

"We have, therefore, to organize the relief of the poor on a broader basis. Every Indian must now share the troubles of their fellowmen for these few years of our formative period. By tightening our belts now, we shall be laying in store for the future. It is not too much to ask if I call upon you to postpone happier times by a few years. If Calcutta or Bengal dies, none in India can live. It is only when Bengal can take its place in Indian policy and get the leadership which it had before that we can say that we have put matters right.

In the end, Sardarji drew the attention of the public of the city to the necessity of bringing peace and order in the city.

remove the canker of provincialism from the city. Calcutta gives shelter and sustenance to people from every province. It cannot afford to look at matters in a narrow parochial spirit. There is room for everybody in this big city. They should all live in peace and amity. Lend a helping hand to Government to remove your persent troubles, improve the atmosphere of the city, and create wealth which you can then distribute. Learn to work together, instead of working apart.

"You must forget that the police is tyrannical and dishonest. If you have complaints against the police, make it to the Government. You must remember that theirs is a very difficult and unenviable task. They are doing that as faithfully as they can. I appealed to the newspaper proprietors vesterday to help in the improvement of the atmosphere in this city. I appeal to the general public to set the tone for the newspapers, so that they can also do their duty. We should have our own volunteers for dealing with these troublemakers. It is only then that Calcutta and Bengal can live in peace and its people can dedicate themselves to the tasks of relief and amelioration."

### CIVIC NEWS FROM FAR AND NEAR

### CIVIC WELCOME TO GOVERNOR-GENERAL

His Excellency C. Rajagopalachari, Governor-General of India, on the occasion of his recent visit to Hyderabad was presented with a joint address of welcome on behalf of the Jalna and Aurangabad Municipalities.

In reply to the address the Governor-General said among other things: "You should look up for the future. Only with mutual love and affection will happiness glow otherwise only poisonous seeds will grow and no happiness will result therefrom."

### ADMINISTRATION OF CANTONMENTS

The Central Committee on Cantonments sometime ago issued a questionnaire on the administration of cantonments for eliciting public opinion.

The Committee was constituted by the Central Covernment, some months ago, to consider the question of delimiting the boundaries of cantonment areas, suggest amendments to the Cantonments Act, 1924, and to deal with other related matters.

(An article on the subject-matter of administration of the cantonment areas in India will be published in the issue of the "Gazette" dated the 28th January).

### CALCUTTA NEWS & VIEWS

PROF. J. D. BERNAL of Birbeck College, London. speaking on the "Responsibilities of Scientists" at Bose Institution on the 13th January last, said that science could not develop or exist if it did not fit in with other things in society. Scientists had a responsibility inside their own science as well as outside. They had the responsibility to see that they themselves were working to the greatest effect inside and that the society was using the results thereof to its benefit.

Referring to India, Prof. Bernal said that the society as a whole was in a pre-industrial phase. Therefore it had to go through some, if not all of the industrial phases that either countries had gone through. Bullock carts still prevailed in the country, he said, were incompatible with modern idea of transport.

A CALL TO CONGRESS WORKERS of West Bengal to make a united stand against disruptive Communist activities and mobilize public opinion against such anti-social activities by organizing public meetings was made by the Executive Council of the West Bengal Provincial Congress Committee in a resolution passed by the Council at a meeting held in Calcutta on Monday, the 16th January.

The District Congress Committees of Calcutta were asked to make special efforts in this connection and to raise volunteer squads for the purpose.

THE INSTITUTE OF NUCLEAR PHYSICS, the first of its kind in India, was opened by Mme Joliot-Curie in Calcutta on the 11th January last. She stressed the importance of the

study of nuclear physics and expressed the hope that work of the Institute would prove to be of great benefit to the country.

Of coarse, there was the perspective of powerful nuclear reactors for atomic energy, she said, but many other utilizations were already known. The production of radio elements became more and more necessary for biological study and medical research; most of the radio-active tracers were artificial radio elements produced by transmutation. Even a small-scale production of these was very useful.

H. E. Dr. Katju, who presided, asked Mme Joliot-Curie to open the Institute. There was a large gathering of scientists, educationists and prominent citizens. Sir Robert Robinson, President of the Royal Society, and Lady Robinson were among the distinguished guests.

SIR EUGEN MILLINGTON-DRAKE, Vice-President of the British Poetry Society, said at a recent Press Conference during his stay in Calcutta, that he was impressed by the remarkable command of English possessed by intellectuals and statesmen in the country.

"I would ask India to think twice before she discards or even allows to be tarnished the rich gold of the English language she possesses—a language that is the richest in the world," said he.

THE INDIAN JOURNALISTS' ASSOCIATION held its 28th annual general meeting on Sunday, the 15th January, at the Vidyasagar College, Calcutta. At the meeting the following office-bearers and members of the Executive Council were elected for the year 1950:

President—Shri Vivokananda Mukherjee (Ingantar), Vice-Presidents—Shri Bidhubhusan Sen Gupta (United Press), Shri Bijoybhusan Das Gupta (Ingantar), Shri Chaplakanta Bhattacharya (Ananda Bazar), Shri Gopal Chandra Neogy (Basumati), Shri Rabindranarayan Choudhury (Amrita Bazar), and Shri Sailendra Nath Ray (Advance); Secretary—Shri Manindra Narayan Ray (Hindusthan Standard); It. Secretary—Shri Basudeb Banerjee (Basumati); Asst. Secretaries—Shri Ramesh Ch. Bhattacharya (Hindusthan Standard), Shri Dev Kumar Ghosh (Iugantar), Shri Nirmal Ghosh (Basumati), Shri Ramendranarayan Chaudhury (Amrita Bazar); Treasurer—Shri Nirmal Chandra Ghosh (Amrita Bazar Patrika); Auditor—Shri Bhupati Mohan Sen (Iechan Beema).

TO THE MEMORY OF SURYA SEN (Masterda) of Chittagong Armoury Raid fame respectful homage was paid at public meetings held in different parts of Calcutta last week in observance of his 16th death anniversary.

Presiding at a largely attended public meeting held at University Institute Hall Shri Surendra Mohan Ghose. President, W. B. P. C. C. characterized Surya Sen one of the glorious bands of martyrs who had laid down their lives in the cause of freedom of the country.

The death of Prof. Braja Sundar Roy occurred at his Calcutta residence at 8, Vidyasagar Street last week. He was 74.

Prof. Roy was the General Secretary of the Sadharan Brahmo Samaj for many years and worked as the editor of the Indian Messenger, the organ of the Samaj.

FOUNDATION DAY OF THE BASIC (PRIMARY)
TRAINING COLLEGE for Women at Alipore was observed
last week. On the occasion a veriety programme, which in-

cluded music, dancing, a pageant on Indian women through: the ages, and displays of physical feats, was gone through. H. E. Dr. Katju, who presided advised first batch of outgoing trainees numbering 32, to take up the teaching profession as a "patriotic duty."

MMe JOLIOT CURIE opened the Chittaranjan Cancer Hospital in Calcutta on the 12th January last. She also laid the foundation stone of the nurses' home of Chittaranjan Seva Sadan.

Dr. Roy, West Bengal Premier, presided, Dr. S. P. Mookerjee, Minister for Industry and Supply, Govenment of India, was among those present.

Mme Joliot-Curie went round wards and departments of the Cancer Hospital and showed particular interest in the million-volt X-ray unit there.

She said that, since the first use of radium for the therapeutics of cancer which was made in France a few years after the discovery of radium, many big centres had grown for the treatment of the disease by radiation. It was a great pleasure for her to see the birth of a big medical institution for cancer treatment in India.

PRINCE PETER AND PRINCESS IRENE of Greece who are in India on an anthropological mission since February last year, arrived in Calcutta on Tuesday, the 10th January, for a short stay in the city.

Prince Peter, who is in India for the third time since-1939, has, in his present mission, spent nine months in South India, carrying on anthropological research work, assisted by his wife. Both have plans to spend another year in India to complete the anthropological research work in central and northern India.

THREE NOBEL PRIZE WINNERS, Sir Robert Robinson, Professor Frederick Joliot and his wife Mme Irene Joliot-Curie, arrived in Calcutta last week by air from Bonrbay.

Professor J. D. Bernal, F.R.s., Professor of Physics. Birbeck College, London, the celebrated British scientist and author, arrived in the same plane as Professor Joliot and Mme Joliot-Curie. These three scientists had earlier attended the 37th Session of the Indian Science Congress at Poona.

MR. THOMAS J. BATA. President. Bata Limited, son and successor of the late founder of the worldwide Bata organization, arrived in Calcutta early this month en route to Far Eastern countries and Australia. He was accompanied by his wife and technical and administrattive advisers.

PROF. A. W. ASHBY, the noted British agricultural economist from Oxford, arrived in Calcutta sometime ago by air from Madras. He went round the Academy of Fine Arts Exhibition and portions of the Indian Museum, During his three days stay in the city, Prof. Ashby visited the Damodar Valley Corporation, the Botanical Gardens and Calcutta University.

SECOND ANNIVERSARY OF BURMA'S INDE-PENDENCE was celebrated by the Burmese citizens in Calcutta on the 4th January last.

A large number of Burmese citizens, men, women and children, some of them attired in their national costume, assembled at a function held at the Burma Consulate in Dalhousie Square in the morning.

### CALCUTTA IMPROVEMENT TRUST

#### KALAKAR STREET

For paving Kalakar Street with asphaltum the Calcutta Improvement Trust has approved payment of the expenditure that the Corporation incurred in that connection. The Board has agreed to resurface the road by concrete pavement at their own cost after a period of 20 years. In the meantime the road will have to be maintained by the Corporation.

#### LAND ACQUISITION

The Trust has approved the acquisition of the following premises in furtherance of its town improvement programmes:

- (a) Premises Nos. 2—2/4, Serang Lane under the Amherst Street to Loudon Street alignment.
- (b) A portion of premises No. 109, Ultadanga Main Road under the Maniktala Improvement Scheme.
- (c) A portion of premises No. 16/1, Chakrabere Lane under the Lansdowne Road—Ballygunge Circular Road scheme.
- (d) Premises No. 47, Creek Row in the Amherst Street—Loudon Street scheme.

### JYOTISH CHANDRA GHOSH

#### DEATH OF A CORPORATION Ex-EMPLOYEE

The Sradh Ceremony of the late Shri Jyotish Chandra Ghosh, a member of the Khulna Bar and one time employee of the Calcutta Corporation, was held on Monday, the 9th January. Shri Ghosh was one of the pioneers who have helped industrialization of Khulna.

Tributes were paid to him at a largely-attended memorial meeting held at the Mahabodhi Society Hall on the 12th January last. Dr. Prafulla Chandra Ghosh presided.

Shri Hemanta Kumar Basu, M.L.A., Shri Shibnath Banerjee, M.L.A. were present.

Dr. Prafulla Chandra Ghosh said it was the service and sacrifice of Congress workers like Jyotish Chandra which had brought freedom nearer to them.

Shri Phanindra Nath Brahma, ex-Mayor of Calcutta, characterised Jyotish Chandra as a patriot of the genuine type.

#### DARIDRA BANDHAB BHANDAR

Shrimati Lakahmi Dasi, Sebayet, Estate of Gouri Shankar, has contributed a sum of Rs. 200 to the Funds of 'Kiransashi Sebayatan' and Sri Hardeodas Daga, Rs. 250 being his Life-Membership subscription to the funds of the Daridra Bandhab Bhandar. The Bhandar appeals to the generous public for such donations in the cause of the suffering humanity.

# DANCE RECITAL TO BE PRESENTED BY DAKSHINEE

Art lovers will certainly welcome this encouraging news that a dance recital is being arranged by the staff and students of "Nritya-kala-Kendra" the dance department of

SM. SEBA MITRA

Dakshinee. The function will be held on the board of Ashutosh College Hall (Bhowanipur) on Sunday, the 29th January, 1950 at 7 p.m. A renowned dancer herself and an ex-professor of Santiniketan Sangeet Bhaban (Dance Section', Sm. Seba Mitra is the principal organiser of this show. It may be recalled that it was through her efforts that Nritya-kala-Kendra of Dakshinee came into existence

and since then the a year ago has removed a long-felt want of a school to train up students in pure Santiniketan style of dancing. It is really praiseworthy that Sm. Seba Mitra has been able to train up within a short period a presentable batch of young artists for public demonstration. Besides several dance items of Sm. Seba Mitra and her group, some of the renowned singing artists of Dakshinee, consisting of Messrs. Suvo Guha Thekurta, Sunil Kumar Roy, Kalim Sarafi, Kamala Bose and others will feature in demonstration of vocal music. We have every reason to believe that the function will be a success,

### SEVEN ORGANIZATIONS BANNED

Seven student, labour, peasant and women's organizations have been declared unlawful by the West Bengal Government as in their opinion "they have for their object interference with the administration of law and the maintenance of law and order" and, as such, "constitute a danger to public peace."

The banned organizations are the Bengal Provincial Students' Federation, the Chhatri Sangha, the Mahila Atma Raksha Samity, the People's Relief Committee, the Kisan Samitis, the Khet Majdur Samitis and the Naojoan League.

#### WALL CALENDARS

We are glad to receive an Engagement Book—1950, and one wall calendar from Messrs. Dutt & Co., Electrical and Mechanical Engineers and Contractors of 95, Bowbazar Street, Calcutta.

We have pleasure to receive a wall calendar entitled "Calender of Britain" from the British Information Services and a wall calendar and an engagement diary from Associated Cement Company of Bombay.

When you stop advertising, this is what you say in effect:

"We hereby notify everybody that we do not expect to do business any more."

Municipal orders do not wait. All the 12 months, the municipalities are buying equipment and supplies and the "Gazette' advertisement will bring you results just as well as it will in March.

Keep up your advertising every month in the year if you expect to do business all the year round.

### REPUBLIC WEEK HOLIDAY

On the 26th January, 1950, our country is going to be declared as a Republic. In celebration of the memorable occasion there will be no issue of the 'Gazette' dated the 28th January. Our next issue will re-appear on the 4th February, which will include the 'Republic of India' and 'Netaji Birthday' supplements.

The Market Prices Current will be published as usual on the 28th January.

SARDAR VALLABHAI PATEL, DEPUTY PRIME MINISTER OF INDIA, AFTER ARRIVAL AT DUM DUM AERODROME

Dr. B. C. Roy (Extrême left) introducing Sardarji to the Ministers and Officials, who were present at the aerodrome to receive him.

(Second from right) Shri S. N. Ray, Administrative Officer, Calcutta Corporation.

# Sardar Vallabhai Patel in Calcutta

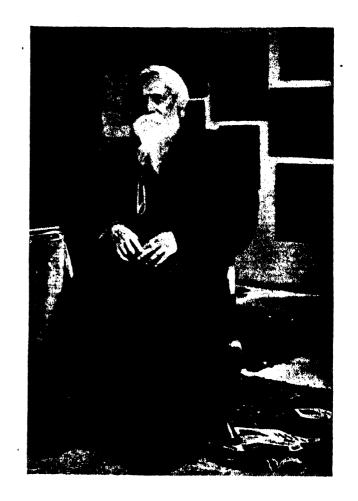

THE POET

AND

THE SEER

MISSION

OF THE

INDIAN REPUBLIC

With the Birth of the Republic, India's Struggle for Freedom has ended. And, this Freedom is not only Political but also Social, Economic, Cultural and Religious.

Now, the Mission of the Republic, of which the Poet dreamt and the Seer saw vision, is yet to be fulfilled. This Mission is to obliterate differences that exist in the world between man and man, between nation and nation, and between culture and culture.

# CALCUTTA—BIRTH-PLACE OF

# INDIAN NATIONALISM

CALCUTTA is not only the birth-place and the nursery of Indian Nationalism but also the most prominent of the battle-fields on which the war of India's liberation has been waged and won.

CALCUTTA was the place where was unfurled the flag of emancipation by Ram Mohun Roy, "the Father of Modern India," to whom must be traced every freedom movement,—religious and social, political and educational.

CALCUTTA established in 1843 Bengal British India Society—the first political association which furnished the model of similar institutions to other provinces in India.

CALCUTTA organized in the first National organization,—the Hindu Mela—in 1867.

CALCUTTA first sounded through the organ-voice of Surendranath Banerjea the trumpet of Nationalism rousing the sleeping country from one end to the other.

CALCUTTA first called in 1883 the meeting of the Indian National Conference,—the precursor of the Congress.

CALCUTTA gave the Indian National Congress its first President.

CALCUTTA claims the honour of being the home of the composer of India's National Authem:

IT WAS IN CALCUTTA that Swami Vivekananda called unto the manhood of India to "cast off fear" to be "hard as adamant and fearless as lions", and asked every one of his countrymen to look upon every Indian—poor, ignorant and lowly—as a brother.

IT WAS IN CALCUTTA that Rabindranath Tagore inspired his people to reject the bowl of the mendicant, preaching the Gospel of Selfhelp through his puissant prose and passionate poetry of purest patriotism.

IT WAS IN CALCUTTA that the Swadeshi Movement was inaugurated and the boycott of British goods first advocated.

IT WAS IN CALCUTTA that the BANDE-MATARAM, the organ of militant Nationalism, founded and first edited by Bipin Chandra Pal. declared for the first time the goal of India's political fulfilment to be "absolute autonomy, free of British control".

IT WAS IN CALCUTTA that Upadhyaya Brahmabandhav, founder-editor of the SANDHYA, charged with sedition, told the British law court that he was "not responsible to an alien bureaucracy which happens to rule India for his share in the God-ordained mission of Swaraj."

IT WAS IN CALCUTTA that Aurobindo first preached his new Gospel of Service and Sucrifice for the Motherland-"Work that she may prosper; suffer that she may rejoice."

IT WAS IN CALCUTTA that a National University was first established and where the Government-controlled University with the British Viceroy as its statutory Chancellor was utilized by one of her citizens, Asutosh Mookerjee, to serve the ends of National Education.

IT WAS IN CALCUTTA that the bomb was first made to be used as a political weapon, and it was from Calcutta that a Bengalee youth first went out on a mission that miscarried but made him the first martyr in the cause of the Motherland.

IT WAS IN CALCUTTA that another Bengalee youth ascended the scaffold for the first time with the name of the Mother on his smiling tips for the 'offence' of having shot an approver dead inside a British prisonhouse.

IT WAS IN CALCUTTA that Indian Nationalism unsettled the "settled fact" of the Partition of Bengal.

IT WAS IN CALCUTTA that the first Bengalee of our time planned and plotted to raise an insurrection with smuggled arms from abroad and went out to the jungles of Orissa to fall fighting the British.

IT WAS IN CALCUTTA that Mahatma Gandhi declared his War of Non-Co-operation with the British Government from the platform of the Indian National Congress.

IT WAS IN CALCUTTA that Chittaranjan Das who had given his all at the call of the Mahatma, unfurled his flag of opposition to the orthodox programme of Non-Co-operation and worked—valiant, daring, and prepared for the worst—till he made the Congress accept his programme and re-orientate its outlook; and

IT WAS IN CALCUTTA that saw Netaji Subhas ('handra Bose, that "Man of Destiny—before whose mind's eye rose the vision of a Free, United and Greater India as rose the vision of a New Jerusalem, before the rapt eyes of the author of the Apocalypse.

-AMAL HOME

### THE EMBLEM OF OUR REPUBLIC

The Emblem of our Republic, which is a replica of the Lion Capital at Sarnath, is a symbol of India's ancient and unique culture.

The symbol shows the profile of the Lion Capital as it exists to day. The crest of the Emblem consists of the three lions on an abacus which has in bas-relief the Dharma Chakra in the centre, a bull on the right and a horse on the left, and the out-lines of the Dharma Chakras on the extreme right and left. The bell-shaped lotus below the abacus in the sculptured Lion Capital has been omitted.

The motto Satyameva Jayate (Truth alone triumphs) in Devanagari script, is included underneath the crest. The motto is taken from India's ancient scripture—Mundaka Upanishad'. It embodies a cardinal principle of Mahatma Gandhi and is acceptable to men of all religions.

The Sarnath Lion Capital, which dates from the century B.C., is associated with Asoka, one of the most magnificent names not only in India's history, but in the history of the world. H. G. Wells wrote: "Amidst the tens of thousands of names of monarchs that crowd the columns of history, their

majesties and graciousnesses and serenities and royal highnesses and the like, the name of Asoka shines, and shines almost alone, a star."

The Asokan period in Indian history was essentially an international period. As Pandit Nehru has pointed out, this was a period when India's ambassadors were abroad "not in the way of empire or imperialism but as ambassadors of peace and culture and goodwill."

The Lion Capital was erected to mark the spot where Lord Buddha first proclaimed his gospel of Ahimsa and love to the four quarters of the globe.

The choice of the Sarnath Lion Capital as the crest of the Emblem of the new Republic of India highlights India's objectives of universal peace and brotherhood. It is in keeping with India's resolve to uphold her ancient heritage and spirit of toleration and the teachings of Mahatma Gandhi.

The Dharma Chakra in the abacus of the capital, which represents the Wheel of Law. embodies a great ideal—the Law, which is the king of kings, which even monarchs have to obey.

THE GOVERNMENT HOUSE, NEW DELHI

### CAPITAL OF THE REPUBLIC

### FUTURE ADMINISTRATION OF NEW DELHI

THE future set-up of Delhi formed the subject-matter of debate in the Constituent Assembly towards the beginning of August last. The debate centred round the question of special power of Parliament "to create or continue for any State, now centrally administered through a Chief Commissioner or Lieutenant-Governor, a body nominated or elected to function as a legislature for the State and a council of Advisers or Ministers. Many speakers advocated separation from Delhi province of New Delhi which should be directly administered by the Centre, while the rest of Delhi province should be annexed to East Punjab.

### FIVE PRINCIPAL OPINIONS

According to one opinion, for ages Delhi had formed part of Hariana district in East Punjab. It was, therefore, right and proper to merge Delhi with East Punjab. The capital of East Punjab could be located in Old Delhi. As for New Delhi it would be separated from old Delhi and left to the Central Government to make a model town of it. If this was not possible Delhi province should be given a real legislature in which the people of the province could have an effective voice.

According to a second opinion, so long as the citizens of Delhi were granted adequate voice in the day-to-day administration in the provincial

the second carries in the contract of the

subjects, there could be no serious objection to the form of the set-up.

According to a third opinion, New Delhi should be separated from Delhi province and the remainder merged with East Punjab. The people of Delhi would thus have an effective voice in the administration of the province. So far as New Delhi was concerned, it was built for Government purposes and most of the buildings belonged to the Government. There were foreign embassies too. The Central capital should, therefore, be administered directly by the Central Government.

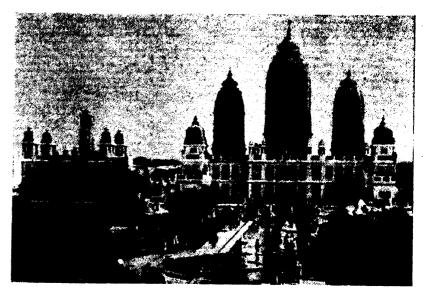

The Furit opinion supported the ptea for the merger of Delhi with East Punjab. 96 per cent of the people in the rural areas of Delhi would support merger. Of the urban population of Delhi more than 500,000 were Punjabi refugees who would like Delhi to be made part of East Punjab.

The fifth opinion stated that both New Delhi and Old Delhi and the rural areas now forming part of Delhi province should be made a separate province, enjoying as much freedom and democracy as existed in any other province. Delhi did not enjoy any democratic rights before freedom and Delhi's citizens were not going to accept anything that did not give them full freedom. Delhi had never formed part of the Punjab or the U. P. For centuries it had retained its separate and independent

THREE ]

This is India's newest temple and is the result of modern Indian achitect's efforts.

status. It had a civilization and history of its own and the question of its being a small province did not arise.

### TRANSFER OF THE CAPITAL

Delhi province, with an area, a little over 500 square miles, a population of about 2 million and an estimated revenue of Rs. 1,59,98,000 is, like Canberra, (Australia), despite its much greater population an entity which as a province has little reason to exist except that it is a seat of Government, wrote the Statesman editorially, following the Constituent Assembly debate; then it made the following survey of the physical growth and constitutional development of the city as the capital of the British Government in India. "The transfer of the capital from Calcutta, determined upon in 1911 and made effective several years later, led to detachment from the U.P. and what is now East Punjab, of a Government enclave comprising a relatively arid area with the city of Delhi, in sad decline, and a number of small villages. In the second decade of the century occurred the development of the northern side of Delhi city with the establishment of the first Viceregal Lodge—now the University Library-and the first Secretariat with attached dwellings. The three successive decades witnessed the foundation and rapid growth of the new city; the refugee influx of 1947-48 and its partial settlement have once again caused it to expand, this time somewhat westwards.

"Delhi province's population and property assets have therefore grown out of all knowledge since the days when nearly 37 years ago, it became a Centrally-administered area. Primarily "a city of clerks," Delhi has come to be not merely the seat of Government but the headquarters of its three Armed Services, of its radio system, and of most of the technical Services that now surround Governments. The cessation of the annual move to the hills has not only added greatly to its housing and conservancy problems, but has also finally established its national importance. Before independence, or at any rate before the war, it could be described as merely the administrative capital: now it is truly the political and national capital also.

### DELHI'S STATUS A PERPLEXITY

"Delhi's status has long been a perplexity, Both the U.P. and the Punjab (since partition, East Punjab) have cast and are believed still to cast—envious eyes upon it. Economically, Delhi is dependent on these provinces. The first move to secure administrative changes in the Capital began in 1927 when a Citizens' Committee was formed. It demanded the formation of a Delhi province comprising the present Centrally-administered area,

DELHI STREET SCENE

from the Minaret of Jumma Musjid, Delhi's great mosque.

the adjoining district of Ambala, and the Agra and Robilkhand Divisions in the U.P. The Corbit Scheme on these lines—prepared in 1930 by Mr. Corbit, i.c.s., was believed to have been approved both by Mahatma Gandhi and Quaid-i-Azam Jinnah, but was disapproved by Mahasabha and Sikh leaders. No further step was taken till 1947. when an Advisory Committee was set up to assist the Chief Commissioner. Three members are nominated and three elected, with one MCA representing Delhi. The Committee has only recommendatory powers, and it is felt to be derogatory that 2m people of the Capital province should live under so unrepresentative a regime. Nor can the system be said to be distinguished or particularly efficient."

### PANDIT NEHRU'S REPLY TO OPINIONS

Prime Minister Pandit Nehru replying to a short notice question by Lala Deshbandhu Gupta on the 22nd December last in Parliament as to whether the Government proposed to bring necessary legislation introducing a change in the future administrative set-up of the Delhi Province, announced that the Government of India had come to the conclusion that the administration of New Delhi should be kept separate from that of Old Delhi and the Notified Areas.

Pandit Nehru added that it was proposed that a corporation might be set up for the whole of the urban area, other than New Delhi and that this corporation should have the largest powers, but not including such powers and functions as law and order, judiciary, public health, Delhi University, and some like subjects. Government proposed to introduce legislation on this basis.

Pandit Nehru said that it was not possible for them to do so in the present session of Parliament for lack of time. But he assured the House that they would take an early opportunity of bringing forward this legislation.

"In the speech I delivered in this House on August 1, 1949, I pointed out that we could not bring legislation in regard to Delhi before the Constitution Act was passed or till the house enable us to do so in some other way."—said Pandit Nehru. He added, "I had expressed the hope then that we might be able to bring legislation in regard to Delhi in this present session of Parliament. Owing to the fact that the Constitution Act was finalized much later than was expected, there has been some delay in carrying out the assurance in regard to legislation for Delhi.

"Government have, however, given earnest consideration to this matter on several occasions. The position of Delhi, both the Old and New City, is in some ways unique, and it is difficult to treat it as any other part of India. It has been the desire of Government that the fullest autonomy should be given to Delhi. On the other hand, New Delhi presents special and peculiar problems which normally cannot

be dealt with in the ordinary way. Then there is a question of the large number of displaced persons who have come to Delhi in the course of the last two years or more.

"Having considered all aspects of this question, Government came to the conclusion that the administration of New Delhi should be kept separate from the administration of Old Delhi and the Notified Areas. It was proposed that a corporation might be set up for the whole of the urban area, other than New Delhi, and that this corporation should have the largest powers, but not including such powers and functions as law and order, judiciary, public health, Delhi University and some like subjects.

"New Delhi consisting as it does largely of official institutions, Government Offices and property owned by Government and foreign embassies, legations and chancelleries, should have a separate administration. It was further proposed that there should be a central authority for co-ordinating the activities of the Delhi Corporation and the New Delhi administration, as well as of any body which might be set up for the caral areas of Delhi.

"Government proposed to introduce legislation on this basis. It is not possible to do so in the present session of Parliament for lack of time as the session will end this week. But they hope to take an early opportunity of bringing forward this legislation."

Asked further by Shri Deshbandhu Gupta whether the Prime Minister could give an assurance to the House that legislation would be introduced at least in the coming Budget session, the Prime Minister said that it was very difficult for him to give any definite time-limit as he did not want to make any official commitment or give any such guarantee. But he said that the Government would introduce legislation as soon as possible.

### THE OFFICIAL CITY

The Government of India's decision, announced in Parliament to institute a Corporation comprising the urban section of Old Delhi under a separate authority undoubtedly disappointed some members. That Delhi should become a Lieutenant-Governor's Province with a Council of Ministers and a Legislature was recommended by an ad hoc Committee appointed by the Constituent Assembly under the chairmanship of Dr. Pattabhi Sitaramayya. This raised hopes of a more elaborate regime and, perhaps, of greater independence of the Central Government.

But such a plan would have involved more expense and demanded more administrative ability than the province could sustain. According to the Statesman, the provision of a separate administration for the new and old cities and combination of the old city with the notified areas seem justified.

(Continued on page Twenty)

# FIRST PRESIDENT OF THE REPUBLIC

## A SHORT CAREER SKETCH

DR. RAJENDRA PRASAD, the First President of the Indian Republic, was elected President of the Indian National Congress in 1932. The session of the Congress was to be held at Puri that year, but the second Civil Disobedience Movement had been launched a day before the appointed date on which the Congress session was to commence. He was again elected President in April, 1989, after Shri Subhas Chandra Bose had resigned from that post following disagreement with the members of the Congress Working Committee. In the Interim Government, which was formed after the decision of the British withdrawal from India he was appointed Member-in-Charge, Food and Agriculture.

In December, 1946, Dr. Prasad was elected as the permanent President of the Indian Constituent Assembly. In November, 1947, he was elected President of the Indian National Congress Committee in place of Acharya Kirpalini having resigned.

#### HIS EDUCATION

Born in Saran district, North Bihar, on December 3, 1884, Rajendra Prasad was the youngest son of the late Munshi Mahadev Sahaya. The boy received his early education in Hindi and Urdu, and passed the Entrance examination, in which he topped the list of successful candidates, from the Chapra Zilla School. Coming then to Calcutta, he joined the Presidency College, and successively passed the F.A., B.A. and M.A. examinations of the Calcutta University, topping the list every time. After working for some time as Professor in a Mozufferpur College, he came back to Calcutta for studying Law. Passing the Final Law Examination in 1910, he got himself enrolled as a member of the High Court Bar. He passed the M.L. examination in 1915, again at the top of the list of successful candidates. While practising in the High Court Bar he was also a Lecturer in the University Law College from 1914 to 1916. Later on the opening of the Patna High Court, he transferred his legal practice there, and soon became one of the leading lawyers of Patna. For erudition in law, at a later date the Allahabad University conferred the honorary Degree of LL.D. on him.

### HIS POLITICAL CAREER

His political career may be said to have begun during the Boycott movement in Bengal, in the early days of his legal practice in Calcutta. On the separation of Bihar from Bengal in 1912, he carried on an agitation there against the system of communal electorate introduced by the Morley-Minto reforms. When a separate University was established at Patna Rajendra Babu became a member of its Syndicate in 1917. It was through his efforts

that the Syndicate decided to provide for examination of students through the medium of their vernaculars.

It was in this year (1917) that he joined Mahatma Gandhi in his campaign of Satyagraha in Champaran to save the ryots from the grip of exploiting European Indigo Planters. In 1920 he presided over the Behar Provincial Conference held at Bhagalpore, in which a resolution was passed supporting the programme for Non-co-operation which Gandhiji had placed before the country. He then became Gandhiji's principal lieutenant in Behar for carrying on the movement.

### CONNECTION WITH MUNICIPALITY

In 1922-28 the Swarajist movement, started under the leadership of Deshabandhu Das and Pandit Motilal Nehru. absorbed a considerable portion of the vast following of the Congress in the country, and after sometime, Congressmen began participating in municipal administration. Following this practice. Rajendra Babu became the Chairman of the Patna Municipality in 1924. After sometime, however, he resigned owing to his differences with non-Congress Municipal Commissioners.

In 1925 Rajendra Babu presided over the Bihar Provincial Hindi Sahitya Sammelan held at Darbhanga and was also elected President of the All-India Kayastha Sabha that met at Monghyr-Jamalpur,

In March, 1928 he paid a visit to England in connection with the famous Dumraon Raj case. A considerable portion of the handsome remuneration that he got from his job as one of the counsels in this case, he gave to the funds of the Bihar Vidyapith. Throughout the time Rajendra Babu was in London, he used to be clad in Khaddar and never in any sort of foreign dress. He later toured the continent of Europe, visiting Vienna, Switzerland, etc.

### PRESIDENT OF THE CONGRESS

In the Civil Disobedience campaign of 1990 Rajendra Babu was incarcerated for a period of six months. In the second Civil Disobedience movement of 1982-98 he was incarcerated twice—once for six months in 1982 and again for a long period of fifteen months in 1983.

In 1982 came the greatest honour of his life bestowed by his countrymen on him up till then. He was elected President of the Indian National Congress that was to be held at Puri. The proposed Congress, however, could not be held as the Second Civil Disobedience campaign of 1982 had begun on the very day previous to that on which the Congress Session was to commence.

DR. RAJENDRA PRASAD
FIRST PRESIDENT OF THE REPUBLIC OF INDIA

Rajendra Prasad had by now well established his reputation as a journalist. He was a member of the Dawn Society of Calcutta since its very inception in 1907 under the guidance of late Satish Chandra Mukhopadhyaya, and he used often to contribute to the journal which was its mouthpiece. Soon afterwards he began contributing to other journals, Indian and foreign. In course of time, he became one of the founders of the Searchlight of Patna. He also brought out a Hindi weekly under the name, Desh. It, however, ceased publication sometime during the Non-Co-operation movement.

Besides being a journalist, Rajendra Babu is also an author. His more well-known works are his "Atma Katha," "Divided India" and "Gandhiji In Bihar."

### A FOLLOWER OF THE MAHATMA

As a result of a Gandhian style of living, Dr. Prasad has lived, for the last 80 years, a life of privation. As President of the Congress on three successive occasions, he undertook extensive tours throughout the length and breadth of India, and although they entailed not only much discomfort, but even serious illness, he carried them out at great personal sacrifice.

During his fifteen months' incarceration in connection with the second Civil Disobedience movement, Rajendra Babu came to contract a bad type of asthma and his health broke down. This caused his release on January 17, 1984, a month before the expiration of his term.

Rajendra Prasad's release almost coincided with an event which opened for him a new sphere of service to his countrymen. It was the unprecedented catastrophe that betell the people of Bihar in the shape of the great carthquake of January 15, 1984. In coping with the formidable problems of relief and rehabilitation in the vast devastated areas in Bihar. Rajendra Babu showed a capacity for hard work and a genius for organization and leadership. He became the President of the Bihar Central Relief Committee whose collections within a few months of its inception reached the neighbourhood of Rs. 30 lakhs.

Shortly after this Rajendra Babu was elected President of the Forty-eighth session of the Indian National Congress held in Bombay in 1984.

In 1985 Rajendra Babu worked as President of the Quetta Central Relief Committee which was formed after a major earthquake had laid in ruins large tracts of land in Quetta District.

In July, 1986, as the Working Committee of the Congress Parliamentary Board was formed at Wardha with Sardar Patel as its Chairman, Rajendra Babu became one of its members. The Board had to face a tremendous task in connection with the elections to the provincial legislatures that were to be constituted early in 1987 with the inauguration of the Government of India Act of 1985.

### Congress President Again

In April, 1989, Rajendra Babu became President of the Indian National Congress—after Netaji

(then Shri) Subhas Chandra Bose had resigned.

In June, 1941 Rajendra Babu laid the foundation stone of a shipbuilding yard at Vizagapattam which was the first of its kind in India.

On August 9, 1942, Rajendra Babu was arrested together with other members of the Congress Working Committee in connection with the famous "Quit India" resolution passed by this Committee at its meeting on the previous day (August 8) in Bombay. He was released on June 15, 1945.

As the Interim Government came to be formed on August 24, 1946, Dr. Rajendra Prasad was appointed its Member-in-Charge of Food.

### FIRST PRESIDENT OF THE REPUBLIC HIS FIRST ADDRESS TO THE NATION

This is a memorable day in our annals. Let us begin with offering our thanks to the Almighty Power, to the Father of the Nation who showed us and the world at large his infallible method of satyagraha and led us on along it to freedom, and to the numberless men and women who by suffering and sacrifice have rendered the attainment of independence and the establishment of this sovereign democratic Republic of India possible.

"To-day, for the first time in our long and chequered history, we find the whole of this vast land from Kashmir in the north to Cape Comorin in the south, from Kathiawar and Cutch in the west to Cocanada and Kamrup in the cast, brought together under the jurisdiction of one constitution and one union, which takes over the responsibility for the welfare of more than \$20 million men and women that inhabit it. Its administration will now be carried on by its people and for its people.

"This country has great natural resources and now has come to it the great opportunity to make its rast population happy and prosperous and to make its own contribution to the establishment of peace in the world."

On December 11, 1946, Dr. Prasad was elected as the permanent President of the Indian Constituent Assembly. He was also elected President of the All-India Congress Committee on November 17, 1947 in place of Acharya Kripalani who resigned. On December 31, 1947. Dr. Prasad resigned his position as Food Minister of the Government of India. He, however, continued as President of the Congress till October 25, 1948. Since then he deveted himself solely to the work of the Constituent Assembly.

On January 24. 1950. Deshratna Rajendra. Prasad, as his countrymen lovingly call him, had the crowning glory of his life when he was elected the First President of the sovereign Republic of India.

SEVEN

# CONSTITUTION OF THE INDIAN REPUBLIC

By

BINOY JIBAN GHOSH. (Offg.) Secretary to the Corporation of Calcutta.

In the midst of the solemn observances of the most momentous and memorable day which will witness the glorious re-birth of our great and ancient land, it may not be altogether inappropriate to take a rapid view of a few salient features of the Constitution of the Indian Republic on the historic day of its inauguration.

Federal Democratic Republic

The Preamble speaks of the constitution of a Sovereign Democratic Republic. The juxtaposition of the word 'Sovereign' is curious, and its introduction here can only be explained as an attempt to contradistinguish our newly won independence from our former dependent status. Sovereignty is the attribute of the State, and a cardinal concept of international jurisprudence. For the purposes of my brief cutechism of the Constitution. I would like to speak of the State envisaged in the Constitution as a Federal Democratic Republic.

THE WRITER

on closer analysis, it seems to me, that the State embodied in the Constitution of Bharat is really a unitary state concealed under the form of a federation.

Nevertheless, it would be ridiculous to deny that the desire to maintain "limited independence" of the Units was altogether absent. The clamour for

creation of separate provinces and for redrawing of the boundaries of existing ones is daily growing louder and more persistent. But here also one may ask whether the creation of the federation is the product of separatism, or vice versa. We know by bitter experience the results of the analogous case of adoption of separate electorates which opened the flood-gates to communalism. The Communal Award made communalism politically a paying proposition for many; federalism may turn parochialism, or provincialism into a profitable political racket for others. Federalism is bound to accentuate localism to some extent.

**F**ederation

The first article of the Constitution declares "India, that is Bharat, shall be a Union of States." Let us, therefore, touch on the leading characteristics of the federal aspect of our Constitution. Dicey lays, down, as an absolutely essential condition for the foundation of a federal system, that there must be on the part of the constituent units a desire for union but no desire for unity. If we pay due regard to the facts of the Indian situation we cannot categorically assert that there was no desire on the part of the peoples of the British Indian provinces, or the Native States for unity. They would have objected little to union within a Unitary State, if the wind of events had blown that way. Indeed,

Distribution Of Powers Between The Federation And The States

So we have in form, at least, a federal Constitution. But what sort of federation? It is customary with Constitutional experts to classify federal states into two types according as either definite powers, or residuary powers, are vested in the federation or the States. Dicey in his Law of the Constitution directs special attention to this principle of the division of powers in a federal State. He had before his mind principally the constitution of the United States with its list of Delegated, Concurrent, Reserved and Prohibited powers compressed within the short compass of Sections 8, 9 and 10 of Article I, together with Amendment X, which says "The powers not delegated to the United States by the

[BIGHT]

Constitution, nor prohibited by it to the States, are reserved to the States respectively or to the people."

Had the Savants on Constitutional Law before them a copy of the new Constitution of India they would not have, I am tempted to think, attached such significance to the location of residuary powers in a federation as they have done heretofore. The allocation of powers is made under Art. 246, and detailed in three separate lists which constitute the Seventh Schedule. The powers conferred on the Federation are stated in List I—Union List; those given to the States are detailed in List II—States

### A REAL REPUBLIC

### THREE POINTS OF EXCELLENCE

"The excellence of the Constitution lies in the conferment on the people of fundamental rights and adult franchise and the abolition of the system of communal election.

The first thing about the Constitution is that it has been made for India by Indians. After ages India is asserting herself without depending on anybody else.

"No other Constitution in the world is so voluminous as India's. But this hugeness is necessary for the rastness of India and the diversity of her culture has made her Constitution a huge one.

In my opinion the provision for adult franchise is the most democratic feature in the Constitution. It establishes the dignity of the Indian masses and this will ultimately lead to the making of a real republic. But adult franchise is a very important weapon and it requires well-regulated use. To acquire this sense of order is necessary a system of real education. Under the present circumstances India's first slogan should be that we will educate all citizens and kindle in them a sense of responsibility, humanity and citizenship. We must educate our masters.

—SHRI C. C. BISWAS,

Vice-Chancellor of Calcutta University, speaking from the Calcutta Station of the All-India Radio on the night of the 25th January last.

List; powers shared by both are delineated in List III—Concurrent List. The enumeration of subjects of State activity in the Seventh Schedule is so elaborate and exhaustive that the residue of possible or conceivable functions of a State left out of the three lists must indeed be infinitesimally small. The residuary powers constitute a negligible and vanishing quantum. I will try to give an idea of how full is the measure of listed subjects in a more concrete way. The Union List covers 96 subjects, the State List 66, and the Concurrent List 47. As I am writing this, I

have before me a text-book on the Constitution and Government of the United States, in which the entire Constitution of the U.S. A., together with the

### "INDIA REBORN"

### PRESENT CONSTITUTION UNPRECE-DENTED IN OUR NATIONAL HISTORY

T wonder whether we Indians ourselves recognize the vastness of the undertaking to unich we are setting our hand today. A Republic of any magnitude is something suprecedented in our national History. There may have been here and there, and now and then, comparatively insignificant self-governing Republies, small in size and population, in uncient India, otherwise personal and dynastic thic was the normal feature of our political life. But here are we today in a world torn with conflict setting up a vast Republic in which 320 million of men and women and children agree to rule themselves under a Constitution framed by their own representatives which quarantees complete equality to every citizen before the law school any distinction of race, creed or colour and in which there are no disabilities on the ground of religious belief, and the rule of law gives complete and equal protection to every citizen.

"In India of the past the social structure divided into different compartments, by its inherent defects led to repeated disasters. Masses of men and women having no share in political power became indifferent to its political independence and integrity. Now franchise shall immediately make the people at large conscious of their political rights and power and awaken them to a sense of responsibility for safeguarding the integrity and Independence of India. The common people will have now something worth fighting for and will be prepared to make every sacrifice and defend the country against external aggression or internal disturbance. The future destiny of India lies now in their hands. Prayers will go forth on this great day from every hearth and home in this great land of ours that this "India Reborn" may attain great heights and flourish and prosper not only for the peace and well-being of her people but also for the well-being of the world at large."

### H. E. DR. KAILAS NATH KATJU.

Governor of West Bengal, speaking from the Calcutta Station of the All-India Radio on the night of the 25th January last.

21 Amendments adopted up to 1941, are given in twenty pages printed in medium types. In the

Constitution of India the Seventh Schedule alone runs into 15 pages—pages 236—250.

Residuary Powers

As it is, the residuary power in the Indian Constitution is vested in the federal, or central Legislature by Art. 248 which states: "(1) Parliament has exclusive power to make any law with respect to any matter not enumerated in the Concurrent List or State List. (2) Such power shall include the power of making any law imposing a tax not mentioned in either of those Lists." Further, the 97th and last item on the Union List repeats the same provision—"Any other matter not enumerated in List II or List III including any tax not memtioned in either of those Lists."

Citizenship: Danger of Divided Allegiance

We may here digress a bit, and consider the question of Citizenship under the Indian Union. A. V. Dicey says that the most serious, and the most inevitable of the weaknesses attaching to federalism is that it creates divided allegiance. The duty of allegiance is the counterpart of the status of Citizenship. The first sentence of the first section of the Amendment of the American Constitution 14th states: "All persons born or naturalised in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside." This provision creates dual citizenship, and as a corollary, divided allegiance. Part II of the Indian Constitution deals with the subject of Citizenship. This part throughout speaks of "a citizen of India", and nowhere, either in this part, or in the 395 Articles, and 8 Schedules of the Constitution of India is there the least hint or trace of a dual citizenship. The danger of divided allegiance cannot arise, though the individual Indian citizen may not be able always to avoid the less difficult dilemma of divided attachment between his own State and the Union.

Control of the Federal Government over the States

Leaving aside for the moment the consideration of the question of the powers of the Judiciary over the enactments of the federal legislature—a topic to which we will revert when discussing Fundamental Rights—let us now examine the extent of the control exercisable by the Federal Government over the legislative and executive actions of the States. Part XI of the Constitution deals with Relations between the Union and the States. Art. 254 says "If any provision of a law made by the Legislature of a State is repugnant to any provision of a law made by Parliament which Parliament is competent to enact \* \* \* the law made by Parliament, whether passed before or after the law made by the Legislature of such State \* \* \* shall prevail and the law made by the Legislature of the State shall. to the extent of the repugnancy, be void." article provides the solution in the case of conflicts between Union and State laws on matters mentioned in the Concurrent List.

DR. RAJENDRA PRASAD FIRST PRESIDENT OF THE INDIAN REPUBLIC

More important still are the articles which empower Parliament to legislate with respect to a matter in the State List in certain eventualities, viz.

Art. 249—When any matter on the State List assumes national importance—"if the Council of States has declared by resolution supported by not less than two thirds of the members present and voting that it is necessary and expedient in the national interest that Parliament should make laws with respect to any matter enumerated in the State List specified in the resolution.

Art. 250—When a Proclamation of Emergency is in operation—"Parliament shall, while a Proclamation of Emergency is in operation, have power to make laws for the whole or any part of the territory of India with respect to any of the matters enumerated in the State List."

Art. 253—Power of Parliament to legislate on any matter for giving effect to international agreements.

Emergency Provisions

Next, we shall touch upon a few articles which occur in Part XVIII—Emergency Provisions. In

# THEY DRAFTED THE CONSTITUTION OF THE INDIAN REPUBLIC

Dr. B. R. Ambedkar.

Shri Alladi Krishnaswami Ayyar.

Shri N. Gopalaswami Ayyanger.

Janab Mohd. Saadullah.

Shri K. M. Munshi.

Shri T. T. Krishnamachari.

# MAKING OF THE DRAFT CONSTITUTION.

Members of the Constituent Assembly—308.

Number of Sessions—11.

Total Expenditure on the Constituent Assembly—Rs. 63,96,729.

Draft Constitution Presented to the Constituent Assembly contained 315 Articles and 8 Schedules.

Final Draft Cantains 395 Articles and 8 Schedules.

Total Number of Amendments moved—2,473.

fact, a Proclamation of Emergency acts like dropping down a sluice-gate which dams up completely the thin stream of federalism, and makes the entire current of State activities flow through one central channel, transforming the Indian federation into a unitarian administration.

Art. 352 declares—"If the President is satisfied that a grave emergency exists whereby the security of India or of any part of the territory thereof is threatened, whether by War or external aggression or internal disturbance, he may by Proclamation, make a declaration to that effect."

We have already dealt with the effect of a **Proclamation** of Emergency on the Legislatures of States vis-a-vis the Parliament.

Art. 353 states: "While a Proclamation of Emergency is in operation, then

(a) Notwithstanding anything in the Constitution.

the executive power of the Union shall extend to the giving of directions to any State as to the manner in which the executive power thereof is to be exercised."

# FUNDAMENTAL RIGHTS OF THE PEOPLE IN THE CONSTITUTION

Right to Equality.

Right to Freedom.

Right Against Exploitation.

Right to Freedom of Religion.

Cultural and Educational Rights.

Right to Property.

Right to Constitutional Remedies.

So also in the event of failure of the Constitutional machinery in any State (Art. 856), "the President may by Proclamation—

- (a) Assume to himself all or any of the functions of the Government of the State.
- (b) Declare that the powers of the Legislature of the State shall be exercisable by or under the authority of Parliament."

Art. 360 provides for Financial Emergency:

"It the President is satisfied that a situation has arisen whereby the financial stability or credit of India or any part of the territory thereof is threatened, he may by a Proclamation, make a declaration to that effect."

"During the period of any such Proclamation the executive authority of the Union shall extend to the giving of directions to any State to observe such canous of financial propriety as may be specified in the directions."

The Proviso to Art. 162 states "that in any matter with respect to which the Legislature of a State and Parliament have power to make laws, the executive power of the State shall be subject, and limited by, the executive power expressly conferred by this Constitution or any law made by Parliament upon the Union or authorities thereof.

But we shall see later that the strongest check by the Union over the States devised in the Constitution is through the office of the President of the Republic.

Allocation of Finance between the Federation and the States

This is done in Part XII. We shall deal only with the main provisions. Apart from their own sources of revenue, the proceeds of certain Union duties and taxes are assigned either wholly or in part to the States. Art. 268 assigns to the States stamp duties and duties of excise on medicinal and toilet preparations. Art. 269 assigns to the States the proceeds of six other duties and taxes levied and collected by the Union. Art. 270 provides that the proceeds of the Income-tax are to be distributed between the Union and the States. Art. 278 lays down that for a period of ten years the States of Assam. Bihar, Orissa and West Bengal are to receive annual grants-in-aid from the Union in lieu of a share of the export duty on jute and jute products.

### Federal Executive—The President

We shall, next, discuss the distribution of powers among the three branches of the Government the Executive, the Legislature, and the Judiciary.

There shall be a President of India" (Art. 52), and Art. 53 says, "The executive power of the Union shall be vested in the President". The words of Art. 53 of our Constitution are an exact repetition of the words of the first sentence of Art. II of the American Constitution. Nevertheless, the Constitution of India does not establish Presidential Government. The external form may be American, the core is British, and we have a

[ELEVEN]

Parliamentary Executive. This will be obvious from the following.

The President himself, on the British model of King-in-Parliament, is a part of Parliament. Art. 79 says—"There shall be a Parliament for the Union which shall consist of the President and two Houses to be known respectively as the Council of State and the House of the People". Clause (3) of Art. 75 lays down: "The Council of Ministers shall be collectively responsible to the House of the People." Clause 3(b) of Art. 53 states: "Nothing in this Article shall prevent Parliament from conferring by law functions on authorities other than the President."

### Election Of The President

The President shall be elected by the members of an electoral college consisting of (a) the elected members of both Houses of Parliament, and (b) the elected members of the Legislative Assemblies of the States (Art. 54), in such a manner as to secure uniformity of representation among the States inter se as well as parity between the States as a whole and the Union (Art. 55). This is the most complicated article in the whole Constitution. I will try to explain it by a concrete illustration of the calculation and process involved. Supposing the total population of West Bengal is two Crores and twenty-five lakhs and the total number of the elected members of the West Bengal Legislative Assembly is 250. Then by dividing the population of the State by the total number of elected members we get the quotient 9,000. Every elected member of the West Bengal Legislative Assembly shall have nine votes (as many votes as many thousands in the quotient obtained as above) to cast in the election of the President. The total number of votes to be cast by all elected members of the West Bengal Legislative Assembly will then come to 2250. Suppose, next, that the total number of votes to be cast by the elected members of the Legislative Assemblies of all the States Indian Union come to 45,000 (forty-five thousand). Now suppose the total number of elected members of the two Houses is 750. Then each elected member of Parliament will have 60 votes (45,000 divided by 750) to cast in the Presidential election. All the elected members of the Assemblies of all the States will have together a total of 45,000 votes. All the elected members of Parliament together will have the same total of 45,000 votes.

The election of the President shall be held in accordance with the system of proportional representation by means of the single transferable vote, tendered by ballot.

The President shall hold office for five years. He may, for violation of the Constitution, be removed from office by impeachment.

### Powers Of The President

I have already said we will not have a Presidential system of Government under the

"There is a peculiar appropriateness about this January 26, for this day links up the past with the present, and this present is seen to grow out of that past. Twenty years ago we took the first pledge of independence. During these 20 years we have known struggle and conflict and failure and achievement. The man who led us through apparent failure to achievement is no more with us, but the fruit of his labours is ours. What we do with this fruit depends upon ourselves. The progress of a nation is dependent upon many factors, the basic factors are those on which Gandhiji laid stress throughout his career-high character, integrity of mind and purpose, a spirit of tolerance and co-operation and hard work. I can only suggest to our people that we should found our republican freedom on these basic characteristics and shed foar and hatred from our minds and think always of the betterment of the millions of our people.

"We are fortunate to witness this emergence of the Republic of India and our successors may well envy us this day, but fortune is a hostage which has to be jealously guarded by our own good works and which has a tendency to slip away if we slacken in our efforts or if we look in wrong directions.

"January 26, 1950 is a day of high significance for India and the Indian people. It does mean the consummation of one important phase of our national struggle. That journey is over, to give place to another and perhaps more arduous journey. A pledge is fulfilled and every fulfilment of a pledge gives satisfaction and strength for future endeavour.

Thus said Pandit Jawaharlal Nehru, Prime Minister of India, in the course of a broadcast talk to the people of India on the eve of the Proclamation of India as a Republic.

[ TWELVE ]

"We worked hard to achieve our freedom. We shall have to strive harder to justify it. Let us resolve to play our true and active role of responsible citizens of a free country which has yet to stand on its feet and to attain its full stature.

"Exactly twenty years ago today, the people of India took a solemn pledge of complete independence. Behind that pledge was the determination of a whole people and the strength which comes of faith in one's desting. Although we obtained independence on Aug. 15, 1947, it was not complete in the sense of the pledge that we took. Today, by the grace of God, that pledge has been completely fulfilled.

"The day on which India attains republican status will be written in letters of gold in its history. With the disappearance of all traces of foreign rule, we become in law and in fact our own masters, and it will be now for us to make or mar our future. It will, however, take time for us to recover from centuries of exploitation and bondage: considerable sacrifices will yet be necessary before sufficient quantity of fresh blood can flow in India's veins.

"We worked hard to achieve our freedom. We shall have to strive harder to justify it. Let us not, therefore, celebrate this occasion with any light heart. On the other hand, let us resolve to play our true and active role of responsible citizens of a free country which has not to stand on its feet and to attain its full stature. May Divine guidance and bounty be with us all."

Thus said SARDAR PATEL, Deputy Prime Minister, in a message to the nation on the eve of the Declaration of India as a Republic.

Constitution of India. But the Indian President shall not be like the French President, who neither rules nor reigns. He will be midway between the English King and the American President, partly reigning partly ruling. He will wield extensive powers. He has been given the right to nominate 12 members of the Council of State from among persons having special knowledge or practical experience of matters in respect of Literature, Science, Art. and Social Service (Art. 80). Besides the formal powers of the right of pardon, the right in respect of summoning, prorogation, or dissolution of Parliament, the President has been given the power, on the analogy of the British Address from the Throne, of addressing the Houses of Parliament, and also, on the model of the U.S. A., the right to send messages to Parliament (Art. 86). Before giving his Assent, the President may return any Bill which is not a Money Bill to the Houses for reconsideration. (Art. 111). The President has the power to promulgate Ordinances during recess of Parliament (Art. 128). The financial powers of the President are considerable. No demand for a grant shall be made except on the recommendation of the President. (Art. 118). No bill or amendment which imposes or varies any tax or duty in which States are interested shall be introduced or moved in either House of Parliament, except on the recommendation of the President. (Art. 274). The President is to constitute the Finance Commission which shall consist of a Chairman, and four other members to be appointed by the President. (Art. 280). (For further powers of the President see Post-Special procedure regarding Money Bills).

### State Executive---Governor

We have already dealt with the Emergency powers of the President. But it is the very real powers of the President over the administration of the States that gives almost a unitary character to the Indian Federation. The Governor of a State shall be appointed by the President, and he shall hold office during the pleasure of the President. (Articles 155 and 156). Not to speak of the U. S. A., where the Governor is always elected by the people of the State, even the draft prepared by the Drafting Committee and submitted to our Constituent Assembly provided for the election of the Governor by the direct vote of all who are entitled to vote at a general election of the Legislative Assembly of the State, or alternatively, for nomination by the President out of a panel of 4 persons to be elected by the Legislature of the State. The elimination in the final form of this modicum of popular election provided for in the alternative of the Drafting Committee is clear proof of how the members of the Constituent Assembly gravitated towards a Unitarian system even in course of framing the Constitution. When we remember that the Governor cannot be removed by any process of impeachment, and that he wields almost the same powers in a State as the President

[THIRTEEN]

does in the Union, we realise the importance of this power of the President, and its consequences by way of central control over the State administration. The Governor shall reserve for the consideration of the President any Bill passed by the Legislature of a State if he thinks such a Bill will derogate from the powers of the High Court. (Art. 200).

#### Vice-President

There shall be a Vice-President, (Art. 68) who, on the American model, shall be ex-officio Chairman of the Council of States, and act as President in a case of vacancy, or in the absence of the President. (Art. 64). The Vice-President shall be elected by ballot at a joint meeting of both Houses of Parliament by the method of proportional representation by means of the single transferable vote. (Art. 66).

### Council of Ministers

"There shall be a Council of Ministers with the Prime Minister at the head to aid and advise the President in the exercise of his functions". (Art. 74). The Conventional position of the British Prime Minister who is regarded as "the keystone of the Cabinet Arch". (Morley's Walpole) has been made explicit in Art. 75 of the Constitution which says—

"The Prime Minister shall be appointed by the President and the other Ministers shall be appointed by the President on the advice of the Prime Minister."

There is a similar provision in the case of the States for a Council of Ministers with the Chief Minister at the head to aid and advise the Governor, "Except in so far as he is by or under the Constitution required to exercise his functions or any of them in his discretion". (Art. 168). This exception is a legacy from the Government of India Act. 1985. (Vide Section 50).

### Federal Legislature—Council of States

The Federal Legislature shall consist of two Houses—the Council of States, and the House of the People. Besides the 12 members to be nominated by the President (See Ante) the Council of States shall consist of not more than 288 representatives of the States as per allocation of seats in the Fourth Schedule. The representatives of each State shall be elected by the elected members of the Legislative Assembly of the State by the system of proportional representation. (Art. 80). The Council of States shall not be subject to dissolution, one-third of the members retiring and being replaced every second year. (Art. 83).

### House of the People

The House of the People shall consist of not more than 500 members directly elected by the voters in the States through territorial constituencies so formed as to ensure there shall not be less than one member for every 750,000 of the population and not more than one member for every

### SOME GREETINGS AND GOODWISHES

Warmest congratulations and good wishes for the welfare and prosperity of the great country of India.

Ireland has always looked with special sympathy and profound admiration to India's long and arduous struggle towards independence, and we share in the country's rejoicing.

—Premier of Eire. (Mr. Costello).

On this historic day, when India becomes a Republic within the Commonwealth of Nations, I send this message of greetings and goodwill. Today our hearts are full of affection for the people of India and of hope for the greatness of India's contribution to the progress and happiness of mankind.

—British Secretary of State for Commonwealth Relations.

(Mr. Noel-Baker).

I was so closely associated with the transfer of power from British to Indian hands and with the early stages of India's independence that my thoughts will be more than ever with India when the final stage is reached and she becomes an independent sovereign republic on January 26, 1950, 894 days after her independence.

-- LORD LOUIS MOUNTBATTEN, Last British Governor-General in India.

My felicitations on the occasion of the coming into effect of the Constitution of the Union of India and the inauguration of its republican form of Government within the framework of the Commonwealth. The accomplishments of independent India, not the least of which is the adoption of its Constitution, have been many. It is our fervent hope the memorable occasion, which is being celebrated today, will mark not only this latest development in India's political transition, but also the beginning of an era in which those problems still remaining will be settled.

I am happy to send this message of goodwill to India knowing that it is engaged in a common endeavour to promote international peace and to maintain just and honourable relations among nations.

-U. S. SECRETARY OF STATES. (Mr. Acheson)

500,000 of the population. (Art. 81). The House of the People, unless sooner dissolved, shall continue for 5 years.

[FOURTEEN]

### SOME GREETINGS AND GOODWISHES

The bonds that unite India and Ceylon are ancient and manifold and we are confident they will be further strengthened and added to in the coming years.

We are particularly glad that India will continue to be associated with Ceylon in the Commonwealth and look forward to friendly, fruitful co-operation in the pursuit and promotion of the high ideals for which the Commonwealth stands.

—Premier of Ceylon. (Mr. Senanayake).

The significance of the day of Declaration of India as a Republic extends far beyond the borders of the country. Three hundred and fifty millions of people, one-quarter of the population of mankind, are now girding themselves under a new political form and constitution to meet the manifold difficulties and use the potential opportunities of our time. May every blessing accompany their adventure.

Canada's greetings are the happier for the knowledge that India's new status as a free and sovereign Republic will not separate her from our Commonwealth of Nations. Spread over five continents as we are, I hope that we can maintain in this Commonwealth that social and friendly association which by its closuress, as well as by the varied contracts and neighbourly contacts of its members, can make a very special contribution to the worldwide tasks of peace.

We like also to note that India's new constitution continues a tradition that has been peculiarly associated with the democratic development of all of us in the Commonwealth, namely, the doctrine and practice of responsible parliamentary Government, which helps so much to link the freedom of the individual with the stability and progress of the State.

—Canadian Secretary of State. (Mr. L. B. Pearson).

It is a source of satisfaction that the Indian Republic is to continue to be a member of our Commonwealth of Nations. We look forward to the continuance of the closest and most friendly relations between our two countries.

-British Prime Minister. (Mr. Clement Attele).

Legislative Procedure

A Bill must be passed by both Houses of Parliament and receive the Assent of the President

before it becomes law. Art. 108 provides for the procedure to be adopted when the two Houses disagree on any Bill which is not a Money Bill. The President shall summon both Houses at a joint sitting. If, at the joint meeting, the Bill be passed by a majority of the total number present and voting, it will be deemed to have been passed by both Houses.

Special Procedure Regarding Money Bilts

Art. 110 defines what is to be deemed a Money Bill. Art. 109, read with Art. 117, provides for the following:—

A Bill involving expenditure from the Consolidated Fund of India shall not be passed unless the President has recommended consideration of it.

A Money Bill shall not be moved except on the recommendation of the President, nor shall it be introduced in the Council of States.

With respect to a Money Bill, the only power given to the Council of States is to make recommendations, and that within fourteen days from date of receipt of the Bill. If more than 14 days clapse, or the recommendations be not accepted by the House of the People, the Money Bill shall be deemed to have been passed by both Houses in the form in which it was passed by the House of the People.

State Legislature

The Legislatures of the States of Bihar, Bombay, Madras, Punjab, the United Provinces, and West Bengal shall be bicameral with a Legislative Council and a Legislative Assembly. The Legislatures of the other States shall be unicameral with only a Legislative Assembly. (Art. 168). But Legislative Councils in States may either be created or abolished by law of Parliament, and such a law shall not be deemed an Amendment of the Constitution. (Art. 169).

The Legislative Assembly of a State shall consist of not more than 500, and not less than 60 members chosen by direct election, and the representation shall be on the scale of not more than one member for every seventy-five thousand of the population. (Art. 170).

Subject to a minimum of forty members the total strength of a Legislative Council shall not exceed one-fourth of the Legislative Assembly. The Legislative Council shall be composed as follows:—

- $(\sigma)$  One-third to be elected by the local bodies of the State,
  - (b) One-twelfth by Graduates of three years standing.
- (c) One twelfth by teachers of educational institu-
- (d) One-third to be elected by members of the Legis-
- (e) One sixth to be nominated by the Governor from among men of letters, science, etc. (Art. 171).

[FIFTEEN]

# SOME OF THE MINISTERS OF THE REPUBLICAN GOVERNMENT OF INDIA

RAJKUMARI AMRIT KAUR (Health)

DR. B. R. AHMEDKAR (Law)

DR. S. P. MOOKERJEE (Industry and Commerce)

The Legislative Council shall not be subject to dissolution. One-third of the members shall retire every second year, and be replaced by others. The duration of a Legislative Assembly shall be five years. (Art. 172). The provisions regarding pro-

cedure, etc., are similar to those enumerated in the Federal part.

Judiciary: Supreme Court of India

In every State, the power and authority exercised by the Judiciary depends largely on the independence of character and legal ingenuity displayed by the occupants of the Bench. Whether the Supreme Court of India will become ultimately "the master of the Constitution" will be determined largely by the fact whether our Judges will

# INAUGURATION OF FIRST PRESIDENT'S

We must rededicate ourselves on this day to the peaceful but sure realization of the dream that had inspired the Father of our Nation and the other captains and soldiers of our freedom struggle, the dream of establishing a classless co-operative, free and happy society in this country. We must remember that this is more a day of dedication than of rejoicing, dedication to the glorious task of making the peasants and workers, the toilers and the thinkers fully free, happy and cultured.

We must not forget even for a moment, that ours is a tremendous responsibility, the responsibility of earrying into each cottage and home of this country, the message of cheer and culture, of freedom and prosperity, of life and light.

We must remember that our ancestors are wistfully looking to us for the completion of the mission which history and Providence are placing on our shoulders on this historic day. With firm resolve, with clear vision, with steady steps, we must march forward to the fulfilment of this glorious mission.

No one, whether aged or young, man or woman, believer or non-believer, must fail or falter or fall away from the line. Our people need the contribution of each and all, the experience of the aged and the energy of the uouth, the strong resolve of warriors and the tender care of the sisters.

We must remember that our future is in our hands and it shall be what we make of it. We must all throw ourselves into unceasing and

be able—and I have no doubt the answer will be "Yes"—to rise to heights of such legal courage as attained so often by American and British Judges like Judge Marshall and Chief Justice Denman, in Stockdale -vs.- Hansard.

"There shall be a Supreme Court of India consisting of a Chief Justice of India and seven other Judges" (Art. 124). The judges shall be appointed by the President, and shall hold office until the attainment of the age of 65 years. In

[SIXTEEN]

appointing the judges, including the Chief Justice of India, the President may consult the sitting judges of the Supreme Court and the High Courts and in case of the appointment of other Judges the Chief Justice of India shall always be consulted.

"A judge of the Supreme Court shall not be removed from his office except by an order of the President after an address by each House of Parliament supported by a majority of the total membership of that House and by a majority of not less than two

# REPUBLIC OF INDIA MESSAGE TO L'EOPLE

incessant creative activity in the farms and the factories, in the school rooms and the laboratories, in the council chambers and the administrative offices. Let not a minute, nay, even a second, be wasted in idle patter or destructive action, and, God willing, ours shall be a country full of milk and honey in the near future.

"It was on January 26, 1930 that we had met under the summons of the Indian National Congress in the rillages and towns of this great country to pledge ourselves to the realization of complete independence for our people. Twenty years of listing and adventure, of struggle and success, have passed since that day, and we gather again in the cities and the rillages to celebrate the fulfilment of that solemn pledge and the realization of that g'orious dream.

"India to-day becomes a sovereign democratic Republic. In this solemn hour, it is
our duty to render thanks to the beneficent
Providence which has guided our steps and
lighted our path in this adventure of freedom.
We must respectfully remember the Father of
the Nation, our beloved Bapu, who ha his
magic mantram inspired a new life and kindled
a new hope in our wears limbs and despondent breasts and who, authoring the scattered
trasments of our people into a spiritual unity,
led them forward from the dark valley of
slavery to this glorious temple of freedom.

"We owe homage to the many men and women, old and young, who fell martyrs in our struagle for freedom."

thirds of the members of that House present and voting has been presented to the President in same session for such removal on the ground of proved misbehaviour or incapacity."

The Supreme Court shall have original jurisdiction in any dispute between the Government of India and a State, and between two or more States "if and in so far as the dispute involves any question (whether of law or fact) on which the existence

# SOME OF THE MINISTERS OF THE REPUBLICAN GOVERNMENT OF INDIA

(Posts & Telegraphs)

DR. J. MATHAI (Railways)

SHRI JAGJIBANRAM
(Labour)

or extent of a legal right depends." (Art. 131). The Appellate jurisdiction of the Supreme Court shall be as follows. An Appeal shall lie to the Supreme Court from any judgment, decree, or final order of a High Court.

[SEVENTEEN]

- (a) If the High Court certifies that the case involves a substantive question of law as to the interpretation of this Constitution; (Art. 132);
- (b) Subject to certain conditions, in a Civil proceeding of a High Court; (Art. 133);
- (c) Subject to certain conditions, in a criminal proceeding of a High Court; (Art. 134).

"The law declared by the Supreme Court shall be binding on all Courts within the territory of India" (Art. 141). By Art. 148 the President has been given the power to consult the Supreme Court: If at any time it appears to the President that a question of law or fact has arisen, or is likely to arise, which is of such a nature, or of such public importance that it is expedient to obtain the opinion of the Supreme Court upon it."

Art. 214 says: "There shall be a High Court for each State". The composition, powers and functions of the High Courts remain almost the same as at present.

Democracy and Fundamental Rights

If I have said there is little of federalism in the Constitution. I have no hesitation in stating that democracy is writ large on the pages of our Constitution.

ADULT SUFFRAGE: Art. 326 constitutes by itself a charter of complete political democracy. "The elections to the House of the People and to the Legislative Assembly of every State shall be on the basis of adult suffrage; that is, every person who is a citizen of India and who is not less than 21 years of age \* \* \* \* \* shall be entitled to be registered as a voter at any such election". Lunatics, criminals, etc., will not, of course, have the franchise.

FUNDAMENTAL RIGHTS: Part III of the Constitution deals with Fundamental Rights which guarantee the liberty of the subject as against the Government. This Part on Fundamental Rights constitutes, in a sense, the most fundamental part of the Constitution. On the face of it, a hurried reading of this Part may create an impression that what is conferred by the right hand is taken away by the left. But we should never forget the commonplace, yet nonetheless important and vital, distinction between liberty and license, and the danger of the right of the one becoming the wrong of another or others. There can be no bestowal of absolute or unlimited rights. Every declaration of a right needs must be saddled with a statement of the limitations thereto. Such limitations not be construed as derogating from the substance of the right conferred on the citizen. The limitations imposed are either in the interest of the safety and security of the State, or in the interest of public order and morality.

RIGHT TO EQUALITY: "The State shall not deny to any person equality before the law, or the equal protection of the laws" (Art. 14). "There shall be equality of opportunity for all citizens in

### SOME GREETINGS AND GOOD WISHES

The proclamation of the independent Republic of India is an epoch-making event which may be termed one of the greatest in the whole world during the twentieth century. India, which has a population of more than 300 million has been able to free itself from imperialism and has achieved full independence. It is hoped that this great event will prove to be one of the factors that will bring peace and prosperity to the world and stability and security to Asia,

Whoever studies closely the efforts made by the Indian leaders, headed by Pandit Nehru cannot but admire the great achievement attained by the Indian people and will remain confident that India will enjoy a great future. The glorious struggle of the Indian nation will serve as a great example for the people of the East who are aspiring for full independence, and the leaders of India will serve as an example to the leaders of these crusading nations.

H. E. Muzahim El-Pancachi,

—Deputy Prime Minister and Foreign

Minister of Iraq.

I send the people of India my most heartfelt good wishes on this auspicious occasion of
their Constitution coming to operation and of
their continued membership with us of the
Commonwealth under the new circumstances
and as a great Republic.

I am confident that this new stage in our relations will bring both of us pride in the accomplishment of the last few years, and I hope that we may go forward to ever fuller friendship.

Sir Stafford Cripps,

—British Chancellor of the Exchequer.

The whole world realizes the deep significance of an independent India, but I think there is no country which realizes this significance more than Indonesia. The spiritualities that bind India and Indonesia go back thousands of years.

The people of Indonesia have not yet completed their struggle. I have said that Indonesia is a fighting nation and for a fighting nation there is no journey's end.

I pray that free and independent India will achieve peace and prosperity and become one of the great nations of the world and that India and Indonesia will go together in close co-operation.

Dr. SOEKARNO.
—Indonesia's Goodwill Representative.

[EIGHTEEN]

### SOME GREETINGS, AND GOOD WISHES

I send my good wishes on the consummation of the idea! for which the people of India have long striven.

It is a tribute to British and Indian statesmanship that this ideal has been realized in an atmosphere of cordial goodwill and with the blessing and approbation of all who wish India well.

But this happy outcome to many years' struggle is above all due to the wise statemanship of Mr. Gandhi and Pandit Nehru and to the firm determination to seek settlement of India's problems on a basis of negotiation and discussion rather than by other means. May the new Republic of India long continue to be inspired by this, the example of her areatest sons.

Dr. Malas. -- Premier of South Africa.

The courage of the great leader, Pandit Nehru, through many years of sacrifice, together with his faithful colleagues under the quidance of the great sage of the East, the late Mahatma Gandhi, led to the liberation of India and cleared the road to success for the warriors to liberate their countries, I send to the esteemed leader, Pandit Nehru, greetings of admiration and sincere wishes for the prosperity of the great Indian Republic, the leader of Asia and the supporter of justice and peace.

Dr. Fares El Khoury Bey,
—Foreign Minister of Syria.

On behalf of the U.N. and on my own behalf I express to the Indian people most sincere congratulations on the inauguration of the Republic of India.

Mr. Trygve Lie.

—United Nations Organization's SecretaryGeneral.

The appearance of the Indian Republic upon the stage of international politics, and behind it the great Indian nation, as well as the spiritual and material forces of this ancient nation, herald the victory of the East's spiritual civilization in the service of world peace and the brotherhood of humanity.

ABDUL RAHMAN AZZAM.

—General Secretary of the Arab League.

General Secretary of the Aral League, May India prosper and may the bonds of friendship between India and Burma last lorerer.

MR. THAKIN NU.
—Premier of Burma.

matters relating to employment or appointment to any office under the State". (Art. 16). "Untouchability is abolished, and its practice in any form is forbidden. The enforcement of any disability arising out of untouchability shall be an offence punishable according to law". (Art. 17). "No title, not being a military or academic distinction, shall be conferred by the State. (Art. 18).

RIGHT TO FREEDOM: Art. 19 declares: (1) All citizens shall have the right—(a) to freedom of speech and expression; (b) to assemble peacably and without arms; (c) to form associations or unions; (d) to move freely throughout the territory of India; (e) to reside and settle in any part of the territory of India; (f) to acquire, hold, and dispose of property; (g) to practise any profession, or to carry on any occupation, trade, or business.

Art. 358, however, provides for suspension of the provisions of Art. 19 during the period in which a Proclamation of Emergency operates. "No person shall be deprived of his life or personal liberty except according to procedure established by law (Art. 21). While generally Art. 22 prohibits the detention of a person without trial, it makes an exception in favour of what is described as a preventive detection.

RIGHT AGAINST EXPLOITATION: Traffic in human beings and forced labour is prohibited. (Art. 23). "No child below the age of 14 years shall be employed to work in a factory or mine, or engaged in any other hazardous employment. (Art. 24).

RIGHT To FREEDOM OF RELIGION: Freedom of conscience and free profession, practice and propagation of religion are guaranteed. (Art. 25). "No religious instruction shall be provided in any educational institutions wholly maintained out of State funds." (Art. 28).

CULTURAL AND EDUCATIONAL RIGHTS: "Any section of the citizens residing in the territory of India or any part thereof having a distinct language, script or culture of its own shall have the right to conserve the same" (Art. 29). "All minorities, whether based on religion or language, shall have the right to establish and administer educational institutions of their choice." (Art. 30).

RIGHT To PROPERTY: "No person shall be deprived of his property save by authority of law, and no property shall be taken over or acquired for public purposes without payment of compensation."

RIGHT TO CONSTITUTIONAL REMEDIES: This constitutes the sanction behind the Fundamental Rights, and herein lies the fulcrum by the use of which the Supreme Court may ultimately become the guardian of the Constitution. Art. 32 enacts:

(1) The right to move the Supreme Court by appropriate proceedings for the enforcement of the rights conferred by this Part is guaranteed.

[NINETEEN]

(2) The Supreme Court shall have power to issue directions or orders or writs, (such as Habeas Corpus, Mandamaus, etc.) for the enforcement of any of the rights conferred by this Part.

The fundamental character of the rights conferred by Part III of the Constitution is emphasized in Art. 13.

- (1) "All laws in force in the territory of India immediately before the commencement of the Constitution in the far as they are inconsistent with the provisions of this Part, shall, to the extent of such inconsistency, be void.
- (2) The State shall not make any law which takes away or abridges the rights conferred by this Part. and any law made in contravention of this clause shall, to the extent of the contravention, be void."

Concessions For Minorities And Backward People: Besides the Fundamental Rights, the Constitution provides for special care and safeguard of the interests of Scheduled Castes and Tribes, and the Anglo-Indian community, etc., in Part XVI.

### Directive Principles Of State Policy

A cynical critic of the Constitution may characterise these principles, enunciated in Part IV, as a body of political platitudes since they are not enforceable by any Court. But these principles are intended to underline the fact that ours is a Welfare State, and it shall be the duty of the State to apply these principles in making laws. (Art. 37).

### Amendment Of The Constitution

The method devised under a Constitution for its own amendment is one of the most important criteria for judging its character. A written Constitution is bound to be more or less a rigid Constitution. The flexibility of the English Constitution in which any and every part of the Constitution can be amended by the simple process of ordinary legislation must remain unattainable in a written Constitution. Ours is, moreover, a federal Constitution, and such Constitutions always tend to be rigid. In view of these two factors, we are bound to admit that the framers have imparted considerable flexibility to the Constitution by Art. 868.

Except for certain parts, the Constitution may be amended by a Bill passed in each House by a majority of the total membership of that House, and by a majority of not less than two-thirds of the members of that House present and voting. Of course, the Bill will have to receive, after this, the President's Assent. Amendment of excepted parts shall, in addition to the above conditions, require to be ratified by the Legislatures of not less than one-half of the States.

### The Republic Of India

I need not have wasted a word on the republican character of the Constitution, but for the artificial fog of criticism and propaganda raised around Premier Nehru's acceptance of membership of the British Commonwealth for India at the last Commonwealth Conference in London. Heretofore, the British Crown was the symbolic link of the British Commonwealth of Nations. The symbol was growing progressively impalpable and indistinct. At the last London Conference the other members of the Commonwealth chose to make that symbol still more evanescent and ethereal to accommodate the Republic of India within the orbit of the Commonwealth. We did not abate one jot or tittle from our republican character. In the whole of the Constitution of India there is not even the faintest or the most indirect reference either to the British Crown or the Commonwealth.

### Independent India For Ever

So far about the Constitution of India. But the 26th of January has been our Independence Day since 1980. Constitutions may come, and Constitutions may go, but Independent India shall go on for ever. I, who have also contributed my little mite of a few drops of sweat, tears, and blood to the grinding of the mortar for the edifice of Indian Independence, would like to conclude this article by humbly appealing to all my countrymen in the noble words of the famous American Declaration; for the support of our newly regained Independence "mutually to pledge to each other our lives, our fortunes, and our sacred honour." on this never-to-be-forgotten day in our country's annals.—Jai Hind.

### -CAPITAL OF THE REPUBLIC

(Continued from page five)

The two cities are markedly distinct. The old, containing not very far short of half a million refugees, largely unhoused, has recently expanded into new suburbs and refugee colonies. Its problems differ markedly from those of the new city, which has to find room for a growing official population and house an increasing number of embassies. To have combined these two unlike elements under one administration would have risked overtaxing one authority with a multiplicity of diverse problems and demands.

As at present while Delhi is still to retain its Corporation, and thus some element of popular control, New Delhi may perhaps suffer from over much official administration. Although it is, like Canberra, a predominantly official city, it is by no means exclusively so, and the interests of commercial and private citizens should be adequately represented. Recent requisitioning of houses and the discouragement of building on this account point to the need.

[TWENTY]

C. RAJAGOPALACHARI
Last Governor General of India

### THE REPUBLIC OF INDIA

26th January, 1950

WE, THE PEOPLE OF INDIA, having solemnly resolved to constitute India into a SOVEREIGN DEMOCRATIC REPUBLIC and to secure to all its citizens :

JUSTICE, social, economic and political;

LIBERTY of thought, expression, belief, faith and worship;

EQUALITY of status and of opportunity; and to promote among them all

FRATERNITY assuring the dignity of the individual and the unity of the Nation;

IN OUR CONSTITUENT ASSEMBLY DO HEREBY ADOPT, ENACT AND GIVE TO OURSELVES THIS CONSTITUTION.

(The Preamble to the Constitution of the Republic of India).

PRIME MINISTER

# BIRTH OF THE AMERICAN REPUBLIC

On January 26, 1950, the Republic of India was inaugurated. Only 161 years ago another great republic had been born as a free and independent nation. This is the story of the birth of that republic—the United States of America.

THE American people declared their independence from England on July 4, 1776, and five years later, at the end of their successful fight for freedom, began to assume their independent place in the family of nations. There were at this time, however, 18 states—each levying taxes, coining money, and attempting to conduct itself as a separate nation.

At the end of the conflict, 11 of the 13 states had drawn up constitutions for self-government. The other two. Connecticut and Rhode Island, made some changes in their old Royal Colonial Charter, under which they had enjoyed a generous liberty, and governed themselves as before.

#### ARTICLES OF CONFEDERATION

The states were bound together by the Articles of Confederation and by their joint determination to achieve the rights of life, liberty, and the pursuit of happiness, but each of the 13 states was jealous of its own self-government. They became increasingly sure of the need for unifying their 18 separate sovereignties, however, in the years immediately after the war against England had been won. All the states had suffered needlessly from the weakness of the loose Confederation. All the states had much the same needs and similar ideas about war, freedom and self-government. No state was safe from invasion by a foreign power. No state was strong enough to protect its international trade. No state, by itself, could improve the system of inland waterways. All the states needed a good interstate network of roads for trade, travel, and postal service.

Finally, 12 of the 13 state legislatures in 1787, sent men experienced in colonial and state governments to a Federal Convention at Philadelphia, in the state of Pennsylvania, to draft a Constitution or amend the Articles of Confederation. A wholly new form of government—the government of the United States as it exists today—was the result. The convention threw away the Articles of Confederation and drew up an entirely new Constitution "in order to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defense, promote general welfare, and secure the blessings of liberty to ourselves and our posterity."

The new Constitution was to become valid when nine states had ratified it by convention. By June 21, 1788, the nine states had ratified. Two more had joined the Union a month later. The remaining two had joined before the end of 1790. The first Wednesday of January 1789 was set for the first national election to choose the electors who

would name the President and Vice-President of the new nation. The first Wednesday of February was designated as the date this body would choose the President and Vice-President. The first Wednesday of March was designated for the inauguration of the new government.

Thus on March 4, 1789, the American Constitution went into effect and the American people became, in fact, a nation—the United States of America. On that date, the first Congress, with delegates from 11 states, met under the new Consituation. Its meeting place was New York City, temporary headquarters pending the establishment of a permanent scat of government. Because of difficulties of communication, and the long distances some of the delegates had to travel over bad roads, it was not until April 6 that the house of Representatives and the Senat and enough delegates present to meet in joint ression to count the electoral votes and proclaim George Washington, military leader of the Revolution and presiding officer at the Constitutional Convention in Philadelphia, the nation's first President.

John Adams of Massachusetts was elected Vice-President.

### LEADERSHIP OF WASHINGTON

The wise leadership of Washington was essential at this time. The qualities that had made him the first soldier in the Revolution also made him the first statesman in the newly organized country. He had the power of planning for a distant end, and the capacity of taking infinite pains. He inspired respect and trust. He had directness rather than adroitness, fortitude rather than flexibility, and great dignity and reserve as well as humility and stoical self-control.

The Constitution, at the time merely a blueprint of things to come, possessed neither tradition nor the backing of organized public opinion. It had been the subject of bitter debate during the period of ratification, and two political parties formed at that time continued antagonistic. One party was for a strong central government. The other feared that a strong government might replace the tyranny from which Americans had so recently fought to free themselves. The necessary nine states rallied to the support of the Constitution only after a promise that a Bill of Rights would be drawn up in the first session of the Congress and referred to the states for adoption. The Bill of Rights, which became the first 10 amendments to the original document, guaranteed to citizens of the United States-among other rights-the freedom of

religion, speech, press, and assembly; and the right to a speedy trial by jury.

Despite continued political differences economic dislocations resulting from the war, new government set out with determination to solve its problems by patience and compromise and to create its own machinery. The problems were many. No taxes were coming in. Until a judiciary could be established, there was no means of law enforcement. The Army was small. The Navy had ceased to exist. The first Congress of the United States held three sessions-in 1789, 1790, and 1791. In these sessions, the Congress drew up and enacted the Bill of Rights and created the Departments of Foreign Affairs, of the Treasury, and of War. It established the federal judiciary, enacted tariff laws, determined the salaries of government officials, and enacted laws for governing the territories of the expanding West. The new Secretary of the Treasury submitted plans to honor the national debt incurred during the war, and to create credit and sound financial programs for the nascent republic. The first copyright law was passed. Vermont was admitted to the Union as the fourteenth state. An act was passed establishing the District of Columbia as the site for the capital of the United States.

#### TROUBLESOME PROBLEMS

Even though the new republic had many serious and troublesome problems, it was a lusty young nation. Economic problems caused by the war were on their way to solution. The country was growing steadily. Immigration from Europe came in volume. Good farms were to be had for small sums. Labour was in strong demand. The rich valley stretches of upper New York, Pennsylvania, and Virginia were becoming great wheat-growing areas. Although many items were still homemade, manufactures too were growing. Massachusetts and Rhode Island were laving the foundations of important textile industries; Connecticut was beginning to turn out tinware and clocks; New York, New Jersey and Pennsylvania were producing paper. glass and iron. Commerce and trade, disrupted by the change from colonial status, were improving. Shipping had grown to such an extent that on the seas the United States was second only to England. American ships were travelling to China to sell furs and bring back tea, spices and silks.

The main impulse of American energy was westward. New Englanders and Pennsylvanians were moving into Ohio; Virginians and Carolinians were heading for Kentucky and Tennessee. Buckskinclad hunters and pioneers with carts of furniture, seeds, simple farm implements, and domestic animals faced wild animals, disease and other perils and hardships as they poured into the wilderness. In many a rough clearing, the frontier farmer and his neighbours raised log cabins, its timber chinked with clay, its roof covered with oak staves. Year by year, the products of the newly-opened areas were destined to increase. More rafts and boats laden with grain, salt, meat, and potash, were to

float down the Mississippi River to New Orleans markets. Year by year, the western towns were togrow more important.

While the authors of the Constitution could not anticipate and provide in detail for two centuries of development, they foresaw much of what was to take-place in the United States.

In spite of the problems with which they had to contend, they laid down a pattern of government which has, for more than a century and a half, served the people well. Its basic elements were so soundly conceived that they apply as well to the complex and incredibly varied requirements of present-day United States as they did to the relatively-simple needs of the 4,00,000 people of the 13 original states.

### THE U. S. A. To-DAY

The United States today has more than 150,000,000 people, 48 state governments, 8,000 county administrations, thousands of city organizations, and approximately 1,50,000 smaller government units. A town in South Dakota has a population of six persons and the city of New York has a population in excess of 7,000,000. Between these extremes are towns, villages, and cities by the thousands.

With all the complexity of its growth and development the framework of America's self-government established by the Constitution, has met all the tests and has returned real and lasting benefits to the people of the United States, who run it.

The Constitution and the Bill of Rights limit the power of the federal government to interfere in the lives of the American people. But the Constitution gave to the federal government the power necessary to meet the governmental needs of the later generations and of the greatly-expanded body politic. As a result, the exercises of the federal government have been extended by constitutional amendment and judicial interpretation of its inherent power.

Even in the twentieth century, however, the American citizen comes far more frequently into contact with his local state government than with his national government. States have sovereign power in most areas affecting the daily lives of the people. Municipal and local government, interstate police power, most factory and labor legislation, chartering of corporations, the statutory development and judicial administration of civil and criminal law, control of education, and the general supervision of people's health, safety, and welfare,—all these are primarily the powers of states and not of the federal government.

The powers of the federal government that came into being on March 4, 1789 were deliberately limited under the Constitution and still are. This delimiting of its power is widely believed to be the source of its stability and its strength—stability and strength that have remained constant through good times and through crises for 161 years.—USIS

# RIGHTS OF CITIZENSHIP IN THE INDIAN REPUBLIC

[By B. V. Roy.]

T is very important for all persons in India to have a clear knowledge of the rules governing "citizenship rights," as well as of the general policy underlying the Articles on Citizenship that have been accepted by the Constituent Assembly. To obtain this knowledge, it is best to go through the Articles as drafted and passed, from the initial stage step by step, and to take note of the amendments proposed from time to time and the discussions thereon. I am therefore giving a full report on these lines. An important point to be noted is that the articles on citizenship are not final, in the sense that they are rigid and unalterable, as Parliament has the right to amend and alter them later as might become necessary. The provisions were tentative, said Shri Krishnaswami during the course of debate, and were subject to any Nationality Law that Parliament might enact later to suit the ecoditions in the country.

### POLITICAL RIGHTS NOT CIVIC

It should also be borne in mind that the citizenship rights conferred by these Articles are political rights, and not civic rights. The time is yet to come when a new orientation and a new shaping will have to be given to our civic rights, so that we may live in the "City Beautiful"—"Where interest in public affairs is a test of citizenship, and devotion to the public weal is a badge of honour: where Government is always honest and efficient, and the principles of democracy find their fullest and truest expression." Bearing these hopes in mind, I will now come to my subject matter.

With the signing of India's new Constitution by the President of the Indian Constituent Assembly on the 26th November, 1949, thirteen of its Articles came into force with immediate effect. The rest, numbering over 400 has taken effect from January 26, 1950, on which day the country was declared a Republic.

Four of these 18 Articles relate to right of citizenship of persons who have migrated to India from Pakistan, right of citizenship of certain migrants to Pakistan and right of citizenship of persons of Indian origin residing outside India.

### These four Articles are:-

Article 5—At the commencement of this Constitution (26th January, 1950) every person who has his domicile in the territory of India and (a) who was born in the territory of India; or (b) either of whose parents was born in the territory of India; or who has been ordinarily resident in the territory of India for not less

than five years immediately preceding such commencement, shall be a citizen of India.

Article 6—Notwithstanding anything in Article 5, a person who has migrated to the territory of India from the territory now included in Pakistan shall be deemed to be a citizen of India at the commencement of this Constitution if

- (a) he or either of his parents or any of his grand-parents was born in India as acfined in the Government of India Act, 1985 (as originally enacted);
- (b) (i) in the case where such person 1948 so migrated before the nineteenth day of July, 1948, he has been ordinarily resident in the territory of India since the date of migration or (ii) in the case where such person has so migrated on or after the 19th day of July, 1948, he has been registered as a citizen of India by an officer appointed in that behalf by the Government of the Dominion of India on an application made by him therefor to such officer before the commencement of this Constitution in the form as prescribed by that Government.

Provided that no person shall be so registered unless he has been resident in the territory of India for at least six months immediately preceding the date of his application.

Article 7—Notwithstanding anything in Articles 5, and 6, a person who has after the first day of March, 1947, migrated from the territory of India to the territory now included in Pakistan shall not be deemed to be a citizen of India provided that nothing in this article shall apply to a person who, after having migrated to the territory now included in Pakistan has returned to the territory of India under a permit for resettlement or permanent return issued by or under suthority of any law and every such person shall for the purposes of clause (b) of Article 6 be deemed to have migrated to the territory of India after the 19th of July, 1948.

Article 8—Notwithstanding anything in Article 5, any person who or either of whose parents or any of whose grandparents was born in India as defined in the Government of India Act. 1985, (as originally enacted) and who is ordinarily residing in any country outside India

[TWENTY-THREE]

as so defined shall be deemed to be a citizen of India if he has been registered a citizen of India by the diplomatic or consular representative of India in the country where he is for the time being residing, on an application made by him therefor to such diplomatic or consular representative, whether before or after the commencement of this Constitution, in the form and manner prescribed by the Government of the Dominion of India or Government of India.

Article 9-No person shall be a citizen of India by cirtue of Articles 5, 6 or Article 8 if he has acquired voluntarily the citizenship of any foreign State.

### NOT SOMETHING UNALTERABLE

The citizenship articles the drafting of which proved a "severe headache" to the Drafting Committee were moved by Dr. Ambedkar on the 10th August, followed by a 30-minute speech elucidating various points.

Regarding the Articles, Dr. Ambedkar said: "I do not think that any other article has given the Drafting Committee such a headache as these particular articles. I think it is a piece of good fortune for the Drafting Committee to have ultimately agreed upon this draft, which satisfies most people if not all."

President Rajendra Prasad incidentally remarked that there was a "veritable jungle of amendments"—numbering about 140—to the citizenship articles.

Referring to certain criticisms. Dr. Ambedkar said: that the new article, referred to citizenship not in a general sense but to citizenship on the date of the commencement of the Constitution, and that the business of laying down a permanent law of citizenship had been left to Parliament.

"Members must not understand that the provisions that we are making for citizenship on the date of the commencement of the Constitution will be something permanent and unalterable. All that we are doing is to decide ad hoc for the time being."

He then gave a detailed description of the five different classes of people for whom the Drafting Committee had provided, under certain terms and conditions laid down, for citizenship rights. Dr. Ambedkar also pointed out that it was not possible to cover every kind of case for conferring citizenship on the date of the commencement of the Constitution. If there were any categories of people who were left out, power was given to Parliament subsequently to make provision for them.

The Constituent Assembly at its resumed sitting on the 11th August again discussed Dr. Ambedkar's new Articles on citizenship qualifications. Among several amendments moved were some which concerned persons who had migrated to Pakistan but who had subsequently returned to India and who now wished to settle permanently in this country.

Possible financial implications of conferring citizenship rights on these persons were dealt with by one member.

#### MAKING CITIZENSHIP CHEAP

Dr. P. Deshmukh, moving substitute amendments to Dr. Ambedkar's Draft, said that the Draft would make Indian citizenship ridiculously cheap—"in fact, the cheapest in the world." He contrasted this with conditions in the U. S. A., where Indians who had spent 20 to 25 years there found themselves unable to obtain citizenship. The House knew the condition of Indian citizens in South Africa, in Malaya, Burma and other countries.

Referring to the argument that this was only a tentative Draft and that Parliament could later correct any mistakes, Dr. Deshmukh said that no Parliament would withdraw citizenship from persons who already enjoyed it. It would be very difficult indeed to correct later any "foolishness" committed now by the Constituent Assembly.

Another member opposed the amendment, which sought to give citizenship status to persons who had migrated to Pakistan from India, but who had subsequently returned to India, under a valid permit, with a view to taking up permanent habitation in this country.

Professor K. T. Shah in moving a series of amendments, said that inheritance qualifications in regard to grandparents should be determined through the paternal side.

By another amendment, Professor Shah proposed that Parliament should not accord equal citizenship rights to nationals of any country which "denied" equal treatment to Indian nationals settled there and desirous of acquiring local citizenship. He cited the instance of Australia, South Africa and the U. S. A.

He also proposed that those who had remigrated to India from Pakistan after July 19, 1948, should produce documentary evidence to prove that they wished to be domiciled, and reside permanently, in India. He contended that though citizenship was a birthright and could aslo be acquired, the privileges of Indian citizenship should not be regarded as commonplace, cheap and easy. He said that those who did not treat Indians equally abroad should not be treated equally in India, whatever the consequences.

Other amendments sought that none should get citizenship rights unless prepared to take up all its obligations: that those who had left India to become citizens of Pakistan "with their eyes open", should not be permitted to become Indian citizens again: or that provision should be made for illiterate persons to acquire citizenship by an oral statement.

[TWENTY-FOUR]

After a two-day discussion, the Constituent Assembly adopted on the 12th August the six Articles defining Indian citizenship and detailing the various qualifications designed to cover all cases.

#### THE GENERAL DEBATE

Many front-benchers participated in the general debate which was initiated by Prime Minister Pandit Nehru and was rounded off by Dr. Ambedkar with a twenty-five-minute speech.

The main criticisms centred round the provision granting right of citizenship to those persons who after having migrated to Pakistan from India have returned to India under a permit for permanent re-entry and settlement. Some speakers suggested that it would operate unjustly against Hindus and Sikhs and would complicate the administration of evacuee properties.

Vigorous defence of the provisions of the Articles was made by Pandit Nehru. Shri Alladi Krishnaswami Ayyar, Pandit Kunzru, Shri N. Gopalaswami Ayyengar and Dr. Ambedkar.

Pandit Nehru claimed that Dr. Ambedkar's proposals had succeeded in a remarkable measure in dealing with 99.9 per cent of the cases with justice and practical commonsense.

"We will not go by a hair's breadth to the right or to the left from what we consider the right way of dealing with a situation, justice to an individual or to a group", remarked the Prime Minister.

Shri Krishnaswami Ayyar emphasised the tentative character of the proposals and urged the need to honour the word of the Government by granting citizenship to re-migrants from Pakistan.

Pandit Kunzru felt that there could be no justification to refuse citizenship rights to the Muslims who left India under compulsion but had now returned.

Dr. Ambedkar thought it would be "a breach of faith" if they now said that the people who had returned from Pakistan for the purpose of permanent residence on the word of Government rightly or wrongly, should not have the right of citizenship.

Most of the amendments were withdrawn and the rest rejected. The debate was again resumed on the 18th August.

Shri Krishnaswami Ayyar outlined the principles underlying the Articles in a 40-minute speech after Pandit Nehru spoke on the general policy that should govern the approach to the problem of citizenship.

### NOT A NATIONALITY CODE

Shri Ayyar said that the object of these Articles was not to place before the House anything like a nationality code. No constitution in the world attempted to incorporate nationality law in the constitution. The provisions were tentative and were subject to any nationality law that Parliament might enact to suit the conditions of the country. In the very nature it was not possible to provide for all

contingencies. He also argued that there was no principle in conceding citizenship rights to those people who had deliberately chosen another country as their home. But the Article took note of the fact that the Government of India had permitted a certain number of people to come and settle down in India after having been satisfied that they wanted to take abode in the country and look upon it as their home. Having given an assurance, it would be a gross breach on the part of the Government of India to say that they were not entitled to the benefits of citizenship.

#### EVACUEE PROPERTIES

Referring to the criticism that it would affect the evacuee properties. Shri Ayyar said that nationality for citizenship had nothing to do with the law of property. Exigencies of the situation like war would enable the State to exercise control over enemy property, but no principle of international law could recognise that the rights of property of nonnationals could be forfeited. Some Members praised the Drafting Committee particularly for Article 5B which "aimed at establishment of good relations between Hindus and Muslims". Pandit Kunzru. replying to the various criticisms said that they pursued a middle course recognising the just rights of all people without losing sight of essential conditions that only those persons should be regarded as citizens of India who in their heart of hearts owed allegiance to this country. Replying to the other point of view which wanted that the people who had migrated from India to Pakistan should be allowed to come back unconditionally, Pandit Kunzru said that the claim was not justifiable. Many Muslims went to Pakistan because they supported the idea of its establishment and thought they could lead a free life only in a Muslim country. They had no moral right to citizenship but provision had been made to cover the cases of Muslims who had to leave the country under compulsion. There could be no justification for refusing them re-entry or the claim of the right of citizenship.

### QUESTION OF PROPERTY

On the question of property, Shri Ayyangar wished to make it clear that those who migrated from India to Pakistan, even if they remained permanearly in Pakistan, retained their right to the properties they had left behind but as had been pointed out by Shri Krishnaswami Ayyar, there was really no necessary connection between citizenship and property. Replying to another Member, Shri Avvangar said that so far as people who migrated to Pakistan from India were concerned there was this definite fact that their first act was one of giving up their allegiance to India and owing their allegiance to a different State. Before they were taken back into India and given rights of citizenship, there must he same definite method by which their intention to return to India was unequivocally expressed.

# MUNICIPAL ADMINISTRATION IN THE CANTONMENT AREAS OF INDIA

### A RELIC OF THE BRITISH RULE IN REPUBLICAN INDIA

THE term 'Cantonment' means "a quarter assigned for lodging of troops," but in this country it has come to mean a permanent military station. The British rulers in India in order to keep the people under domination by force of arms, quartered their defence forces at various places all over the country, and would not like the soldiers to mix with the civil population. In the first decade of the 19th century cantonments were therefore built in the suburbs of the important cities of India and also some cantonments, specially for use by the British troops as their summer resorts, were built in the hills. Towards the middle of that century the cantonment areas were found to have attracted a large number of civilians. They had gone there either for prospects of business or for some other worthwhile employment. Laws like the Bengal Cantonment Act XXII of 1864, Madras Cantonment Act 1 of 1866 and Bombay Cantonment Act III of 1867 were passed for control of civilian population in the Cantonment areas of the three presidencies. All these three Acts were later consolidated in the Cantonments Act III of 1880, repealed by Act XV of 1910.

### THE FIRST CANTONMENT

Barrackpore, near Calcutta, was perhaps the cantonment formed in this country towards the last quarter of the 18th century. Then, other cantonments in Bengal came into being, at Midnapore, and Dacca and in Bihar at Dinapur. Early in the 19th century quite a number of cantonments was set up in the United Provinces. Beginning from April, 1789 orders were issued by the Governor-General from time to time with a view to regulate acquisition of property for military needs and to control private building activities in the cantonment areas of the British settlement in Bengal, Bihar and Orissa. All these orders were later superseded by an order of 1886. This order was incorporated in the Bengal Army Regulation of 1855-1857. In Bombay the Government issued a regulating order for the first time in April, 1819. followed by a number of orders. All these separate orders were consolidated by an order passed in May, 1819 and later incorporated in the Army Regulation of Bombay in 1887. In May, 1812 the Government of Madras passed the first regulating order. succeeded by a number of other orders. All these orders were revised by the Governor-General's order passed in October, 1818, and later this order was included in the Army Regulations of 1887.

Despite different orders and regulations passed in the respective presidencies—the cantonments in

India gradually lost their original character and came to accommodate quite a large number of civilians. At last when the Government of India Act of 1919, "promising gradual development of Self-Government in the country" came up before the British Parliament, in India the civil population of the cantonments formed into an association and went on petitioning to the British Government of India for sympathetic consideration of their claim to progressive Self-Government. A departmental committee was appointed to report on the conditions prevailing in the cantonment areas. On the report of this committee a special committee, called the Renouff Committee, was appointed in March, 1921 to determine what concessions might be granted towards Local Self-Government of the civil population of the cantonment areas, that is, to consider what changes were necessary in the administration of the cantonment areas so as to introduce therein the spirit of Montague Reforms. The Committee submitted a report in October, and soon the drafts of the Cantonments House Accommodation Act and the Cantonment Act were placed before the Central Legislative Assembly and were "virtually rushed through the two Houses," for their life under the old ways was drawing to a

### CANTONMENT ACT OF 1924

The Cantonment Act of 1924 was enacted with a view to bringing the system under which the municipal administration of the Indian Cantonments was carried on into conformity with the principles of Local Self-Government and Municipal laws in general. In fact, the Act was framed on the model of the then Municipal Acts of the United Provinces and the Punjab. Under this statute administration of the Cantonments was placed in the hands of a Directorate at the head of which would be the Commander-in-Chief. In fact, the Cantonments Act was not, and even today is not, concerned with provision of civic amenities to the Defence Services, for whom the Defence Ministry maintains hospitals and special clinics, undertakes sanitary and hygienic duties and provides roads, water supply, drainage, sewerage, building, educational, recreational and other facilities. The Cantonment Board, a shadow of Local Self-Government, for every particular area, however, arranges on receipt of annual payment conservancy services in the areas where troops are quartered.

The same principles as laid down under the Cantonments Act II of 1924 relating to "Local Self-Government in Cantonment areas, the constitution and powers within such areas of cantonment

authorities, the regulation of House Accommodation in such areas and the delimitation of such areas," were retained in the Seventh Schedule Federal Legislative List I under item No. 2 of the Government of India Act. 1985. The very same principles have been reproduced in the Draft Constitution of Free India in item 7 Union List I of the Seventh Schedule.

### NUMBER OF CANTONMENTS

There are 55 Cantonments in the Union of India and the total number of civil population in them was 5.36,000 in 1931, which increased to 6.02.000 in 1941. Of the total number of Cantonments the U. P. has 21 of which 15 are suburban and 6 in the hills, East Punjab 11, of which 4 are suburban and 7 in the hills, Bombay 6, all suburban; West Bengal 3, of which one is suburban and 2 in the hills; central Provinces 4, of which 8 are suburban and one in the hills; Bihar 2, of which one is suburban and one is independent: Madras 3, of which 2 are suburban and one in the hills; Assam, one, which is suburban; Delhi one, which is suburban; Ajmere, one, which is suburban; the states, two, which are suburban. Thus, there are 87 suburban, 17 hill and one independent cantonments. Some of the cantonments are quite big towns with over half a lakh of population, and some of them are so small that they should not exist as independent local bodies. The Cantonment Boards, that are entrusted with the Municipal Government of the cantonment towns, are composed of three different elements:-

- (i) the Officers of the cantonment Department:
- (ii) the Official nominated block in majority and
  - (iii) the elected members in minority.

Under the Constitution the responsibility of carrying on the administration is vested in the official majority with the Official President. The highest strength of such a board is 15 with 8 official and nominated members and 7 elected members. The next is 13 with 7 official and nominated and 6 elected members; the third is 11 and the lowest is 3 with 2 official and nominated members and one elected member. The two Cantonment Boards with the highest strength of 15 members are respectively for the U. P. 4. East Punjab 8. Bombay 4, Madras none, Assam none, Delhi one, Ajmere one. The United Provinces have one second-class and two third-class cantonment towns, that have their Boards with 18 and 11 members respectively; East Punjab has one third-class town: Bombay one second-class: Madras one second and one third-class towns. There are seven cantonment towns in the U. P. that have 9 official members nominated and elec'ed on the Board. East Punjab. Bombay and Madras have no such town: only Assam has one. The number of cantonment towns with a Board of 7 official, nominated and elected members is one in the U. P., none in any other Provinces. Five cantonment towns in the U. P. have a Board of 3 members; the number of such towns in East Punjab is 7, in Bombay 1 and in Madras 1.

### OFFICIAL MAJORITY

The official majority in a Cantonment Board consists of the military officers to whom the service and guidance of a Civil Magistrate is arranged by the Government of India in the comparatively bigger cantonments. The President of the Board is the officer commanding of the station. There is an elected Vice-President but he never enjoys any delegation of powers or duties and is hence a figurehead only. The statutory Bazar Committee of Cantonment Board was brought into being by the Government of India in 1986 in fulfilment of the demand made in the Central Legislature. But as soon as such a Committee was formed it was reduced to the status of a merely recommendatory sub-committee of the Board. For every Board there is an Executive Officer in whom the real power of administration is vested. This Executive is guided by circulars, open or confidential and other instructions received by him from the Central Directorate under the Commander-in-Chief.

The Cantonment Boards derive all their income by levy of Home Tax and Water tax, Octroi or Terminal Tax and Profession Tax from the civilian residents. No house tax is levied on the military buildings. The Defence Services goods entering Cantonments are exempted from payment of Octroi or terminal tax. And Defence Services personnel are free from payment of Profession or water taxes.

Now about their duties. The Cantonment Boards are concerned chiefly with the arrangement of civic amenities for the civilian inhabitants. Such amenities are as follows, Schools, libraries, reading rooms, hospitals, clinics, child welfare and maternity centres, water-supply, supply of electric energy, drainage, sewerage, construction of public buildings, roads, maintenance of fire brigades, parks, gardens, etc.

### ALL-India Cantonments Association

The All-India Cantonments Association, in order to look to the interests of the civilian population residing in the cantonment towns was formed about 1919 and it was at the instance of this association that the Cantonment Act of 1924 granting some measure of Local Self-Government to the Cantonment areas was brought into being. According to a Memorandum recently submitted by this Association to the Central Committee (the Directorates of Cantonments the constitution of a Cantonment Board requires re-orientation along the following lines:

- (i. universal suffrage,
- (ii) free elections,
- (iii) responsible house of representatives.
- (iv) non-official office-bearers.
- (v) enlightened services and
- (vi) national control.

The Association suggests that either the Cantonments Act be repealed and the Cantonment Boards abolished, the Cantonment areas forming a part of the Provincial Local Self-Government. or the Cantonments Act be radically amended to make room for enlargement of the elective principle in the matter of formation of the Boards, election of the Board members on the basis of adult franchise, joint electorates, raising of the strength of a Board, election of President and Vice-President for every Board, appointment of Executive Officer trained in Local Self-Government matters and curtailment of the power of the Central Electorate. The Association also suggests the forms of revenues from taxes, rates and other sources. The Association also defines the scope and nature of duties of every Board. The Association further puts forward

some suggestions for the solution of the present day land problem in the Cantonment areas under the House Accommodation Act of 1928, and expresses opinion in the form of a comprehensive land legislation permitting the operations of an Improvement Trust, introducing the system of passing building plans sanctioned by every respective board and prescribing areas for factories, bazar and residential quarters, however allowing acquisition of private property by the military authorities after due notice and payment of adequate compensation. The Association, after all, wants that "the spirit of freedom and independence", that has come to Indian Union, must also be evident "in the sphere of Canton-ment administration". The claim of the Association is too just to be ignored, and in the new set-up of Republican India this absolute relic of British rule should be done away with.—S. K. C.

### HOW DELHI HAILED IN THE NEW STATE

At a solemn ceremony held in the morning of the 26th January in the Durbar Hall of Government House, Indae's last Governor-General, Shri C. Rajagopalachari, read the proclamation announcing the birth of the new Republic and by the very act laid down his office as the King's representative.

Dr. Rajendra Prasad was then sworn in as the first President by the Chief Justice, Sir Harilal J. Kania, who administered the oath in Hindi.

Simultaneously 31 guns boomed in salute while the Governor-General's flag was lowered and the President's flag went up to the strains of the national anthem Jana Gana Mana.

The ceremony was attended by members of the diplomatic corps, members of the Constituent Assembly, high dignitaries and prominent guests.

The President then made a short speech, first in Hindi and then in English.

The President was then conducted to an entercom, where he administered the oath of office to the Prime Minister,

Deputy Prime Minister, the Chief Justice, the Speaker, Cabinet Ministers, Judges of the Supreme Court and the Auditor-General.

Shri C. Rajagopalachari, the Governor-General, told the nation in a broadcast talk on the eve of his relinquishing office that no economic disaster could come down upon Indians so long as they continued to work.

Exhorting the people not to give way to depression, the Governor-General, in his characteristic trenchant way said:

"The fundamental basis of national wealth is industriousness and as long as we preserve that from deterioration, we cannot be worse off than we were before and it lies with us to improve our condition by greater effort."

Impressive ceremonies were held at Bombay, Madras and other provincial capitals.

In the European, African and Middle Eastern capitals Indians celebrated the inauguration of the new Republic with grand ceremonials.

# CALCUTTA CELEBRATES BIRTH OF THE REPUBLIC

HIS EXCELLENCY ON A STATE DRIVE FROM GOVERNMENT HOUSE TO PARADE GROUND

A very colourful and pleasant pageantry was provided by the State drive, which to witness throughd crowds of people on the streets.

Photo: Tarak Das

INAUGURATION OF THE INDIAN REPUBLIC was celebrated with pomp and grandeur, suitable to the occasion, in New Delhi, the capital of the Republic, in every provincial capital and in the cities of the countries all over the World, where Indians have settled in numbers or where the Republic has sent Ambassadors or Consular Officials.

In the City of Calcutta celebrations began with the hoisting of the National Flag on all Government buildings, followed by a pilgrimage by His Excellency the Governor and Ministers to Gandhi Memorial Ghat at Barrackpore, an All-Faiths Prayer meeting at Government House, swearing in of the Governor, Ministers and Judges of the High Court under the new Constitution.

A gun fire signal from Fort William announced the commencement of two minutes' silence at 12 noon in memory of the martyrs in the cause of Freedom.

In the afternoon a grand labour rally was held near the foot of Ochterloney Monument attended by two lakks of workers. Nearly half a million Citizens gathered to watch the combined military and police parade and the Governor's State drive from Government House to Brigade Parade Ground where the parade was held.

Citizens of Calcutta took the pledge of Republican India at a publican meeting held under the auspices of the Provincial Congress at Wellington Square.

A painting of Mahatma Gandhi was unveiled at Government House in the evening.

[TWENTY-NINE]

As dusk fell, crowds filled the approaches to Maidan and Dalhousie Square areas where the brilliantly illuminated Government buildings and commercial houses presented gorgeous scenes of beauty and there was a fire-works display at the Aryan Ground.

At night a State banquet was given by the Governor at Government House.

#### CEREMONIES IN THE CITY DESCRIBED IN DETAILS

SINCE early morning—national flags fluttered over every house and the streets of the City were decorated with arches of leaves and flowers—and festoons of varied colours. Portraits of national leaders, past and present, formed parts of house and street decorations, so also Sahid Bedis with incense burning before them.

#### VISIT TO GANDHI GHAT

The visit of the Governor and Ministers to Gandhi Memorial Ghat at Barrackpore where they laid wreaths in respectful homage to Mahatma Gandhi was attended with a programme of recitations from the "Gita" and the Vedas and a short speech by the Governor.

"Let us take the vow to-day that we shall remain ready to sacrifice everything to retain the hard-earned freedom of the country," observed Governor, Dr. Katju paying his tributes to Gandhiji on the occasion.

Thousands of people placed wreaths in silence before the marble pedestal at the Ghat where Gandhiji's ashes are enshrined.

#### 'Homa' And Prayer

A Rashtra-Kalyan Yajna followed by an All-Faiths Prayer was held in the grounds of Government House at about 8-30 in the morning. The pundits of Bangiya Sanskrita Siksha Parishad performed the religious rites of the Yajna, Dr. Kailas Nath Katju, Governor, West Bengal, participating.

At the All-Faiths Prayer meeting, Pandit Suresh Chandra Chakravarty recited Slokas from the Vedas.

This was followed by prayers from holy scriptures of different communities, Budhist, Jain, Brahmo, Sikh, Arya Samaj, Islam, Christian, Jew and Parsee. Rev. Bhikkhu N. Jinaratna, Shri Fatch Kumar Singhji, Shri Nani Bhusan Das Gupta, Pandit Syamsundar Sastri, Rev. Raghu Vir Singh Vir, Prof. Aga Mirza Mohsen Namazie, Rev. John Kel'as, Mr. Rabbi David Raymond and Dr. J. B. Dastoor conducted the prayers of their respective faiths.

The ceremony concluded with readings from the Gita by Mahamahopadhyay Chinnaswami Sastri.

#### SWEARING-IN CEREMONY

The swearing-in ceremony where the Governor and Ministers took their oaths of office, took place at 10-15 a.m., in the Throne Room of the Government House.

The solemn ceremony, attended by a large and distinguished gathering, commenced with the orchestral tuning of Bandemataram. His Excellency Dr. Kailas Nath Katju. Governor of the State of West Bengal, read the Proclamation of the Inauguration of the Republic of India. Guns from the Fort William boomed seventeen times after the Governor had read the Proclamation and taken the oath of office administered by Justice Shri Amarendra Nath Sen. At the same time, the Governor's new flag went up the huge dome of the Government House and the orchestra played the tune of Jana Gana Mana.

His Excel'ency then administered the oaths of office and secrecy to Dr. B. C. Roy, Chief Minister,

Rai H. N. Chaudhuri, Shri P. C. Sen, Shri J. N. Panja, Shri B. C. Sinha, Shri N. B. Maiti, Shri K. P. Mookerjee, Shri Bhupati Majumdar, Shri H. C. Nasker and Shri S. P. Barman, Ministers; and to Shri I. D. Jalan, the Speaker.

Two of the Ministers, Shri N. R. Sarkar and Shri N. Dutt-Majumdar were unable to attend the ceremony at Government House owing to illness. The Governor administered the oath to Shri Sarkar at his residence in Lower Circular Road and to Shri Dutt-Majumdar at the Presidency General Hospital. At both of which places His Excellency was accompanied by the Chief Minister, Dr. Roy, and the Chief Secretary, Shri Sukumar Sen.

Leading citizens, men and women, members of the provincial legislature, Judges of the High Court, Lord Bishop of Calcutta, Sheriff of Calcutta, members of Diplomatic Corps, high military and Government officials were present at the ceremony.

#### FUNCTION AT HIGH COURT

The swearing-in ceremony of the Chief Justice and sixteen Judges of the High Court of the State of West Bengal was held in the presence of a large and distinguished gathering including Chief Minister, Dr. B. C. Roy, members of the learned tracfession and officers of the Court, at the Court warm of the Chief Justice at noon,

Governor, Dr. K. N. Katju, administered the eath and shook hands with the Chief Justice and the Judges of the Fourt. The entire gathering stood up as Judges took their oath of office one by the according to seniority.

In the midst of the ceremony, at the stroke of 12 noon, two minutes' silence was observed by the gathering standing in memory of the martyrs in the cause of freedon. A gun signal from the Fort announced the beginning of the silence and another the termination of the period.

#### GOVERNOR'S ADDRESS

After the oath-taking ceremony had been over, Dr. Katju, addressing the gathering, said that the imaguration of the Democratic Sovereign Republic was an event unprecedented in the history of India, encient or modern. It would have many signal results. Throughout the ages, administration of justice had been the King's prerogative and justice

Constitution of the New Republic and the position of the High Court under the Constitution.

#### LABOUR RALLY

At about 3 p.m., a grand labour rally was held in the Maidan near the foot of the Ochterloney monument, celebrating the occasion.

Office and factory workers and workers from the field from the Greater Calcutta area took part in the rally. They came in processions, big and small, in trucks, in trams and buses, carrying the national tricolour and shouting national slogans, all the way.

Dr. Suresh Chandra Banerjee, President of the West Bengal Provincial National Trade Union Congress, who presided, stressed that their country had been declared as a Republic still they had to make the Republic a classless one.

"Establishment of such a society is only possible if landlordism is wholly abolished and actual tillers become the owners of the soil, if basic industries are fully nationalized and other industries are effectively controlled and if need be managed by the State and the workers are assured of such fundamental rights as right to work, living wages and human living and working conditions."

Dr. Banerjee said that for the establishment of such a classless society no violent means was necessary. People could have it through constitutional means, through election. Dr. Banerjee urged all to boldly face those who put obstacles by violence, in the way of the peaceful progress of the masses towards classless democracy. He stressed the need of workers to step up production by all means possible, so that the country might within the shortest possible time be self-sufficient.

#### MILITARY-POLICE PARADE

Some half a million people watched the combined military and police parade held at 3-30 p.m., at the Brigade Parade Ground in the Maidan in celebration of the occasion.

The Governor, dressed in a white Sherwani and Pyjama, drove in State in a coach-and-four from Government House to the Brigade Parade Ground, escorted by the Calcutta Mounted Police. The State procession advanced to the Brigade Parade Ground through Government Place North. Old Court House Street, Government Place East, Red Road and Casuarina Avenue. All along the route, densely packed crowds lined both sides of the road and cheered the Governor as he passed.

On arrival, His Excellency was received by Major-General S. B. S. Roy, Area Commander, Bengal, Bihar and Orissa. The Governor hoisted the National Flag, the band playing the National Anthem, Jana Gana Mana. The Governor was then given a salute by the parade, in which about 1,000 men and women, representing about 22 contingents, took part.

The Governor and Major-General Roy inspected the parade. After inspection His Excellency addressed the armed forces.

There were thirty gun-fires at the conclusion of Dr. Katju's speech. These gun-fires were in three volleys, punctuated by 31 rounds from light artillery drawn up alongside. The Governor took the salute at the march past which was led by Brigadier Denyer, the police band playing the tune.

The following contingents of the defence forces and the police participated in the parade.

#### GOVERNOR'S ADDRESS

. Addressing the gathering Dr. Katju said that every Indian, rich or poor, industrialist or a factory worker, had equal rights in the Indian Republic that was inaugurated on the day. Everyone had his rights safeguarded and all was equal here, there being no discrimination between man and man.

Dr. Katju said that a great responsibility had devolved on the men of the armed forces because they were the soldiers of free India. Of course, there was no difference today between civil population and the military, because the military forces of

today were drawn from the people. Today, India's own men were in the armed forces and the army was Indian peoples' own army. In case of emergency, the task of defending India's freedom would not be left to the care of the armed forces alone. The people would always assist the armed forces in that sacred task. But as soldiers, the men of the armed forces were primarily charged with the noble task of maintaining the Independence of the country and protect the country in times of emergency.

Soldiers in the national struggle for freedom, Dr. Katju said, had always dreamt of the auspicious day which they were celebrating today. Mahatma Gandhi had sacrificed everything and through his suffering and sacrifice led the Indian people to the goal of freedom. Gandhiji had shown them that real strength lay more in spirit than in arms. The soldiers, though they bore arms, must realise this and be prepared, if necessary, to sacrifice their all in the cause of the country. He hoped that it would always be their endeavour to safeguard the Republic that was inaugurated today and the flag that was hoisted would command their greatest

THIRTY-FIVE

respect. He believed that *Dharma Chakra* of King Asoka in the National Flag would always guide them in the performance of their duty and service to the country.

#### A CITIZENS' ASSEMBLY

A large assembly of citizens gathered in the afternoon at Wellington Square to celebrate the Day. Standing in silence they took the pledge of the Republican India as contained in the preamble to India's new constitution. Shri Bipin Behari Ganguli, Vice-President of the Provincial Congress, who presided, administered the pledge.

Proceedings began with the observance of two minutes' silence in memory of countless martyrs, known and unknown, who fell in the battle of India's long struggle for freedom, and with the singing of Bande Mataram.

A "Saheed Bedi" was erected within an enclosure set up with a gate built in Asokan style with the Republican India's emblem of three Asokan lions and Charka placed on it. A huge National Flag fluttered from a long staff placed at the middle of the meeting place.

#### UNVEILING OF MAHATMAJI'S PORTRAIT

The unveiling ceremony of a life-size portrait of Mahatma Gandhi presented by the Dawdi Borah members of the Calcutta Art Society to the Government House at the Throne Room was a very pleasant function of the evening.

Proceedings included singing of Vedic hymns and singing of Rabindranath's songs favourite to Gandhiji. Shrimati Subhadra Haskar. daughter of the Governor, unveiled the portrait.

Addressing the gathering Dr. Kailas Nath Katju. West Bengal Governor, said that there was plenty of suffering in Bengal and it might be that while they were celebrating the Day, there were lakes of refugees who had come from other parts of Bengal and who were living in distress. To them the message of Gandhiji would go forth and it was in the fitness of things that the portrait of Gandhiji was

presented to Government House, which was a House of the people of Bengal. Dr. Katju hoped that it would soon be possible to adorn Government House with other portraits, notably a portrait of Gurudeva and another of Rishi Bankimenandra, because so long as Bharat lives Gurudeva lives and so long as Bharat lives Bankimehandra lives.

#### ILLUMINATION IN THE CITY

As the dusk approached the city's illuminated buildings presented a wonderful sight. Among the more striking displays were those at Government House, Writers' Building, the GPO, Assembly House, Indian Museum, New Customs House, Marine House, Sealdah and Howrah Stations. The Corporation buildings, of the main and the district offices, were decorated with foliage and later at night illuminated. There were fireworks displays in different parts of the city.

#### A STATE RECEPTION

The Republic Day celebrations in Calcutta continued on the 27th January last. A State reception was given by the Chief Minister, Dr. B. C. Roy, in the afternoon at the Assembly House grounds in which over 3,000 citizens were present. The guests included Cabinet Ministers, High Court Judges, members of the Diplomatic Corps in the city and of the W. Bengal Assembly, principal military and civil officers and representatives of Chambers of Commerce, Bar Associations, Congress Committees and various other organizations. His Excellency Dr. Katju was the chief guest.

The Governor, accompanied by the Chief Minister, moved among the gathering and exchanged greetings.

The band of the Eastern Frontier Rifles (West Bengal Police) played special selections of Indian and European music.

#### AN ARMY EXHIBITION

An exhibition depicting the soldier's life and activities of the different branches of the Indian-

A STATE RECEPTION WAS CIVEN BY CHIEF MINISTER, DR. B. C. ROY, AT THE ASSEMBLY HOUSE GROUNDS ON THE 27TH JANUARY LAST.

HIS EXCELLENCY POSES FOR THE "GAZETTE" PHOTOGRAPHER

This photograph was taken by our staff-photographer, Md. Jillani, after the Swearing-in ceremony at Government House in the morning of the Republic Day, the 26th January last. (From left to right): Shri P. C. Sen, Minister-in-charge of Food, His Excellency and Shri Sukumar Sen, Chief Secretary.

Army was opened by West Bengal Governor Dr. K. N. Katju at Fort William in the morning. Various Army weapons are also on view there.

Explaining the object of holding the exhibition. the Area Commander, General S. B. S. Roy said that through the exhibition they wanted to put before the people the life a soldier and his family led in the Army and to bring the people closer to their 'brethren in uniform.'

Organized by the Bengal, Bihar and Orissa Area Command of the Indian Army in observance of the 'Area Week' in connection with the inauguration of the Indian Republic, the exhibition remained open to the public till the 31st January daily between 10 a.m. and 4 p.m.

The exhibits were displayed in various stalls named after the different branches of the Army, such as. Infantry. Transport, Medical, Signals. Ordnance, Supply and Engineers.

In the Ordnance stall were displayed a large number of rifles and pistols—from rifles manufactured in 1700 to the modern one—giving an idea of the improvement made in the manufacture of rifles and pistols stage by stage.

#### MILITARY TATTOO

The tattoo organized by the military authorities at the Brigade Parade ground in the evening was watched by a large number of people. A two-hour programme was gone through.

The tattoo began, after a brief opening speech by the Governor, with a march past—by about 700 men representing over 16 units taking—part in the evening's programme. The column was headed by despatch riders of Eastern Command Signals,—who later gave a thrilling display of dare-devil riding on motor cycles. The feat—in which—nine—men—sat astride a fast moving motor cycle must surely have seemed the fitting answer to the family man's problem of coping with Calcutta's transport difficulties but for the acrobatics involved.

#### MOCK INFANTRY ATTACK

The interesting'y mixed programme included demonstrations of massed physical drill by the 2nd Jats, the Changing of the Guard by the 8rd Sikhs attired in their picturesque scarlet ceremonial uniforms, torchlight P.T. by the 30th Bengal Defence Battalion, and folk dancing by Santhal, Naga, Maharatta and Jat soldiers.

The programme concluded with a mock infantry attack on a hill feature—well defended—by—the "enemy." The "Allies", before the attack actually got under way, gave demonstrations of behind-the-line preparations, including toughening up exercises and the building of a Bailey Bridge—in the short space of 15 minutes. The attack—itself,—in which trench mortars, heavy artillery, machine-guns and Verey lights were freely used, had enough "bang" in it to satisfy everyone.

The tattoo was held every evening at 6-80 till the 31st January last.

[THIRTY-SEVEN]

#### SOME GREETINGS FROM ABROAD

On the occasion of the inauguration of the Indian Republic, I send my warmest good wishes. May the people of India enjoy the full blessings of peace and prosperity in the years to come. The foundations of the Indian Republic within the Commonwealth have been well laid. I am confident that the strong ties of friendship which link our peoples will be maintained and consolidated and that they will continue to work together steadfastly for the common good.

-KING GEORGE VI.

I send my grectings and best wishes and those of the people of the United States to the people of the Union of India.

The establishment of the Sovereign Independent Republic of India within the Commonwealth represents a final step in India's political transition which closely parallels to the political evolution of our own country. Because of our traditional sympathy with India, the people of the United States are particularly happy to send expressions of goodwill on this occasion.

The inauguration of India's new form of Government and of its new Constitution, and the assumption of office by the first President constitute an auspicious beginning of the second half of the 20th century. May the future of the new Republic, functioning under its democratic Constitution, be characterized by peace, prosperity and good fortune.

-PRESIDENT TRUMAN.

I hope that the inauguration of the Indian Republic will mark the beginning of a new era of friendly co-operation and good neighbourly relations between India and Pakistan.

-- KHWAJA NAZIMUDDIN. Governor-General of Pakistan.

Personally, and on behalf of the people of Canada, I send good wishes. On this historic occasion it is our sincere desire that India may enjou peace and prosperity in the years that lie ahead.

-GOVERNOR-GENERAL OF CANADA.

We pray for the continued prosperity of the great country of India and the happiness of her people.

-SAO SHWE TAAIK.

President of Burma.

At the inauguration of the Indian Republic I have the pleasure in sending the Indian Government and people, my heartiest congratulations and those of the Portuguese people with best wishes for the prosperity of the new Republic, and the strengthening of friendly relations between our two countries.

-PRESIDENT CARMONA OF PORTUGAL.

I am convinced that the close and friendly association between the two nations will be confirmed and strengthened.

—W. J. MCKELL. Governor-General of Australia.

On the inauguration of the Republic of India I beg the Indian Government to accept the heartiest congratulations of the Government of Finland together with their best wishes for the future of the Republic.

-PRIME MINISTER OF FINLAND.

On the day on which India becomes a Republic I have the honour to express the sincere good wishes of the Danish people for the future prosperity of India under the new constitution and their earnest desire to continue and further the good and amicable relations between Denmark and India.

-FOREIGN MINISTER OF DENMARK.

Sharing as we do with India the friendly association of membership of the Commonwealth, it is our heartfelt wish that the coming years may bring only peace, prosperity and happiness to the citizens of the great country.

—FOREIGN MINISTER OF NEWZUALAND

On behalf of the Norwegian Government I wish to extend my sincere congratulations on this historic occasion on the proclamation of the Republic of India.

-PRIME MINISTER OF NORWAY.

On the occasion of the proclamation of the independent Republic of India which the Indian nation won for itself after long lasting struggles I wish all the best in my name and in the name of the Czechoslovak Government. The Czechoslovak nation has followed with interest the progress of the Indian nation both culturally and economically and wishes all prosperity and success.

-PRIME MINISTER OF CZECHOSLOVAKIA

JANUARY 80, on which day Mahatma Gandhi fell a victim to assassination in New Delhi two years ago, was observed in Calcutta as a Sarvodaya Day. Citizens gathered at different places in the city and suburbs to offer homage to the Mahatma's memory and renewed their resolve to carry out his constructive programme and work for the revitalisation of village life.

#### TREK TO GANDHI GHAT

A large number of people went to Gandhi Ghat at Barrackpore in the morning, when wreaths were laid at the foot of the Memorial Column by the Governor, Dr. Katju, Shri Sriprakasa, Governor of Assam, who happened to be in Calcutta, and the Chief Minister of West Bengal, represented by Shri H. C. Nasker. Wreaths were also offered by the

# PAYS HOMAGE TO MAHATMA GANDHI

His Excellency Dr. Kailas Nath Katju offering floral wreath at foot of the Memorial Column at Gandhi Ghat at Barrackpore.

Photo: Tarak Das

West Bengal Congress and numerous other organisations. Mahatma Gandhi's favourite hymns were sung.

#### GOVERNOR'S ADDRESS

Addressing the gathering, Dr. Katju reminded everyone present that the only homage one could pay to Gandhiji was by performing one's own duty. The Mahatma had inculcated the spirit of truthfulness, honesty and sacrifice in those who followed him and it was his teachings that lifted the morale of his followers.

Dr. Katju also said that when they bowed in respect to Gandhiji they should pray not only that the country might live in peace and prosperity but that the individual might be granted strength to perform his duty.

Dr. Prafulla Chandra Ghosh also reminded the gathering that the best homage to Gandhiji was to follow his ideals of equality, honesty and sacrifice and to perform their duty.

Later in the morning, the Governor participated in a "yagna" followed by ritual spinning at

The Ministers of West Bengal may be seen in the picture.

[THIRTY-NINE]

His Excellency participating in ritual spinning held on January 30, at Government House.

Photo: Tarak Das

Government House, Calcutta. Over 500 people attended.

A spinning demonstration was also organised by the Provincial Congress Committee at the Indian Association Hall.

In the afternoon a meeting was held at the same place under the presidentship of Dr. P. C. Guha Roy who dwelt on the life and teachings of the Father of the Nation.

WEST BENGAL STUDENTS CONGRESS

Addressing a students' rally on the Maidan, organized by the West Bengal Students Congress, Dr. I'. C. Ghosh said that if Gandhism was to survive. corruption and blackmarketing must be removed and social, political and economic equality ensured. Mahatma Gandhi thought of a society which would provide equal opportunities to all for self-development. Unless this was achieved, history

would record that Gandhism died with the death of the Mahatma.

Local and suburban District Congress Committees and various other associations also organized discourses on Mahatma Gandhi's life and held spinning demonstrations.

#### GOVERNOR'S RADIO TALK

Broadcasting a talk from Calcutta in the evening, Dr. Katju said; "We shall need the beacon light that was Gandhiji increasingly in the coming years because we have built up an edifice of human government never previously known to mankind on this yest scale."

He added that 320 million people had resolved to live anicably as citizens of one great republic—all equal before the law, entitled to equal opportunities without any special privileges for any class or community.

Dr. Katju said that the central core of the Mahatma's instruction always had been; "Make your life pure, your action pure and work for the welfare of the community by disinterested action."

When he returned from South Africa to India in 1914 he expanded his activities to every field of national life. "Not only did he become our supreme guide and director in the struggle for national freedom, but he endeavoured to transform all those who came in contact with him, even from a distance, spiritually and morally by his all-pervading influence and example.

"While he lived, his presence worked for us as a signal to worthy conduct. Now that he is no more with us in the physical plane, let us always think of him in the spirit and endeavour to be guided by him as we used to do when he was alive.

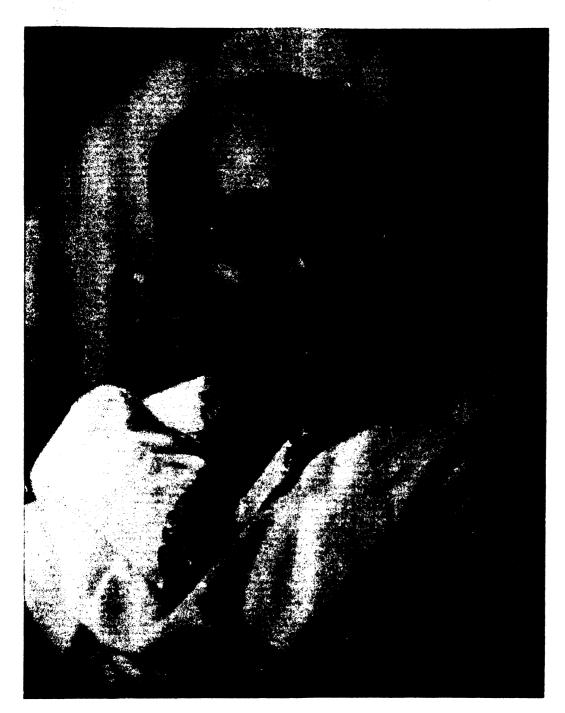

Though we have attained the boon of complete freedom and we have established a people's republic in India, and in our constitution have endeavoured to embody many of his injunctions—some as fundamental rights, others as directive principles of State policy. The letter of the law will prove lifeless unless the people by their daily conduct in every sphere of national activity are determined to make them living principles of national policy.

# NETAJI BIRTHDAY CELEBRATION AT CORPORATION

All Corporation employees took part in the function. Here, the lady teachers of the Corporation Schools and Staff of other departments are singing "Bandemataram" to open the ceremony.

# CALCUTTA CELEBRATES NETAJI'S 54TH BIRTHDAY

#### CORPORATION OFFERS SPECIAL TRIBUTES

NETAJI SUBHAS CHANDRA BOSE'S 54TH BIRTHDAY formed the occasion of countrywide celebrations on the 23rd January last. In this city of Calcutta, which had seen him work as the Chief Executive Officer of the civic Corporation, as Alderman and Mayor, as a leader of anti-British movement, and as a friend of the poor and the depressed, a day long programme was gone through. This programme included the hoisting of National Flags, processions and meetings where speeches were made recalling the services and sacrifices of the immortal hero of India's straggle for her emancipation. In the morning, Prabhat Pherics were out in the sfreets singing national songs, and at noon, the time when Netaji was born was announced by the blowing of conch-shells and gun fires.

#### "MAHAJATI SADAN"

"Mahajati Sadan", the Home of the Great Nation, which Netaji wanted so much to be erected in the city, the Corporation of Calcutta and Hazra Park in South Calcutta, were the three principal spots of celebrations.

In the morning, Shri Hemanta Kumar Basu hoisted the National Flag in front of the incomplete Mahajati Sadan building in the presence of a large gathering.

The Sadan was decorated with National flags, flowers and foliage. A decorated portrait of Netaji

A VIEW OF THE MAHAJATI SADAN FUNCTION

Photo: J. R. Sen

#### AT THE CORPORATION

There was a well-attended function, presided over by Prof. P. R. Sen, who was a close associate of Subhas Chandra during his student days. Prof. Sen may be seen in the picture addressing the assembly of the Corporation employee. To Prof. Sen's left is (sitting) Shri S. N. Ray, Administrative Officer, Calcutta Corporation.

Photo: Md. Jilane

(in bust) was placed on the top of the unfinished structure while another portrait of Netaji in military uniform was installed on an altar in front of the premises before which incense and earthen lamps burnt.

Going to hoist the flag Shri Basu said that they had not been able to build up society in accordance with the ideal of "All power to the people" which Netaji had placed before his countrymen. So he pleaded for a revolutionary outlook for solution of the political and social problems now facing them and stressed that the country stood in need today of a revolutionary leader like Netaji.

A largely-attended public meeting was held in the afternoon at Mahajati Sadan, Syed Naucher Ali presiding.

The celebrations at the Mahajati Sadan ended with illuminations of the building and fireworks in its front.

All these celebrations were held under the auspices of the Mahajati Sadan Netaji Birthday Celebrations Committee.

On this occasion the Government of West Bengal published an illustrated booklet on Mahajati Sadan.

#### CORPORATION OF CALCUTTA

At 9 a.m., in the Corporation quadrangle was held a solemn function, presided over by Prof. Priya Ranjan Sen. The function included singing of Bande Mataram, moving by the Chief Executive Officer of a proposal for election of the President. introduction of the President to those assembled by the Offg. Secretary

to the Corporation, hoisting of the National Flag by the President, offering of floral wreaths to the portrait and bust of Netaji by the President, the Administrative Officer, Calcutta Corporation Employees' Association and others, addresses by the President and the Administrative Officer and singing of national songs. The President in his address said that Bengal had a unique place in India for her faith, energy and enthusiasm, and all these three had combined in Netaji. While a student he strictly observed discipline and order but that did not take away his personal liberty. In a family, which followed western ways of life, Subhas Chandra was born but he was soon able to breathe a new national air into the very lungs of that family. Prof. Sen, who was a classmate of Subhas Chandra, remarked that it was the victory of Japan in the Russo-Japanese war that attracted the attention of Subhas Chandra, then a student, and this significant occasion had provided him inspiration for waging anti-British campaign both within and outside the country.

The Calcutta Corporation Employees' Association celebrated the occasion at a separate function held in the afternoon at the Corporation Employees' Tiffin room. At this function a portrait of Subhas Chandra to be hung in the tiffin room was unveiled.

#### SOUTH CALCUTTA

At the Hazra Park a day-long programme of celebrations was arranged by South Calcutta Netaji Birthday Celebrations Committee.

A full-size portrait of Netaji in Indian costume was placed on a raised platform beautifully decorated

with flowers and foliage on one side of the Park on the occasion.

The day-long programme commenced with the hoisting of the National Flag in the morning by Shri Kalipada Mukherjee, West Bengal's Labour Minister.

Hoisting the National Flag Shri Mukherjee said that Netaji was an embodiment of national aspiration. On this auspicious day they should take their lesson from his life and activities and his sense of order and discipline.

#### MILE-LONG PROCESSION

In the afternoon a mile-long procession was brought out by the Netaji Celebrations Committee which emerged from the Azad Hind Bagh (Cornwallis Square)—carrying posters and shouting slogans—"Netaji will come back" and terminated at Deshpriya

Park in South Calcutta where a largely attended meeting was held in the evening.

The meeting, which was presided over by Shri N. C. Chunder, was addressed by Shri Satya Ranjan Bakshi. Shri Basantalal Murarka and others. Suri Bakshi said that he believed that Netaji was still alive and at the time of his next birthday celebration he himself would be present here.

The celebrations terminated with the display of fireworks in the evening.

The United Socialist Organization of India under the leadership of Shri Sarat Chandra Bose observed the occasion as the Anti-Commonwealth Day and held a meeting at the Maidan near the foot of Ochterlony Monument in the afternoon.

Shri Mrinalkanti Bose presided over this meeting.

#### THE FLAG OF INDIA

The Flag of India is the symbol of her freedom. Behind it lies the epic story of her non-violent struggle for independence under the leadership of Mahatma Gandhi.

The tricolour, which substituted the Umon Jack on State buildings from August, 15, 1347, was adopted as the Nation's Flag by the Constituent Assembly on July 22, 1947. The resolution described the Flag as a horizontal tricolour of deep saffron, white and green in equal proportions with a wheel in navy Line in the central band. The design of the wheel is that of the Dharma Chakra on the abacus in the Lion Capital of Sarnath.

The Flag was presented to the Nation by the women of India at the memorable midnight session of the Constituent Assembly on August 14, 1947.

The tricolour with the emblem of the Charkha was the banner of freedom held aloft by thousands of puissant patriots, men and women, since 1921, when Mahatma Gandhi launched the Non-co-operation Movement. Then the colours on the flag were red, white and green. The Indian National Congress in 1931 changed the colours into saffron, white and green with the Charkha in blue across the white band. This was adopted by the Congress in 1933 as the flag of the Nation.

The Asokan Chakra displaced the Charkha when the tricolour was made the State Flag. One reason for the change was that the symbol on one side of the flag should exactly be the same on the other side.

The choice of the Dharma Chakra from the Lion Capital of Sarnath was influenced by many considerations. The Chakra is nearly the same as the Charkha, but without the spindle and the string. Apart from being artistic, the Dharma Chakra represented India's age-long tradition and culture and was associated with Asoka, whose memory is cherished not only in India, but in China, Tibet and other Asian countries. The Asokan Wheel, as Professor Sarvapalli Badhakrishnan explained, represented the Wheel of Law—the Dharma which was perpetually moving, indicating that there was death in stagnation, while there was life in movement.

According to the Professor, the saffron colour on the Flag represented the spirit of renunciation, the white truth and purity, and the green our relation to the earth on which all life depends.

"This Flag." Pandit Nehru said, while introducing the resolution in the Constituent Assembly, "is not a flag of empire, a flag of imperialism, a flag of domination over anybody, but a flag of freedom not only for ourselves but a flag of freedom to all people who may see it. Wherever it may go-and I hope it will go far-not only where Indians dwell as our ambassadors and ministers but across the iar seas where it may be carried by Indian ships-wherever it may go, it will bring a message, I hope, of freedom to those people, a message of comradeship, a message that India wants to be friends with every country of the world and India wants to help any people who seed freedom."

Mrs. Sarojini Naidu, who followed him. said: "Remember, under this Fiag, there is no prince and there is no peasant, there is no rich and there is no poor. There is no privilege; there is only duty and responsibility and sacrific. Whether we be Hindus or Muslims. Christians, Jains. Sikhs or Zoroastrians and others, our Mother India is one undivided heart and one indivisible spirit. Men and women of reborn India, rise and salute this Flag. I bid you rise and salute the Flag."

Shri Subhas Chandra Bose was appointed Chief Executive Officer of the Calcutta Corporation in April, 1924 While in server he was accested and imprisoned for near than 2 years and a half under a new ordinance. Only 2 days after the expiry of his leave granted by the Corporation and after confirmation of the then acting incumbent, Shri Bose was released in May, 1927.

[The Photograph was taken soon after his release.]

# Netaji's Training In Leadership The Role Played By The Corporation Of Calcutta

[By Santosh Kumar Chatterjee]

N ETAJI, the beloved leader of the Indian National Army and of the Provisional Government of Azad Hind (Free India) with its headquarters at Shonan (Singapore) and Rangoon, and Subhas Chandra Bose, the keen follower of Deshubandhu Chittaranjan Das in the propagation of the freedom movement in Bengal and in the evolution of the municipal administration of Calcutta, the first citizen of Calcutta at the head of a procession of his fellow-citizens in connection with the Independence Day celebrations on the 26th January, 1981, and an ardent leader of an entire nation of 400 millions as the elected President of the fifty-first session of the Indian National Congress held at Haripura in January, 1938, and again of the following session held at Tripuri. These two stalwart personalities are so different from each other and so distinctive of each other. Yet, they are actually two in one,—the two heads of Janus\*, one looking into the past and the other into the future.

#### An Effulgence Of Hope

Subhas Chandra of the past is gradually thinning into oblivion and Netaji of the day is brighten-

\*The word January is derived from the name of the Greek god, Janus. It is interesting to note that the dates of some of the most important events in his life fell in January. He was born on the 23rd January, 1897; on the 26th January, 1931. Subhas Chandra, then Mayor of Calcutta, led a procession in connection with the Independence Day celebrations and was arrested; on the 18th January, 1938, when he was in England, he was elected President of the 51st session of the Indian National Congress at Haripura; on the 26th January, 1941, he mysteriously disappeared from his house, to be later known as Netaji, the revered leader.

ing up the whole eastern horizon with an effulgence of hope and cheer. Subhas Chandra's life was one of perpetual struggle and incarceration, full of ideas and ideals, very few of which he could fulfil. Then came his mysterious disappearance from his Calcutta residence while under house arrest, followed by a period during which various legends about him emanated from reports in the press, or his voice heard over the air from Berlin. Tokyo, Singapore or Rangoon. It was later reported that he commanded the Indian National Army invading Rangoon and next striking at the borders of India and even entering upon the Indian mainland. The last that could be known was that he had been involved in a fatal air crash.

For the later phase of his political life following his disappearance from Calcutta, many an account has been placed on record by those who had seen him, felt him and received inspiration from him while abroad. But, I, as one who has with all his heart put his shoulder to the wheel of the chariot of Juggernaut.—the premier civic institution of Calcutta,—in order to keep it moving towards the goal set before it by Deshabandhu Chittaranjan Das, am interested in recalling the close association that Netaji in the first phase of his political career, then known as Deshagaurab Subhas Chandra,—enjoyed with the Corporation of Calcutta.

#### INDIA'S FREEDOM STRUGGLE

Subhas Chandra Bose was a renowned leader of India's freedom struggle, who had his own readings of the political situations in this country and his own way of fighting against British imperialism in India. But, in his emergence as Netaji, Subhas

·Chandra is reborn with a new life, a new vision and a new power. And this complete metamorphosis has been sudden, not following any graded course of progress. All about him thus seems unnatural. But, when one closely studies his past life and activities he is sure to detect the seed of the mighty personality grown into a healthy plant, full of vigour and vitality. But, the ground on which the seed fell and the atmosphere in which the plant strove hard to grow were not as helpful. The plant, however, gradually gave signs of a stunted growth. So, when it was removed root and branch to a more congenial ground and atmosphere, up it sprang to its natural life and growth. And, in no time the stunted plant turned into a mighty tree.

In 1921 Subhas Chandra returned home from England having won a striking success at the Indian Civil Service examination and also having resigned from that 'heaven-born' service. Back in India, he plunged heart and soul into the non-co-operation movement then raging in the country. The Indian National Congress had long struggled hard to bring prosperity and welfare of the country and her people under the British Rule in India. It was Mahatma Gandhi who first steered the Indian National Congress through a new course of movement. And, Subhas Chandra, who was so much of an Indian and had since his days at college harboured a keen anti-British feeling in the deep recess of his heart, found in the new movement of the Congress a probable fruition of his mission in life. He progressed through a career of volunteer organisation, observance of hartal, and other activities in which the Indians set at defiance the power of the British Government in India. Police raids, arrests, releases and fresh repressive operations followed.

#### Comes To The Corporation

A political movement, unless backed by a strong military power, could not be continuous. This realisation must have come to Subhas Chandra. Then, again, the country, so miserably stricken with poverty, occasionally suffered from failure of crops, floods and other natural inclemencies. And for the amelioration of the condition of the people relief work had to be undertaken. This aspect of India's miseries might have attracted his notice.

When Subhas Chandra had gained some experience about the responsibility of launching anti-British campaign in India, had realised the importance of making India militant and had also been moved by the country's miseries and helplessness, he in the following of Deshabandhu Chittaranjan entered the portals of the civic organisation of Calcutta. Sir Surendranath had just freed this great institution from the direct control of the Bureaucracy.

It was in April, 1924, young Subhas Chandra, with a vision of India liberated from British control. himself leading a victorious army of the valiant Indians, accepted the appointment to the post of the

Chief Executive Officer of the Corporation of Calcutta. He had experience of volunteer organisation, of relief work among the distressed, of electioneering campaign (in 1928) and of running both Bengali and English dailies (Banglar Katha and Forward), and might have realised that his countrymen would have first of all to be made self-reliant, economically, socially and politically. And unless they were taken out of the ruts of various social disabilities and miserable economic conditions they could not be made politically conscious.

#### IMPRISONED AT MANDALAY

But, he was not destined to pursue the ideals set before him by Deshabandhu Chittaranjan. Under a new ordinance he was arrested and thrown into prison. While in detention he was deported to Mandalay in Burma. Citizens of Calcutta observed a day of complete hartal as a protest against ill-treatment to the noble sons of Bengal kept behind prison bars at Mandalay. In course of time Subhas Chandra and other political prisoners from Bengal were brought to Calcutta and subsequently released. Unfortunately enough, Subhas Chandra's release was effected two days after the expiry of his leave granted by the Corporation and also after the acting incumber, and been confirmed in the post of the Chief Executive Officer.

Subhas Chandra could work for six months only as the Chief Executive Officer and within so short a period he was the "controlling hand in every important work done or proposed to be done" by the Corporation. "The very idea of the Gazette, as the Calcutta Municipal Gazette editorially records (November 15, 1924), "originated with him." This Gazette till today is the premier civic journal, issued from an official source, not only in India, nor in the East but all over the world.

#### FIRST CITIZEN OF CALCUTTA

Being circumstantially freed from bearing upon his broad shoulders the burden of a great institution as the Corporation of Calcutta, Subhas Chandra carried on his usual activities, such as giving help to famine-stricken areas, organising election campaigns, preaching the gospel of freedom throughout the country, attending conferences and Congress sessions, or suffering incarceration. Thus, some five years and odd months passed. 'And while he was in prison he was elected Alderman and also Mayor of Calcutta (August 22, 1980) in the vacancy caused by Deshapriya Jatindra Mohan Sen Gupta, who had been in duress.

Mayor Subhas Chandra was released on the 23rd September, 1980, and the next day he took oath of office as an Alderman of the Corporation and adorned the Mayoral chair. A great enthusiasm prevailed not only over the whole Corporation but over the whole city too.

It is significant to take note of his speeches delivered on different occasions in the Corporation offices and at several other places in the city and outside as the Mayor of Calcutta. The practical

programme that Deshabandhu Chittaranjan had placed before the New Corporation was shelved after his death and also as a result of temporary aloofness of Subhas Chandra from the institution. When Subhas Chandra came in he took out that shelved programme and placed it before the Corporation again. This programme included among others the following few items:

Free Primary Education; Free Medical Relief for the Poor; Purer and Cheaper Food and Milk Supply; Better Supply of Filtered and Unfiltered Water; Better Sanitation in Bustees and Congested Areas; Improved Transport Facilities; and lastly, Greater Efficiency of Administration at a Cheaper Cost.

#### DESHABANDHU'S IDEALS

With Deshabandhu, his accredited leader, Subhas Chandra also understood the value of a better, purer and cleaner life for the people being helpful to the progress of the political movement in the country. Now, our leaders at the helm of the Government of the country are realising how beneficial it would have been today had the different social, civic and other associations and institutions in the country achieved an equal, if not greater, progress in the improvement of the living conditions of the people alongside the achievement of the freedom movement of the Congress. They have today to look after not only the country's political reorganisation but also its social, educational, cultural and medical reorganisation.

With Deshabandhu, Subhas Chandra also realised that "the service of the poor is the service of God", and also that "in the Corporation there is plenty of work possible in the direction of building up of a pan-Indian people consisting of diverse communities with diverse interests but united and federated as one nation." What the Congress looked on to achieve in a far wider field, Deshabandhu and Subhas Chandra set themselves to materialise in a smaller sphere however.

#### CIVIC LIFE AND POLITICAL FREEDOM

This practical approach towards the solution of the various problems attending India's national life formed a beginning of his transformation in later life as Netaji, the Leader of Free India. In the same strain, he believed, as others did not, that "civic life cannot be beautiful and perfect without political freedom." In the background of such a belief was his realisation that "no nation can keep another nation in bondage for ever; we must pay adequate price to regain what we have lost." This is what he said in reply to the address presented by the Pabna Municipality in East Bengal in December, 1930, when Subhas Chandra, then Mayor of Calcutta, visited the town. Also, how strongly he felt the correlation of politics with civic life may be seen from a reference to another

utterance of his as Mayor of Calcutta. Replyiyng to a civic welcome presented to him by the Corporation of Karachi (in March, 1981) he said, "Through municipalities we can discharge our duties of nationalism by supporting national institutions and creating thousands more." And, he did create the unparalleled and undreamt of organisation that helped not a little the progress of India's struggle for freedom. This organisation, so well-known to us, was the Provisional Government of Azad Hind and its army of deathless heroes.

Then a Mayor, on the Independence Day in 1931 he defied the ban put on processions by leading one in Calcutta and was arrested and imprisoned for a short time. After his release he tendered resignation of his office as an Alderman of the Corporation and for a good long time stayed in Europe for reasons of health and particularly because the British Government in India did not like that he should come to India and stay here except behind the bars.

In 1988, while he was in England, Subhas Chandra was elected President of the Indian National Congress. Although he did not agree with the elderly leaders of the Congress on the form of India's demand for freedom at a time when the Second World War was in the offing, the country had liked him much. For the next term he was again elected President of the Congress.

#### WHAT CORPORATION WAS TO HIM!

In 1989 his differences with the leaders of the Congress were appreciable, and in 1940 the Corporation elected him as an Alderman, which showed the country how this city of his adoption loved him dearly, respected him and looked forward to him for his guidance. Really, he effected a miraculous rapproachement between the majority and the minority communities in the city council, which the Congress had sought so much to make effective.

In 1941 on the 26th day of January he mysteriously escaped from his house where he had been interned.

Thus, when he was in the midst of the new freedom movement of the country, openly anti-imperialist and anti-British, he was closely associated with the activities of the Corporation; again, when he left India unobserved by the host of spies set upon him he carried with him his association with the Corporation of Calcutta, of which he was then an Alderman.

What he was to the Corporation of Calcutta and the Corporation to him! No account of Subhas Chandra, or even Netaji, would be complete if his plans, programmes and activities centering round the premier civic institution of Calcutta, the city where his future career was shaped, are left out of consideration. The Corporation was so to say the training ground of the Great Leader, whom India today pays a tribute of glory that shall never tarnish.

#### **EDITORIAL**

#### SIR B. L. MITTER

It is with deep regret that we have to announce the death of Sir Brojendra Lal Mitter, which melancholy event took place in the early hours of the 26th January last. The first intimation received by the public was through the Calcutta Station of the All-India Radio in the morning.

Deeply versed in Law, he not only had a brilliant career at the Bar, but was also Standing Counsel, later Advocate-General, Bengal; a Member of the Viceroy's Executive Council; a Member of the Bengal Executive Council; also Advocate-General of India. Besides his brilliant public career, he was no less distinguished for his integrity of character and purity of mind, which would serve as an example to future generations in Bengal. We give elsewhere a brief sketch of his life and career, and we offer our heartfelt condolences to the members of the bereaved family.

[The Portrait of Sir B. L. Mitter will be published in the issue of the Gazette, dated the 11th February, 1950.]

MIDDLE

# SIR B. L. MITTER

#### Death Cf A Distinguished Citizen

THE death took place in the morning of the 26th January last of Sir Brojendra Lal Mitter, after a brief illness. Sir Mitter was formerly Law Member of the Government of India. In 1947 he acted as Governor of West Bengal for some time. Lately, he was the Chairman of the Calcutta University Enquiry Committee. He was 75.

The cremation took place at Keoratala Burning Ghat, South Calcutta, in the afternoon. Among those present were many lawyers, officials and distinguished citizens of Calcutta.

Sir B. L. Mitter has left behind Lady Mitter and their son, Shri Bhaskar Mitter, and daughter, Shrimati S. Chaudhuri.

Reference to the death of Sir B. L. Mitter was made at the annual meeting of the Calcutta University Senate on the 28th January last.

H. E. the Chancellor, Dr. Katju, in a letter to the Vice-Chancellor, which was read at the meeting, stated that the University and the people of India had suffered a great loss by the death of Sir B. L. Mitter, whose integrity of character and purity of mind would for ever serve as an example to generations to come in Bengal.

The Vice-Chancellor, Mr. C. C. Biswas, said that Sir B. L. Mitter was the first graduate of this University to have the distinction of becoming its Chancellor although for a short time.

He agreed to serve as Chairman of the University Inquiry Committee as a call to duty. It was a matter of regret that he did not live to complete his task

Having received his M.A. degree in Geology in 1895 from Calcutta University, Brojendra Lal found the future career in life in the study and practice of law. Articled to the late Shri Saroda Charan Mitra, who was afterwards a judge of the Calcutta High Court, he took the degree of B.L. in 1897 and was enrolled as a vakil. Going later to England he joined Lincoln's Inn and read in the chambers of Mr. T. T. Method. In 1904, he was called to the Bar and returned to Calcutta, where he soon built up a wide practice.

Iu 1922, he was appointed Standing Counsel; and in 1925, Advocate-General, Bengal. In 1928, he was called from the latter post to become Law Member of the Governor-General's Executive Council and knighted. He held office till 1934, becoming Vice-President of the Council in 1932, when he was made a K.C.S.I. and twice led delegations to the League of Nations.

From 1934 to 1937, he was a Member of the Bengal Executive Council. He then returned to the Centre as Advocate-General and continued in that office till the closing stages of World War II, when he became Dewan of Baroda.

It was clear to him as a constitutional lawyer, and a practical statesman that, whatever political changes there might be, it would be impossible for the States to remain in isolation. Accordingly, in his new office, he played a prominent part in moulding the future of the States, shared in the work of

the Indian Constituent Assembly and, when it became known that the country was to be divided, paved the way for Baroda's accession to India.

He left Baroda in October, 1947, on retirement. In the following month, however, he was called to act as Governor of his own province, West Bengal, while Mr. Rajagopalachari acted as Governor-General during the absence of Lord Mountbatten.

A Calcutta Gazette extraordinary issued on the 28th January, announcing the death of Shri Brojendra Lal Mitter, states:—

"His Excellency the Governor of West Bengal and the Government of West Bengal announce with deep regret the sudden death of Shri Brojendra Lal Mitter at Calcutta on January 26th last.

"A distinguished lawyer and administrator, the late Shri Brojendra Lal Mitter had a brilliant career at the Bar, serving first as Standing Counsel and then as Advocate-General of Bengal. Later he became Law Member of the Government of India and then the Advocate-General of India. While serving as the Dewan of Baroda, he took a leading part in the matter of merging of Indian States into the Union. He also acted as Governor of West Bengal for some time in 1947.

"Endowed with unique gifts of intellect and character, Shri Brojendra Lal Mitter gave of his best to his country in all the various positions of distinction and eminence that he occupied for nearly thirty years. His sound knowledge of law and public affairs, his mature judgment and his great experience he had always placed unreservedly at the disposal of his countrymen. He died whilst working for his country. In him Bengal and India have lost a devoted son, a valuable guide and counsellor.

"The Government of West Bengal desire to extend their sincerest condolences to the bereaved family."

#### EX-COUNCILLOR A. C. BANERJI

#### HIS DEATH MOURNED

A public meeting was held on January 8, at 1, Sura First Lane to condole the death of Shri Abinash Chandra Banerjee, the veteran Congress worker and an ex-Councillor under the auspices of the Beleghata Students' Library. Shri Bepin Behari Ganguly, M.L.A., was in the chair. Shri Durga Pressd Ghosh, (General Secretary), Shri Moti Roy, Prof. Bejoy Bhattacharjee, Shri Bibhuti Bose in paying tributes to the deceased remarked that Shri Banerji was a constructive worker throughout his life. As a Councillor of the Calcutte Corporation he did splendid and valuable service to the people of East Calcutte.

It may be recalled that Shri Banerji was a founder-President of the library.

#### CALCUTTA NEWS & VIEWS

SHRI J. C. MAHINDRA, an industrial magnate, died in the morning of the 21st January last in a nursing home in Calcutta.

Shri Mahindra was the Managing Director of the Mahindra and Mahindra Ltd., and formerly he was the Steel Controller of the Government of India.

Shri Mahindra, who was only 58 years old, was connected with several important industrial institutions and served the Tata Steel Corporation and the Martin Burn Company Ltd.

He was a widower and left behind him two sons and one daughter.

He began his career at Martin Burn as an Engineer.

Afterwards he was appointed sales manager of Tata Iron and

Steel Co., Ltd.

During the last war when control was imposed on iron and steel he was appointed the first Iron and Steel Controller. He proved his ability and showed his outstanding worth by discharging his duties as such. He was adviser of Britain's Ministry of Supply in India. In the year 1945 he left the post of Controller of Iron and Steel and set out for America in order to gain knowledge of improving the industries. After his return he founded the firm of Mahindra & Mahindra. This Company took over the several companies as their managing agents. He established the Iron Merchants' Association in Calcutta, Tata Scob Dealers' Association, Bengal Galvanised Sheet Merchants' Association, Tata Steel Re-rolling Mills Association of India, Coltars' Distilleries' Association. For the benefit and improvement of the Iron merchants he established an Association named Central Secretariat of Associations following the precedence of Bengal Chamber of Commerce. After the termination of war he established his own business firm.

He was a staunch nationalist and his charities were extensive.

AN EXHIBITION OF INDIAN FOLK PAINTING (scroll), popularly known as 'Pats', was opened at Senate Hall, Calcutta University, by the Siamese Envoy Extraordinary and Minister Plenipotentiary in India, His Excellency Luang Phinit Akson on the 20th January last.

The exhibition which was organized by Calcutta Art Society, included nearly 130 'pat' paintings representing the folk art of Bengal, Orissa, Rajasthan, Nepal and Tibet.

The exhibition remained open daily for the public till the 30th January last.

THE FIRST COMMERCIAL ART EXHIBITION, to be organised by the Indian Institute of Art in Industry, was opened by Rai Harendra Nath Chaudhuri, Education Minister, West Bengal, at Artistry House on the 22nd January last.

The exhibition, which is divided into four main sections—calendars, press and magazine advertisements, posters and labels and cartons—has been restricted to instances of commercial art produced by members of the Institute during 1849.

In declaring the exhibition open, Shri Chaudhuri said that not long ago Indian designs were much in demand all ever the world and even the simplest cottage industry products of this country were considered marvels of beauty abroad. But as a result of the rapid industrial development of the West in the last century, combined with India's own political decay, she had lost much of her world markets, and, what was worse, her own internal market was flooded with cheep products of foreign manufacturers.

The exhibition remained open to the public from the 23rd January till the 27th January.

HIS EXCELLENCY LUANG PHINIT-AKSON, Envoy Extraordinary and Minister Plenipotentiary of the King of Siam in India, who was in Calcutta on his way to Delhi to join the Republic Day celebrations there, was accorded a reception by the Bengal Buddhist Association at the local temple on the 22nd January.

Speaking at the function, His Excellency recalled the close relatious between the peoples of India and Siam through the ages.

THE 133RD ANNIVERSARY OF THE FOUNDATION OF PRESIDENCY COLLEGE was held at the Physics Theatre on the 20th January last. Shri Atul Gupta presided over the function. On the same occasion, unveiling a portrait of Prof. Nripendra Chandra Banerjee, Shri Gupta recalled the services of Prof. Banerjee.

Prof Janardhan Chakravarty said that Prof. Banerjee's life of service and sacrifice was a matter of pride with them. He also referred to the deaths of Prof. Benoy Kumar Sarkar. Shri Kiran Sankar Roy, Prof. Sailendra Nath Ghose. among others, who had all been connected with the Presidency College.

THE ANNUAL CELEBRATION OF COLLEGE DAY OF SCOTTISH CHURCH COLLEGE was held at the College compound on the 18th January last. Presiding over the celebration Dr. H. C. Mookerjee, Vice-President, Constituent Assembly, gave out a call to the young students to gird up their loins and do their duty to the country.

The question was, Dr. Mookerjee said, what must they do must guide the children of the poor and down-trodden so that they nright become like them and others who were better placed in the society.

DR. K. N. KATJU, Governor of West Bengal, presiding at the 115th Foundation day and prize-distribution meeting of Medical College, on the 28th January last, appealed to the young doctors to go out to the villages. A large gathering of doctors and medical students was present.

In his address, Principal of the College, Dr. Dinesh Chandra Chakrabarti, pointed out that basic conditions of drawing a sufficient number of doctors to villages are practically non-existent.

In his speech Dr. Katju added: "I am readyy to go to the extent of providing some stipends for the education of medical students who are willing to serve in rural areas."

THE SARASWATI PUJA celebrations passed off in Calcutta in the midst of great enthusiasm on the 23rd January last.

Numerous homes, educational institutions and cultural and literary association premises held the Puja. The following day, small processions accompanied by music followed the images as they were being carried to the riverside for immersion.

THE SEVEN-DAY-LONG SILVER JUBILEE CELE-BRATIONS OF SAROJ NALINI MEMORIAL ASSOCIATION on completion of its 25 years' service to the women of Bengal commenced at the Association's school premises at Ballygunge, sometime ago.

Inaugurating the celebrations, Sreejukta Sucharu Devi. Maharanes of Mayurbhanj, said that men became immortal through the works they left behind. Saroj Nalini and Gurusadaya would remain immortal through the institution they had built and left behind. She was associated with the institution since its foundation and it was a matter of great satisfaction to her to find that the institution had grown from more to more.

When you stop advertising, this is what you say in effect:

"We hereby notify everybody that we do not expect to do business any more."

Municipal orders do not wait. All the 12 months, the municipalities are buying equipment and supplies and the "Gazette' advertisement will bring you results just as well as it will in March.

Keep up your advertising every month in the year if you expect to do business all the year round.

#### CHRONICLE & COMMENT

# CORPORATION TO BE SOON PROVIDED WITH A NEW CONSTITUTION

I N the course of a brief address, with which the Budget Session of the West Bengal Legislative Assembly opened on the 3rd February last, His Excellency Dr. Kailas Nath Ratju referred to the legislative measures that the House would be asked to approve. Among these measures is a Bill proposing to reform the electoral procedure and administrative organization of the Corporation of Calcutta.

#### MD. RAFIQUE

On Monday, the 6th February, when the House met after adjournment following His Excellency's address, Janab Mohammed Rafique debating upon the address pointed out that His Excellency had not given any indication of when elections would be held for reconstitution of the present set-up of the Corporation. He also stated that the Government would keep the Corporation under supersession for many years because they wanted to provide employment for certain individuals.

#### SIBNATH BANERJEE

Shri Sibnath Banerjee (Socialist) said that if there were reasons for supersession of Calcutta Corporation, there were equally compelling reasons for taking similar measures in respect of many other municipalities in the State and reconstituting them after elections under adult franchise.

#### DR. P. C. GHOSH

At the resumed debate held on Tuesday, the 7th February, Dr. Prafulla Chandra Ghosh, former Premier of West Bengal, referring to the supersession of Calcutta Corporation, said that municipal elections should be held by July. Otherwise, there was a possibility of its clashing with the general elections expected during the next cold weather. This might result in postponement of the Corporation elections again. District Boards' he declared, which were now "more or less nominated bodies" should also be reconstituted on an elective besis

#### J. C. GUPTA

Shri J. C. Gupta (Congress) said that Calcutta citizens expected the Corporation elections to be

heid before March. In any case they should not be deferred beyond July and should be held on the basis of privacy rolls already prepared by the Government.

#### Dr. Roy's REPLY

Replying to the debate on the address of the Governor outlining the policy of the Government, Dr. B. C. Roy, Chief Minister, declared in the Assembly, at its sitting on Wednesday, the 8th February, that the Government were anxious to find an early, yet satisfactory, solution of the profilem attending supersession of the Corporation.

#### A REFORM BILL

Beforeing to what Janab Rafique had stated,—that the Government would keep the Calcutta Cor-

## Silver Jubilee Number

We have pleasure in announcing that the SILVER JUBILEE NUMBER of the CALCUTTA MUNICIPAL GAZETTE is being published as Supplement to this issue of the GAZETTE.

This issue, together with the Silver Jubilee Number, is priced at Rs. 3/1/-.

poration under supersession for many years because the authorities wanted to provde employment for certain individuals.—Dr. Roy said that the allegation was absolutely false. The Corporation Investigation Commission had already submitted its report which was now being considered by the Government. The Government proposed to introduce a Bill designed to reform the electoral procedure and administrative machinery of the Corporation. After the Assembly had passed this Bill and agreed to the formation of the Corporation on a new model, election would take palce to bring in

# BETHUNE VIDYALAYA CENTENARY CELEBRATIONS

THE centenary celebrations of Bethune Vidyalaya (School and College), India's pioneer educational institution for women, were inaugurated on the 28th January last. Her Highness Maharani Sucharu Devi of Mayurbhanj presided over the inaugural session. His Excellency Dr. Kailas Nath Katju, Governor of West Bengal, addressed the gathering on the occasion and opened an exhibition organized in connection with the centenary.

#### LIGHT OF EDUCATION

After garlanding a statue of John Drinkwater Bethune, founder of the institution, the alumni, after a short ceremony in the attached college hall, each one of them carrying a Mangal Pradip, signifying the light of knowledge that they had spread, in her hand, proceeded to the venue of the function to the accompaniment of music and band. They were followed by the West Bengal Governor, Dr. Kailash Nath Katju, Maharani Sucharu Devi and members of the Reception Committee.

The function was held under a big pandal set up on the occasion in the school grounds. The pandal was tastefully decorated.

#### HIS EXCELLENCY'S ADDRESS

His Excellency addressing the gathering, referred to the contributions of the institution to promote women's education for a century and hoped that it would continue to spread the light of education for many container to come.

During the past 100 years, he said, this institution had produced many women of eminence. They had in their turn reared great men and women.

who had contributed much to the making of India's history. Now they were turning over a new leaf and the centenary was taking place in the new environment of free India. Under the new Constitution, men and women stood on a footing of absolute equality in the political sphere. Their rights and opportunities were now equal. He felt sure that in the coming years women of India would play a great part in fashioning the destiny of the country.

They had won political freedom, but economic freedom remained to be achieved. Women could contribute in large measure to the solution of the difficult economic problem. Women's special sphere was the home. In social welfare work and in rearing the next generation the burden rested mainly on them.

#### MAHARANI SUCHABU DEVI

Maharani Sucharu Devi, who presided, expressed her gratitude to those who had helped to spread women's education in the past and had worked to make this institution what it was today.

Shri C. C. Biswas, Vice-Chancellor, Calcutta University, wished that the whole nation would join him in paying homage to the memory of the great founder of the institution and invoking the blessings of God on the institution and on all of its workers.

past and present.

The Most Rev. G. C. Hubback, the Metropolitan of India, who represented the District Grandmaster of the Masonic Fraternity, said that a hundred years ago when the foundation stone of this institution was laid, the District Grandmaster

of the Fraternity officiated at the ceremony. It was fitting, therefore, that the Fraternity should be represented at the centenary celebrations. "A new chapter in the history of India has been opened. What will be written in that chapter depends very largely upon the lives of men and women now in our colleges," he added.

Dr. Radhabinode Pal, President of the Centenary Celebrations Committee, Dr. Kalidas Nag, Chairman of the Reception Committee, and Shrimati Tatini Das, Principal of the College, also spoke.

#### DETAILS OF CELEBRATIONS

The centenary celebrations, which continued till the 1st February, included functions, besides those described in connection with the inauguration ceremony and the Exhibition, which remained open on all the days as follows:—

Prize distribution to the present students, variety entertainments by the students (28th January); Athletic games and Folk dances, dramatic performances by alumni of the Institution (29th January); symposium on women's education (President, Shrimati Hansa Mehta), Memorial Service to Mahatma Gandhi, Pageant depicting landmarks in Women's Education and Social life from ancient times to the present day and taken part in by the students (80th January); Musical Soiree representing different stages in the Evolution of Music in India (1st February).

On the 27th January last the Reunion function, participated in by the old and present students of the institution, was held in the afternoon.

At the symposium on women's education Shrimati Hansa Mehta, Vice-Chancellor of Baroda University in her presidential address urged women to avail themselves of the opportunities, open to them under the new Constitution, to take up any career. She particularly stressed the need of women jurists, to protect women's interests.

Other speakers included Mlle Christine Bossennec of the Alliance Française, Prof. P. R. Sen of Calcutta University, Kumari Leila Khan, Principal, Basic Training College, Alipore, Mr. H. L. Littler of the British Council. Kumari Parimal Das, Mr. Leslie L. Lewis, U. S. Consul and Public Affairs Officer, and Dr. Kalidas Nag.

#### PAST HISTORY

Bethune Vidvalaya, now at 181, Cornwallis Street, was founded in May, 1849, by the Hon'ble John Elliott Drinkwater Bethune, Law Member of the Governor-General's Council and President of the Council of Education under the name of the Hindu ·Female School. It provided for the education of Indian girls of the upper class, and was the first of its kind in Calcutta. The first classes were held in Sukeas Street, at the residence of Raja Dakshinaranjan Mukerjee Bahadur, who made a gift of land in Cornwallis Street for the College building. The foundation stone of the present College was laid in 1850 by Sir John Hunter Littler, then Deputy-Governor of Bengal with Masonic Honours, but unfortunately, before the building could be completed, John Bethune, who had borne expenses so far, died in 1851 bequeathing all his property to it. The same year the institution was renamed as the

Bethune School. After Mr. Bethune's death, Lord and Lady Dalhousie, who took a keen interest in the education of women, maintained the Institution at their own expense until they left India in 1856. Thereafter the Government has been responsible for its upkeep.

#### MR. BETHUNE'S MUNIFICENCE

The first teachers of the institution were Mr. Bethune himself and Pandit Madan Mohan Tarkalankar, and its first Secretary was Pandit Iswar Chandra Vidyasagar. The two daughters of Pandit Tarkalankar were the first students of the School. Kumari Kadambini Basu (now Ganguli) and Kumari Chandramukhi Basu were the first students to pass the Entrance Examination from this school.

Here, something needs be said about Mr. Bethune's munificence. He personally donated Rs. 800 every month towards the cost of the institution and in his death he gave to it all his property together with Rs. 80,000 in cash.

The institution, after passing through many vicissitudes, came into prominence through its amalgamation in 1878 with the Banga Mahila Vidyalaya of the Brahmo Samaj, and by the outstanding achievement of Kumari K. Bose, one of its pupils, at the University Entrance Examination. The opening of the University classes in 1879 was furthered by the sympathy and interest shown by Sir Alfred Croft.

The institution was affiliated to the Calcutta University in 1888 and to-day prepares students for the B.A. (Pass and Honours Degrees), and the I.A. and I.Sc. Examinations. The annual awards of the College are six free studentship in the School section, and several scholarships, gold medals and prizes in the College section.

The centenary of foundation was celebrated at an earlier function on the 7th May, 1949, in a suitable manner. On that day three sapplings were planted to memorize the occasion amidst Vedic prayers, songs and dances.

#### (Continued from page 289)

# --CORPORATION TO BE SOON PROVIDED WITH A NEW CONSTITUTION

men who would be fully alive to their responsibilities in that organization.

#### WHY GOVT. ARE CAUTIOUS

It was common knowledge that there was something wrong in the Corporation. The Assembly, therefore, agreed to its supersession. It was essential that the Corporation should not be allowed to go on its old corrupt ways and that sufficient care should be taken to form a new constitution which would avoid some of the corrupt practices.

Continuing Dr. Roy said that Dr. P. C. Glash and Shei J. C. Gupta had suggested that a body like the Calcutta Corporation should not remain superseded for long but there were others who were anxious that supersession be ended so that they would be able to go back to their old method of utilizing the Corporation for their own purpose. Therefore the Government had to be cautions.

#### CALCUTTA NEWS & VIEWS

THE SACRED RELICS OF LORD BUDDHA AND HIS TWO DISCIPLES Arhans Sariputta and Moggallana were received from the Mahabodhi Society of India by Mr. Thakin Nu, Prime Minister of Burma, on the 4th February last at a ceremony held at the Mahabodhi Hall in College Square. West Bengal Governor, Dr. K. N. Katju, presided over the ceremony.

The Burmese Prime Minister arrived in Calcutta the same morning on his way to Rangoon from Ceylon, where he had been on a religious mission. The Burmese Ambassador in India, Sir Maung Gyee, received the Prime Minister at Dum Dum.

The relics left Calcutta for Rangoon on Sunday, the 5th February. They will be brought back to India in May next.

THE BUDGET SESSION OF THE WEST-BENGAL ASSEMBLY was opened by His Excellency Dr. K. N. Katju, Governor on the 3rd February last.

His Excellency, riding in a coach drawn by four horses and escorted by the Calcutta Mounted Police, drove in State to the Assembly House.

Dr. Katju was met on arrival at the main entrance to the Assembly House by the Secretary of the Assembly, and conducted to the main vostibule, where he was welcomed by the Speaker, Shri I. D. Jalan. The Governor then entered the Council Chamber and occupied the Speaker's chair. The Speaker sat on his right.

The Visitors' gallery was packed and the Speaker's gallery was occupied by members of the city's Diplomatic Corps.

The debate on the Government's policy as outlined in the Governor's address to the House, which had begun on the 6th February last, was brought to a close on Wednesday, the 8th February by Dr B. C. Roy, Prime Minister of West Bengal, by his speech in reply.

The Chief Minister dealt with anti-social activities, financial matters, with particular reference to the Deshmukh award and development grants, the general election under the new Constitution, reform of the Calcutta Corporation and Calcutta University and zamindari system.

Dr. Roy referred to refugee rehabilitation and appealed to all concerned to co-operate with the Government in finding a satisfactry and early solution of the problem.

Dr. Roy declared that his Government would give no quarter to communalist mischief-makers and was determined to do everything in its power to protect minority communities.

THE 1NDO-PAKISTAN BOUNDARY DISPUTE TRIBUNAL appointed under the Chairmanship of Lord Justice Algot Bagge for adjudication and final settlement of the boundary disputes between East and West Bengal and East Bengal and Assam, arising out of the interpretation of the Radcliffe award, held the first series of hearings in Calcutta from December 5 to December 16, 1949. The next series of hearings was held in Dacca.

There were four disputes, two relating to East and West Bengal and two relating to East Bengal and Assaw.

The Tribanal consisted of two other members, namely. Justice Shri Chandrasekhara Aiyar and Justice Shahabuddin. nominees of the Government of India and the Government of Pakistan respectively.

The final decisions of the Tribunal were released on the 4th February last. The dispute over the boundary line between Murshidabad and Rajshahi districts involving the river Mathabhanga which was pointed out in an article published some time ago in the Gazette to be of some importance to Calcutta has been decided, namely, that there is to be a fixed boundary line between the districts of Murshidabad and Rajshahi along the midstream of the river

Ganges instead of leaving the boundary line fluid as thecourse of the river might shift from time to time.

THE ROYAL ASIATIC SOCIETY OF BENGAL held its annual meeting on Monday, the 6th February, Justice Shri itama Prasad Mookerjee presiding.

Speaking at the meeting His Excellency Dr. Katju expressed hope that now that the people of India had formally established a Sovereign Republic scholars and historians would, by careful research and investigation, probe into the working of the national mind in past centuries and discover the basic principles which had appealed to the Indian people in regulating their own conduct.

The Governor unveiled a portrait of Vedacharya Satyabrata Samasrami, a Bengali Vedic scholar who was one of the earliest Indian Honorary Fellows of the Society. Dr. Katju also inspected an exhibition of manuscripts and books in possession of the organization.

The Society's Peace and Culture medal for 1949 was awarded to Sri Aurobindo, the philosopher-saint of Pondicherry.

Dr. W. D. West received the P. N. Bose memorial medal for his contributions to the study of geology with special reference to Asia, and Dr. K. V. Krishnan the Barclay memorial medal for his work in medical science with special reference to India. The Dr. B. C. Law gold medal for ancient Indian history went to Dr. U. N. Ghoshal, and the Sir Judmath Sarkar gold medal for history to Dr. Havi Rum Gupta.

Mr. Justice Mookerjee was re-elected President and Dr. Nibar-ranjan Ray, Secretary of the Society for 1950-51. The Vice-Presidents elected were Dr. M. N. Saha, Dr. M. Z. Siddioi, Dr. R. C. Majemdar and Mr. K. P. Khaitan.

parliamentary government, in the United Kingdom has been to vest responsibility for administration in a Council rather than in an individual, and following the British model, such group administration has almost always been also a feature of Calcutta's civic government, at any rate, since it came to be placed on a representative basis, however limited. All the same, there is no gainsaying the fact that a period of municipal progress and expansion has invariably coincided with the regime of a strong

executive, functioning without interference by popular representatives. The great problem, therefore is how to devise a system of government which, while sufficiently subject to democratic control, and sufficiently responsive to public opinion, will still be capable of efficiently rendering those services which the community have a right to demand. In other words, the question is, how to make democracy work efficiently.

(To be continued.)

### Seven Days Of Unrest In Calcutta

#### What Have Been The Maladies?

is not a provincial problem only but an all-India one, and the burden of solving it must rest with the whole of India,' observed Prime Minister Pandit Jawaharlal Nehru in a statement issued in New Delhi on the 10th February last appealing to the citizens of Calcutta and the people of West Bengal, including refugees who had come over from East Bengal, to put a speedy end to manifestations of disorder.

Referring to developments in East Bengal, which had caused great excitement and tension, the Prime Minister assured that Government of West Bengal and Government of India were fully conscious of the situation and they had been in constant and urgent consultation with Pakistan Government.

Deputy Prime Minister, Sardar Vallabhai Patel, in a different statement issued the same day on the East Bengal situation appealed to citizens of the affected areas to help the Government maintain "peace and sober judgment."

#### Some Incidents

Some incidents of arson, loot and other antisocial activities confined to the previously affected areas under Maniktolla Police Station occurred on the 11th February last. A few of them took place in adjacent localities under Belliaghatta and Amherst Street thanas. As a result the night curfew was extended to cover a larger area. Increased patrols by the Military and the Police reduced the panic which had prevailed. There was some migration of people from the affected areas to safer places in the city.

Congress workers of Calcutta at a meeting held at the Indian Association Hall urged the public to organize active and vigorous peace squads in every mohalla of the city.

A joint statement was issued by the Governments of East and West Bengal on the conclusion of the Chief Secretary's Conference on the 11th February last recognising the urgency and importance of the prevention of communal tension and expressing decision of both the Governments to ruthlessly punish all evil-doers and gave relief and protection to sufferers. This statement, extension of the period of curfew in the affected areas, fresh

imposition of curfew in a few other localities and vigorous police and military patrolling in the city tended to appreciably improve the situation in the city on the 11th February, which passed without any major incident.

#### Police Commissioner's Views

Speaking on the 'Maladies of Calcutta' at the monthly luncheon meeting of the 'Milanee' (a sociocultural club) at the Great Eastern Hotel on the 11th February last Shri S. N. Chatterjee, Police Commissioner of Calcutta, had pleaded for a change in the present mental make-up of the citizns. It would take a long time but a beginning must be made without delay, he said.

Organization of peace committees in different localities and institutions, building up of a corporate life and more effective participation by the citizens in the work of maintaining civic life in Calcutta were some of the remedies suggested by Shri Chatterjee for curing Calcutta of its maladies.

He said that though Calcutta was an old city of 250 years, citizens here were not prepared to shoulder any civic responsibility till the twenties, when they accepted some responsibility. But even to this day good men and influential men scarcely exercised their responsibility in civic affairs. That was why they saw to-day a pathetic apathy to civic life. If a policeman went to arrest a man, righteous indignation of the people were roused but if some boys came to set fire on a bus, like meek lambs they all stayed away. This had got to be changed.

The population of Calcutta, Shri Chatterjee said, was about 92,000 in 1901. In course of the last 50 years it had grown enormously. The result was that a citizen did not know his next door neighbour. This lack of corporate life in Calcutta was a very serious malady. If they had corporate life, if they had some local leader whom they could believe and trust, many of the ills would have gone.

#### Anti-Social Elements

With the growth of Calcutta from a small trading place to the most important trading centre perhaps of the East, Shri Chatterjee said, antisocial elements in large numbers settled here.

They assembled here as professionals. With the development of business and wealth their numbers also grew and these elements began to spread in different areas. That was why to-day they could find good men, respectable men fraternising and mixing with these anti-social elements.

#### SOME MORE INCIDENTS

Some incidents of arson occurred in the affected parts of the city on Sunday, the 12th February. Police and military patrols continued throughout the day. Military and police pickets were posted in a few more places. In view of the prevailing panic, curfew was extended to the Tangra area of Calcutta.

The Congress Seva Dal, Khilafat and other organizations helped in the distribution of food and in maintaining peace and creating an atmosphere of confidence.

The situation in the city improved further on Monday, the 18th February, only one or two incidents in the affected areas being reported. The rest of Calcutta was peaceful. Business was carried on in the normal way and the city transport services were running in the usual manner. The Police and Military continued patrolling the streets. Curfew was maintained in the Entally Police Station area.

#### DR. ROY'S APPEAL

"Five days have passed during which the social and economic life of places in East and West Bengal has been disturbed by acts of arson, loot and assaults on individuals," said Dr. B. C. Roy, Chief Minister of West Bengal, in a statement issued to the Press on the 18th February.

He added:-

ig state of g

"This is not the time to judge where the blame lay, but it seems clear that the two Bengals are so closely linked that events in Khulna provoked mob excesses in this city and its suburbs, and these incidents had their repercussions in Dacca.

"I appeal to all persons, both in East and West Bengal, to pause and consider whether violence can ever cure violence, whether any act of incendiarism or assault will not increase the evil which may prove to be difficult to control afterwards. Even if the fault lay on one side or the other, even if we know who were the initial culprits and how they pursued their nefarious purposes, acts of vicarious vengeance on innocent persons by individuals and groups cannot be effective in any way but are sure to lead to greater panic and harm to the helpless people on the other side of the I can assure all concerned that the border. Government of West Bengal and the Government of India are closely watching events and are taking all possible steps to stop future recurrence of these troubles and to achieve permanent eradication of the root causes.

He then appealed to all persons both in East and West Bengal to maintain peace.

#### CENTRAL PEACE CONFERENCE

Except for a few incidents of petty fires and minor assaults Calcutta was normal on Tuesday and Wednesday, the 14th and 15th February.

A Central Peace Committee with representatives of different shades of public opinion was formed on Tuesday, the 14th February, at a meeting of the Indian Association Hall organized by the West Bengal Provincial Congress Committee. Dr. P. C. Ghosh, member of the Congress Working Committee presided.

# SUPERSESSION PERIOD OF THE CORPORATION EXTENDED

The supersession of the Calcutta Corporation was extended till December 81 by the West Bengal Assembly at its sitting on Monday, the 18th February.

Introducing the Bill incorporating the provision for further extension of the supersession period of the Calcutta Corporation, Shri J. N. Panja, Minister for Local Self-Government said that the Corporation had been first superseded on March 24, 1948, for a year. Almost simultaneously, the Investigation Commission was set up to inquire into the affairs of the Corporation and recommended steps to be taken, including changes in the constitution, for improvement in its administration.

As the Commissioner's recommendations regarding the Corporation's constitution were not available in time, the supersession was extended by a year. Unfortunately, the expectation that election would be held by that date after introducing changes in the constitution had not been realized.

The Commission's interim recommendations on the Corporation's constitution were received in June last year. The Government proposed to change the constitution and extend the franchise. This required amendment of the Calcutta Municipal Act of 1928, and it was intended to bring in a Bill in the current session.

The Bill was taken into consideration and passed without discussion.

On both the days curfew was imposed on certain areas of the city.

#### MAULANA AZAD ABRIVES

Maulana Abul Kalam Azad, Education Minister, Government of India, arrived in Calcutta from New Delhi by air on Wednesday, the 15th February, to study the situation in the city. He

There was no incident in the city and Greater Calcutta on Thursday, the 16th February. The military and the police continued their vigilance and patrols were maintained. The curfew which was being gradually relaxed, was continued in certain areas.

# The David Hare Training College

N Education Week, inaugurated by the Hon'ble Rai Harendra Nath Chaudhury, Education Minister, West Bengal, was held by the authorities of the David Hare Training College from the 28th January, to the 4th February last.

Shri Charu Chandra Biswas, Vice-Chancellor, Calcutta University, presided over the inaugural function.

An exhibition was arranged on the same occasion. Opened by the Hon'ble Education Minister, the Exhibition remained open daily from 1 p.m. to 5 p.m. between the 28th January and the 4th February, both days inclusive.

On the 29th January functions in connection with the Re-union of the old students of the College were held. His Excellency Dr. Kailas Nath Katju, Governor of West Bengal, was the chief guest at the Re-Union meeting. Prof. S. N. Bose presided over it.

#### PROBLEMS OF TEACHERS

Speaking to the reunion gathering His Excellency Dr. Katju said that the West Bengal Government were fully alive to the problems of teachers and would assist them in every way.

Everywhere in the world, he said, teachers were held in the highest esteem, but nowhere were they rich. However great the resources of Government, it would not be possible for them to give teachers anything comparable to the earnings of people in other professions, such as law, medicine and business.

Teachers could legitimately claim a decent living, housing, medical help and education for children at State expense, and they would certainly be satisfied if these things were provided for them.

In independent India the task of the teacher was as great as that of the mother. They were responsible for rearing children and equipping them for the service of the country and the world.

Dr. Katju regretted that during the past 12 months many things had happened in the student world of Calcutta which should not have happened. He hoped that with the inauguration of their own. Republic their attitude would change, and young men, and women would realize their responsibility and serve the country honestly.

#### PURPOSE OF THE REUNION

Prof. S. N. Bose expressed the hope that the salary that the West Bengal Government would fix for teachers would enable them to "have good food, a roof over their heads and free education for their children." They wanted nothing more.

It was not teachers, he said, who were to blame for some undesirable developments in the country. They were prepared to contribute their utmost for the solution of the country's problems. But conditions in the country and the atmosphere in the home should be such as would enable them to do so.

Principal K. D. Ghose, explaining the purpose of the reunion, said that it enabled a large number of teachers every year to exchange information and experience about educational practice and progress in the State and elsewhere.

The closing of the Re-union came on the 4th February, on which occasion a meeting was held under the presidency of Shri C. C. Biswas. The Hon'ble Shri Kalipada Mookherjee, Labour Minister, Government of West Bengal, was the Guest of Honour.

#### EDUCATION WEEK

On all the days of the Education Week symposiums of lectures on educational subjects were held. The subjects included, "Strikes in Educational Institutions," "School Text-books," "Social Education in Rural Areas," and "Reform of Secondary and Higher Education." Educational films, both Indian and foreign were exhibited on some of the days.

On the 28th and the 29th January two special programmes of entertainment were gone through: Vichitra and theatrical performance of the play Kalindi.

In this connection, it will surely interest our readers to know something about the inception, and aims and objects of the institution.

#### Burth Or THE COLLEGE

The need for a Training College for High English School teachers was felt as early as the middle of the mineteenth century. Teachers trained in the Normal schools were not considered suitable for High English schools but no decisive step was taken till after 1906, i.e., after the partition of Bengal. The suggestion for a Training College for graduate teachers came from Mr. H. R. James, the then Principal of the Presidency College, Calcutta. The voice of the late Sir Asutosh Mookerjee was predominant in the formulation of a practical scheme and the Calcutta University drafted in 1907 the courses of studies for a Degree Course (B.T.) for graduates and a Licentiate Course (L.T.) for undergraduates, each extending over one academic year. The Government of Bengal at last decided to establish a Training College, the result being the birth of the David Hare Training College in 1908. The College was very felicitously christened after the Scotch philanthropist, a true friend of India, particularly of Bengal. Mr. James, most probably suggested the name. The College was opened in July, 1908, in Albert Hall, opposite the presidency College Buildings, on a monthly rental of Rs. 100/-. There was no opening ceremony. The Albert Hall was not then the magnificent building as we know it to-day-it was an old type of structure-truly "a numbled heap of murky buildings" in Keat's words. Mr. W. E. Griffith was the first Principal of the College and the Teaching Staff in the first session consisted of two other members. viz., Prof. H. Armstead and Prof. Thicket who soon after left the College to join as Principal, Patna Training College.

Admission was limited only to twenty students in the first session and was restricted mainly to Government school teachers. Two seats were reserved in the first session for private candidates, one of whom was Sri Monoranjan Mitra who has since retired as the Principal of the College.

#### DEMONSTRATION SCHOOL

The College had no Demonstration School until 1928. The Hindu and the Hare Schools (then under the able Headmastership of Rai Rasamaya Mitra Bahadur and Shri Ishan Chandra Ghose respectively) were the only institutions that were used as Practising Schools. The Hostel of the College was located on Harrison Road in a rented building in the vicinity of the College and the social life of the College was restricted to occasional debates only. The College continued in the Albert Hall buildings till 1920 when it was shifted to the Lohia Buildings at the junction of Harrison Road and Beniatola Lane where it functioned till June, 1926. The top floor of this fairly big building was utilized as the Hostel of the College.

The College was shifted to its own and present premises at 25/8. Ballygunge Circular Road in July, 1926 and the session 1926-27 was the first session of the College there. The Demonstration School of the College, the Ballygunge Government High School, was opened just across the street at 38/2, Beltola Road in January, 1928. There was a cala function on the occasion and His Excellency Lord Lytton performed the opening ceremony.

#### SOCIAL LIFE OF THE COLLEGE

The social life of the College, now a residential institution with a magnificent Hostel (one of the best in India) improved immensely. Before the establishment of the Dacca Teachers' Training College in 1911, the jurisdiction of the College was very wide and extended to the whole of Bengal and Assam. Since the establishment of the Teachers' Training College at Dacca for the purpose of recruiting aided and Government school teachers, its jurisdiction has shrunk to the Presidency and Burdwan Divisions only. This College was the only Training institution in this part of Bengal even so late as 1940 when the Calcutta University opened its Teachers' Training Department. In spite of the dearth of trained graduate teachers in Bengal, the David Hare Training College has often unfortunately figured as the Cinderella of the Education Department. It was twice (the last time in 1988) seriously proposed to abolish it altogether and whenever the question of retrenchment loomed large, the axe simed its first blow at the College. It emerged at the end of this period from this unnatural struggle a little battered no doubt but more puzzled perhaps at an ignorant world that could think of such a step.

The College went on fairly smoothly till the end of 1941. With the entry of Japan into the Second World War and the aerial bombardment of Rangoon, war knocked at India's eastern gates and once again of all Government Colleges, the David Hare Training College "became the first casualty" of the war. It was closed indefinitely under orders of the Government of Bengal in April, 1942. Things moved at blitz speed. Consequent upon the commandeering of the premises of the Lady Brabourne College for military purposes, that institution moved to the premises of the David Hare Training College and the College office was transferred to a back room of the Lady Brabourne College buildings where a skeleton staff and a sinecure Principal somehow kept the embers burning. The College after a period of suspension for two full academic sessions, once again re-opened on the initiative of Dr. W. A. Jenkins, the then D. P. I., Bengal, in August, 1944 at Hooghly in a portion of the Hooghly Training School buildings. The College functioned at Hooghly for two academic sessions (1944-46). It was only in June, 1946 that the College was brought back to its gracious surroundings. The Demonstration School had also its share of reverses. The school buildings were taken over by the Police Department and the school (an ideal institution in respect of its buildings, its equipment, and grounds) was shifted to a rented house in the vicinity and had to function there under the most unfavourable conditions.

#### NEW DEVELOPMENTS

Owing to new developments, College work could not be carried on in the existing premises. The Udayan (a rented building) to the immediate south of the College huildings formed an annexe of the College from 1946 to 1948 and since then another adjacent building has been made use of and a great part of the College work is now done at the annexe.

A notable feature of the Post-War period is that the College has been thrown open to women strelents with effect from the session 1946-47. Residential accommodation for the women trainees is provided in the Women's Hostel of the College located at 7, Hungerford Street, Calcutta.

#### MEET THE PRINCIPAL

And before we close this account of the David Hare Training College, we feel we should say something about the present Principal of the institution, Dr. K. D. Ghose, M.A. (CKON), P.LITT., Diploma in Education (OXON), Bar-at-Law. Dr. Ghose is a recognised authority on pedagogy not only because he has been the Principal of the premier institution of pedagogy in India but also because he is the author of several important and popular text-books for schools and some important works on the science of teaching.

Dr. Ghose is a keen lover of sports and a great connoisseur of arts and crafts. He is the Hony. Secretary of the Academy of Fine Arts, Calcutta, an institution of all-India recognition. He is the Hony. Secretary of Sarat Samiti, a socio-cultural organization in South Calcutta, founded with the object of perpetuating the loving memory of a most popular novelist of Bengal, Sarat Chandra Chattopadhyaya. Dr. Ghose is the President of the Bangiya Sishu Sahitya Parishad, All-Bengal Association of Writers for Children. He is a Rotarian and a very sociable gentleman of this city.

#### DEEP SEA FISHING AS A COTTAGE INDUSTRY How Fish Price In Calcutta May Be Brought Down

The importance of developing deep sea fishing as a private enterprise to augment the food supplies was emphasized by Shri U. Shanker Rao of the Bengal Pilot Service (Retd.) when he addressed a public lecture held under the auspices of the Zoological Society of India, Indian Museum, sometime ago.

Shri Shanker Rao explained why commercial fishing proved failure so far and stated that modern methods of fishing with up-to-date trawlers were unsuitable in the present economic conditions of the fishing industry. He suggested the introduction of a smaller vessel known as the Drifter Trawler, an all-purpose-type of vessel that could be handled by Indian fishermen and would enable the use of present fishing nets, equipment, and methods that were prevailing on the coasts and estuaries of India. "This would," Shri Rao said "increase the fishing potential from 5 to 7 times—that is for a place like Calcutta, it could bring down by 25 per cent., the present market price of fish". He recommended a scheme where such Drifter Trawlers of standardised design could be built by a State Agency and then given on "bare boat" charter terms to fishermen or fishing companies.

Proceeding, Shri Rao said that naval help could be taken for conducting a fishery survey of the coastal and estuarial waters, and referred to the Ripley Expedition and suggested that the Government of India should invite the National Geographic Society to carry out a detailed survey of the Indian seas, the Andamens, and the Laccadive Islands. The commercial possibilities of fishery by-products and the introduction of Fish and Chips Shops at schools and colleges to cater midday meals to the boys and girls was also explained.

A Model of an Olter Trawl, Photographs of Fishing at the Sandheads, Blue Print of a Motor Fishing Vessel, has been on view at the Indian Museum in the Fisheries Section of the recently held Zeological Exhibition.

#### BENGAL ENGINEERING COLLEGE

#### SOME HIGHLY QUALIFIED PROFESSORS JOIN SERVICE

Dr. Walter Baukloh, has joined the Bengal Engineering College, Sibpur as Professor of Metallurgy. He was formerly Professor and Director, Iron Institute, Technical University, Berlin.

Dr. Ing. Winegartener, a German expert in synthetic mineral oils, Dr. B. Chatterjee, Physical Chemist, and Shri P. C. Ghosh, B.Mwr., Ferrous Metallurgist, have also joined the same department.

The addition of these technically efficient professors has been under the development plan of West Bengal Government with regard to higher technical education and research.

### ADULTERATED MUSTARD OIL CASES

# 2,203 MDS. OF OIL DESTROYED: SOME PROPRIETORS AND SELLERS CONVICTED AND FINED

On the complaint of Dr. H. C. Saha, Shri J. M. Das Gupta, Dr. S. B. Nath and Dr. N. Bagui, Food Inspectors of the Calcutta Corporation (1) Messrs. Shadiram Ganga Prosad and others, (2) Messrs. Hitsaran & Co., selling agents in Calcutta of Messrs. Nehal Chand Kishori Lal, (3) Messrs. Hira Lal Radha-Kishan & Others, (4) Messrs. Tikaram & Sons and Others, (5) Messrs. Northern India Oil Industries and Others, (6) Messrs. Radha Kissen Maheswari, Gopi Kissen Maheswari, Sagar Mall Maheswari, and (7) Messrs. Duli Chand Omrao Lal were prosecuted for selling mustard oil mixed with argemone oil which was unsound and unwholesome and unfit for human consumption. The parties had been brought up for trial in connection with 13 cases instituted by the Corporation against them.

In course of his judgment covering 21 typed pages Shri S. P. Chatterjee, Municipal Magistrate, ordered under Section 421 of Calcutta Municipal Act for destruction of the total quantity of about 2,295 mds. of the said mustard oil seized by the above Food Inspectors either in course of transit in the railway tank wagon at the Jagannath Ghat Railway Station or stored in the respective godowns in Calcutta on the Strand Road side.

Out of 2,203 mds. of mustard oil, 463 mds. belonged to Messrs. Shadiram Ganga Prosad, 400 mds. to Messrs. Hitsaran and Co., selling agents in Calcutta of Messrs. Nehal Chand Kishori Lal, 290 mds. to Messrs. Hira Lal Radha Kishan, 450 mds. to Messrs. Dulichand Omraolal, 240 mds. to Messrs. Radha Kishan Maheswari, Gopi Kisen Maheswari and Sagor Mall Maheswari and 450 mds. to Messrs. Northern India Oil Industries.

In two cases, viz., against (1) Messrs. Hitsaran & Co., selling agents in Calcutta of Messrs. Nehal Chand Kishori Lal and (2) Messrs. Hira Lal Radhakissen, the Magistrate convicted the proprietors and sellers and imposed maximum fine of Rs. 259 and Rs. 169 on them respectively in each case under Section 412 of the Calcutta Municipal Act while in case of Messrs. Tikaram and Sons, the proprietor and sellers were convicted and fined Rs. 250 and Rs. 100 respectively under Section 412 of the Calcutta Municipal Act, there being no seizure case under Section 421 of the Act against this party. In respect of other parties they were acquitted under Section 412 of the Act for inadequate provision of that section.

In course of his judgment in those above cases the Magistrate observed inter alia, "I have already observed that the presence of argemone oil has in this case been proved by specific test. It has been established by authorities, like Drs.

#### A CORPORATION EMPLOYEE

RETURNS FROM STUDY TOUR OF EUROPE

Shri B. N. Guha, an employee of the Calcutta Corporation in the Engineering Department, has returned from a recent study tour of the United Kingdom, Paris and Switzerland.

During his stay abroad Shri Guha studied the practical aspects of refuse collection and disposal as well as of maintenance of sewer and other services as carried out in the Corporations of London, Paris and Switzerland. He also studied the methods of systematic destruction of the rodent posts of the urban areas.

Chopra, Lal and others that argenione oil is extracted from the seed of a wild plant called Argemone Mexicana which is frequently found in stocks of mustard seeds used for pressing oil. This leads to the inevitable conclusion that the mustard oil in this case has been derived from mustard seeds neixed with argemone seeds, or in other words (to quote the language of Section 407), has not been derived exclusively from mustard sceds. In this view of the matter, the oil is adulterated within the meaning of Section 2(c)(v) of the Calcutta Municipal Act." The present medical opinion is that argemone oil is a toxic substance which leads to epidemic dropsy and other diseases. Dr. A. K. Sen and Dr. R. B. Lal who have got a lot of research in this subject to their credit and both of whom were examined as Court witnesses in this case, agreed that argemone oil was a toxic substance. Argemone oil when present in oil used for cooking gives rise to certain symptoms. The most marked effect is Oedema of the legs and in same the development of a generalised flush and Cardiac involvement. Similar symptoms are produced by the use of mustard oil implicated in outbreaks of epidemic dropsy and which gives a causative reaction for argemone oil. So, there is no doubt that argemess oil is a poisonous substance and has an injurious effect on the human system. Referring to the apprehension of considerable dislocation of the industry due to indiscrimate rejection of mustard oil owing to the presence of small amount of argemone oil, the Magistrate observed: "For my part I would rather see the whole industry paralysed than allow the adoption of a measure which is bound to rob the people of their health by slow imperceptible degrees and itself rests on the very unsafe basis of speculative theory."

The Magistrate recorded his appreciation of services rendered by the Food Inspectors concerned who took great pains in seizing the oil.

Shri Debabrata Mukherjee, advocate, Shri Ramani Mohan Ghosal, Municipal Pleader appeared on behalf of the Corporation while Shri S. K. Basu, Shri A. Basu, Shri Sudhansa K. Sinha Roy and Shri B. Roy on behalf of the accused.

#### LATE SIR B. L. MITTER

HIS DEATH CONDOLED BY WARD I RATEPAYERS'
ASSOCIATION

A public meeting to condole the demise of Sir B. L. Mitter was held recently at 5C, Ram Erishna Lane, Baghhasar under the joint auspices of the Ward No. I Rate Payers' Association and Harauath College of Culture. Dr. N. N. Chowdhury, M.A., Ph.D., presided. Dr. R. C. Adhikary, Principal moved the following resolutions which were ununimously accepted:—

"The Ward I Rate Payers' Association and Haranath College of Culture record their sense of deep sorrow at the said demine of Sir Brojendra Lal Mitter, ex-Chanceller, Calcutta University and President, Calcutta Citizens' Association whose death is an irreparable loss not only to this province but to the nation as a whole."

"This meeting further requests the Chancellor Dr. Katju to publish the last public work of Sir Mitter regarding the report of the Enquiry Committee of the Calcutta University without any further delay."

Dr. Dinesh Chandra Chakravarty, Mr. Ranajit Coomer Mitter gratefully recalled the matifold services rendered by the late Sir Mitter in political and accial regeneration of the country, THE RESERVE

#### CALCUTTA NEWS & VIEWS

SIR FRANK WHITTLE, Greator of the first gas turbine jet propulsion unit and adviser on jet development to BOAC, speaking recently at a meeting under the joint auspices of the Aeronautical Society of India and the Post Graduate Council of Science, Calcutta University, said the chief thing that an aeroplane as a means of transport had to offer was speed.

The jet plane also offered increased safety because of simpler engine controls and because absence of vibration reduced crew fatigue and improved radio communications. The risk of the sircraft bursting into flames in the event of a minor crash was also negligible because the fuel used—aviation kerosene—was safer than petrol.

CALCUTTTA'S FIRST BATCH OF POLICEWOMEN recently passed out of training after seven months at a parade on the ground of their barracks in Theatre Road.

Shri S. N. Chatterjee, Commissioner of Police, inspecting them, took the salute at the march past.

Originally 32 recruits started their training of whom one resigned. Of the present batch, nine are sub-inspectors and 22 assistant sub-inspectors. A second batch of 12 recruits, it is understood, awaits training.

The Institution of Engineers (Bengal centre) held its annual meeting in the Institution's premises on the 10th Februaryy last. Addressing the meeting Shri B. C. Sinha, Minister of Land Revenue, West Bengal stressed the rôle that Indians could play in building the new India.

Whichever aspect of nation-building activities they considered, he said there could be no progress without engineers. The most important problem that confronted West Bengal today was overcongestion in the city at the cost of the villages. If communications were not developed in the State to connect the villages with major towns and cities, the time was not far off when congested cities would be surrounded by ruined villages. In such a state of affairs the agricultural economy of the state would face disaster.

He grouped the problems of engineers into three categories, those of roads, irrigation and drainage. Most of the waste lands could be brought into use if irrigation facilities were provided and marshes were cleared to give an impetus to food production. He advised engineers to study the problems of road development in a constructive manner and work out a suitable scheme.

JADABPUR TUBERCULOSIS HOSPITAL has been provided with a new block with 75 beds. This block was opened recently by Shri Ramkumar Bangur, a leading Calcutta business man,

Called the New Patients' Block, it is a three-storied building and cost the hospital authorities about Rs. 6,00,000. Of this, Rs. 5,00,000 was received from the public as contribution.

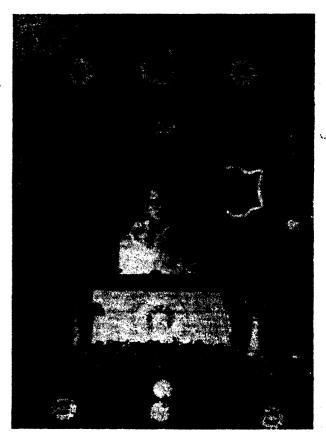

Dr. K. S. Roy, Superintendent of the hospital, appealing for funds, said that with generous public support the institution, which was started in 1923 with only four cottage beds, had now grown to be the biggest of its kind in India with about 500 beds.

RECRUITMENT IN THE CALCUTTA POLICE FORCE formed a question in the West Bengal Assembly on Monday, the 13th February. The reply to this question brought to light that since August 15, 1947, two thousand six hundred and fifty-two men were recruited in the Calcutta Police Force. Of them, 116 were Muslims,

# CORPORATION EMPLOYEES CELEBRATE. NETAJI'S BIRTHDAY

Under the suspices of the Calcutta Corporation Employees' Association, the Tiffin Room authorities celebrated the 54th birthday of its founder, Netaji Subhas Chandra-Bose, in the Corporation premises. An oil painting bust portrait of Netaji was unveiled by Shri Hemants Kumar Basu, M.L.A., who while presiding over the function in a very neat speech invited all to imbibe the lofty ideals of Netaji and to contribute to the cause of fulfilment of the ideal of the beloved leader. A dais was erected decked with flowers and 54 lamps were set on it to symbolize the 54th birthday of Netaji. In the background the tri-coloured flag was flying gloriously on a map of India tastefully decorated with

"chandmalas". Shri Abani Banerjea read out a study of Netaji's life specially written by him for the occasion. Songs that were sung were well chosen and highly applauded by the gathering. Shri Dwijendra Nath Ganguly recalled those days when he worked under Subhas Chandra and requested everybody to take up the unfinished task of Netaji. Shri Akshoy Kumar Mitra, the Chairman of the Tiffin Room, thanked all present for attending the function and making it a success.

Shri Amiya Mukherjee, Secretary of the Tiffin Room Shri Abani Banerjee, Shri Benoyjiban Ghosh, Assistant Secretary to the Corporation. Shri Kumudlal Bhatta:harjee, Shri Kanailal Dutt, Shri Sushil Ghose, Shri Sushil Chakravarty, Shri Manick Ch. Roy, Shri Sailen Pal and others were all attention to the guests who were treated to light refreshments.

The present policy of the Government regarding filling up of the vacancies in West Bengal Public Services is that there is no communal reservation either where recruitment is by open competition or in cases of promotion.

When posts are filled by direct recruitment on a non-competitive basis there is reservation for the communities as follows: (1) Non-Muslims excluding Schedules Castes—65 per cent., (2) Scheduled Caste Hindus—15 per cent., and (3) Muslims—20 per cent.

and the second of the second o

# ORPORATION NOTICES

#### To Contractors

S. GHOSHAL.

Central Municipal Office, The 14th February, 1950.

#### Notice To Fire Insurance Companies

1. Quotations are invited for the fire in surance of the Town Hall Buildings with contents as per details noted below for one year from the 19th March, 1950:—

Rs. 2,65,750 for the buildings excluding plinth and foundations. Rs. 5,000 for electric fittings and fixtures.

2. Quotations are invited for the fire insurance of the Central Municipal Office Buildings with contents, (excluding the portion occupied by the Printing Department of the Corporation, which is separately insured) for Rs. 8,07,000 as per details noted below, for one year from the 19th noted below, for one year from the 19th March, 1950.
Rs. 7,70,000 for buildings.
Rs. 5,200 for switch boards, telephone in struments and Electric instal-

lations.

Rs. 10,800 for furniture.
Rs. 10,000 for drawings and plans.
Rs. 11,000 for files and papers.
Quotations for 1 and 2 above must be enclosed in separate sealed covers and superscribed "Quotations for . . . . . and will be received by the undersigned up to 3 p.m. on Friday, the 24th February, 1950.

S GHOSHAL.

Central Municipal Office. The 13th February, 1950.

#### Repairs to Dingee Boats

Quotations in sealed covers and super-scribed for the above work are invited and will be received by the undersigned up to 2 p.m. of Friday, the 24th February, 1950.

Intending tenderers are expected to inspect the bosts at Bhojerhat and to acquaint themselves with all other carticulars if required in this connection from the office of the undersigned on all working days during office hours prior to submitting their quotations. The successful tenderer will have to deposit as security in cash or in Municipal Debentures the sum of Rs. 50 (Rupees Fifty only) for the above work into the Corporation Treasury through this department before taking up the same in hand. Work mentioned above must be

completed in all its details within 3 weeks from the date of receiving the Work Orders in this respect.

#### Road Closed

Notice is hereby given for the information of the public that in pursuance of an order passed by the Administrative Officer of the Corporation on the 23rd August, 1948, in exercise of the powers vested in him under Section 306 of the Calcutta Municipal Act (B. C. III) of 1923, read with the Corporation of Calcutta Temporary Supersession Act, 1948 (W. B. Act, VIII of 1948), the part of footpath land measuring 9 ch. 13 s.ft. in front of premises No. 10, Lake Avenue, in Ward No. 27 and delineated in the map or plan prepared in this behalf and thereon coloured green has been permanently closed with effect from the date of the said order.

A. D. KHAN,

A. D. KHAN Chief Executive Officer Central Municipal Office. The 18th February, 1950.

#### Renewal of Lawyers' License

License

I awyers practising in the different Courts of Calcutta are hereby reminded that under Section 175 of the Calcutta Municipal Act read with items 1; and 56 of Schedule VI of the same Act, they are hable to renew their professional licenses on payment of Rs. 25 in case of those who do not pay Income Tax, and Rs. 50 in case of those paying Income Tax. The license tax is to be paid by the 28th February, failing which the Department will be most reluctantly obliged to file prosecution against the defaulters. The inspectors of this Department will visit the different Courts on every alternate day to whom payment may be made and who will issue license on receipt of the usual fee. Those willing to deposit in office, may send the amount between the hours of 11 a.m. and 2 p.m. on all working days except Saturday when the amount will be taken up to 12-20 p.m. only. Lawyers practising in more than one Court in Calcutta will kindly let me know from which Court they want to take out professional license or otherwise they will run the risk of being assessed in thore than one place. This information is to be supplied to me by the 28th February, 1950.

B. N. GANGULI,

B. N. GANGULI, License Officer.

Central Municipal Office: The 6th February, 1950.

# RESTRUCTIONS ON THE OCCASION OF KUMBHA MELA AT VRINDABAN AND HARDWAR

The Government of the U. P. are desirous of taking steps to ensure that an epidemic of cholora does not break out and spread as a result of the Kumbha Mela which is to be held at Vrindaban and Hardwai in the latter end of February and in the middle of April, 1950 respectively. With this end in view they propose to issue an Order making anti-cholora inoculation a condition precedent to the pilgrims' journey to the mela. The Railway Administrations are being requested not to issue tickets from any station within their jurisdiction to any of the specified stations with effect from

February 10 to February 28, 1950 in the case of Vrindaban fair and from March 14 to April 13, 1950, in the case of Hardwar fair except to a person who produces a certificate of having been inoculated against cholera on a date not prior to December 1, 1949. This Government will arrange for establishment of checking barriers at all the main points of entry into Vrindaban and Hardwar and the mela areas. Arrangements will also be made for free inoculation of pilgrims within the province

#### **EDITORIAL**

## SARAT CHANDRA BOSE

OVERWHELMED with grief at the death of one of Bengal's most valuant sons, and a most prominent lawyer, sturdy corporator and acclaimed leader of men, Sarat Chandra Bose, we stand today Although he had been suffering from illness for some time nobody did realise that he would pass away so suddenly. On the day the people of this city assembled at the cremation to pay their last homage to his mortal remains he was to have appeared before the Chief Justice of the Calcutta High Court with a case; he was also to have attended the Endget session of the Assembly as the leader of the Opposition for the first time after his sensational election.

As a corporator Shri Bose was associated with this institution, both as an Alderman and as a Councillor for two terms, 1924-27 and 1930-32. It may be recalled here that he was one of those upon whom Deshabandhu Chittaranjan Das called to undertake the burden of the civic work of this city. And ever since his first contact with this institution he always kept its welfare before him and enjoyed the deepest regard of those who were carrying on the work after he had left it behind.

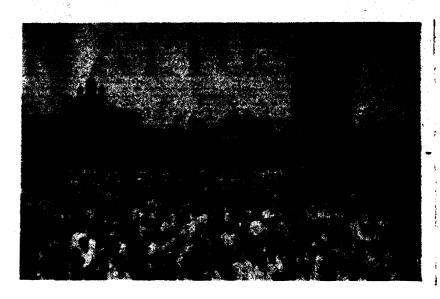

About May. 1942, when Sarat Chandra was in detention under the Defence of India Rules, this Corporation on receipt of news of his ill-health expressed its grave concern and repeatedly requested the then Government of India to set him free. When in September he was released, the Corporation presented to him an address of welcome and felicitation. Before this, the Corporation had also accorded him a civic reception on another occasion.

We remember how he always in and out of this Corporation, sought to remind us that our work would not be judged by the beautiful palaces nor by the beautiful roads that we would make but by the conditions of the workers in the bustees and slums of the city.

One, who courted death while engaged in the consideration of the means that would bring happiness and peace to the hearts, stirred by communal passion or thrown out of balance by economic or social ills and inequities, must have dedicated himself to the service of humanity beyond all personal considerations.

To-day, he is gone from amongst us, but his advice temains to guide us in the achievement of what he has set as a goal before us. His demise, many agree, has caused a void in Indian political.

### SHRI SARAT CHANDRA BOSE

#### A Very Distinguished Citizen Passes Away

Shri Sarat Chandra Bose, President of the United Socialist Organization, elder brother of Netaji Subhas Chandra Bose, an eminent barrister of this city and an ex-Alderman of the Corporation of Calcutta, breathed his last at 11-40 p.m. on Monday, the 20th February, at his Woodburn Park residence. He was 61. Calcutta was really shocked to receive the death news of Shri Bose.

Shri Bose, who had been ailing for the past few months from thrombosis of the heart, was reported to be gradually recovering and about three weeks ago he had also started occasionally visiting the High Court though unable to do any professional work.

In the evening of Monday, the 20th February, he was dictating an article for The Nation appealing to the people of East and West Bengal for peace and amity. He finished dictating the article at 11-10 p.m. and retired to bed. Soon after, he started complaining of heart trouble and succumbed to the acute attack just at 11-40 p.m.

Shri Bose is survived by his widow Srimati Bibhabati Debi and four sons and four daughters. His fourth brother, Shri Sudhir Chandra Bose, died only about a fortnight ago.

The funeral took place at the Keoratola burning ghat, Kalighat, on Tuesday, the 21st February. Many people called at his Woodburn Park residence to pay their last respects. There was a large crowd of citizens, who assembled at the cremation ground to pay homage to their beloved leader. Among those who called at Woodburn Park residence were Ir. B. C. Koy, Chief Minister of West Bengal, other Ministers of the Government, High Court Judges, members of the State Legislature, lawyers, Government Officials and leading citizens.

The funeral procession in progress through
Asutosh Mukherjee Road, Bhowanipur.
The route of the procession was lined by
crowds and at places flowers were
showered on the bier.

Photos : Tarak Das.

At 11 o'clock the funeral procession left the house. The flower-badecked bier, on which was placed the flag of the United Socialist Organization, of which Shri Bose was founder-president, was carried by barefooted mourners. On the way to the burning ghat, the milelong procession made a brief halt outside 38-2, Elgin Road, the ancestral home of Shri Bose. The route was lined by crowds who in silence watched the procession pass. At some places flowers were showered on the bier from houses.

His Excellency Dr. Katju arrived a few minutes before the funeral procession left. He went to the room where the body was, and laid a wreath. Wreaths were also sent on behalf of the Government and the Legislative Assembly and by numerous public organizations and private individuals.

The procession reached the burning ghat at about 1 p.m. After the preliminary rites had been performed, the pyre was set alight by Shri Bose's eldest son who had arrived by air from Jamshedpur a few hours earlier.

As a mark of respect to the departed Government offices, the High Court and other courts, offices of Calcutta Corporation and schools and colleges were closed. Many shops and other establishments suspended business, and many cinema houses cancelled their shows for the day.

The Sradh Ceremony to the memory of the great deceased was performed on Thursday, the 2nd March last. Friends, admirers and followers of Shri Bose attended the ceremony.

#### HIS DEATH IS MOURNED ALL OVER THE COUNTRY

Chandra Bose, a former Leader of the Congress Party in the Central Assembly, was made by Pandit Nehru in Parliament on Tuesday, the 21st February. Members stood in silence for two minutes as a mark of respect.

Soon after question hour the Prime Minister referred to the passing of "an old member of the House, and one who played a notable part in the service of the people and the country."

The Prime Minister added:

"A member of a very distinguished family and a lawyer of eminence, Sarat Bose occupied the highest position in the organization engaged in the struggle for freedom. He was a member of the Congress Working Committee for some years and become a member of the House, and was chosen as Leader of the Congress Party of the House. Later he became a member of the Interim Government which came into existence in 1946.

"On the political plane, he parted company with some of us and was one of our severest critics. Whether he was a critic or not,—everybody has a right to be a critic—he played an eminent role in the struggle for freedom, and it is a matter of sorrow for us that an eminent Indian should pass away. At any other time it would have been a matter of sorrow for us, but at the present moment, when grim tragedy faces us in Bengal, and when voices of controversy should be hushed before the tragedy, both actual and potential, it is a peculiar sorrow and regret that an eminent son of Bengal and India should pass away."

The Speaker, Shri Mavlankar, associated himtelf with the observations made by the Leader of the House.

The West Bengal Assembly mourned the death of Shri Bose on Tuesday, the 21st February and adjourned for the day without transacting any business.

#### Dr. B. C. Roy

Dr. B. C. Roy, the Chief Minister, said that the sudden death of Shri Bose had come as a shock and surprise to them. He had decided to attend the Assembly because he was feeling well. But he died almost immediately after writing an article for his paper urging the establishment of amity between the two Bengals.

Nearly 80 years ago Dr. Roy began his political life under the leadership of Deshabandhu C. R. Das. During the first few years of their political career. Dr. Roy, Shri Bose and three others were so closely associated that they were nicknamed "the Big Five."

Shri Bose was a man gifted in many ways. In the legal profession he had a unique position. In the Congress he had occupied very important places and had embraced incarceration and jail life for the sake of the country. He was an unflinching critic of anything that he thought was wrong and against the interest of the country and the people. He was a valiant fighter for social, economic and political freedom which he wanted his country to achieve.

Dr. P. C. Ghosh, former Premier of West Bengal, said that Shri Bose was completely free from communalism. He was a true Bengali and wanted prosperity of both Bengals irrespective of religion. Shri Bose was especially needed now. In Parliamentary democracy the Opposition also helped the Administration. He was not of course a leader of a large party in the House, but by his able criticisms and suggestions he could have done much to influence the Government.

The Speaker, Shri I. D. Jalan, said that Shri Bose had exceptional qualities. He was sincere and straightforward. He had the courage of conviction and pursued with resolution what he thought was right.

#### GOVERNOR'S REFERENCE

Reference to the death of Shri Sarat Chandra Bose was made by His Excellency Dr. Kailas Nath Katju in his address to the annual meeting of the Bengal Chamber of Commerce in Calcutta on Tuesday, the 21st February.

The Governor said:

The Association had contacts with him in his professional capacity and would mourn with me the passing away of a great son of Bengal. In the silence of death all political controversies are hushed and it is only when we lost something for ever that we realize the extent of our loss.

"Shri Bose was a great lawyer and the legal profession, not only in West Bengal but in the whole of India, is the poorer today by his passing away. But the people shall mourn him as one who took a great and valiant part in the struggle for national independence and made great sacrifices for the advancement of the national cause."

The Rotary Club of Calcutta at its 45th anniversary meeting held on Tuesday, the 21st February, adopted a resolution mourning the death of Shri Sarat Chandra Bose.

Students of Calcutta University, at a meeting held at the Ashutosh Building expressed sorrow at the death of Shri Bose.

Calcutta University in all its departments remained closed on Wednesday, the 22nd February.

The Bombay Municipal Corporation adjourned its meeting fixed for Tuesday, the 21st February, as a mark of respect to the memory of Shri Sarat Chandra Bose.

#### CALCUTTA HIGH COURT

Glowing tributes were paid to the memory of Shri Sarat Chandra Bose when a full court reference was made to his death in the court room of the Chief Justice of the Calcuta High Court on Wednesday, the 22nd February.

The Chief Justice said that he received one of the greatest shocks that he had ever received when on opening the paper the day before he read the death news of Shri Bose. He had thought that Shri Bose was recovering from his illness, because on Monday, the 20th February, he actually appeared in this court in a criminal matter. Apart from looking a little pale, he appeared to be in fairly good health. Alas, that very night he passed away.

The Advocate-General Shri S. M. Bose said that they had assembled to mourn the loss of a true patriot, a great fighter for India's freedom, an able Parliamentarian and a great lawyer.

Shri Sitaram Banerjee, President of the Bar Association, said that he knew Shri Bose from the

beginning of the century. He had a big heart. He lived nobly and died nobly.

Shri N. C. Chunder on behalf of the Incorporated Law Society said that he and Shri Bose were close friends and their friendship continued in spite of subsequent political differences. Both of them started their political career under the leadership of Deshbandhu Das.

#### CALCUTTA'S HOMAGE

A resolution paying tribute to the sufferings and services of Shri Sarat Chandra Bose in the cause of the country's freedom and expressing sympathy with members of the bereaved family was adopted at a largely attended public meeting held under the suspices of the Indian Association in its premises in Bowbazar Street on Wednesday evening, the 22nd February. Dr. Radhabenode Pal was in the chair.

Two minutes' silence in honour of Shri Bose's memory was observed by the gathering standing.

In his presidential speech Dr. Pal said that Shri Bose was a valiant fighter in the cause of freedom. Shri Bose was always in the vanguard. He might have had his differences with some leaders as regards the method of winning freedom and working it but as regards the aim there was no difference and he never hesitated to follow what he regarded as the correct path. There was no room for bitterness or interference for differences of opinion as regards the method, the objective being the same.

#### MESSAGES OF CONDOLENCE

Over 100 telegrams and messages of condolence were received by Shrimati Bibhabati Bose and her sons from prominent personages all over India, including the President of India, Dr. Rajendra Prasad, the Deputy Prime Minister, Sardar Patel, Shri C. Rajagopalachari, last Governor-General of India, Shri Sri Prakasa, Governor of Assam, Janab Asaf Ali, Governor of Orissa, Shri N. V. Gadgil, Minister for Works, Mines and Power, Government of India, Shri Ambalal Sarabhai, Shri J. B. Kripalani and Shri G. D. Birla.

- DR. RAJENDRA PRASAD: "Our friendly relations never suffered eclipse despite political differences."
- SARDAR PATEL: "His patriotism and zeal to serve his province and country will stand out in his long and distinguished career."
- Shri C. Rajagopalachari: "A noble discontent marked his whole career."
- Shri Sri Prakasa: "In the service of the country he had often staked his all."
- SHEI B. G. KHER: "Even those who differed from him have the highest regard for his zeal."
- Mayor of Bombay: "The country has lost one of its best patriots."
- SHRI N. R. SARKER: "Our mutual respect for each other was never impaired."
- [A short career sketch of the late Shri Sarat Chandra Bose will appear in the next issue of the Gazette.]

# Great Sarat Chandra Bose

#### in Grateful Remembrance

[By BINOY JIBAN GHOSH]

MORLEY in his Life of Gladstone, speaking of the great political antagonist of his hero; quotes the words of Goethe about St. Peter's in Rome, In spite of all the roccoco etwas grosses—there was something great." There was certainly something great about the late Sarat C. Bose, and about him, it is my grateful pride, I can claim to know something. He earned like a Prince. But he earned whatever he earned by the sweat of his own brow. The most remarkable trait in him was that he gave away his hard-earned money in almost reckless generosity like a Prince.

#### FRIEND OF THE POOR

He was comrade, companion and close friend of the biggest in the land, but even during the zenith of his career there were hundreds amongst his closest associates and companions, who were poor, non-descript common men, who could never have dared to approach him or to be intimate with

# "RETALIATION IS NO REMEDY"

-MAHATMA GANDHI

Every Citizen Should Do His Best To Maintain Peace In The City.

him, had not the kind warmth of his nature, his conduct, his words totally disarmed them of all fears and hesitation and assured them that so far as Shri Sarat C. Bose was concerned, they would be treated as perfect equals and friends.

Not the least, he liked good people and disliked bad ones, irrespective of party affiliations. This was a rare and extraordinary quality in a man, who had passed most of his career in the vortex of political struggles.

# A CORPORATION EMPLOYEE RETIRES ON SUPERANNUATION

pleasant function recently took place the Health Officer in room of with bidding farewell to Shri Atul Krishna Das, one of the senior clerks of the Health Department (Head Office), who recently retired on superannuation. Dr. M. U. Ahmad, Health Officer, presided. Eloquent tributes were paid to the manifold qualities of Shri Das by Shri S. C. Matilal, (Secretary, Hindu Burial Board), Shri Santosh K. Das Gupta (Actg. P. A. to Health Officer), Shri Shibnath Banerji and Shri Satyendranath Rai Chowdhury to which Shri Das made a suitable reply. All the members of the staff of the Health Department (Head Office) were present and a group photo was taken with Shri Das and Dr. Ahmad (Health Officer). Shri Atul Krishna Das was presented with a silver mounted stick and a copy of the Bhagabad Gita and a copy of Brahmu Bidya. The last one was presented by Shri S. C. Matilal as a token of his personal regard for Atul Babu. The function commenced with an opening song (sung by Shrimati Namita Das) and closed with a song (sung by Shri Biresh Chakravarty). The gentlemen present were treated to light refreshments.

Of his high intellectual attainments, his parity and integrity of character, his warm and affectionate but powerful personality, his immense services and sufferings in the national cause, it is needless for me to speak.

#### A Noble And Valiant Soul

Even in the midst of tempestuous political squabbles, in which, unfortunately, it was the lot of the late Sarat C. Bose to be involved, one thing should never be forgotten, that if he aspired after any political objective, he looked to the top of the tree and wanted to be the First in India. There was no position in the Province of West Bengal which he could not have find for the mere asking. He never cared for such small glories.

There was essentially something big and grand about the man and even as a rival and opponent, he was a stormy giant, not easily to be reckoned with.

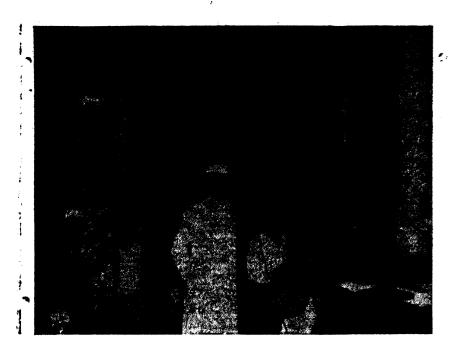

Bengal has lost a superb son, a sturdy patriot and a noble and valiant Soul.

#### ZOOLOGICAL EXHIBITION AT THE INDIAN MUSEUM

An Exhibition organised by the Zoological Society of India was opened at the Indian Museum by H. E. Dr. Kailashnath Katju, Governor of West Bengal, last month. A small but distinguished gathering was present on the occasion, including a fair sprinkling of ladies. The President of The Society, Dr. S. L. Hora, in welcoming His Excellency and thanking him for coming to open the Exhibition in the midst of his multifarious duties, deprecated the fact that the study and researches in various branches of service in India had suffered a set-back since the Europeans left India, and that very few Indians are taking any interest in these branches of knowledge. Mankind, he said, had for ages past been living with animals, whose contact had been either beneficial or harmful, and as such Zoology was an important branch of service deserving study. He cited Susruta, Kautilya and other Indian sages, whose writings offer evidence of erudite study of Zoology, and mentioned a rock-cut Edict of Asoka where laws relating to fisheries and pisciculture are enunciated. He stressed that these laws appear to be the last word on the subject, and as such, he had asked the Government of India to enact a law based on Asoka's directives.

In reply His Excellency Dr. Katju also deprecated the fact that though India is rich in its flora, fauna and other natural resources, thorough study of branches of science like archaeology, zoology, botany, anthropology etc., are taken up by very few Indians. In the new set-up of a free Republican India, he declared, we must devote more attention to such branches of science. Confessing that he was an ignorannus so far as zoology was concerned, His Excellency expressed surprise that an Asokan Edict of more than 2,000 years ago should contain such excellent laws regarding fish preservation and culture.

His Excellency then declared the Exhibition open, and along with the invited guests, spent an enjoyable and interesting half-hour inspecting the exhibits, which comprise beasts, hirds, insects, marine creatures, snakes etc. Though small, the collection is a select and representative one, gathered from all parts of India.

HIS EXCELLENCY SPEAKING ON THE OCCASION OF THE FIRST DEATH ANNIVERSARY OF LATE SHRI KIRON SANKAR ROY

# Late Shri Kiran Sankar Roy First Death Anniversary Celebrated

N the occasion of the First Death Anniversary of Shri Kiran Sankar Roy, who had been Home Minister of West Bengal at the time of his death, a portrait of the late Shri Roy was unveiled by His Excellency Dr. K. N. Katju at West Bengal Secretariat on the 20th February last.

Paying his tributes, Dr. Katju said that when he came to Bengal he had looked forward to a long association with Kiran Babu whom he had earlier met in the Congress platform. A lovable personality, the deceased was a great lover of literature and had a wide circle of friends and admirers for his great intellectual attainments and social qualities. If the deceased was born some 25 years back, he would perhaps have left a great mark in the field of literature. But he was born in a generation when literary pursuits were impossible and he plunged himself into politics. Dr. Katju had no doubt that the country would benefit from the great inheritance of solid work which the deceased had left behind.

#### DR. B. C. Roy

Paying his tributes, the Chief Minister, Dr. B. C. Roy said that when the history of India came to be written the great part which Bengal had played in the struggle for political freedom would find a prominent place in it. Surendra Nath Baneriea, Deshabandhu Chittarenjan Das, Deshapriya Jatindra Mohan and Netaji Subhas Chandra Bose and many others had struggled long and sacrificed their all in the struggle for freedom. Kiran Sankar Roy belonged to that band of selfless workers. Though Kiran Sankar was born in a rich family, he did not hesitate to plunge himself in the struggle for freedom when the call for it came.

Dr. Prafulla Chandra Ghosh said that in the contemporary political history of Bengal, Kiran Sankar would have a prominent place.

Shri T. C. Goswami said that in Kiran Sankar Roy they had witnessed a rare combination of culture and politics, of earnestness, truth and scholarahip.

Shri Ashutosh Mallick, Deputy Speaker, West Bengal Assembly, said that from 1921 down to 1949 Kiran Sankar was closely connected with Bengal Congress and during this period one could not think of Bengal Congress without Kiran Sankar.

Shri Satya Ranjan Bakshi said that Kiran Sankar was never in the floodlight of politics and yet he was in the thick of politics. The deceased was also a politician who was always conscious of his own limitations. For the last 30 years Kiran Sankar played the role of the second man in Bengal politics. History could not forget him.

Shri Bhupati Majumdar, Irrigation Minister, said that Kiran Sankar had a genuine love for the country. Today, when independence had been achieved and the need of constructive thinking and work was the need of the hour they were greatly feeling the absence of Kiran Sankar.

#### FUNCTION AT KEORATALA

A memorial meeting was held in the morning at Keoratala burning ghat, at the site where Shri Roy's body had been cremated.

Wreaths were placed before a decorated portrait of the deceased on behalf of different organizations and individuals. Shri Suresh Chandra Das, President, South Calcutta Congress Committee, presided.

The meeting passed a resolution, requesting West Bengal Government and Calcutta Corporation to re-name Wellington Square and Dharamtala Street as 'Kiran Sankar Square' and Kiran Sankar Roy Road in memory of the deceased.

Besides the President Shri Nishapati Majhi, Shri Haranath Chakravarti, Shri Rajaballi Sukla, Kaviraj Satyabrata Sen and Shri Kumudbandhu Chatterjee addressed the gathering paying tributes to Shri Roy's work.

## Form Of Calcutta's Civic Administration—II

#### Commission's Recommendations To Government

[Concluded from the issue of 18th February, 1950]

NALCUTTA need no longer be tied down to the British model, but may fashion its constitution in the light of its own experience as well as the experience of other countries besides the United Kingdom. Of all coun-United tries in the world, the America may perhaps claim to have made the most extensive and varied experiments in the art of municipal government, which, though not entirely discarding the Anglo-Saxon tradition of elected municipal councils, are still a departure from it in a vital respect in so far as they have tended more and more towards government by an individual rather than by a council or a committee.

#### MUNICIPAL GOVERNMENT IN AMERICA

Generally speaking, it may be stated that four different types of government structure have been tried in American cities. In the order of their effectiveness they may be listed as follows:—

- (1) Council-Manager form,
- (2) Strong Mayor-Council form,
- (8) Commission form,
- (4) Weak Mayor-Council form.

The Weak Mayor-Council form was most in vogue during the 19th century, when a theory was current that democracy was best served by directly electing as many officials as possible. The following were the main characteristics of this plan:—

- (1) A city council with Committees delving into details of administration;
- (2) an elected mayor (with executive powers and not a mere ceremonial head);
- (3) most administrative heads elected, including treasurer, solicitor, and some or all other heads of departments;
- (4) elected administrative boards or committees.

It did not take long for the system to reveal its inherent defects—lending itself easily to political manipulation, and failing to provide for competent administrative personnel or a unifying responsible executive head.

#### Commission Form

The commission form of government was little more successful. It was first started in Galveston, Texas, in 1900, when a tidal wave brought the necessity for quick governmental action. A new form of government was conceived and adopted as an emergency measure. There was no separate council but an elected legislative body of five members who were also heads of the administrative departments. The points in favour of this type of government were these:—

- (1) It concentrated responsibility in a small group;
- (2) it was simple and easily understandable by the voters;
- (8) it avoided friction between the legislative and executive branches;
- (4) it provided a short ballot;
- (5) it provided election at large rather than by dictricts.

The chief fault of the commission form was that it made no organisational distinction between the policy-making function of government and the administrative function. Executive responsibility, again, was not concentrated but divided. Another defect was that persons meant for technical administrative work were selected by election. The process of election, however, can seldom carry to office men who have the talent for administration. Personality, connections backing a political organisation—are the factors which produce votes. A good administrator may not, and frequently does not, have these attributes. Moreover, those men who have the qualities necessary to successful public administration, are rarely willing to run for office under conditions like those of the commission plan. Another most serious shortcoming was the failure of this plan to provide an executive head for the government. History shows an impressive record of failure with the multiple executive form. Even parliamentary forms of government give one of the ministers the citle and powers of an executive. But while under the commission plan one official was designated mayor, he was legally no more than a chairman for the commission while it was exercising its legislative role. The mayor had no authority over his fellow commissioners in their administrative roles. The result of the lack of an executive head was that there was no brake on the activities of each department, and no co-ordination either between the activities of the departments. Executive responsibility was not concentrated but divided, and in case of some serious administrative error or misdeed. there was no one on whom the legislative body or the voters could fix blame.

#### MAYOR FORM

The strong-mayor form has been more successful than either the weak-mayor plan or the commission form. In practice, it too developed serious weaknesses. It is still in use in many cities. This plan has commonly the following characteristics:—

- (1) A city council elected by wards or at large;
- (2) a mayor elected at large;
- (3) the mayor vested with power to "hire and fire" most or all departmental heads;
- (4) the mayor entitled to veto acts of council;
- (5) the mayor to prepare the city budget for consideration of the council.

The chief defects are :-

- (1) The difficulty of electing a mayor who has real executive ability and knowledge of the job;
- (2) the opportunity provided for the mayor tobuild up a powerful personal political

The strong-mayor form automatically corrects one of the most serious defects of the commission form—lack of a single responsible executive head. It also eliminates the danger of union of administrative and policy-making functions. The council is responsible for legislation and policy-making, while the mayor's job is administrative except in his power to yeto acts of the council.

But the strong-mayor form does not eliminate other serious defects of the commission form. First of these is the lack of administrative expertness. For the same reason that trained municipal executives are not normally elected to a city commission, only by chance would a qualified administrator be elected mayor, although the chances of electing a single good administrator may be better than those of electing five. Nevertheless, seldom does election produce even one good administrator. It does almost invariably produce politicians. Occasionally when a mayor is elected who is competent to direct the complicated business of the city, the strong-mayor form of government is at its best; but such cases are rare.

#### POLITICS IN CITY ADMINISTRATION

Even when a strong executive does happen to be elected mayor, there are serious obstacles in the way The very effort successful government. of inevitably carries with election achieve to it strong political obligations, and the mayor's make appointments comprehensive power to and direct the workings of the various departments provides a convenient avenue for the discharge of these obligations. The result is, any mayor is almost always forced to play politics with the city administration. Another inherent defect in this form of government is the possibility of deadlock between the mayor and the council. Since the council controls the purse strings, it may stop the mayor at any point. But the mayor may block the council with his veto power. Therefore, political differences between mayor and council may impede the day-to-day administration.

To correct some of its defects, a variation of the strong-mayor form has been tried, which involves the employment of a chief administrative officer by the mayor. It is an attempt to combine professional administration with an executive who is elected.

#### COUNCIL-MANAGER TYPE

The form of government which tries to avoid or remedy many of the difficulties of the other forms of government is the Council-Manager type, which includes a council elected by the people, a mayor or president of the council for the performance of ceremonial duties, and a chief executive or city manager, appointed by the council to serve as executive head of the city for an indefinite term.

The council-manager form preserves the advantages claimed for the commission form of government, while at the same time it avoides the objections to the commission form in that:—

- (1) Administration and legislation are kept separate;
- (2) the ideal of a single-headed executive is realised:
- (8) council men need be legislators only, and no combinations of legislators and executives;
- (4) the composition of the council is not hampered by executive considerations;
- (5) practically speaking, there is a wider range of choice for the executive head of the city, and therefore abler administrators may be chosen.

Most cities in the United States have now adopted, and are still adopting, the council-manager plan. In a very few cases, strong political machines have retained their hold on the council, a non-expert manager has been appointed, and politics has been injected into administration. But this is the exception and not the rule. In almost all cities the experience with the manager plan has been favourable—increased efficiency, better public services, and easier voter control of government at the polls.

easier voter control of government at the polls.

As already stated, the council-manager plan clearly differentiates between the policy-making function and the administrative function of government. The people elect the council, which makes governmental policy, controls the raising and appropriation of funds, levies taxes and contracts debts. The council also chooses the manager, whose duty it is to carry out its policies, spend the funds it has appropriated, supervise the work of the administrative departments, and make all appointments.

#### POINTS OF DISTINCTION

A distinct line is drawn between the duties of the council and the duties of the manager, and it is made illegal for council-men to interfere with administration. No administrative authority is given to the council, except the employment and the discharge of the city manager. This plus the requirement of independent annual audit gives the council adequate check on the administration for the carrying out of its purposes as a policy-determining body.

Unlike other forms, the administration of government under the council-manager form is not likely to be handled by amateurs. The council is required to appoint a manager solely on the basis of his executive and administrative qualifications, with special reference to his actual experience in, or his knowledge of, accepted practice in respect to the duties of his office.

There can be no doubt that a good deal of the success of this form of government depends on the right choice of the city manager. He must be a person with a firm belief in the dignity and worth of the services rendered by government and a deep sense of his own social responsibility as a trusted public servant. He should be governed by the highest ideals of honour and integrity in his public and personal relationships in order that he may merit the respect and inspire the confidence of the administrative organisation which he directs and of the public which he serves. He should in no sense be a political leader. In order that policy may be intelligent and effective, he should provide the council with information and advice, but encourage positive decisions on policy by the council instead of passive acceptance of his recommendations. He should realize that it is the council, the elected representatives of the people, which is entitled to the credit for the fulfilment of municipal policies, and will leave to the council the defence of policies which may be criticised. In order to preserve his integrity as a professional administrator, he should resist any encroachment on his control of personnel, insist on the exercise of his own judgment in accomplishing council policies and deal frankly with the council as a unit rather than secretly with its individual members. He should handle all matters of personnel on the basis of merit and not on political, religious or racial considerations.

It is not expected that the manager should be an expert in all branches of administration, or that he should personally attend to all the multifarious details of administration. He will select his departmental heads and subordinates wisely, and make use of their knowledge in performing his task of supervision and co-ordination, devoting more time and energy to the larger problems of over-all administration.

Although the manager is the pivot of the administration in the council-manager form, the Council will hold the key to the success or failure of the plan in so far as it will be the body selecting the manager, determining policies, and co-operating and working with the manager. The very fact that under this plan the council will be freed of responsibility for administrative details, will help to attract to it man of greater ability—community leaders able and willing to give their thought and time to general policies and programmes. There need be no fear that the manager will become a dictator. There is no record of such a thing occurring in any of the American cities where the council-manager plan is in operation. On the contrary, the manager's immediate responsibility to the council makes him more genuinely subject to democractic control. While his authority over administration will be complete, the council will have power to dismiss him, if his work should prove unsatisfactory, just as a board of directors of a business organisation may dismiss its manager.

#### EXPERIENCE OF AMERICAN CITIES

Of all forms of government the council-manager form, makes the job of the citizens easy, makes it so much easier that the citizens can understand how it works, and make it work. But it need hardly be emphasised that if the citizen fails to play his role in the democratic process, then a bad government is likely to result, whatever the form of government.

With the experience of American cities before us, we have seriously considered whether the council-manager plan may not be fitted into Calcutta's municipal government as the best remedy for the abuses and weaknesses which it has developed. The germs of the council-manager plan may be said to have been implicit in the constitution under Act III of 1928, in so far as it provided for an elected council (though not wholly so), a ceremonial mayor to be elected by the council itself, and an officer, corresponding to the manager, to be appointed by the council as the principal Executive Officer of the Corporation,—constituting on the whole a set-up, which, there was no reason to suppose, would not produce efficient administration. Unfortunately, however, out of what must now be regarded as an exaggerated anxiety to give the Corporation a wide democratic character, all powers, duties and functions, legislative as well as administrative, were expressly vested in the Corporation, and the Chief Executive Officer was left to exercise his authority (except as regards a few matters like assessment and election) only by virtue of delegation by the Corporation. The Corporation was also empowered to delegate its powers, executive or otherwise, to committees, and this, again, entrenched further upon the authority of the Executive Officer.

AUTHORITY OF THE EXECUTIVE

We shall see hereafter how the powers of delegation varied from time to time according to the

whims and caprices of the Councillors, and reduced the Chief Executive Officer to a position of complete subservience, so much so, that even in matters in which the Chief Executive Officer had statutory powers, individual Councillors had their way. We are fully satisfied, after examining the affairs of the Corporation, that it was this weakness of the Executive, and the scattering of responsibility among Committees charged with executive powers, that consituted the root cause of the maladministration in every department of the Corporation. In England, the committee system of government still continues, but public opinion there is a powerful corrective. That unhappily, as experience has shown, is a sad desideratum here.

We now proceed to give a general outline of the plan of municipal government we recommend for Calcutta, which will be democratic, that is to say, responsive to the electorate, and at the same time capable of efficiently translating the intention of the voters into effective administrative action as promptly and as economically as possible.

For the accomplishment of this democratic purpose, our scheme concentrates all the powers of the Corporation in a single council of elected representatives with full responsibility for determination of policy. In order to obtain administrative efficiency, it concentrates the actual administration in a single administrative officer who is appointed by, and is at all times responsible to, the council. Under this scheme there can be no avoidance of responsibility either by the people's representatives for determinations of policy or by the administrative officer for the actual administration.

#### MANAGEMENT BY TRAINED MEN

The plan is based on the concept of entrusting administration to men trained in municipal management, which assumes the building up of a profession of public management. In America this. assumption has already been realised, and there now exists there a substantial body of trained municipal administrators on which local governments may draw. Colleges and Universities have recognised this field as one of the newly developed professions and are giving the needed instructions. The City Managers have their own professional organisation, devoted to the maintenance of high standards. There is no reason why a serious attempt should not be made in this country to provide similar courses of instruction in municipal administration. There should be increasing recognition that the administration of cities can and should be improved, and the training of competent personnel should be an essential part of that process. As we have said before, the success of the City Manager plan depends upon the availability of qualified personnel for the position of Managers. So long as specially trained men are not available here, men of general executive and administrative ability will have to be chosen. But the earliest steps should be taken for setting up special institutions for training.

We recognise that under the Council-Manager plan, the smaller the city council, the more efficient it is. From this point of view, a council of 75, as we have recommended in our interim report, may appear too large, but we have been guided by a desire to avoid a sudden and violent change from the past.

#### CALCUTTA NEWS & VIEWS

BENGALI BANKS in the city received a serious jolt last week end. The Nath Bank, a scheduled bank, suspended payment on the 17th February last at its head office and branches in Calcutta. Following such suspension there was some panic among the depositors of other Bengali Banks in the city. Thereupon the Reserve Bank of India suggested in a Press Note the immediate amalgamation of some of the principal banks in Calcutta.

The boards of directors of these banks have agreed to the proposal, it is understood. The Banking Companies Act will soon be smended suitably to enable such amalgamation.

The proposed amalgamated bank will have a capital of over Rs. 2-1/2 crores and a reserve of Rs. 1 crore.

The banks who have agreed to amalgamate are the Bengal Central Bank Ltd., the Comilla Union Bank Ltd., the Comilla Banking Corporation Ltd., the Hooghly Bank Ltd., and the Calcutta National Bank Ltd.

BENGAL GIRLS GUIDE ASSOCIATION organised a mela in the grounds of Government House on the 18th February last. The mela, attended by 5,000 women and children, was opened by Dr. Kailas Nath Katju. His Excellency told the girls that their first duty was to revere their parents. Unless they were good at home, they could never be really good outside. He advised them to visit villages so that women there could gain some idea of modern ways of life.

CHITTARANJAN CANCER HOSPITAL was visited by His Excellency Dr. Katju on Sunday, the 19th February. The Governor was given an at-home by the committee of management of the hospital. Speaking at the function His Excellency said:

"Cancer is an ancient disease and millions of dollars are spent every year in the U.S.A. on its research, "Calcutta has the privilege of establishing a hospital where patients from all over India may come for treatment of cancer.

Appealing to the generous public to help this hospital so that services might be rendered to the public His Excellency said; The contribution, however small, I feel sure, will be gratefully appreciated by the hospital authorities.

A CONFERENCE OF PRINCIPALS of Calcutta Colleges was held on the 18th February last at Writers' Buildings. At the Conference a general agreement on the necessity of restricting the enrolment in colleges was reached. There was, however, no unanimity regarding the precise number of students the colleges should admit.

The discussion took place on the basis of the recommendations of the Indian Universities Commission and on a questionnaire issued by the Vice-Chancellor of Calcutta University.

THE INDIAN MUSEUM at Calcutta is so congested that it lacks ordinary amenities for the visiting public, such as moving space, lifts, seats, fans and refreshment rooms.

Stressing the need for expansion and reorganization of the museum, Dr. S. L. Hora, Director, Zoological Survey of India, speaking at a meeting organized by the Indian Museum said that at present the institution was managed in aix sections unrelated to one another and having no common policy.

He suggested that university departmental museums should be combined into a public museum. This was the most inexpensive way of utilizing India's museum resources in men, material and money.

Dr. Hora also suggested the opening of a School Section under a public relations officer at the Indian Museum as an instrument of Education.

BENGAL CHAMBER OF COMMERCE held its annual meeting on Tuesday, the 21st February. Presiding over the occasion His Excellency Dr. Katju said that citizens of both West and East Bengal should display utmost fellow feeling and forbearance towards each other.

Warning against the dangers of "spreading false reports and exaggerated versions of incidents, wittingly or unwittingly," the Governor said that these were likely to "cause incalculable damage to life, limb and property of most humble people, innocent and harmless."

Dr. Katju also discussed the various problems confronting trade and industry in the country with special reference to West Bengal.

Mr. A. J. Elkins, President of the Chamber, in his address referred to the economic interdependence of West and East Bengal, the burden of direct taxation, questions of decontrol and bringing down the cost of living, and maintenance of good relations between managements of industrial organizations and labour.

#### WEST BENGAL'S BUDGET FOR 1950-51

#### No Proposals For Fresh Taxation

West Bengal's Budget Estimates for 1950-51, presented in the State Assembly by the Finance Minister, Shri N. R. Sarker, on Thursday, the 16th February, contain no proposals either for fresh taxation or for easing the taxpayer's burden.

The Estimates show a net Revenue deficit of Rs. 1,33,01,000 during 1950-51. Revenue receipts being taken at Rs. 33,89,86,000 and Revenue expenditure at Rs. 35,22,87,000. The Revised Estimates for 1949-50 show a net Revenue surplus of Rs. 1,47,07,000, Revenue receipts being calculated at Rs. 34,72,71,000 and Revenue expenditure at Rs. 33,25,64,000.

According to Shri Sarker, the Revenue deficit during the coming year is mainly attributable to the sudden stoppage by the Central Government of its Development grant to the State. But for this, the year would have ended with a surplus.

In contrast to the current year's expected Revenue surplus, the Revised Estimates disclose a deficit of Rs. 8,12,23,000 outside Revenue account. It is proposed to finance this large deficit partly from the Revenue surplus and partly from the year's opening balance. The year will, therefore, close with a balance of Rs. 3,54,02,000 as against the opening balance of Rs. 10,19,18,000.

In 1950-51, in addition to the expected deficit of Rs. 1,33,01,000 on Revenue account, the Budget Estimates reveal a deficit outside Revenue account of Rs. 4,27,76,000. According to the Finance Minister, their opening balance for the year is inadequate to finance these deficits and 1950-51 is expected to close with a negative balance of Rs. 2,06,75,000.

As in the past two years, expenditure on Police during 1950-51 at Rs. 5,76,59,000 is expected to absorb about 19.7 per cent., of the total budgeted cost of non-revenue earning Government departments.

Civil Supplies (now split up into the departments of Food and Supply) at Rs. 3,42,10,000, Education at Rs. 3,40,78,000, and Medical at Rs. 3,10,72,000 are other outstanding items of expanditure accounting for 11.7 per cent., 11.6 per cent., and 10.6 per cent., respectively of the budgeted... total.

General Administration accounts for only 9.4 per cent., at Rs. 2,75,44,000.

4

#### VITAL STATISTICS

**(I)** 

For the City of Calcutta for the week ending 28th January, 1950

CITY OF CALGUTTA (TOWN AND SUBURBS.)

The total number of deaths registered during the week was 830 against 976 and 993 in the two preceding weeks and higher than the corresponding week of the last year by 22. The general death of the week was 15.80 per millo.

#### Town (Wards 1-27.)

The number of deaths registered during the week ending 28th January, 1950 was 685 against 752 and 787 in the two preceding weeks. There were 37 deaths from cholers, against 15 and 7 in the two preceding weeks. There were 39 deaths from small-pox during the week against 31 in the previous week. There was 1 death from influenza against 1 in the pervious week. The mortality from fevers and bowel-complaints amounted to 38 and 78 respectively against 37 and 82 in the preceding week. The general death-rate of the week was 14.05 per mille per annum.

There were 14 imported deaths. Excluding these, the death-rate of the Town was 13.76.

There were I39 deaths from respiratory diseases against 143 in the previous week

There were 36 deaths from tuberculosis against 41 in the previous week.

#### Suburbs (Wards 28-32.)

The number of deaths registered was 195 against 224 and 206 in the two preceding weeks. Of these, 3 were from cholers, 55 from small-pox, nil from influenza, 13 from fevers, 16 from bowel-complaints and 35 from respiratory diseases. The death-rate of the suburbs (or added areas) was 28.15 per mills.

There were nil imported deaths. Excluding these, the death-rate was 28.15.

There were 6 deaths from tuberculosis against 5 in the previous week.

(II)

For the City of Calcutta for the week ending 4th February, 1950

#### CITY OF CALCUTTA (TOWN & SUBURBS)

The total number of deaths registered during the week was 891 against 880 and 976 in the two preceding weeks and higher than the corresponding week of the last year by 51. The general death-rate of the week was 16.00 per mille.

#### Town (Wards 1-27)

The number of deaths registered during the week ending 4th February, 1950 was 690 against 685 and 752 in the two preceding weeks. There were 54 deaths from cholera, against 37 and 15 in the two preceding weeks. There were 44 deaths from small-pox during the week against 39 in the previous week. There was 1 death from influenza against 1 in the previous week. The mortality from fevers and bowel-complaints amounted to 36 and 79 respectively against 38 and 78 in the preceding week. The general death-rate of the week was 1.15 per mille per annum.

There were 24 imported deaths. Excluding these, the death-rate of the Town was 13.65.

There were 112 deaths from respiratory diseases against 139 in the previous week.

A STATE OF THE STA

There were 41 deaths from tuberculosis against 36 in the previous week.

Suburbs (Wards 28-32)

The number of deaths registered was 201 against 195 and 224 in the two preceding weeks. Of these, 9 were from cholera, 66 from small-pox, nil from influenza, 10 from fevers. 24 from bowel-complaints and 31 from respiratory diseases. The death-rate of the suburbs (or added areas) was 29.01 per mille.

There were nil imported deaths. Excluding these, the death-rate was 29.01

There were 6 deaths from tuberculosis against 6 in the previous week.

(III)

For the City of Calcutta for the week ending 11th February, 1950.

CITA OF CALCUITA (TOWN AND SUBURBS.)

The total number of deaths registered during the week was 860 against 891 and 880 in the two preceding weeks and lower than the corresponding week of the last year by 17. The general death-rate of the week was 15.44 per mille.

Town (Wards 1-27.)

The number of deaths registered during the week ending 11th February, 1950, was 699 against 690 and 685 in the two preceding weeks. There were 50 deaths from cholera, against 54 and 37 in the two preceding weeks. There were 49 deaths from small-pox during the week against 44 in the previous week. There was nil death from influenza against 1 in the previous week. The mortality from fevers and bowel complaints amounted to 39 and 75 respectively against 36 and 79 in the preceding week. The general death-rate of the week was 14.33 per mille per annum.

There were 32 imported deaths. Excluding these, the death-rate of the Town was 13.68.

There were 111 deaths from respiratory diseases against 112 in the previous week.

There were 30 deaths from tuberculosis against 41 in the previous week.

Suburbs (Wards 28-32.)

The number of deaths registered was 161 against 201 and 195 in the two preceding weeks. Of these, 12 were from cholera, 40 from small-pox, nil from influenza, 11 from fevers, 13 from bowel-complaints and 24 from respiratory diseases. The death-rate of the suburbs (or added areas) was 23.24 per mille.

There was nil imported death. Excluding these, the death-rate was 23.24.

There were 2 deaths from tuberculosis against 6 in the previous week.

(IV)

For the City of Calcutta for the week ending 18th February, 1950.

CITY OF CALCUTTA (TOWN AND SUBURBS.)

The total number of deaths registered during the week was 979 against 860 and 891 in the two preceding weeks

# Chronicle & Comment

#### DR. SACHCHIDANANDA SINHA

Dr. Sachchidananda Sinha, first President of the Indian Constituent Assembly (Provisional) and a leading citizen of Bihar, died at Patna on Monday, the 6th March.

Dr. Sinha's death is mourned all over the country, for a leading man-of-letters and a constitutionalist is gone with his demise. Besides his personal admiration for Gazette he could claim association with this City having been a student of the City College and having also practised here, although for some time only, as an advocate of the Calcutta High Court.

We pay our last homage to the departed, and our sincerest sorrow and sympathy to the members of the bereaved family.

#### DELHI'S MUNICIPAL JOURNAL

The first issue of the "Rajdhani" saw the light of day on the most memorable date, the 26th January, 1950, the day on which India was declared an independent sovereign republic. Born on such an auspicious day the journal has through its recent issues given promise of a very bright future.

The aims and objects of the journal have been stated to be

(a) to develop in the public mind a sense of civic duties and responsibilities so that the ideal of model citizenship of a model metropolis may be attained,

The State of the said of the s

- (b) to supply the citizens information regarding the activities of the Municipal Committee and the facilities, amenities and services provided by it,
- (c) to keep the public and the municipal authorities mutually informed of each other's view points,
- (d) to present the public life of the city to its own citizens as well as to those outside,
- (e) to provide the public with good and healthy reading material.

The first issue of "Rajdhani" carries quite a number of goodwill messages, and in two of which we have been most interested. Because these two messages refer to our own journal, the Calcutta Municipal Gazette. In congratulating Rajdhani on its first appearance Rai Bahadur Harish Chandra, former Vice-President of Delhi Municipal Committee, writes: "Calcutta has had such an organ for the past many years and it has proved to be extremely helpful both to Calcutta Corporation and that city's vast population". Mr. Arthur Moore. formerly Editor of the Statesman and a much esteemed contributor to our Gazette, writes in his message to Rajdhani; "Calcutta has now for many years had such a journal, which has rendered good service, and it is good to know that Delhi is now to have its own organ".

What is most praiseworthy about Rajdhani is that the journal is trilingual,—English, Hindusthani and Urdu.

We offer this youngest contemporary of ours.
our most cordial welcome.

PANDIT NEHRU TALKING TO CALCUTTA JOURNALISTS

10 Pandit Nehru's left is Shri Sures Chandra Majumdar, Managing Director, Ananda Bazar Patrika and Hindusthan Standard. Behind Shri Majumdar is Shri Amal Home, Director of Publicity, Government of West Bengal. To Shri Home's left is Shrimati Indira Gandhi, Panditji's daughter. Shri S. P. Mookerjee. Minister-in-charge, Industry and Supply, Government of India, may be seen in the picture.

Among the journalists who may be recognised in the picture, are Shri B. Sengupta, Managing Director. United Press of India, Shri Anil Banerjee (Amrita Bazar Patrika); Shri Phanindranata Mukherjee (Bharatbarsha), Shri J. C. Himkar (Jagriti), Shri Bhabatosh Ghatak (Basumati) and Shri S. K. Chatterjee (Municipal Gazette).

# Pandit Nehru In Calcutta To Study Problems Created In East Bengal

Pandit Jawaharlal Nehru arrived in Calcutta from Delhi on Monday noon, the 6th February, on a three-day visit to the City to study problems attending the communal disturbances in East Bengal. The Prime Minister was accompanied by the Industry and Supply Minister, Dr. Syamaprasad Mookerjee and his daughter, Shrimati Indira Gandhi.

On arrival at Government House Pandit Nehru held consultation with the West Bengal Governor, Dr. K. N. Katju, Chief Minister, Dr. B. C. Roy and Shri Surendra Mohan Ghosh, President, West Bengal Provincial Congress Committee regarding the programme of his stay in the City. In the afternoon the Prime Minister met the editors of Calcutta papers at Government House and discussed with them the situation in all its aspects for nearly two hours. The Prime Minister also met a deputation of women social workers representing 35 women organizations, who urged for the immediate evacuation of the minority from Pakistan and immediate action for the rescue of women who had been abducted or forcibly converted.

In the evening Pandit Nehru met the Ministers of West Bengal Government.

The same evening Dr. Sita Ram, High Commissioner for India in Pakistan, who had been on tour in East Bengal, and Shri Santosh Kumar Basu, Deputy High Commissioner for India in Pakistan, arrived by air from Dacca with the purpose of meeting Panditii."

HE Prime Minister met the Congress M.L.A.'s of West Bengal on Tuesday, the 7th February,-the second day of his stay—at a conference at Government House. He assured that of India were fully Government alive to the importance of the problem and would do everything possible to solve it. The Government of India must see that the sufferings of the minority community in Eastern Pakistan were alleviated. While he was not in favour of a mass exodus, he felt that those who wanted to cross the border must be given every facility to do so.

Long-term remedies, he said, involved time and careful thinking, for exchange of populations presented great difficulties.

He congratulated the West Bengal Government their handling of the situation and on maintaining peace in the State. They must continue to maintain peace, otherwise they would not be able to do much for the minorities in East Bengal.

About 50 Muslims, including M.L.A.'s of West Bengal and Maulana Hafizur Rahman, President of Jamait-ul-Ulema-e-Hind, met the Prime Minister.

Members of the West Bengal Congress Executive Committee and representatives of certain nonofficial relief organizations also saw the Prime

In a memorandum submitted to the Prime Minister, the East Bengal Minority Welfare Central Committee suggested planned evacuation of minorities

The Prime Minister had discussions with high officials of the West Bengal Government, who gave him an overall picture of conditions in the State.

Among others who met him was Maj.-Gen. S. B. S. Roy, G.o.c., Bengal Bihar and Orissa.

In the afternoon Pandit Nehru met the Chief Ministers of West Bengal, Bihar, Assam and Orissa at a conference. The discussions centred round the question of rehabilitation of East Bengal refugees.

#### GOLDEN JUBILEE OF INDIAN REVIEW

The Golden Jubilee number of the Indian Review (G. A. Natesan & Co., Madras) opens with a fine tribute from the pen of H. E. The Governor General to this "dependable monthly Cyclopaedia of public affairs with the backing of fifty years of experience through a period of change and struggle." This is followed by a message from Pandit Jawaharlal Nehru, our Prime Minister and one from H. E. the Governor of Madras. The Editorial on Fifty Years is a record of five decades of political and social progress which the Review has tried to cover, month by month. Dr. Pattabhi Sitaramayya, the Congress President, the Hon. Mr. B. G. Kher, the Premier of Bombay, and H. E. Dr. Katju, the Governor of West Bengal, Dr. Jinarajadasa, President of the Theosophical Society follow with special articles appropriate to the occasion. The Archbishop of Madras has an article on "Peace, the Tranquilliy of Order" commenting on the recent Pacific Conference in Calcutta. Sir V. T. Krishnamachari writes on one of the most pressing of our problems affecting the entire population, viz., National Savings: Sir C. P. Ramaswami Aiyar on Devaluation, Prof. M. Ruthnaswami on Europe and Russia: An Essay in Soviet Diplomacy, and the Hop. Chief Justice Rajamannar on "The Place of Administrative Law in the New India." There is a short story by Mr. S. K. Chettur, i.c.s., and a play depicting the life story of the great South Indian Bhaktha Kannappar by Harindranath Chattopadhyaya. Among other articles in this number are: The Review and its Founder, by Hon. Mr. P. S. Kumaraswami Raja; "In Freedom it Found its Golden Jubilee' by Kamaladevi Chattopadhyaya; G. A. N.—Some Happy Memories by Mr. H. S. L. Polak; Democracy and Discipline by Mr. N. Raghunathan; Himalayan Humanity by Dr. James H. Cousins; Our Children by Mrs. K. Satthianadhan; Interpreting Indian Thought to America by Dr. T. M. P. Mahadevan, M.A.; The Policy of Protection in India by Dr. B. V. Narayanaswamy Naidu, M.A.; The Toy Cart Theatre by Mr. G. Venkatachalam; Gandhi's Approach to Gita and Upanishads by Mr. V. Krishna Rao; Ramkrishna and Vivelenanda by Dr. Nandalal Chatterif, A.A.; Tamil at the Cross-Roads by Prof. K. Swaminathan, M.A.; British Annexation Policy in India by Prot. C. S. Srinivasacharier; The Triumph of Nehru, by Mr. J. J. Singh;

Significance of Mohurram by Sir Mahomed Usman, k.c.s.i.; The Universities and the Future by Prof. S. Ramaswami, M.A.; The Appreciation of the Movies by Mr Amar Mukherji, M.A.; Industrial Management and Labour by Urmila Srivastava; That Summer Afternoon by B. N.: The Minor Conduct; A Short Story by Mr. S. K. Chettur, 1.c.s.; Our Constitution: A Symposium by Dr. Rajendra Prasad, Dr. B. R. Ambedkar, Hon. Mr. R. R. Divakar; Threat of S. A. Fascism to East Africa by Mr. M. J. Seroney; Planned Utilization of Man Power Resources by Mr. K. Ramachandran; These Eventful Years, etc. etc.

This number is profusely illustrated with over 180 portraits of writers and leaders besides facsimiles of famous personages like Gokhale, Sir Henry Cotton, Sir Wm. Wedderburn, Sarojini Naidu, Dr. Besant and others and Coloured Plate of the Founder G. A. Natesan.

The Golden Jubilee number is beautifully printed on art paper with a specially designed and attractive jacket, and is priced Rs. 8 only.

## Peace And Order Maintained

#### Calcutta Calmly Receives Gruesome Reports From East Bengal

REQUESTED to make a statement on the situation in the city and the steps the Government had taken for the maintenance of order, Dr. B. C. Roy, Chief Minister, West Bengal, explained the measures taken by the West Bengal Government to restore order in the city in the State Assembly early last month (February 9).

Dr. Roy said that instruction had been issued to all newspapers not to publish report of incidents which might lead to communal difficulties.

He expressed hope that after troops had been called out the day before to assist the police in maintaining law and order after a few incidents in certain localities in the city and after other arrangements had been made to put a stop to the apread of the disturbance, the city gradually calmed down.

Shri Surendra Mohan Ghosh, President of the West Bengal Provincial Congress Committee, in a statement issued on the 17th February last suggested that for a permanent solution of the present communal problem "we have to strive to inspire confidence in the minds of the members of the minority community by restoring to them a complete sense of security." On that day curfew was lifted and the life of the city was normal. The displaced persons returned home in some parts of the city. And the Government gave financial aid to the evacuees.

#### MAULANA AZAD'S VISIT

Maulana Abul Kalam Azad, India's Education Minister, who had come to this city two days ago and had toured over the city visiting the localities affected by the disturbances had a talk on the 17th February last with Janab Fazlul Huq, a former Premier of undivided Bengal, on the situation in Calcutta. Shri S. M. Ghosh, President of the West Bengal Provincial Congress Committee and Shri Satish (handra Das Gupta of Khadi Pratisthan also called on the Maulana at Government House.

Maulana Azad left Calcutta for Delhi by air on the 18th February last after a three-day visit of the city.

More people who had moved away from their homes returned to their respective abodes on the 18th February last.

The same day a resolution urging all citizens particularly the women of East and West Bengal to rally the forces for the protection of minorities was passed at the annual meeting of Calcutta Branch of All-India Women's Conference, held at Sakhwat Memorial Girls' School, South Calcutta.

#### GOVERNOR'S APPEAL

An appeal to the citizens of Calcutta to revive the old relations of comradeship and good neighbourliness among all sections of the people. was made by West Bengal Governor His Excellency Dr. K. N. Katju from Midnapore where he had been on a tour.

When Calcutta was all peaceful reports of gruesome happenings in East Bengal causing untold miseries to the minorities there flowed into the cityenand as days passed by confirmation of these incidents was available. On the 28rd February last grave concern over reports of happenings in East Bengal was expressed by different members participating in the second day's general discussion of the State Budget in West Bengal Lègislative Assembly.

The same day about 50 leading Muslim citizens of Calcutta, in a joint statement strongly condemned the atrocities of a section of their co-religionists in East Bengal and appealed to the Government of India to take immediately drastic and effective steps to make recurrence of such atrocities impossible.

On the 24th February it could be known from a statement of Dr. B. C. Roy, Chief Minister, that Pakistan was purposely blacking out all news and stressed for realisation of the Chief Minister of Eastern Pakistan the need for evacuating the distressed persons.

A hartal was observed in the city with the object of showing sympathy to the sufferers in East Bengal. But unfortunately this hartal caused considerable panic in the city and there were some instances of violence.

Police and military patrols toured extensively throughout the city as a precautionay measure.

Chief Minister, Dr. B. C. Roy, in an appeal to the people condemned the hartal and requested them to consider whether mere invectives eor hartals or protests would help the majority in West Bengal or the minority in East Bengal.

#### Dr. SITARAM'S ARRIVAL

Except for an incident the city remained peaceful on Sunday, the 26th February.

The Indian High Commissioner, Dr. Sita Ram, arrived in Calcutta after his tour of East Bengal. Shri J. P. Narain, the Socialist leader, also arrived in Calcutta the same day. He met Dr. P. C. Ghosh, member of the Congress Working Committee, and discussed with him the present situation in East and West Bengal. He also visited some of the areas in Calcutta where disturbances had taken place.

The Indian High Commissioner in Pakistan, Dr. Sita Ram met Dr. B. C. Roy, Chief Minister, West Bengal, at Government House on the day of his arrival and the following day, on which Shri Santosh Kumar Basu, Indian Deputy High Commissioner in Dacca, also arrived in Calcutta.

The High Commissioner and his Deputy stating their impressions said that they had indisputable evidence that since the beginning of the

trouble at Dacca on February 10 there had been "innumeratio" cases of arson, loot and murder in different areas in East Bengal:

The situation at present was under control, but the minority community was still panicky and most were eager to leave Pakistan as quickly as possible.

#### EAST BENGAL RELIEF COMMITTEE

On Monday, the 27th February Calcutta was peaceful.

A representative committee, called the East Bengal Relief Committee, had been formed in Calcutta. The Committee proposes to co-operate with the Government in all possible ways in ascertaining what is happening in East Bengal and "in giving first aid to victims."

Dr. Meghnad Saha is the President of the Committee and Shri Charu Chandra Roy its Secretary.

On Tuesday, the 28th February there were four cases of stray assaults in the city and Dr. B. C. Roy, Chief Minister, appealed to all, young and old, to pull their full weight in subduing such emotional outbursts in the interests of both Bengals.

He assured all persons that the Government were straining their utmost in finding a quick and satisfactory solution of the present impasse.

#### CALCUITA CORPORATION DRAMATIC CLUB

#### 27th Annual Social

On the occasion of the 27th annual social of the Calcutta Corporation Dramatic Club, the members staged on the board of the Rungmahal Theatre on the 24th' February lass Kathasilpi Sarat Chandra's masterpiece, "PATHER DABI". The Chief Executive Officer Corporation, Mr. A. D. Khan, opened the function. The programme started with the Club's symphony playing a melody of Rabindranath led by Shri Nripen Seal. The performance of the play attained all-round success. Shri Sisir Batabyal as "Sabyasachi", Shri Promode Ganguly as "Bharati", Shri Jogeskamal Das Gupta as 'Sumitra', Shri Arun Banerjee as 'Apurba', Shri Abani Banerjee as "Sashi Kabi", Shri Tejen Bose as 'Jamal', Shri Jiban Banerjee as 'Raimohan', Shri Kshitish Bose as 'Nabatara', Shri Upen Chatterjee as 'Then Mong', Shri Kali Bhattacharjee as 'Nemai Daroga', Shri Jatin Chaudhuri as 'Tewari', Shri Biswapati Chaudhuri as 'Brojendra', Shri Nirmal Banerjee as 'Talwarkar', Shri Tarun Mazumdar as 'Mr. Brown' and Shri Kanai Mukherjee as 'Mr. Chang' acted creditably in their respective roles. The minor roles were also well played, in such roles Shri Balai Banerjee as 'Manik' and Shri Bishnu Chatterjee as 'Panchcowri' deserve special mention.

Amongst those present on the occasion were Shri D. N. Ganguly, Shri S. N. Ghosal, Shri N. N. Sarkar, Janab A. Sattar, Shri S. C. Ghose, Shri P. N. Bagchi, Shri Balaram Basu, Shri Paritosh Mitra, Shri Puridas Ghosh, Shri K. L. Dey, Shri D. N. Dutt, Shri Akshoy Kumar Mitra, Shri Gokul Mukherjee, Shri Lokenath Bal and many others. Everybody spoke highly of the performances for schick much credit is due to Shri Jogeskamal Des Gupte, the Director.

#### SHRI SAXENA IN CALCUTTA

The question of reception and relief of refugees coming from East Bengal was discussed at a conference of representatives of India Government and the Governments of West Bengal, Assam, Bihar, Orissa, Cooch Behar and Tripura, held at the Secretariat on the 1st March last. The Central Relief and Rehabilitation Minister, Shri Mohan Lal Saxena, presided.

It was decided to open a number of 'holding centres' at different border stations in the Indian Union to accommodate temporarily refugees who would be coming from Eastern Pakistan.

The Rehabilitation Conference again met the next day at the West Bengal Secretariat when the question of accommodation of refugees in different neighbouring States was further discussed.

Shri Saxena stayed in Calcutta till March 4. And besides attending conferences of representatives he met Shri Surendra Mohan Ghose, President, W. B. P. C. C., Dr. Pratap Chandra Guha Roy and others,

He also met Dr. B. C. Roy and Shri Sures. Chandra Majumdar.

Shri Saxena tevealed that over 56,200 refugees from East Bengal had arrived in West Bengal between January 1 and February 27. Of these, 9.077 had come to Calcutta, 5.869 by air and 8,208 by train.

A hartal had been called on Monday, the 6th March for the purpose of drawing the attention of the Hon. Prime Minister to the situation in East Bengal and to the necessity of taking steps to find a solution of the problem. But the Government having appealed to the citizens of Calcutta not to resort to hartal, but to wait for presenting their points of view before the Prime Minister through their representatives, there was no hartal on that day.

# CALCUTTA CORPORATION CO-OPERATIVE CREDIT SOCIETY LTD.

#### INTEREST PAYMENTS ON FIXED DEPOSITS

The half-yearly interest on deposits payable for the period ending 31st March, 1950, falls due and becomes payable from 1st April, 1950.

With a view to facilitate arrangements for the payment of the same, it is as usual necessary to stop refunds and payment of intersts on and from 15th March, 1950.

As such notice is hereby given that all transactions relating to refunds of Fixed Deposits and payment of interests will remain suspended from 15th March, 1950.

All mormal transactions regarding deposits will continue as usual from 1st April, 1950.

#### MR. THOMAS BATA IN CALCUTTA

Mr. Thomas Bats, President of the Bats organization, is now in Calcutta in the course of a world tour,

The organization of which he is the President was built up by his father and for which he had worked for over 50 years. The factory in Czechoslovakia is now under the Czech Communist Government. Similarly, the factories in Poland and Hungary are under Government control.

SHRI SARAI CHANDRA BOSE REPLYING TO THE ADDRESS OF FELICITATIONS PRESENTED TO HIM BY THE CORPORATION OF CALCUTTA SOON AFTER HIS RELEASE FROM DETENTION UNDER D. I. RULES IN SEPTEMBER, 1945.

#### SHRI SARAT CHANDRA BOSE

#### A Short Sketch Of His Career

SARAT Chandra was the second son of the late Rai Bahadur Janakinath Bose, the renowned Advocate of Cuttack. He was born on September 7, 1889 at Cuttack and had his education in Cuttack, Calcutta and lastly England, where he qualified himself for the English Bar. On return to India he started practice in the Calcutta High Court in 1918.

The first few years of his practice brought him some success but it was during the early years of the Swarajist movement in Bengal that he came into the limelight. Since then he steadily maintained his most enviable position as a leading practitioner of the Calcutta High Court.

Shri Bose's political career started with his participation in the Swarajya Party movement under the leadership of Deshabandhu Chittaranjan Das. He at once became one of Deshabandhu's principal lieutenants.

#### ALDERMAN OF THE CORPORATION

He became an Alderman of the Calcutta Corporation in 1924. For eight successive years since then he was elected to this position as a representative of the Swarajists and the Congress.

When after Deshabandhu's death, the Forward was overtaken by a great crisis arising out of the imposition of a too heavy fine on it in a defaunation case brought by the Railway authorities against it. Shri Bose helped save this journal from being extinct. Principally through his efforts the paper managed to avoid paying the fine and reappeared first as New Forward and then as Liberty.

He had great interest in journalism since the early days of his public life. And lately in 1930 when the Civil Disobedience Movement began, Shri Bose helped its progress in Bengal especially by rendering financial assistance to it.

Lately he started a daily paper, called the Nation. His very last act in life was his dictating an editorial (an extract of which is published elsewhere in this issue) for the Nation.

He was arrested some time in 1982 under Regulation III of 1818 and put into detention till 1936.

#### ELECTION TO CENTRAL ASSEMBLY

During his detention he was elected in 1988 to the Central Assembly as a Congress candidate. He was permitted to come to Calcutta during his detention in 1985 on his father's death. He was released unconditionally on July 26 that year.

In 1986 he toured many places in India and addressed public meetings dealing on the baneful effect of the Communal Award.

In February, 1989, he presided over the 86th sess on of the Bengal Provincial Conference held at Jalpaiguri. His presidential address at this conference contained a vigorous declamation of the Federal Scheme of the Government of India Act of 1985. Against this scheme, it may be mentioned, Subhas chandra also had been carrying on a tearing campaign. It was one of the issues on which he had, just a few days back, won the contest for the presidentship of the Tripuri session of the Congress.

In his presidential address Shri Bose mentioned of a six months' ultimatum to the British Government to quit India, and a resolution to that effect was passed by the conference mainly through his enterprise.

This address became specially famous later on because of the "Quit India" proposal to the Britishers in India he made in it and for his eloquent plea for the revival of the ideal of Purna Swaraj. It was quite in line with this his suggestion that later in 1942 the Congress Working Committee

adopted its fanous August Resolution which marked the beginning of the last and the final phase of our national struggle for freedom.

#### LEADER OF THE OPPOSITION

For a long time since the inauguration of provincial Autonomy in 1987. Sarat Babu was the leader of the Opposition to the Bengal Ministry in the Legislative Assembly. On numerous occasions during that period the different sections of the House were greatly impressed by his uncommon ability as a parliamentary politician and a debator.

In December, 1989, Shri Bose moved an amendment to the official resoltion supporting Allied war preparation in the Bengal Assembly.

In 1941 Sarat Babu was arrested for the last time in his life under the Defence of India Rules.

#### EPOCH OF THE PROLETARIAT

"Now that the tide has turned in our favour, it is up to all of us to pull together and usher in a new cra—an era of freedom and progress. Swamiji said more than fifty years ago that "the world was passing through its fourth epoch, the epoch of the Sudra or the proletariat". Let us all work for the amelioration of the lot of the common man; for after all, it is he who counts."

-SARAT CHANDRA BOSE 28th June, 1949.

[The above lines are taken from a personal letter written from Hotel Victoria, Glion, Switzerland, to our friend Shri Sarathi Nath Sett. We are obliged to Shri Sett for making available to us this letter of the late Shri Sarat Chandra Bose from which we quote the above lines.]

On September 14, 1945 he was released from his long detention in a place in distant Coorg.

On his return to Calcutta he was given a right royal reception by the Corporation of Calcutta and also a tremendous ovation by the citizens of Calcutta at the Deshabandhu Park.

Shri Bose was elected to the Central Assembly in 1946 and became the Leader of the Congress Party there. He was later appointed a Member of

#### SHRI SARAT CHANDRA BOSE

His Death Condoled By Corporation Co-operative
INSURANCE SOCIETY LTD.

At a Special General Meeting of the Corporation Go-operative Insurance Society Ltd., paying its respectful homage to the memory of Shri Sarat Chandra Bose, an illustrious son of India, the following resolution was adopted:

"The sudden death of Shri Sarat Chandra Bose, an illustrious son of Bengal, has come as a great shock to us at this critical time of the province. Shri Bose played a distinct rele and created a history in the fight for the independence of the country. His latest election to the West Bengal Legislative Assembly as a peoples' representative instilled hope in the minds of the people that corruption would be eradicated from the province. He fought till the last day of his life for the establishment of a Secialist Republic."

the Interim National Government of India from September to November 1946, when he resigned both from the Government and the Congress Working Committee and formed his own party.

#### THE REAL SOLUTION

During the last eleven days I have been thinking deeply as to what is the real solution for the present state of things. I have considered in turns the suggestions offered from different quarters, namely, mass evacaution of Hindus from East Bengal or exchange of population between the two Bengals. As a result of deep thinking and mature consideration, I have been forced to the conclusion that neither of them is the solution. I need only remind the people of India and Pakistan that compulsory mass evacuation in and from the Punjab has left behind numerous problems each of which has defied solution up till now.

"The solution that I offer for the acceptance of the people of India and Pakistan is that East Bengal as a distinct and separate State should join the Indian Union and that the people of Lucha and Pakistan should bring pressure to bear upon their respective Governments to bring it about as soon as possible. I have been saying repeatedly during the last three years, that to my mind a division of provinces on the religious basis was and is no solution of the communal problem, that even if the provinces were so divided, Hindus and Muslims would still have to live side by side and that communal segregation or religious quarantine was neither desirable nor feasible. That being my political opinion, I have never made any distinction at any time of my life between Hindus and Muslims in undivided Bengal or in divided Bengal. The population in both the Bengals remains as composite in character as before. I do not wish to disturb the partition of Bengal which has already taken place. I am well aware that there was in the recent past a sense of frustration among the people of East Bengal, which was one of the reasons which gave rise to the demand for partition. The solution which I am offering will mean the least possible interference in the present state of things. Let East Bengal live and flourish as a distinct and separate State, but in the interests of the future well-being of the communities living in the two Bengals which, as I have said before, are integral to each other, which are each other's bone of bone and flesh of flesh, let East Bengal live and flourish under the fostering care of the Indian Union."

[-Extracts from, the aditorial article for "The Nation", the last act of the last Shri Sarat Chandra Bose in life appealing to the people of East and West Bengal for peace and amity.]

In June last year Shri Bose consected the South Calcutta by-election for a seat in the West Bengal Legislative Assembly and was returned by an overwhelming majority.

#### LETTERS TO THE EDITOR

[The Editor does not held himself responsible for the views expressed by the correspondent]

#### APPEAL FOR PRIORITY

To THE EDITOR, "CALCUTTA MUNICIPAL GAZETTE"

Sir,-We draw the attention of the Chairman of the Calcutta Improvement Trust, through your esteemed journal that the locality, bounded on the north by Middle Road, Entally, on the south by Ananda Palit Road, on the east by Sambhu Babu Lane and on the west by Dr. Suresh Sircar Road, is a most congested and insanitary one. There are a good many insanitary service privies, khatals. stables, workshops and surface drains which add not only discomfort to the local residents but are also causes of all sorts of epidemic diseases which break out every year in this locality. The Corporation of Calcutta after three years' deliberations sanctioned a 40 ft. wide projected public street in extension of Police Hospital Road towards the east in 1928. In February, 1981, the Corporation accorded administrative sanction to the expenditure of Rs. 4,28,000 for opening out the above projected public street but for want of funds they could not give effect to the Scheme after the Government had sanctioned the same under Section 14 of the Calcutta Municipal Act.

The local residents approached the Calcutta Improvement Trust in 1945, as the Corporation of Calcutta could not give effect to the above Scheme for over a decade, to frame an Improvement Scheme under Sections 36 and 37 of the C.I.T. Act to remove congestion and to improve the sanitary condition of the locality.

We appeal to the authorities (Chairman of the Calcutta Improvement Trust and the members of the Board) to give priority to this Scheme.—Yours etc.,

W. C. MULLICK,

Secretary,

Entally People's Association and others. Calcutta, the 16th February, 1950.

#### GARIAHAT MARKET

TO THE EDITOR, -CALCUTTA MUNICIPAL GAZETTE

Sir,—It is hardly necessary to emphasize upon the fact that Gariahat Market premises look picturesque and those who have to go there daily for making Bazar-purchases are mostly decent and cultured men who expect that the market compound should be kept neat and clean and free from insanitation. But unfortunately this is not the case. A small portion of an un-utilized vacant land on the western side of the compound, where the earthen pot shop exists, has become a veritable hell wherefrom obnoxious smell emanates and fouls the atmosphere. The vendors in spite of the existence of latrines and urinals use this piece of land with impunity. How far this state of affairs is injurious from the hygienic point of view can better be

imagined than described. Small-pox and Cholera have already started taking their tolls and in the interest of the health of both vendors and daily market-goers this nuisance must be stopped forthwith by allotting the land in question to the vendors after proper disinfection.

I beg to add further that another danger to which the market-goers and vendors are exposed is the depredation of the street bulls and cows being chased and beaten by vendors. They run helterskelter in such a manner as to endanger the lives of those who happen to be there. Barriers must be placed immediately at all the gates to stop entry of cows within the market compound. I hope this will receive immediate attention of the authorities concerned.

Yours faithfully, HARI CHARAN BOSE.

8A, Hazra Lane, Calcutta—29. The 18th January, 1950.

#### FIRST BUDGET OF THE REPUBLIC

GIVES A SURPLUS OF Rs. 9.62 CRORES

Presenting the first budget of the Indian Republic in Parliament on the 28th February last, the Finance Minister. Dr. John Matthai announced a revenue surplus of Rs. 9.62 crores for 1950-51 as against a deficit of Rs. 3.74 crores for 1949-50.

Revenue receipts for 1950-51 are estimated at Rs. 347.5 crores and expenditure at Rs. 337.88 crores.

Revenue receipts for 1949-50 are now estimated at Rs. 332.36 crores and expenditure at Rs. 336.1 crores.

The Finance Minister this year presented a White Paper on the budget in addition to the usual explanatory memorandum.

The Finance Minister in his speech referred to a proposal regarding setting up of an estimates committee which would function in addition to the standing finance committee. planning commission, finance commission, financial integration of States, revenue and expenditure, economy move, capital budget and taxation proposals.

Of the total estimated expenditure of Rs. 337.88 crores in 1950-51; Defence will get Rs. 168.01 crores and Civil Rs. 169.87 crores.

Among the Budget proposals are the following:

Dividend Limitation Act will not be renewed after March 31, when it expires.

The rate of local delivery of letters will be reduced from two annas to one anna. Rate of local delivery of postcards will also be reduced from nine pies to six pies.

Business Profit Tax will be abolished.

The minimum basic charge for ordinary telegrams will be reduced from annas nine to annas eight and for express telegrams from rupes one and annas two to rupes one.

Minimum rate of Income-Tax will be reduced from five annas in the rupes to four annas in the rupes.

The maximum rate of Super-Tax will be reduced from 10 annas in the case of unserned income and nine annas in the case of earned income to a uniform rate of eight and a half annas in the rupes and will be applicable to an income of rupess one and a half lakks.

Corporation Tax is to be increased from two annae to two and a half annae.

and the second s

#### CALCUTTA NEWS & VIEWS

SHRI NIRMALENDU LAHIRI, one of the most prominent figures of the Calcutta stage and screen, breathed his last on Tuesday, the 28th February at his Calcutta residence in Bagbasar. Shri Lahiri was 58.

Shri Lahiri had been suffering from high blood pressure and uraemia for some time past. He leaves behind his wife, two sons and three brothers.

Shri Lahiri was born at Dinajpur, where his father. Dr. Nikunja Behari Lahiri, was a civil surgeon. After passing his r.a. Examination he worked for some time in the Calcutta Corporation but his latent histrionic talents drew him to the stage in no time.

BANGIYA BIJNAN PARISHAD held its second anniversary in the Bose Research Institute premises in Upper Circular Road on Monday, the 27th February. Lady Abala Bose was present as the Chief Guest.

Dr. Snehamoy Dutt, who presided, said that where mass contact was necessary the provincial language should be used but in fields of international contact English should be used. Education up to the stage of graduation might be given in Bengali but the medium of post-Graduate education must be English and those who intended to go in for post-Graduate education must learn English from the secondary stage.

Prof. Satyen Bose, President of the Parishad, said thate Bengalees had made distinct contributions in the advancement of India in the fields of learning and culture and wished that they might retain their eminent position.

HOLI, THE GREAT SPRING FESTIVAL OF THE HINDUS, passed off in Calcutta on the 4th March last Under the shadow of East Bengal tragedy this year's relebrations were shorn of much of their usual enthusiasm.

Owing to buses and tramears not plying before 1, O'clock the celebrations this year were generally confined within the limits of different localities.

THE BRITISH COUNCIL CENTRE at 5. Theatre Road. Calcutta, was formally inaugurated by Sir John Sargent on the 24th February. A large number of eminent educationists were present.

Explaining the aims of the British Council. Sir John Sargent, who is a Director of the Commonwealth Department of the British Council, said that the Council endeavoured to interpret the British way of life to the people. It was a "cultural restaurant," where the food served was what the British genius could offer, he added.

The Council aimed at developing not only closer relations between Britain and other countries, but endeavoured to promote a wider knowledge of educational, literary, scientific, medical, technical and cultural achievements of Great Britain.

DR. DO HUNG, personal envoy of ex-Emperor Bao ban of Viet Nam, returned to Calcutta on his way back to Saigon from Delhi on Sunday, the 26th February.

• Dr. Hung, who was on a goodwill mission visited various places in India and met high officials of the External Affairs Ministry at Delhi during his two-month stay in this country.

INDIA GOVERNMENT'S FILM ENQUIRY COM-MITTEE, lately visited the city. The Chaisman of the Committee, Shri S. K. Patil, speaking at a reception accorded to members of the Committee on behalf of Bengal Motion Picture Association at the Prince's on the 25th February assured the industry that the enquiry had been instituted by the Government of India with the intention of putting this "very great and vital national industry, on a scientific and sounder basis" and the sooner it was done, the better it would be for all concerned.

And the second s

DELHI-CALCUTTA AIR RACE came to an end on the 24th February last when flying in "Yellow Sapphire," 35-year-old Captain M. V. Namjoshi landed at Barrackpore aerodrome being first among the competitors.

His average speed for the 910-mile race was 99 mph. And he used the smallest and slowest plane in the race.

Captain Namjoshi is the Chief Flying Instructor and Vice-Principal of the Civil Aviation Training Centre, Allahabad.

Mr. V. Edmonston, Chief Flying Instructor, C.P. and Berar Flying Club, flying an L.5, was second with an average speed of 145 mph. He won the Harikishen Das Challenge Shield and Rs. 1,500.

Fit Lt C. B. Contractor, Chief Flying Instructor, National Air Academy, Bareilly, in an old Tiger Moth was third.

Major-General Misri Chand, GOC, Lucknow Area, who won the Willingdon Trophy when the race was last run in 1936, arrived fourth. He was flying a Miles Gemini, a twin-engined plane, and he won a special cup, presented by U Aung Than, for being the first "A" licence pilot (amateur) to arrive. He also won Rs. 500.

Mr. E. Peck, the American, flying a Beechcraft Bonanza, though he arrived fifth, won the Wakefield Challenge Trophy and Rs. 500 for the fastest flight. He averaged 189 mph. over the course,

Of the eight starters at Delhi seven completed the course though Mr. Y. Bhandarkar, in a Chipmunk, withdrew from the race at Asansol. Mr. B. W. Smith abandoned the race after taking off from Agra owing to engine trouble and returned to Delhi.

FIRST NATIONAL AIR RALLY was opened at Barrackpore by H. E. Dr. Katju, Governor of West Bengal, on the 24th February last.

Dr. Katju presented 50 "wings"—44 to members of the Bengal Flying Club and six to members of other clubs.

The three-day-old National Air Rally concluded at Barrackpore on the 26th February last.

The attractive features of the day's programme were crazy flying by E. Peck, the winner of the fastest flying prize, and the aerobatics by two Jet Vampires of the Indian Air Force Captain Namjoshi, who bagged the Willingdon Trophy on Saturday, added colour to the rally by remarkable display of a number of tricks with his plane.

General Officer Commanding, Bengal, Bihar and Orissa, Major-General S. B. S. Roy, who presided over the function addressing the gathering said that in spite of all difficulties the Rally was a grand success both from the point of view of the number of entries as also from the type of show and the interest evinced by all sections of the people.

The G.O.C. thanked Shri Biren Roy, Chairman of the show and President of the Bengul Aero Club for his organising the first National Air Rally successfully.

#### ADULTERATED MUSTARD OIL CASE

On the complaint of Dr. Sanmatha Datta, Food Inspector, Calcutta Corporation. Bibhuti Bhusan Das, Proprietor of Biswanath Oil Mills at 243, Upper Circular Road was prosecuted in the Court of Shri S. P. Chatterjee, Municipal Magistrate and the party was fined Rs. 100 and Rs. 30 under Sections 407 and 419 respectively of the Calcutta Municipal Act. The Magistrate ordered in the petition under Sections 421 and 426 of the Calcutta Municipal Act that 160 mds. of mustard oil kept in the custody of the party by the Corporation, which was found to be adulterated should vest in the Calcutta Corporation to be designed by them so as to make the stuff unfit for history consumption.

Shri Ramani Ghosal, Corporation Pleader, conducted the prosecution.

#### VITAL STATISTICS

For the City of Calcutta for the week ending 25th February, 1950.

CITY OF CALCUTTA. (TOWN AND SUBURBS.)

The total number of deaths registered during the week was 982 against 976 and 860 in the two preceding weeks and higher than the corresponding week of the last year by 201. The general death-rate of the week was 17.63 per mille.

#### 2.own (Wards 1-27.)

The number of deaths registered during the week ending 25th February 1950 was 786 against 834 and 699 in the two preceding weeks. There were 42 deaths from cholera, against 36 and 50 in the two preceding weeks. There were 113 deaths from small-pox during the week against 67 in the previous week. There were nil deaths from influenza against nil in the previous week. The mortality from fevers and bowel-complaints amounted to 52 and 95 respectively against 46 and 90 in the preceding week. The general death-rate of the week was 16.12 per mille per annum.

There were 28 imported deaths. Excluding these, the death-rate of the Town was 15.54

There were 111 deaths from respiratory diseases against 169 in the previous week.

There were 29 deaths from tuberculosis against 40 in the previous week.

#### Suburbs (Wards 28-32.)

The number of deaths registered was 196 against 145 and 161 in the two preceding weeks. Of these, 8 were from cholera, 53 from small-pox, nil from influenza, 12 from fevers, 24 from bowel-complaints and 30 from respiratory diseases. The death- rate of the suburbs (or added areas) was 28.29 per mille.

There were nil imported deaths. Excluding these, the death-rate was 28.29

There were 9 deaths from tubtrculosis against 6 in the previous week.

#### CALCUTTA PORT TRUST

#### BUDGET ESTIMATES FOR 1950-51

Total seaborne traffic expected to pass through the port of Calcutta during 1950-51 is estimated at 7,165,000 tons and the income which will accrue to the Port Commissioners from this is estimated at Rs. 6,35,23,768, according to the budget estimates presented recently to the Commissioners for the Port of Calcutta, by Mr. N. M. Ayyar, the Chairman.

The total expenditure is estimated at Rs. 6,88,36,805 or about Rs. 42 lakhs less than the revised estimate for 1949-50.

According to these estimates, there will be a deficit of Rs. 53,13,037, and it will be necessary to withdraw Rs. 53,00,000 from the Revenue Reserve and Fire Insurance Fund, reducing that Fund to Rs. 5,32,51,758. The estimated deficit on the year's working would have been about Rs. 10½ lakhs less if the charges on foodgrains had not been reduced from January 1, 1950.

The saving to the Commissioners by the application to their service of the Government Compulsory Saving Scheme is Rg. 2,180 during 1989-50 and Rs. 7,500 during 1980-51.

# Chronicle & Comment

. TOWN PLANNING EXHIBITION IN AHMEDA-BAD

Ahmedabad Municipality recently held a Town Planning Exhibition from 28th February, 1950 to 7th March, 1950 (both days inclusive) at the Sheth Mangaldas Memorial Hall, known as Town Hall, at Ellis Bridge, Ahmedabad. Some very educative materials, such as, Photographs, Films, Brochures, Reports, Town Planning literature, etc., were received from England as well as from different parts of India. The Municipality also prepared much useful material, such as, maps, charts, placards, etc. All efforts were made to make the exhibition as interesting and instructive as possible with the help of many enlightened citizens.

The idea of the Exhibition was to stimulate public interest in Town planning. It is now realised, on all sides, that without the active cooperation of the people, it is neither possible nor desirable to launch comprehensive planning schemes.

The planning problems of all the expanding cities have become very difficult and pressing. And it is high time when both the planning authorities and the people should know where they stand. The problems are concerned no more with physical planning only. A planning scheme to be successful must have its socio-economic content. Thus active, democratic interests of the people become sine qua non to a successful planning scheme. Hence,

arises the necessity of holding such exhibitions to stimulate public interest in our planning schemes.

# A PROMISING PAINTER OF THE CITY

Week before last we published an illustrated account of the First Death Anniversary of the Late Shri Kiran Shanker Roy, Home Minister, Government of West Bengal. On that occasion a bust painting of Shri Roy, to be hung in the Secretariat, was unveiled by His Excellency Dr. Kailas Nath Katju. This painting, we have come to know, has been the work of Shri Sukumar Sen, a 86-year-old artist of this City, who sometime ago made very successful studies of the "heads" of more than a dozen of the celebrities of the City from sittings given to him. Such a sitting would not be more than two hours. These "heads" were done in pastel colours, that Shri Sen used with great skill to aid his character-study.

It gives us pleasur in recording the great promise that Shri Sen has shown in painting the portrait of the Late Shri K. S. Roy, and more so because Shri Sen has occasionally drawn for us sketches for use in the Gazette. Particularly, his help in drawing most of the headpieces used in our "Silver Jubilee Number" at a short-time notice we must appreciate.

We wish this young promising painter of this City, who is a nephew of Shri Lalit Mohan Sen, A.R.C.A., Principal, Lucknow Art School, a career attended with more brilliant success.

# PANDIT NEHRU IN CALCUI**TA**

Pandit Nebru addressing the West Bengal Congress Workers at Government House.

Pandit Jawaharlal Nehru, Prime Minister of India, came to this city on the 6th March last on a three-day visit with the object of studying the problems resulting out of the communal troubles happening in Eastern Pakistan. During his visit the Prime Minister met the Calcutta Editors, the Congress M. L. A.'s of West Bengal, Muslim Citizens, members of verious non-official relief organizations, Government officials and even some of the refugees in the Bongaon area, 40 miles from Calcutta. He left for Delhi by air on the 9th March.

Again, he came to Calcutta from Delhi by a special plane on Tuesday, the 14th March, to make further study of the same problems. The following day he visited the camps of refugees from Eastern Pakistan about 52 miles from Calcutta

# "I CAN DEAL WITH THE PROBLEM MORE EFFECTIVELY WHEN I AM NEAR THE PROFLE OF BRIGAL"

PANDIT NEHRU visited on the 8th March last certain camps in the Bongaon area and in Calcutta to see the condition in which refugees were living and arrangements made for their relief.

He spoke to a number of refugees and also addressed meetings at which he advised people to shed fear and not give way to despair.

At Government House, the Prime Minister had discussions with Dr. P. C. Ghosh, former Premier of West Bengal, and Shri Ashutosh Lahiri, a leader of the Hindu Mahasabha. He also met some members of the Calcutta Bar and representatives of business interests in the city.

He visited the house of the late Shri Sarat Chandra Bose, saw Shrimati Bose and expressed his sympathy with her. He also saw the wife of the President of Burma, now in Calcutta, and Lady Mitter, wife of Sir B. L. Mitter.

Pandit Nehru left for Delhi by air on the 9th March last.

The Industry and Supply Minister, Dr. Syama Prasad Mookerjee also left for Delhi by the same plane.

The Prime Minister's party included among others his daughter, Shrimati Indira Gandhi, and Additional Secretary, External Affairs Department, Shri S. Dutta.

Among those present at the Dum Dum airport to see the Prime Minister off were West Bengal Governor, Dr. K. N. Katju, Major-General S. B. S. Roy, Area Commander, Bengal, Bihar and Orissa, Shri Sukumar Sen, Chief Secretary, West Bengal Government, Shri S. Gupta, /Inspector-General of Police, West Bengal, Shri S. N. Ray, Administrative Officer, Calcutta Corporation, Shri J. N. Talukder, Commissioner, Presidency Division, and Shri S. N. Chatterjee, Commissioner of Police.

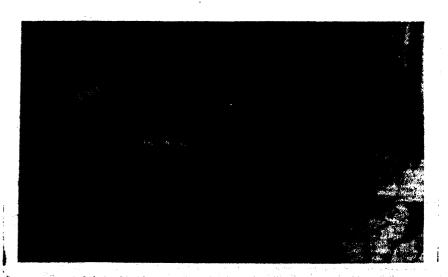

The Prime Minister, in a statement issued shortly before his departure, declared that the problem of Bengal had priority in India today. It occupied his mind to the exclusion of much else.

BENGAL'S PROBLEM
FILLS MY MIND

-PANDIT NEHRU

Pandit Nehru speaking to the members of the West Bengal Congress Assembly Party at Government House.

Photo: Publicity Dept., W. B. Govt.

Pandit Nehru inspecting a refugee centre

#### TWO PROBLEMS

To Protect Those Who Are in Fear and Danger.

To properly Rehabilitate the Refugees.

The immediate question, he said, was protection for those who were in fear and danger, and how to make arrangements for those who wished to travel to safety with adequate protection. "We are tackling both these immediately."

He added that he would not discuss at this stage the long-term aspect of the problem although "it fills my mind and we have to find a remedy."

"I am going away from Calcutta today for urgent work in Delhi, but I hope to return within a week. I feel that I can understand the problem and deal with it more effectively when I am near the people of Bengal who have been the chief sufferers."

In the morning, Pandit Nehru received a deputation of leftist organizations; a leader of the Rastriya Swayam Sevak Sangha and the President Jamaiat-ul-Ulema Hind. The Prime Minister also received a deputation on behalf of the Relief and Peace Co-ordination Committee.

After absence from Calcutta for four days Pandit Nehru arrived in the city on Tuesday, the 14th March, by special plane from Delhi to resume his study of problems arising from the happenings in East Bengal. On arrival at Dum Dum Air port he was received by H. E. Dr. Katju, the Governor, and Dr. B. C. Roy, Chief Minister. Shri Sukumar Sen, Chief Secretary, Maj.-Gen. S. B. S. Roy, G.O.C., Bengal, Bihar and Orissa area, Shri S. N. Ray, Administrative Officer, Calcutta Corporation, Shri S. Gupta, Inspector-General of Police, and Shri S. N. Chatterji, Calcutta Police Commissioner, were also present.

The Prime Minister's party included Shri S. Dutt, Additional Secretary, External Affairs Ministry, Shri S. K. Dey, Rehabilitation Adviser to the Government of India, and Shri P. C. Chow-

dhuri, Secretary to the Ministry of Information and Broadcasting.

The entire route from Dum Dum aerodrome to Government House was lined with theusands of people, who cheered as the Prime Minister passed. At one place his car stopped and he was garlanded by a refugee woman.

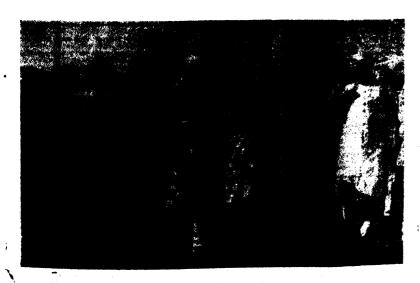

Immediately after arrival at Government House, Pandit Nehru had a talk with Dr. Roy. In the afterneou, he met Shri Asutosh Lahiri and Shri H. N. Sukherjee, Hindu Mahasabha leaders. Dr. P. C. Ghosh and Shri Nikhil Sen also met him.

Later. Shri K. P. Mookerjee, Labour Minister, West Bengal. Shri B. S. Nahar and Shri Narendra Nath Sen met the Prime Minister, who also discussed problems of relief and rehabilitation of Elast Bengal refugees with Government officers chancel in relief work. Dr. Roy and Shri P. C. Sen. Food Minister, were also present.

Panditji also had a conference with the editors of some Calcutta newspapers..

Pandit Nehru on Wednesday, the 15th March visited two transit camps for East Bengal refugees near Ranaghat station on the Sealdah-Goalundo lins. He also inspected the progress of the West Bengal Government's Refugee Housing Scheme at Habra. Dr. B. C. Roy, Chief Minister of West Bengal, accompanied him throughout the tour.

There are about 12,600 people, men. women and children, in the two Ranaghat camps. The average number of arrivals is estimated to be over 500 daily. In both camps the Prime Minister spoke to refugees in expression of sympathy to them.

#### **JUDGMENT**

FOR SAFEGUARDING
THE HEALTH OF
THE UNSUSPECTING
PUBLIC THE ENTIRE
STOCK OF UNWHOLESOME JAM BE
DESTROYED

Dr. H. C. Saha, Food Inspector of the Corporation of Calcutta, who helped the Health Officer.

### THE JAM CASE

[Br B. V. Ror, M.A.]

List 8 or 4 years, the frequent announcements of auction sales under the heading of "Disposals" or "American Surplus Stores." During the last World-War, when India was turned into a huge Army Base by the Allied Powers, the Americans brought out immense quantities of all kinds of supplies, worth crores and crores of rupees, most of which were left behind at the cessation of the War. The Government of India took them over, and has been continuously selling off these "swiples stores" generally in large lots some times worth lakhs of rupees. After such sales, these stores trickled down to the Calcutta bazars and street-hawkers from the original purchasers. A large variety of such stores may be found even today being sold in Calcutta.

#### A Unique Case

Out of one such sale arcse an interesting case which is unique not only in Calcutta but the whole of India. The case is important because it concerns the health of the citizens, and I am here giving a brief account of the affair. A huge quantity of timed fruit-jams and marrealade (for convenience referred to as "jams" only) had been purchased by a Calcutta firm. Sir Abdoolla Haroon & Co., from "disposals" which, after being "reprocessed," was being packed in new fins for sale to the public. In what circumstances I'm. II. C. Saha under orders of the Health Officer to the Corporation selzed the entire stock, applied to the Municipal Magistrate for its destruction, and order to destroy was passed by the Magistrate, will appear from the account here given.

It was some time in June, 1947 that the Health Officer to the Corporation (Dr. Ahmad) came to know of American tinned foodstuffs, obtained from Military surplus stores, being sold all over Calcutta. Being doubtful whether these were suitable for human consumption, he started enquiries. and held conferences with the Heads of the Gorernment Departments concerned, and while this was going on, was informed (by wire) by the Fruit Adviser to the Department of Agriculture. Government of India, about the purhouse by Abdoolla Haroon & Co., of a huge quantity jams of doubtful quality, and was requested examine samples. A Food Inspector of the Corporation (Dr. H. C. Saha) was therefore deputed to procure samples, and 48-7 (repacked) sample: were taken at rendom from the stock. On being examined these were all found bad and unfit for human consumption. The Health Officer personally, with his Food Inspector, inspected and seized the entire stock, then kept in the godown of Richard Howard & Co., at 80, Park Lane. The jams had originally been in large 8 lb. tins, and the purchasers had asked R. Howard & Co., to "reprocess" them and to pack them in fresh small size (20 oz.) tins with beautiful, shining new labels "Californian Jams made out of choice fruits of California, U.S.A.," to tempt purchasers. The stock found there consisted of about 1500 cases,

each containing six 8 lb. tins, and some 700 cases, each containing four dozen 20 oz. tins (subsequently on actual counting it was found 2,264 cases 8 lb. tins and 1866 cases 20 oz. repacked tins—total 3,880 cases and 1,88,880 tins i.e., total roughly over 2,21,424 lbs. and valued about 8 lacs of Rupees).

From the point of value of foodstuff involved, this case probably constitutes a record in the history of food cases in India.

#### MAIN ISSUE OF THE CASE

The Corporation of Calcutta, through its Inspector Dr. Saha, then applied to Shri N. K. Ghosh, Senior Municipal Magistrate, under Section 421 of the Calcutta Municipal Act, for an order of destruction in respect of the entire stock of jams (both original and repacked new tins) on the ground that the same were unsound, unwholesome, and unlit for human consumption (Case No. 76A of 1947).

The main issues for consideration by the Magistrate trace:

- (i) Whether the original 8 lb. tins contained jam which was unfit for human consumption.
- .(2) In that case, the repacked tins, admittedly filled from the original large tins, would have a strong presumption against them that their contents also were bad; and
- (3) unless it appeared to the Court that in the process of re-packing, the defects attaching to the 8 lb. tins had been effectively eliminated.

The most important question on which the first point turned, was the age of the tinned fruit-jams. Admittedly these tins had come to India before the termination of the War (1945) and some time must also be added for their first preparation and transit to India. In India these tins underwent transportation from one place to another over long distances, during which they were subjected to very rough treatment, and were in damaged condition. A good deal of expert evidence was adduced on this point, and it appeared that under the American food-laws, a life of two years was the maximum allowed for jams, preserved fruits etc., which had fulfilled all other conditions as to purity etc. It was proved on evidence that a very large proportion of the tins were dented or "blown" i.c., puffed out by formation of deleterious gases. Dr. A. K. Sen, Director Public Public Health Laboratory, West Bengal, which is as his firm opinion that "blowing" was an evidence of decomposition of the contents. Representing the average consumer, another witness for the defence riz., the Manager of Mazda & Co., the well-known provision dealers, stated he would never purchase dented or blown tins, and would reject them forthwith without going into technicalities.

#### MATTER OF STORAGE

In answer to the question as to now the Government had allowed these tins to be sold, the Director of Disposals wrote to the Health Officer that at the time the stocks were delivered to the purchasing firm (end of 1946), no Food Inspector had been appointed, and the jam was issued by the Depot Commander, who considered them fit for human consumption.

On the question of storage (at 30 Park that Dr. it appeared on evidence Lane), Corthe Food Inspector of the Saha, poration, found the cases stacked in moms which were dark, damp, full of dust, with all doors and windows closed, and to crown all, the floor was soiled with drippings from the tins and giving out a bad smell. As for 're-processing', the Corporation Inspector found some (original) tins being boiled in large pans (karais) once in an open courtyard and once in a dirty-looking garage in front of which cabinet makers were repairing old furniture with old coirs at the side of the storegodown, without the least pretensions to cleanliness or freedom from contamination. These descriptions were not challenged by the defendant firm.

As to the labels affixed to the new tins, it was stated they were beautiful, multi-coloured labels printed on glazed paper, bearing only the words "Californian jam" on them. According to Dr. Ahmad, there was nothing on the label to show the date of reprocessing from the old tins. He was of opinion that it was not safe to allow sale of reprocessed jams, in the absence of name of manufacturer and date of reprocessing which is essential under the Fruit Products control order. "The consumer", he stated, "who goes by the label, has a right to all these valuable informations for his safety".

#### RESULTS OF EXAMINATION

A good deal of expert evidence was adduced on the quality of the jams as found on bacteriological and chemical examination. Much was made by the defence of the fact that, on examination by the West Bengal Public Health Laboratory for any presence of lead, no reaction was obtained. Experts however stated that no tests for tin-contamination had been made, hence the results were purely negative. On the other hand, two deleterious substances had been found in the jam viz., gelatine and arsenic. There was a long discussion by the experts as to the quantity of arsenic that might be considered harmless, and Dr. A. K. Sen definitely stated that "there was every likelihood of harm being done to the human system by slow and continuous consumption of arsenic even in minute doses, if such arsenic is found in canned fruits or jams." The gelatine found on analysis was definitely held to be an adulterant. Dr. Sen stated that gelatine is made from hoofs and horns of cattle, and other substances which are animal matters derived from bodies of dead animals. "Though it is not a poisonous substance, it has been used as an adulterant for thickening the jam, and it is injurious in the sense that injury is being done to the rights of the consumer who is entitled to get pure jam".

#### SOME REMARKS OF THE MAGISTRATE

In delivering judgment, the learned Magistrate made some remarks which are worth quoting in full. He observed, inter alia, that

"The conduct of the defendants in resorting to re-cooking of the stuff (they were actually seen

boiling the original tins in hot water) and to misleading labers, made it clear that they were aware of the unwholesome and unsound character of the food, and of its unfitness for human consumption.

#### THE TRYING MAGISTRATE

Shri Nanda Kishore Ghose, Barrister-at-Law, who has been the Senior Municipal Magistrate, Calcutta, since 25th April, 1989, was born at Calcutta on 1st April, 1905. He graduated from the Scottish Church College with high Hons. in History in 1926 and then proceeded to England for higher studies. He obtained his LL. B. degree from the Leeds University in 1929. He was called to the Bar from Lincoln's Inn in June, 1929 having obtained a high first class each in Roman Law and Criminal Law & Procedure. Thereafter he practised as an Advocate of the Calcutta High Court.

On the recommendation of the Public Service Commission, Bengal, he was appointed Senior Municipal Magistrate, Calcutta by the Government on 22nd April, 1989. At the request of the Corporation, Government last year appointed him as an Additional Chief Presidency Magistrate, Calcutta, for transfer and recall of cases from the files of other Municipal Magistrates. His judgment in the celebrated case of Corporation vs. Sir Abdoola Haroon and Co., and others, in which he made an order of destruction of a huge quantity of jams and Marmalades, being the first case of its kind in India, was highly appreciated both by the Press and the Public. Calcutta High Court has recently affirmed the said order of destruction.

Mr. Ghose has been Senior Municipal Magistrate for over 10 years and has acquired extensive and valuable knowledge of the working of the Calcutta Municipal Act.

The Magistrate finally wound up the judgment with the following remarks:

"In view of the very clear and categorical opinions expressed by two of the highest experts in the country, viz., Dr. Ahmad, Health Officer of Calcutta, and Dr. A. K. Sen, Director of Public Health Laboratory, West Bengal, not only as to the contents of the original 8 lb. tins of jam and the small repacked tins of jam, but also in respect of tinned foodstuffs generally, and as many of the said tinned foodstuffs originally the property of the U. S. Army and subsequently sold by the Government of India

through is posals may still be in the market awaiting to be purchased and consumed by the unsuspecting public anxious to obtain cheap foodstuffs in these days of rising prices, and as most of the said tinned foodstuffs coming from that source would be considerably more than two years old, I consider it my duty in the interest of the safety of the health of my poor countrymen, to draw the attention of the Government of India and also of the Government of West Bengal to the immediate necessity, firstly, of sounding a note of warning to all not to purchase and/or consume any of the old tinned foodstuff which is more than two years old; secondly, to recall from the traders and merchants such stock which still remains undisposed of (if recessary, on payment of compensation)......and to destroy the same; thirdly, to prohibit reprocessing or re-recanning of the said foodstuffs under any circumstances; fourthly, to issue instructions to all Municipal and District Board Health Offices for seizure of all such old tinned foodstuffs;............fifthly, to take more vigorous action against breach of the Fruit Products Control order by unscrupulous merchants; and lastly, to consider what further legislation should be enacted to safeguard the general public against the risk involved in purchasing and consuming tinned foodstuffs."

HIGH COURT VIEWS JUDGMENT

Against this order of the Municipal Magistrate defendant firm moved the High Court and obtained a Rule, which was heard by Justices Ramaprosad Mukherjee and K. C. Dasgupta in their Revisionary jurisdiction. A great deal of argument and counter-argument centred round the point raised by the Advocate-General whether the order of the Municipal Magistrate was passed in an executive capacity, being mere ministerial or administrative directions, or in a judicial capacity as subordinate to the High Court. If the first view was correct, the High Court would have no jurisdiction to exercise its revisionary powers. It was accepted by Justice Mukerjee that the order of the Magistrate was in a judicial capacity, though Justice Dasgupta, in a separate judgment, differed on this point. Both the judges however agreed that "the petitioner has failed to show that there has been any error of law or miscarriage of justice committed by the magistrate". "With regard to the other question as the number of the specimens examined before the magistrate it cannot be argued that he must examine each and every particle of the foodstuff or each and every one of the tins..... The conclusion arrived at by him is the only one possible.

"The provisions contained in this part of the Calcutta Municipal Act are provisions for the safety of public health, and no risk can or should be taken in this matter. In the interest of public health and in view of the powers in the Act, the order passed by the Magistrate is unassailable. In this view the Rule must be discharged, and the order passed by the Magistrate affirmed."

And the second s

CONCLUSION

As the Calcutta Municipal Act of 1928 is soon going to be amended, the Government of West Bengal should be well-advised to utilise Mr. Ghose's services specially in connection with the revision and making upto-date—the provision of the chapter relating to Foods and Drugs which have become hopelessly inadequate to meet the present-day conditions to stop adulteration and sale of unwholesome food etc., the penal provisions, as also in introducing a simpler procedure to be applicable for trial of cases before the Municipal Magistrates other than those provided in the Criminal Procedure Code.

#### LETTERS TO THE EDITOR

[The Editor does not held himself responsible for the views expressed by the correspondent]

#### DISCIPLINE & TRUTH

To THE EDITOR "CALCUTTA MUNICIPAL GAZETTE"

Sir.—I would like to thank you for giving publicity through the medium of the Calcutta Municipal Gazette." to a well-conceived article, viz., "Corporation and Citizen" contributed by Shri Shyamadas Chatterji, which deserves appreciation. Articles like these should be encouraged by all possible means, with a view to putting the erring and the misguided of this country on to the path of discipline and truth.

It we are inclined to restore our Mother India to her past greatness, we must endeavour hard to cultivate our moral-force; and reading of such articles like the one under reference will help much. The morality has degenerated through ignorance and greed and requires to be elevated. Science has not achieved that power as yet. The teachings of Ancient India can only help the humanity to get out of this quagmire of immorality.—Yours, etc.

A. ROY -

Office of the 2nd Dy. Ex. Officer. The 7th Jan., 1950

#### USE OF STREPTOMYCIN

#### HARMFUL COMPARED TO PENICILIAN

The British Medical Journal has warned that use of the "wonder drug" streptomycin may have to be shandoned because "it is too dangerous."

The Journal says that the drug can have serious poisonous effects on the "eighth nerve," causing giddiness and desfiness and may even upset a patient's sense of balance permanently.

The leading article in the Journal says that streptomycinis much more harmful, and also less potent, than penicillin and would find no place in therapeutics but for the fact that it acts on many bacteria against which penicillin is powerless."

The drug is used frequently to combat tuberculosis but, in the majority of cases, the Journal states, patients become resistant to the drug and remain so indefinitely.

The second of th

#### Adulteration Of Foodstuff

[By A. R. Roy]

HE practice of adultering food-stuffs has become so rampant now-a-days that the matter can no longer be left in the existing state of things, and a strong public opinion should be roused against this nefarious practice which is doing much mischief to the welfare of society. It is not only anti-social but also ruinous. The unfortunate people of Bengal have not yet fully recovered from the attack of epidemic dropsy with heart and eye troubles due to use of adulterated mustard oil, while some have passed beyond all earthly troubles. A few hundred maunds of mustard oil and seeds were recently brought down from the U.P. on payment of prices abnormally high. The stuff, however, could not make an easy access to the markets of Bengal due to vigilance of the Health Department of the Calcuta Corporation who found the entire stuff to be adulterated with poisonous seeds of argemone. So they were seized.

When the matter was brought to light, it not only perturbed the manufacturers concerned, but the U.P. Government also. The U.P. Government, it is learnt, requested the Bengal Government to return the entire staff as they were. But already the matter had been placed before the Court of Law.

#### EVERY SORT OF PROTECTION

The Hindusthan Standard in her editorial on the 10th of November, 1949 commented on this big haul of adulterated mustard oil and concluded by saying: Protection to the public against adulteration should be given not only through law but also in other ways. The Government and other authorities concerned must give adequate publicity to the facts whenever the wrong-doers are caught or adulterated stocks are seized. For instance, they should tell the public who are the people involved in the adulteration of stocks that have been seized by them, whenever the guilt is legally established. Again they must let the public know the brands that have been found adulterated. Let them enlighten the public for instance as to the name of the particular brands that have been already found adulterated. To let the public know the names of the persons and brands involved in the nefarious practice of adulteration would be at once to ensure their protection and to punish the offenders deterrently.'

It may be said that the activities of the Health Department of the Corporation were so long limited to the petty vendors and shop-keepers. This time they have encountered big game. But how far they will be successful in bringing them to book, it is to be seen. The publication of the names of offenders punished under the law for food adulteration is in vogue. On perusal of the Calcutta Muni-

cipal Gazette dated the 20th August, 1949 it will be found that the following shop-keepers were prosecuted and fined by the court of law for selling adulterated mustard oil:—

| Name and place of business.     | Date.   | Fine. |
|---------------------------------|---------|-------|
| 1. Jawla Prosad Marwari, 87,    |         | Rs.   |
| Manicktala Main Road (Bag-      |         |       |
| mari Bazar)                     | 11-7-49 | 100   |
| 2. Amal Kumar Bose, 8/8, Belia- |         |       |
| what Main David                 |         | 25    |

#### GRAVITY OF MISDEEDS

It seems that no punishment is deterrent enough to bring these men to their senses. The promulgation of rigid laws and regulations has only helped these designing men to devise novel plans of cheating. Unless these men are brought to their senses: unless they are made to realise the gravity of their misdeeds, nothing will be of any avail. It may be pointed out in this connection, that a gentleman of this country went to England on a visit. On waking up in the morning, he was so much struck by finding the milk-vendors supplying the milk in every household and the housewife accepting the same without any question as to the purity of the milk, that he could not help questioning the milk-vendors, if there was any adulteration of milk here. The vendors looked in amazement in his face, and then replied in disgust, "Adulteration in milk. How one can ruin his nation for the gain of a few chips?" But alas such sense is entirely lacking in this country. The educated as well as the uneducated men of this country are now vying with one another the pursuit of their unabated greed. which is eating into the vitals of the nation.—not to speak of saving it from ruin. The vitality, the morality and the economy of the nation are all at stake. The greed for wealth has done much mischief to the nation. This illusion of greed must be dispelled, and the men should be brought to their sense,-the sense that helps men to discriminate right from wrong. Personal gain is not the only consideration to live in a society, there are obligations.- moral and social to look into the welfare of the neighbours as well.

#### To CREATE PUBLIC OPINION

In conclusion, it gives me pleasure to congratulate Dr. S. B. Nath, Food Inspector of the Corporation Health Department, whose vigilance was responsible for conducting the case so succesfully. The offenders,—both manufacturer and the sellers have been fined and the adulterated articles have been ordered to be destroyed. The report in this respect appeared in the *Hindusthan Standard* dated 4th January, 1950.

## Anti-Tuberculosis Work In India

LTHQUGH India had experts in anti-tuber-A sulcais work who were equal to or even better than those in many other countries their number at present was too small, said Dr. J. B. McDougall, Chief of the T.B. section of the World Health organization speaking at the Calcutta Medical Club some time ago.

Each province in India, Dr. McDougall added, had its own characteristics and should, therefore, be the subject of individual and intensive epidemiological study. For this a large band of workers was necessary.

He disclosed that there would be three teaching and training areas for this disease in India by the spring of 1950. They would be established with the assistance of the U.N. International Children's Emergency Fund and WHO. The former would supply the equipment for the areas and the latter the foreign personnel necessary for the completion of the scheme.

Dr. McDougall's visit to India and Ceylon was to prepare the ground for a WHO adviser on TB who will be attached to the Delhi HQ of the Regional Director of WHO in South-East Asia early next

#### A STATISTICAL ANALYSIS

. An interesting statistical analysis of the cases brought to the diagnostic clinic of Tuberculosis Relief Association for the year, 1948-49, was recently made public.

The analysis shows that of 911 cases attended up to 31st March, 1949 48 per cent were tuberculous 26 per cent were kept under observation and 26 per cent turned out to be non-tuberculous.

Of the tuberculous cases, 50.5 per cent had an incomne below Rs. 9 per capita per month and 28.6 had income below Rs. 19 per capita per month.

Distribution of cases according to occupation showed that 16.2 per cent comprised students, 22.6 per cent service-holders, 8.9 per cent housewives and 5.9 per cent factory workers. The rest came from the unemployed and unspecified elements.

Viewed in the light of age levels, the analysis showed that 47 per cent of the tuberculous cases comprised men in the third decade of life. The per centage fell sharply for age groups above 89.

In 48 per cent of the tuberculous cases the sputum was found to be positive. These were open cases capable of spreading infection.

Opening out of a semi-general ward for Bengalee patients at U. M. T. Sanatorium near Madanpalli, donation of a bed in the T. B. Ward of R. G. Kar hospital X-Ray examination of over 8,000 patients and laboratory examination of 2595 cases in their clinic up to October last have been some of the outstanding achievements.

The Association feels that it has yet to possess sanatorium and to start a Home Service organization.

The Association will shortly install an apparatus for fluorescent microscopy and it will then be first of its kind in this country to utilise this method of finding tubercle becilli in the sputum.

TUBERCULOSIS WORKERS' CONFERENCE

Rajkumari Amrit Kaur, India's Health Minister, inaugurating the 7th Tuberculosis Workers' Conference in Bombay towards the end of last year said that India needed Rs. 400 crores in addition to a running cost of Rs. 100 crores to fight tuberculosis in the country on a " requisite standard."

Even a modest tuberculosis scheme for India would mean at least 500,000 beds and 4,000 tuberculosis clinics, she added. To man these, at least 15,000 doctors, about 50,000 nurses and an equal number of health visitors would be required.

At present there were only about 8,000 beds, 120 clinics, 200 trained doctors and a very small number of nurses and health visitors in India.

About 150 delegates and workers from all over the country attended the session. Prominent among those at the morning session were Dr. Jivraj Mehta, Bombay's Minister for Public Works. Sir Purshotenidas Thakurdas, who is connected with the provincial Tuberculosis Association, and Sir Sri Ram.

Dr. Gilder reviewed the work done by the Government of Bombay for the control of tubtrculosis in the province and said the Government would soon open a T. B. hospital at Aundh, with over 100 beds and the latest equipment. The number of beds in this hospital would be doubled as soon as possible.

Moreover, all civil hospitals in the province had been asked to open special T. B. wards. The Government had prepared many schemes, but there was difficulty in finding adequate funds to implement them.

So far, over 200,000 persons have been tested in the province and over 60,000 "reactors" given BCG vaccinations.

Dr. A. C. Ukil, formerly principal of the Calcutta Medical College, who presided over the conference, urged the necessity of immediate legislation in the form of a Public Health Act for compulsory segregation of T. B. infected persons.

#### 500,000 DEATHS A YEAR

Rajkumari Amrit Kaur said that T.B. was responsible for about 500,000 deaths every year in India. Another 24m people in the country annually became victims of active tuberculosis.

Our Chief aim immediately should be to have simple housing just outside our cities and in selected villages where infective cases can be removed and given proper care and attention," she said. "The training of medical personnel must be speeded up. Mobile T. B. dispensaries can be of immense use for our villages. Compulsory medical examination of school children and university youths should be encouraged.

"In any scheme of tuberculosis control the the cases of the tuberculosis patient and his rehabilitation after recovery must form an important item. This has not received the attention it deserves in India.

"The Central Government in collaboration with international bodies, like the W. H. O. and U.N.I.C.E.F. have started a B.C.G. vaccination

programme in India. So far over 800,000 people have been tested and over 100,000 vaccinated.

"It is true that we are at present shout of funds to wage total war against tuberculosis. Meanwhile, the resources of all non-official bodies should be substantially augmented in order to enable them to discharge their duties.

The U.S.A. I understand, raised over \$18m last year by the sale of tuberculosis seans. There is no reason why India should not make a start and make a substantial collection for the use of the Tuberculosis Association."

(To be continued)

#### CALCUTTA NEWS & VIEWS

A FERE BROKE OUT IN CALCUTTA UNIVERSITY accounts officers' room on the first floor of Darbhanga Building at about 8 p.m. on Tuesday, the 14th March. Eight fire engines fought the outbreak and brought it under contests in about an hour. A large number of old files was destroyed.

The Vice-Chancellor, Shri C. C. Biswas, visited the place when the firemen were at work.

CO-OPERATION WITH THE POLICE in the maintenance of law and order and in increasing its efficiency was invited by Dr. B. C. Roy, Chief Minister, West Bengal, moving the Budget demand for police expenditure in the State Assembly on Monday, the 13th March.

Dr. Roy said that formerly the police came in for a great deal of criticism. They were then actuated by a bias against the police because they were utilized by the then imperialistic Government for curbing the urge of independence among the people. It was now wrong to think that the police, the administration and the public were different and antagonistic to one other.

He then added that better co-operation with the public was the keynote of every public servant. They should realize that a new era had come and they should work in co-operation with the public.

Dr. Rey sammed that every effort was being made to recruit better type of people:

Giving a picture of the increased duties of the police Dr. Roy said that after the end of the war and partition, blackmarketing and various types of anti-social activities increased. Then there were Communist activities followed by communal trouble: They had to fight all this. Then they had to guard their borders.

In order to meet the difficulties of inter-connection among the police stations already wireless communications between different police stations in the border areas and in other places in the State and the Head Quarter in Calcutta had been established.

In order to increase the efficiency of the police the Government had expanded the police force in its various branches. The women police force they had raised had been found very useful. They had increased the number of the armed police from two to five battalions. Considering the demand made on them during the last disturbances, this even was not sufficient.

The question of reorganization of the Calcutta police and its unification with the district force was engaging the attention of the Government, Dr. Roy stated.

OVERCROWDING IN SOME CALCUTTA COLLEGES has been a great problem to be solved by the Government.

A scheme for relieving such overcrowding and also for diverting students to technical courses was certified by West Bengal Education Minister, Rai Harendra Nath Chaudhury newsing the Landgets demand rungles 'Education' in the State Legislative Assembly on the 10th March last.

Overcrowding of Calcutta colleges, Shri Rai Chaudhury said, had been a matter of comment by the University Commission. In pursuance of a scheme to secure dispersul of students from overcrowded Calcutta colleges it was proposed to upgrade about 18 high schools and to improve and expand about 18 colleges in the different districts of West Bengal and also divert students to technical courses by setting up a polytechnic institution at Dhadka (Asonsol) a similar school at Sibpore, a technical school at Jalpaiguri and also by expanding the existing facilities for technical instruction at Moberley School at Hooghly and B.D.P.C. School at Krishnagar.

"To implement the scheme," the Hon. Minister said, "the Government of India have, at the instance of our Chief Minister, agreed to advance a loan of Rs. 20 lakha this year and Rs. 50 lakha in the next. The success of the dispersal scheme, however, will largely depend on the so-operation of the authorities of the Calcutta colleges to limit their enrolment as desired by the University Commission."

#### **VITAL STATISTICS**

For the City of Calcutta for the week ending
4th March, 1969.

City of Calcutta (Town and Suburbs.).

The total number of deaths registered during the week was 996 against 982 and 979 in the two preceding weeks and higher than the corresponding week of the last year by 272. The general death-rate of the week was 17.88 per mille.

#### Town (WARDS 1-27.)

The number of deaths registered during the week anding 4th March, 1950, was 825 against 785 and 834 in the two preceding weeks. There were 41 deaths from cholers, against 42 and 36 in the two preceding weeks. There were 132 deaths from small-pex during the week against 113 in the previous week. There was 1 death from influence against nil in the previous week. The mentality from fevers and bowel-complaints amounted to 59 and 161 respectively against 52 and 95 in the preceding week. The general death-rate of the week was 16.92 per mille per amount.

There were 21 imported deaths. Excluding these, the death-rate of the Town was 16,48.

These were 126 deaths from respiratory diseases against 111 in the previous week,

There were 47 deaths from tubercules against 29 in the previous week.

#### SUBURBS (WARDS 28-32.)

The number of deaths registered was 171 against 196 and 145 in the two preceding weeks. Of these, 10 were from coolers, 48 from small-pox, nil from influence, 9 from favors, 25 from bowel-complaints and 18 from respiratory diseases. The death-rate of the suburbs (or added areas) was 24.67 per mille.

There was mil imported death. Excluding these, the death-rate was 24.6%.

There were 7 deaths from tuberculosis against 9 is the previous week.

# CORPORATION BUDGET FOR 1950-51

The Revised Budget Estimates of the Corporation of Calcutta for 1949-50 and the Budget Estimates for 1950-51 were passed by Shri S. N. Ray. Administrative Officer, on Wednesday, the 22nd March, 1950.

The year 1950-51 opens with an estimated balance of Rs. 42,25,000 and closes with an estimated balance of Rs. 7,66,000. The receipts for the year are estimated at Rs. 5,13,11,000 and the expenditure at Rs. 5,47,70,000. The main heads of receipts are Consolidated Rate, Contributions from the Government, Taxes on trades and professions, Income from markets, slaughter houses and other Corporation institutions and Sale of water. The main heads of expenditure are Repair works, Precaution against epidemics, Contribution to Improvement Trust, Improvement of Primary Education, Repayment of Loans, and Establishments.

The year 1950-51 will have increased receipts in Consolidated Rates resulting from General Revaluation. But since the effect of the new assessment cannot be given before July, 1950, its full effect will be operative in the year 1951-52.

#### ADMINISTRATIVE OFFICER HOLDS PRESS CONFERENCE

ANOUNCING the Budget to a Press Conference Shri S. N. Ray, Administrative Officer, explained in the course of a statement the increase and decrease of every principal item of receipts and expenditure, and indicated the new works and schemes of the Corporation for the year.

The work of a scheme for the erection of a set of rapid gravity filters at Pulta, designed to make an addition of 18 million gallons of filtered water to the existing supply at a cost of Rs. 15,50,000, has been undertaken and is expected to be complete by December 1950.

Substantial repair work on the main thoroughfares has been done and continues to be done, and it is expected that all the roads of the city proper may be brought to a satisfactory condition within the current year.

Funds have been provided for the purchase of a mechanical sweeper, which has already been put to use by the Corporation of Bombay.

Already considerable improvement has been made in the matter of lighting the city streets. Provision has been made in the budget for installation of extric lights in thirty busy junctions where the volume of traffic requires better lighting.

The influx of population into the city has placed a great burden on the sanitary arrangements of the city. Reorganization of the Vaccine institute has doubled its lymph production. But, unfortunately, the public are very apathetic towards inoculation and vaccination.

The number of offenders against sanitary rules brought to book and prosecuted before the Municipal Magistrate has increased tremendously. However, the Administrative Officer points out that "the powers under the Municipal Act for dealing with offences against sanitary rules are extremely inadequate."

Children V

We publish below the full text of the Administrative Officer's statement on the Budget Estimates for 1950-51. The abstracts of the major items of Receipts and Expenditure for both the Budget Estimates for 1949-50 and 1950-51 are also included in this issue of the "Gazette."

# ADMINISTRATIVE OFFICER'S STATEMENT RECEIPTS FOR 1949-50

Dealing with Receipts, there is a decrease of Rs. 23,83,000 in Consolidated Rates. This is mainly due to the civil disturbances in the city which started about the middle of February right in the middle of the busiest period from the collection point of view, and partly due to non-realisation of arrears in respect of certain properties owned by the Government of India, regarding which disputes have not been settled. Actual collection in 1949-50 will be Rs. 2,81,50,000 against Rs. 2,48,25,000 in 1948-49 and Rs. 2,19,50,000 in 1947-48.

The decrease of Rs. 4,30,000 under exemption fees, rent of lands etc. is due to non-realisation of pre-partition dues from Government for the Tallah Open Space, smaller realisation of salami for the settlement of Kotrung brick-fields after settlement of civil suit and failure to supply adequate sewage water to fisheries on account of villagers cutting the Corporation bunds.

A decrease of Rs. 4,55,000 on account of Loans from Government for improvement of unfiltered water supply at Mullickghat and Watgunge Pumping Stations is due to the Corporation not drawing the full amount of loan granted until the machineries actually arrive and until further progress is made towards the scheme.

The decrease of Rs. 2,75,000 under receipts for service charges for the Council House is due to the fact that the dispute as to whether the Council House is situated within the Municipal limits or not still remains unsettled.

There is an increase of Rs. 2,00,000 on account of interest on surplus cash balances, an increase of Rs. 58,000 on account of sale of water: an increase of Rs. 34,000 in fines under the Municipal Act and other Acts. Miscellaneous receipts account for an increase of Rs. 4,91,000.

#### EXPENDITURE FOR 1949-50

Coming to the Expenditure side, it is seen that the main increase over the original estimates are:—

|                            |                |              |                | IVO.     |
|----------------------------|----------------|--------------|----------------|----------|
| Contribution to Hospitals  | s. Dispensarie | es, Alms Ho  | uses,          |          |
| ${ m etc.}$                | • • •          |              | • • •          | 1,15,000 |
| Dearness allowance to en   | mployees       | •••          | • • •          | 1,67,000 |
| Cost of food concessions   | to employee    | ···          |                | 3,98,000 |
| New works                  | •••            |              | • • •          | 1,19,000 |
| Cost of materials          | •••            | •••          |                | 2,91,000 |
| Miscellaneous items, e.g., | Filter bed     | working, pro | <del>)</del> - |          |
| caution against epidemic   | es, etc.       | •••          |                | 6,55,000 |
|                            | •              |              |                |          |

The increase in the cost of food concession to employees is due to adjustment of losses incurred in the previous year.

The increase in filter bed working is due to addition of fresh sand for replenishment of filter bed at Palta.

The following decreases are worthy of note:-

Rs. 4.47,000 in establishment is mainly due to the wages not paid to strikers during the strike period.

There is a decrease of Rs. 5,00,000 in costs of general revaluation of the city, but this is not a real saving, but only a deferment of expenditure which will be incurred next year.

#### RECEIPTS FOR 1950-51

Last year I stated that the Budget of 1950-51 would reflect increased Receipts resulting from General Revaluation and I expected that the new assessments would be effective from 1st of April 1950. During

the course of operations of revaluation work it was found that certain amendments to the Calcutta Municipal Act had also to be effected. These amendments are expected to be passed into law in the course of the current session of the Legislature. The unfortunate delay in enacting this piece of legislation will result in the postponement of the date of effect of the new assessments to 1st July, 1950, instead of the beginning of the new financial year. The same reason accounts for postponement of publication of assessments with the result that the hearing of objections will also be delayed. The nett effect of these postponements would be that only a small portion of the increased assessments will be reflected in the Receipt Side during 1950-51 and the full effect will be visible only in 1951-52.

Last year I also expected that the Budget for 1950-51 will include receipts from Octroi Duty. Unfortunately, however, the matter has not yet been finalised, and I have not included any receipts during the coming financial year on this account.

As a result of the new assessments made I now estimate that the receipts from Consolidated Rates will increase by about Rupees eighty lakes per annum, which is thirty per cent. on the figure of 1949-50. I would correct the general impression that revaluation would result in taxes increasing by 200 to 300 per cent. of present rates. I expect that after disposal of objections, this percentage will, on the average, work out at not more that 30 to 50 per cent. Only in cases where there has been gross under-valuation in the past that assessment may be increased two to three times the present figures.

The receipts from Consolidated Rates for 1950-51 are estimated to increase by Rs. 32,77,000. The increase will reflect only a portion of the new assessment under the general revaluation and will also net in the collections which will fall into arrears at the end of the current year owing to the civil disturbances.

An increase of Rs. 2,02,000 under the head 'Contribution from Government' is due to estimates for receipts for damage to roads by military vehicles, regarding which correspondence is still being carried on with the Government of India. The receipts from Trades and Professions, Licences and from markets and slaughter houses, etc. have almost reached the peak and are not expected to yield any substantial increases over the current year's figures.

#### EXPENDITURE FOR 1950-51

On the Expenditure side, establishment costs have increased by Rs. 13,89,000. Establishment costs of Primary School staff will increase by Rs. 1,10,000 included under the head 'Improvement of Primary Education'. Dearness allowance to employees will increase by a little over Rs. 1,00,000.

#### IMPROVEMENTS IN CITY SERVICES

Water Supply:—Last year I stated that a scheme was under consideration of Government for the sinking of experimental tube-wells under the Layne-Well system. This scheme was not finalised, but a very important scheme was taken up during the year to augment the filtered water supply of the city. The scheme is for the erection of a set of rapid gravity filters at Pulta, designed to make a nett addition of 18 million gallons of filtered water to the existing supply at a cost of Rs. 15½ lakhs. I am glad to say that two contracts have been let out and considerable progress in the work has already been made by the well known contractors, Messrs. Hindusthan Construction Co. Ltd., and the Jewel Filter Co., Ltd. The former contractor is in charge of civil works and the latter in charge of installation of necessary machinery. There is every reason to hope that the entire work will be complete by December, 1950. Thereafter the acute scarcity of filtered water, felt at present whenever the rate of filtration at Pulta filter beds diminishes owing to the appearance of algae, will no longer be a recurrent feature of Calcutta's water supply. During the year, restoration and repair of tube-wells taken over from Government have continued and at present 1250 tube-wells have been put in working order as against 800

during 1948-49. 2 out of 8 boilers in Pulta have been renovated during the last 2 years and 3 out of 4 boilers at Tallah. Provision is being made for renovation of three boilers at Pulta during the financial year.

Roads:—During the current year nearly 200 miles of road have been repaired or new surfaces put in. The damage done to the Calcutta roads during the war period had left much leeway to be made up. It is worthy of note that during the current year all repair works and new surfacing were done by permanent labour staff maintained by the Corporation and the staff of the Asphaltum Department. New surfacing was effected in Gas Street, Bhupendra Bose Avenue, Dinendra Street, R & Kar Road, portion of Upper Chitpur Road, portion of Upper Circular Road and the whole of Sarat Chandra Avenue, Lake Road and numerous side streets in southern Calcutta. For next year Rs. 20 lakhs have been provided for the improvement and repair of roads by Departmental labour. If the supply of materials continues to come in regularly and the present wagon position in the Railways continues, it is expected that all the roads in the City proper will be brought to a satisfactory condition. During the current year special attention was paid to main thoroughfares but next year the smaller roads will be taken up.

Conservancy:—Due to a careful distribution of conservancy lorries effected by the Chief Engineer, the clearing of the dustbins has shown considerable improvement in spite of the heavy influx of population in the City—During the coming year funds have been provided for the purchase of a mechanical sweeper as is being used by the Bombay Municipality—Funds have also been provided for further decentralisation of motor vehicles so that the vehicles allotted to each district will be located within the district thereby ensuring better maintenance and service and minimising the total distance run by virtue of smaller leads.

The small Incinerator plant at Goragacha has been repaired within the current year and is in function.

Survey has been completed by Messrs. Skoda Ltd. for repair to the new Incinerator plant.

The development of New Alipore Area having been completed by the Hindusthan Insurance Co. Ltd., resulting in better drainage of 800 acres of land, a new sewer along Tollygunge Road is under construction to carry the sewerage from the developed area through a syphon under the Tolly's Nullah. This sewer when completed will serve a large unsewered area between Protapaditya Road and Tolly's Nullah. Another well-known unsewered pocket in Nakuleswar Bhattacharjee Lane area is being sewered. Work of construction of Kalighat syphon which is long overdue has been taken up. The required number of inter locked steel sheet piles have arrived from England and the work will be completed in the course of the year.

Lighting —During the past two years a large number of gas lamp posts which were not functioning from the A.R.P. days were restored, damages to broken glass panes repaired, and lamps put in working In spite of changing the nipples to normal size the lighting from gas continues to be unsatisfactory on account of the pressure talling immediately after lighting hours and the pressure improves only after 9 p.m. I must admit that very recently the Oriental Gas company have started improving their supply and pressure, and it seems that they are now ready to co-operate with us in providing more satisfactory lighting for the City's streets. The capital cost of electrification is so prohibitive these days that under the present financial position of the Corporation changeover from gas to electrification even in a small way is not possible. So far as electric lighting is concerned, the extent of illumination in the main thoroughfares in Circular Road, Central Avenue, part of Barrackpore Trunk Road and Chowringhee has been restored to the normal 300 watt bulbs. This has considerably improved the lighting of these roads. In addition, provision has been made in the next year's budget for installation of electric lights in 30 busy junctions where the volume of traffic requires better lighting. The list was prepared in consultation with the lighting. lighting. ice Department.

Sanitation and Public Health:—The influx of population into this town is placing a burden on the sanitary arrangements, which is almost unbearable. But fortunately so far epidemics have not broken out in a virulent form. The menace of plague appears to be quiescent, but there is no room for complacency. Last year there was a reorganisation of the Vaccine Institute with the result that today we have doubled our lymph production which will satisfy our needs and may even enable us to supply small quantities to others. Unfortunately the public reaction to our appeals for protection by vaccination and inoculation improves only when an epidemic does break out and not before as should be the case. The powers under the present-Municipal Act for dealing with offences, against sanitary rules are extremely inadequate.

The number of offenders brought to book and prosecuted before the Municipal Magistrates has increased tremendously. But the amounts of the fines are small.

An offender does not mind being fined several times a year as he finds it more costly to carry out the sanitary improvements that the Corporation requires him to do under the law.

#### OTHER ACTIVITIES OF THE CORPORATION

Anti-corruption Department:—I was fortunate last year to get Sri Lokenath Ball to take up the duties of the Anti-corruption Officer. Excellent work has been done in his department; but even more important than the number of cases that he has caught, is the fact—that—his presence and vigilance has a most salutary effect on would-be wrongdoers. There is provision in the next year's Budget—for—giving—him extra assistance.

Building cases:—Mr. J. A. Parks, Chief Valuer of the Calcutta Improvement Trust, has been working from January, 1949, as Special Officer in a purely honorary capacity, and regularly hearing building cases twice a week at the Corporation. By his indefatigable energy he has succeeded in disposing of three thousand cases in one year including both plan and demolition cases. This figure compares with seventeen hundred cases disposed of during 1947-48.

Studge Scheme:—The Government of Bengal are removing during the dry weather 70 to 80 tons of sludge manure daily from Bantala and distributing it to agriculturists. This is a valuable manure much in demand, and we are extending the Municipal railway line up to Bantala for facility of transportation of the sludge. The Government of India are placing funds at our disposal to construct the railway line and bridges, and we are getting additional locomotives and refuse wagons. The extra wagons will carry refuse to Dhapa and load sludge on their return journey.

Loans and Advances:—During the current year we did not require to go up to Government for ways and means advance, nor shall we require to ask for such advance during the next year. Provision has been made for returning to Government another five lakhs of rupees next year in part repayment of their outstanding loans.

. Corporation Employees:—The history of the strike in October last is too recent for repetition. I am happy to say that the Industrial Tribunal set up have completed their task and their award is expected by the end of this month.

Election of Councillors:—Provision has been made next year for expenses in connection with the election of Councillors. After the full effect of the re-assessment comes into play and the Corporation produce some Revenue surplus, it will be in a position to raise loans and carry out overdue capital projects. For the last two years many urgent projects have had to be financed by advance from revenues to the Capital Fund. It is hoped that the new Councillors after election will be able to work unhampered by chronic financial difficulties.

The Consolidated Rate shall be levied at 21½ per cent. with an additional ½ per cent. as the Howrah Bridge tax, the dog tax at Rs. 5 per dog per annum under Section 173 (2) and the other taxes in accordance with the Calcutta Municipal Act, 1923.

The Licensed Warehouse fees will be levied at 10 per cent. (as in 1949-50) on the annual valuation of the Licensed Warehouses under Section 10 of the Licensed Warehouse and Fire Brigade Act, as amended in 1934.

(a) This Balance is estimated on the basis of Receipts and Payments only according to the Praliminary Account for 1948-49. The Cash balance does not include the amounts held for contractors' deposit, which are estimated at about Rs. 5 lakhs. They are included in the opening balance of Rs. 10 lakhs shown under "Suspense Heads Contra" above.

N. SARKAR, Chief Accountant, 22nd March, 1950. A. D. KHAN, Chief Executive Officer.

CHRONICLE & COMMENT

## CORPORATION COAT OF ARMS

The Coat of Arms, which the Corporation of Calcutta today uses, was received in 1896, eight years after it had been enacted by the Legislative Council of Bengal that a municipal Corporation be formed for the City of Calcutta. This Coat of Arms was presented by Sir Albert William Woods, Knight Commander of the Most Distinguished Order of Saint Michael and Saint George Garter Principal King of Arms on representation to the Duke of Norfolk, Privy Councillor to Queen Victoria, by the Chairman of the Corporation

Today, when India has ceased to be a dependency of Great Britain there is no justification for using the old ('oat of Arms. The attention of the Authorities, we learn, have already been drawn to this matter.

The warrant of issue of this Coat of Arms, duly signed and sealed by the Garter Principal King of Arms, are on public view at the Victoria Memorial Museum.

For the interest of our readers we reproduce below the full contents of the warrant. We, however, cannot give any coloured reproductions of the Coat of Arms and the seal, which may be seen reproduced in the "Ninth Anniversary Number" of the Gazette, published in November. 1933. The warrant is as follows:

TO ALL AND SINGULAR to whom these presents shall come Sir Albert William Woods. Knight Commander of the Most Distinguished Order of Saint Michael and Saint George Garter Principal King of Arms Sendeth Greeting WHEREAS the Chairman of the Municipal Corporation of the City of Calcutta hath represented unto The Most Noble Henry Duke of Norfolk Earl Marshal and Hereditary Marshal of England Knight of the Most Noble Order of the Garter and one of Her Majesty's Most Honourable Privy Council that in an Act passed by the Legislative Council of Bengal entitled No. 11 of 1888 and which Act received the Assent of Her Majesty's Viceroy and Governor General of India on the twelfth day of September one thousand eight hundred and eighty eight, it was enacted that the Municipal Corporation of the City of Calcutta should consist of a Chairman, Vice-Chairman and Seventy-five persons to be appointed or elected as thereinafter is provided and should by the name of "The Corporation of Calcutta" be a Body Corporate and have perpetual succession and a Common Seal and have power to hold land and by such name to sue and be sued: That the Chairman, Vice-Chairman and Members of the Municipal Corporation of the City of Calcutta are desirous that the Common Seal to be used by them in their corporate capacity should contain fit and proper Armorial Bearings under legal and unquestionable actionally. He therefore requirement on behalf of the said Chairman,

Vice-Chairman and Members the favour of His Grace's Warrant for my granting and assigning such Supporters, to the Arms of the said Corporation of Calcutta as may be proper to be borne by them and their successors on Seals, Shields, Banners or otherwise according to Laws of Arms AND INASMUCH as the said Earl Marshal did by Warrant under his hand and seal bearing date the Thirtieth day of June last authorise and direct me to grant and assign such Supporters accordingly KNOW YE THEREFORE that I the said Garter in pursuance of His Grace's Warrant and by virtue of the Letters Patent of my office to me granted do by these Presents grant and assign unto the Corporation of Calcutta the Supporters following that is to say on either side a Representation of an Adjutant Bird holding in the beak a serpent proper charged on the shoulder with an Eastern Crown or as the same are in the margin hereof more plainly depicted to be borne and used for ever hereafter by the Chairman, Vice-Chairman and Members of the Corporation of Calcutta and their successors on Seals, Shields, Banners or otherwise according to the Laws of Arms IN WITNESS whereof I the said Garter Principal King of Arms to these Presents subscribed my name and affixed the Seal of my office this twenty-eighth day of December in the Sixtieth year of the Reign of Our Sovereign Lady Victoria by the Grace of God of the United Kingdom of Great Britain and Ireland Queen Defender of the Faith etc., and in the year of Our Lord one thousand eight hundred and ninety-six."

# System Of Education In Calcutta

THE report of the University Education Commission presided over by Dr. Sarvapalli Radhakrishnan, was made public sometime ago. Discussing the unsatisfactory condition in which education is imparted today under the university the report has opined, that poorly paid teachers are furnishing the leaven to the movements, already in existence in Calcutta, for the overthrow of the present system of Government.

The total student population of Calcutta has assumed huge proportions, and there are also those who have left their studies and have not been able to obtain employment. A large number of poorly paid teachers of schools, colleges and universities finds it extremely difficult to scrape a livelihood on the meagre salaries, which even in normal times were insufficient as was noticed by the Calcutta University Commission thirty years ago, but now owing to inflation can hardly enable them to keep body and soul together.

#### EFFECT OF INACTION

Due to inaction during the last thirty years the organization and management of colleges have suffered. The total number of college students has risen from 3,827 in 1882 to 45,008 in 1947. In 1947 there were 2,41,794 students in the 20 universities of India taken together and of these nearly 20 per cent was the enrolment of the Calcutta University. The partition of the province, the report says, did not lead to any substantial decrease in the number of students, as in 1948 the University still had over 41,000 students, and to-day it has 74, affiliated colleges of which 36 are in the city of Calcutta. Five of the Calcutta colleges Vidyasagar, Surendranath, City, Bangabasi and Asutosh colleges have between them an enrolment of 30,492 students.

The building and equipment of these colleges the Commission says, " are far from satisfactory, for they have not been able to keep pace with the increase in the number of students. The total area on which some of these colleges are built does not

and so the said

extend to even one acre and the rooms cannot accommodate more than a fraction of the students on the rolls. Lectures in double and treble shifts, practical work in 30 to 40 sections mark the organisation of some of these institutions which have been carrying on without any help from the Government and have been mainly responsible for the higher education of the province. The condition in which many of the students of these colleges live is extremely unsatisfactory.

#### EQUIPMENT AND EFFICIENCY

There is extreme disparity, the report says, in equipment and efficiency and in the salaries of teachers due to the differences in origin of the institutions. As teachers doing the same kind of work get widely different scales of salary, there is a dangerous under-current of jealousy, suspicion and ill-will between teachers of Government colleges and those of private colleges.

The control of the University in enforcing standards of efficiency and reasonable scales of salary for the teaching profession in the colleges affiliated to it is in most cases merely nominal as it has no funds at its disposal to give effect to these proposals, and has no control over appointments either in Government or in other affiliated colleges. The Government of the country though it is now national, has as yet assumed no real responsibility to improve the conditions of the private colleges by helping them to acquire land, for building places of instruction, residences for students and hostels, and to raise the scales of salaries of teachers to the standard of even living wages.

Some of the colleges under the direct control of the Government, the Commission continues, have either declined in efficiency, or remained in a state of stagnation during the last 80 years since the Calcutta University Commission reported on their condition. This is partly due to the fact that neither the Principal nor the teachers are allowed much initiative which has to come from the cor-

The same of the sa

60th 1800h, 1969

responding Ministry (e.g. from the Ministry of Education for Arts, Science and Engineering colleges, or from the Ministry of Health in the case of Medical College). The Governing bodies of these institutions have little power and meet infrequently.

The position is further complicated by several other factors. The spirit of indiscipline among students which has been aroused by the leaders of the country in their struggle for freedom has now become a habit. This spirit of indiscipline once excited, is very difficult to put down in spite of the best efforts of the leaders and the Government.

There has been terrible overcrowding in the city due to war conditions, and influx of refugees from East Bengal. This has resulted in overcrowding in the Calcutta colleges and the University and there has been no improvement in the residential arrangements for the students.

#### Undemocratic Constitution

Further, the Commission says, the constitution of Calcutta University is still governed by the undemocratic Act of 1904. Eighty per cent of the members of the Senate, which is the supreme executive and policy-making body are nominated by the Chancellor on the advice of the Vice-Chancellor, though he is not bound to accept his suggestions, 20 per cent are elected by the Faculties and the Registered graduates. It has been alleged that nominations have not always represented the academic interests.

Post-graduate education in Arts and Science is under direct control of Calcutta University. Though the graduate study in the American sense was first organised in 1915 due to the initiative and foresight of the great educationist Sir Asutosh Mukherji and though the Calcutta University Commission gave unstinted support for the philosophy and organisation of such studies these university post-graduate colleges have not made satisfactory progress during the last 30 years.

After thus discussing the present condition, the Commission proceeds to recommend remedies for improvement. It says that the biggest problem of Calcutta is the congregation of the huge number of students and the consequent inefficiency in education. Therefore, steps should be taken to prevent students from coming to Calcutta from outside for purposes of study except where the subjects cannot be studied at an outside centre, to distribute the present number of students in many institutions instead of allowing them to collect in just a few. The total enrolment in any single institution The Commission says should not exceed 1,500. that the proportion of high school students proceeding to the University will be reduced if more appropriate and productive opportunities are provided.

As early as possible, as a first step, the Commission emphasizes, four Occupational Institutes should be started in different parts of Calcutta, which will provide for training of about 1,000 young men in each, in different vocations. The students who have completed their education at the present high school stage should be eligible for admission at these institutes.

If Intermediate education will no longer be a part of the University curriculum, the Commission says, for the majority of University students in Calcutta who are in the Intermediate classes represents Intermediate colleges have to be started and some of the present weak degree colleges may

have to content with training students only upto the intermediate stage. The situation of these intermediate colleges has got to be planned according to the needs of the different quarters of the city. An examination of the geographical locations of the 26 non-professional Calcutta colleges show that they have not been properly distributed. While there are numerous institutions in the neighbourhood of College Square or in South Calcutta, there are many congested localities without any educational facilities. This may not be a serious matter if communications between different parts are improved as they are likely to be, but in a city like Calcutta the student population should not be concentrated in a few areas.

#### University's Financial Difficulties

The Committee appointed by West Bengal Government to enquire into the financial difficulties of Calcutta University consequent upon shrinkage of its jurisdiction following Partition and to review its financial requirements for general development have unanimously recommended that a lump sum capital grant of Rs. 34 lakhs be made to the University by the Provincial Government.

Under the Committee's recommendation the extra annual recurring grant of Rs. 8 lakhs will be in addition to the annual recurring grant of about Rs. 15 lakhs which the University now receives from the provincial exchequer.

As regards the lump-sum capital grant of Rs. 34 lakhs, the Committee have proposed that the grant be spread over a period of 5 years, a part of which, the Committee have recommended, may be utilized for acquisition of land in Upper Circular Road for expansion of the Science College and erection of a new building for the College.

#### PRINCIPALS MEET PRIME MINISTER

Dr. B. C. Roy, the West Bengal Premier, and Rai H. N. Chaudhuri, Education Minister, recently met Principals of Calcutta colleges at Writers' Building and had discussion with them on overcrowding in these institutions and the resultant lowering of educational standards. Shri C. C. Biswas, Vice-Chancellor of the University, and Dr. D. M. Sen. Secretary, Education Department, were also present.

Dr. Roy said that concerted efforts should be made to reorganize Calcutta colleges, in accordance with their own resources, on the lines of the recommendations of the Radhakrishnan Commission to ensure a reasonable standard of efficiency. As a corollary it would be necessary to strengthen the mufassil colleges, particularly in regard to facilities for the teaching of science at the intermediate stage at any rate.

He had already sent some provisional suggestions to the Government of India, whose assistance might be necessary if the plan was put into effect immediately.

Dr. Roy emphasized that there was no question of curtailment of educational facilities. The whole object was the rational distribution of these facilities.

The West Bengal Government propose to proceed with their policy with regard to text-books for primary schools, it is learnt.

A fair number of District School Boards and a large number of primary school teachers have signified their approval of the Government decision in this regard.

## East Bengal Refugees Arriving In Calcutta

# Their Rehabilitation Is Given As Much Priority As War Emergency

R. B. C. Roy, Chief Minister, told West Bengal Assembly on the 10th March last that the State Government had directed that the programme of rehabilitation of East Bengal refugees should be given as much priority as war emergency and all the district authorities have been advised to take up the matter accordingly.

Dr. Roy was moving the Budget demand for grant of Rs. 4,99,16,000 under head, Expenditure on refugees and loans and advances to refugees.

Referring to the 'distressful' condition of many of the refugees who were coming in the present exodus from East Bengal, Dr. Roy said:

"I have met men, many prominent citizens from different parts of East Bengal who have arrived here only with one change of clothing and nothing else."

Dr. Roy assured that Government was fully alive to the need of giving help to those who were coming away now.

of the beginning 1948 latter part of 1947 it was clear that some people in Eastern Pakistan were not able to stay there and were coming over to West Bengal. The tide went up till the middle of 1948 when as many as 10,000 or 11,000 people were coming into West Bengal every day, with the result that by the end of 1948 West Bengal had between 13 to 15 lakhs of persons coming from East Pakistan,-men who were not only displaced from their homes and had lost their belongings but men who had no means of livelihood and who were entirely dependent on what help their relations or friends or the Government could give them.

#### ARRIVAL OF REFUGEES

Early last week some 3,000 East Bengal refugees were daily arriving in Calcutta by the three trains coming from Pakistan—the Assam Mail, the Chittagong Mail and the Barisal Express. In addition over 1,500 people were daily leaving trains either at Ranaghat or Bongaon from where they were taken to relief camps opened by the Government.

On arrival at Scaldah Station refugees were met by representatives of relief organizations working at the station, who assisted them in various ways.

Two officers of the Relief Department were constantly on duty at the station.

The arriving refugees were provided transport facilities by the Government or the relief organizations. They were also given, on request, certificates entitling them to draw one week's rations free of charge.

UNITED COUNCIL OF RELIEF AND WELFARE

The first meeting of the West Bengal Centre of United Council of Relief and Welfare was held on the 18th March last at Government House, Calcutta. The proceedings opened with a short speech by His Excellency Dr. Kailas Nath Katju, in which he explained the aims and objectives of this organization.

He said that the main purpose of this centre of the U. C. R. W. would be to co-ordinate the activities of all societies and social welfare organisa-

tions already engaged in or desirous of taking part in refugee relief work, and he was therefore particularly glad that representatives of so many social welfare organizations were co-operating with the centre.

Its main activity would be to work in the closest co-operation with the Government Relief and Rehabilitation department and to supplement Government measures and to supply the much needed personal touch in relief and welfare work by encouraging personal contacts between social welfare workers and refugees and more particularly women and children among refugees.

His Excellency Dr. Kailas Nath Katju, Governor of West Bengal, is the Chairman of the Council with Shrimati Phulrenu Guha, as Secretary. Shri H. C. Sen, Secretary to the Governor of West Bengal, is its Treasurer.

#### PANDIT NEHRU LEAVES CALCUTTA

Pandit Nehru left Calcutta for Delhi by a special plane on the 16th March last. Pandit Nehru had come to the city on a second visit to study problems arising of the happenings in East Bengal. He may visit Calcutta again in April.

The Prime Minister was accompanied by Shri S. Dutt, Additional Secretary, External Affairs Ministry, Shri P. C. Chowdhuri, Secretary to the Ministry of Information and Broadcasting, and Shri S. K. Dey, Rehabilitation Adviser, Government of India.

He was seen off at Dum Dum by His Excellency Dr. Katju, who also left for Delhi a few minutes later in a special plane to attend the Governors' conference there. Shri Sukumar Sen, Chief Secretary; Maj.-Gen. S. B. S. Roy, G.O.C., Bengal, Bihar and Orissa; Shri S. N. Ray, Administrative Officer of Calcutta Corporation; Shri S. Gupta, Inspector-General of Police; and Shri S. N. Chatterjee, Commissioner onf Police, Calcutta, were present.

#### REFUGEE HOUSING COLONY

Last week-end there was an appreciably increased influx of refugees.

The arrivals included a large number of middle-class families from town and village areas.

The refugee housing colony at Habra in 24-Parganas, about 80 miles from Calcutta, which Pandit Nehru visited on the 15th March last, is the largest of its kind under the auspices of the West Bengal Government. It is now nearing completion.

The scheme will provide accommodation for over 5,000 families, or about 80,000 people, and enable them as far as possible to earn a living.

The West Bengal Governor, Dr. Kailas Nath Katju, on the 16th March last appealed to the people of the State to contribute to the fund of the United Council of Relief and Welfare, Bengal centre, for the relief of those who had suffered during the recent disturbances both in West and East Bengal.

According to an estimate about 1,75,000 people arrived in Calcutte and elsewhere in the State, during the past just months.

# Anti-Tuberculosis Work In India—II

(Continued from Previous Issue)

TOP ranking tuberculosis experts from eight countries, including India, met in Copenhagen towards the end of July last to devise a long-term programme to combat the disease, which kills 4 million people every year.

Dr. Johannes Holm, Danish technical director of the campaign, who was elected Chairman of the meeting, said that the death rate from the disease was equivalent to one every seventh second. The meeting was told that in India alone half a million died from tuberculosis every year.

It was announced that the anti-tuberculosis campaign which is now being conducted in India, Ceylon, Austria, Czechoslovakia, Finland, Greece, Poland and Yugoslavia, would be extended to Malava and Siam.

The campaign already being waged in Morocco would be extended to Algeria and Tunis, while surveys were taking place in South America to determine the need there.

#### COMMONWEALTH TUBERCULOSIS CONFERENCE

A four-day Commonwealth Tuberculosis Conference, attended by nearly 1,200 specialists from 50 countries, opened in London in July last with dramatic accounts of the fight being waged in India. South Africa, Canada and the USA against civilization's greatest killing diseases. Dr. J. E. Perkins, Managing Director of the National Tuberculosis Association in the USA, contrasted the annual death-rate from the disease in his own country as 30 for every 100,000 with India's 500,000 deaths a year.

The Indian mortality rate, he said, was five times that of the USA. China was "as bad or worse, and it was estimated that the annual tuberculosis rate throughout Asia as a whole was 260 to 360 deaths per 100,000."

Dr. R. C. Adhikari of the Bengal Tuberculosis Association, spoke of India as "a vast population breeding and dying lavishly." If real prevention and elimination of the disease lay in treating and making every case bacilli-free, he said that mass inoculation of a preventive vaccine must be introduced at once. It was a great relief to learn that the Government of India, in spite of so many preoccupations, had seriously taken up the task of manufacturing, on a mass scale, the vaccine known as BCG.

#### HALF-A-MILLION DEATHS

The rapidly mounting incidence of tuberculosis, he said, was one of the most urgent problems in post-war India. As no complete survey had ever been made, the extent of the disease could not be definitely known. He confirmed the figure of at least 1m deaths a year quoted by Dr. Perkins and said that there were about 21m open cases of tuberculosis with bacilli in the sputum.

The rural people, he added, were the cinderella of India. Not to speak of any hospital facilities, the vast majority of villages did not even possess a qualified doctor. Denied all facilities of diagno-

and the second s

sis and treatment, the victims spread infection far and wide and died a slow death. "to fatten the earth which can no longer fatten them."

Modern standards of health demanded that for a city like Bombay, there should be a minimum of open air space of four acres per 1,000 population. But the actual space available was just half an acre. Surveys in limited areas of Madras and the Punjab between 8 and 11 years ago revealed a higher incidence of the disease among women than among men. Frequent pregnancy among half-famished women had been a potent cause of the disease.

Poverty, malnutrition insanitary living in exteremely congested houses, ingnorance and bad social customs, and the prevalence of malaria and diabetes had combined to bring about a high incidence of inhermiosis, Dr. Adhikari said. The problem was complicated by the dearth of proper medical facilities. Mass radiography was practically unknown. The total number of beds available for patients was about 7,000 while India required about 11m beds. The number of doctors qualified and with sufficient experience of tuberculosis work probably did not exceed 200 in the whole country. The State had so far made only meagre attempts to fight the disease. It did not bear any expense and the patient was always thrown on his own resources.

#### B. C. G. INOCULATION

In the preliminary discussions on the disease two of the specialists from India and Pakistan agreed that the only way to grapple with tuberculosis in Asian countries, where it is rampant, is to inoculate uninfected newly born babies with BCG, a method of vaccination developed in France 40 years ago by two doctors, after whom it is named.

Dr. R. C. Adhikari said that as the isolation of patients was impossible in areas of India like West Bengal the only remedy was to vaccinate babies, which they were beginning to do.

which they were beginning to do.

Dr. R. Shah of the King Edward Medical College, Lahore, agreed that tuberculosis should be tackled through babies. They had only about 400 beds for tuberculosis patients in Pakistan, he said.

He said he intended to inform the conference of their problem in the hope that they would get real practical help. The U. N. was sending teams to Pakistan to train personnel in B.C.G. vaccination and the World Health Organization was despatching a doctor to assist

It would take "years and years" to educate the population Dr. Shah said, but B.C.G. particularly suited tropical countries which were not advanced medically and it was cheap and easy to administer.

#### BENGAL TURBECULOSIS ASSOCIATION

Presiding at the last annual general meeting of the Bengal Tuberculosis Association held at Covernment House Dr. K. N. Katju, Governor of West Bengal, said that medical relief organisations

should draw up their schemes of work taking into consideration the local conditions and national income of the country. No useful purpose would be served, he said, by comparing what Governments of Western countries or America were providing for giving relief to patients suffering from tuberculosis because the national income of those countries was far greater than that of theirs, and money provided by them for relief works represented only a small fraction of their national income.

Dr. Katju suggested that this organisation should work in such a line which would relieve congestion of sick people in this city and in other towns. What was needed more, he said, for the Tuberculosis organization was the provision of cheap senatoria for patients and asked them to contact the Director of Health Services of West Bengal for construction of cheap sanatoria in the model of the proposed Government sanatoria at Panagarh.

He discouraged the tendency of sitting tight over the accumulated money and trying to get help from the Government and asked them to spend the money

#### CHOLERA & SMALLPOX IN THE CITY

Cholera and smallpox are raging in the city and are taking a heavy toll of life, our Health Officer informs us.

The public are requested to co-operate with our Health Department by having themselves and the members of their families (including servants) vaccinated and inoculated without delay. Those who are unable to call at the centres for this purpose should contact the nearest District Health Officer, when arrangements will be made for sending a doctor or vaccinator to their houses free of charge.

Cholera and smallpox are notifiable diseases. Private medical practitioners are, therefore, requested to inform the Health Department of any case of cholera and smallpox that may come to their notice. "Business Reply Cards" are available, free of charge, at the Chief Health Officer's (Statistical Department), Central Municipal Building, on request. Such assistance from medical practitioners will help the authorities to a great extent in taking timely preventive measures to combat the spread of the disease.

in opening more clinics. If after spending the entire sum it was found more money was needed for running those clinics they could then approach the Government failing which they should approach the public for help.

#### CALCUTTA NEEDS CLINICS

The Honorary Secretary of the Assocation Dr. P. K. Ghose in his annual report stated that training of home visitors and social workers, Post-Graduate training for the nurses, short course specialised training for three months of general practitioners and a full course Post-Graduate training for 1 year with a diploma of T.D.D. were in their programme. Standardization of technique of diagnosis and therapy tuberculosis surveys in selected fields would also be taken up at an early date.

Reviewing the present anti-tubercalosis measure available in the province Dr. Chose stated that there

should be more clinics. The number of clinics in Calcutta should be at least one in each of its \$2 wards and a clinic in each of the 6 districts. The clinics should be remodelled and provincialized. Financial help to patients and their families should follow-up, renabilitation and after care of patients should be taken up at an early date.

#### CALCUTTA NEWS & VIEWS

NEW TELEPHONE ADVISORY COMMITTEE at their first meeting held on Monday, the 20th March, at Telephone House, Shri Saraj Kumar Kanjilal, General Manager, Telephones, Calcutta District, presiding, decided that 5 per cent of available connections should be allotted to each of the following four categories:

(1) doctors and nurses, (2) hospitals and public institutions, (3) refugees, (4) public men.

They also decided that a total of 10 per cent of available connections would be given to subscribers whose telephones had been disconnected in 1942 for political reasons or whose telephones had been disconnected during the war to meet Government requirements; newspapers and press representatives; persons granted special reservation under the discretion of the Communications Ministry and the Post and Telegraph Department; and applicants who had been already allotted priority by the Telephone Advisory Committee prior to December 12 last.

STATE TRANSPORT SYSTEM IN THE CITY was the subject of discussion in the West Bengal Assembly on Monday, the 20th March, when the House considered the Budget demand for the Covernment road transport scheme.

Dr. B. C. Roy, Premier, stated that the State Transport Department were now running some 180 singledecked petrol buses in Calcutta. They had placed orders for 200 more. They were also running a double-decker diesel engine bus. Orders had also been placed for more such buses. They had already received 30 diesel-engine chassis, bodies of which would be built in their own garage.

About Rs. 23,00,000 had been provided in the budget for purchase of land and equipment for the garage. The Government was considering an extension of bus service to the refugee colony at Habra, about 25 miles from Calcutta.

THE WORK OF THE YMCA IN INDIA was praised by H. E. Dr. Kailas Nath Katju at the annual meeting of the Calcutta Association held on the 15th March last. Mr. W. R. Elliot presided. The Rev. R. W. Matheson delivered the anniversary address.

The Governor said that during the last half a century the organisation had served people of all communities in the country. Its activities were wide and far-reaching—from organizing sports and recreation to strengthening bonds of fellowship through social service and education.

Out of 1,377 members of Calcutta Y.M.C.A., in 1949, 253 were Christians, 903 Hindus, 191 Muslims, nine Sikhs and 24 Jews. There were 12 racial groups in its membership.

The cane weaving, the paper work and the household tailoring departments of the Association had trained 123 persons and employed 113, including a number of refugees.

MR. WILFRED BARRETT, Deputy Director of the Personnel Bureau, U.N. headquarters, New York, was in Calcutta early this month.

He is now on a round-the-world tour recruiting personnel for the staff of the U. N. secretariat in New York. He visited Delhi, Allahabad, Madras and Bombay, during the past few weeks and interviewed about 60 condidates including several girls.

# ORPORATION NOTICES

# Amondments of Provident Fund Rules

The Administrative Officer of the Corporation has accepted the following amendments of Rule 10A of the Provident Fund Rules:—

(1) In the eighth line of Rule 10A, the words 'Salary drawn by' should be replaced by the words 'monthly substantive pay or.'

#### Accommodation Boat For Survey Work

Undersigned will receive quotations in sealed covers up to 2 p.m. of 30th March for supply on monthly hire system, one good and stable accommodation boat with one Manjhi only for plying in Kulti series of rivers. Minimum length 40 ft., width 8 ft. Security Deposit of Rs. 50 in cash is to be deposited by the successful tendager.

A. N. BANERJEE,

Outfall Engineer.

Central Municipal Office,

The 20th March, 1950.

#### Lake Road Market

ALLOTMENT OF FISH STALLS

Applications with offers of initial rent are invited for permanent allotment of fish stalls in the Laks Road Market and will be received by the Acting Superintendent of the Market up to 31st March, 1950 on week days between the hours of 8 a.m. and 11 a.m.

S. GHOSHAL,

Secretary

Central Municipal Office, The 9th March, 1950.

#### NATIONAL VOLUNTEERS CORPS

The West Bengel National Volunteers Corps might sitimately become a permanent jestitution, as Dr. B. C. Rey, Chief Mininger of West Bengel, stated in the West Bengel Assembly on Tuesday, the Est March. We informed the House that 400 acres of land had been allotted in Kanchrapara for use of the Volunteer Corps. The Government hoped to be able to build a military school in that area after the present disturbed conditions had subsided.

After the passing of the West Bengal National Volunteer Force Act last year, the Border Defence Force and similar organizations had been taken under the National Volunteer Force. Since then a group of the Border Defence Force was trained for pioneer work. They had randered valuable service during the last Calcutta Corpora-

tion strike. The Government intended to raise a large number of pioneer force to help the public and the Government in different mays. The services of this force had simply them required by the Feed Department for loading and unloading of foodgrains in railway yards. The Levigation Department, which was finding it difficult to get trained workers, might require the services of this force. The organization would be called Agragami Dal.

AND THE RESERVE AND ADDRESS OF THE PARTY OF

Besides these two groups, the Government proposed to train a large number of volunteers from different district areas who might be called upon to help the police and the military whenever necessary. Provision had been made in the budget for the training of instructors of such a force and for a central executive to supervise the work of these departments.

#### COLLEGE STREET MARKET-Shops To Let

Applications with offers of initial rent for the privilege of occupying the undermen ioned stalls on rents noted against each, are invited and will be received by the Superintendent in the Market Office daily between the hours of 9 a.m. and 4 p.m.

- this connection.

  10. Customers are requested that if they suspect any weight used by any vendor of the market to be short, they will bring the matter immediately to the notice of the Superintendent when the weight will be duly tested in the Office and the vendor punished if it is found short.

  11. The public and the shop-keepers of the market are requested to assist in the mitigation of the beggar-nuisance by refraining from giving alms of any description within the market.
- 12. Customers are requested to examine the coins, obtained in the course of transaction, before they leave the shop. Ordinarily no action can be taken against the shop keeper if any spurious coin is alleged to have been detected after they leave the shop.

A. QASIM, BAR-AT-LAW Supdt., S. S. Hogg Market
